Accessing Web User Interfaces from Cloudera Data Science Workbench

This topic describes how to access user interfaces for applications such as Cloudera Manager, Hue, and so on, directly from the Cloudera Data Science Workbench UI .

Cloudera Manager, Hue, and the Spark History Server

Cloudera Data Science Workbench also gives you a way to access your CDH cluster's Cloudera Manager and Hue UIs from within the Cloudera Data Science Workbench application. Spark 2 provides a UI that displays information and logs for completed Spark applications, which is useful for debugging and performance monitoring.

This UI, called the History Server, runs on the CDH cluster, on a configurable host and port.

To access these applications, click the grid icon in the upper right hand corner of the Cloudera Data Science Workbench web application, and select the UI you want to visit from the dropdown.
