Running a query in Cloudera Data Warehouse.....	4
--	----------

Running a query in Cloudera Data Warehouse

You simply open Hue and submit your query. You do not need to manually start beeline or any other shell.

About this task

As a DW User, you open Hue from the VW options menu, and run the query, as shown in the following diagram.

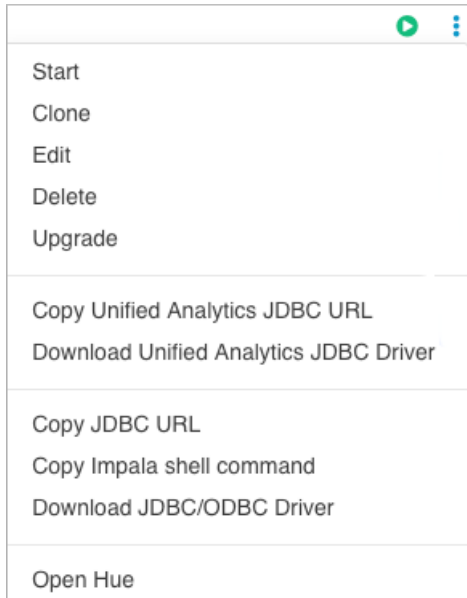

Before you begin

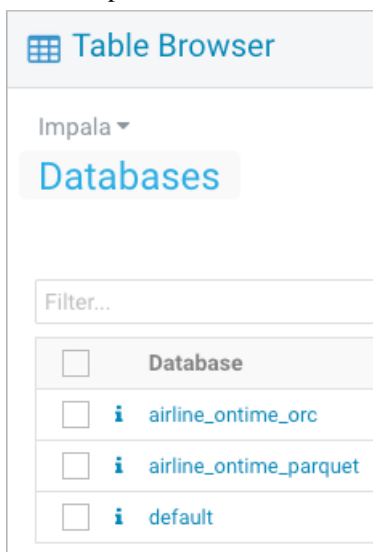

- As a DW user, you obtained permission to run SQL queries from the Env Admin, who added you to a Hadoop SQL policy.

Procedure

1. On the **Overview** page under Virtual Warehouses, click the options menu in the upper right corner, and select Open Hue.

2. Select a database.
For example, select database `airline_ontime_parquet`.

3. In Hue, enter a query.

```
SELECT dest, origin  
FROM flights  
GROUP BY dest, origin;
```

4. Click  to run the query.
