Java KeyStore KMS Properties in Cloudera Runtime 7.1.9

Role groups:

Key Management Server

Advanced**Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

For advanced use only. A string to be inserted into core-site.xml for this role only.

Related Name**Default Value****API Name**

core-site.xml_role_safety_valve

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml**Description**

For advanced use only. A string to be inserted into kms-acls.xml for this role only.

Related Name**Default Value****API Name**

kms-acls.xml_role_safety_valve

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml**Description**

For advanced use only. A string to be inserted into kms-site.xml for this role only.

Related Name**Default Value****API Name**

kms-site.xml_role_safety_valve

Required

false

Key Management Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KMS_role_env_safety_valve

Required

false

Key Management Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

`oom_heap_dump_dir`

Default Value

`/tmp`

API Name

`oom_heap_dump_dir`

Required

`false`

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

`true`

API Name

`oom_heap_dump_enabled`

Required

`true`

Kill When Out of Memory

Description

When set, a `SIGKILL` signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

`true`

API Name

`oom_sigkill_enabled`

Required

`true`

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml

Description

For advanced use only. A string to be inserted into ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ssl-server.xml_role_safety_valve

Required

false

Logs

Key Management Server Log Directory

Description

The log directory for log files of the role Key Management Server.

Related Name

log.dir

Default Value

/var/log/hadoop-kms

API Name

log_dir

Required

false

Key Management Server Logging Threshold

Description

The minimum log level for Key Management Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Key Management Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Key Management Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Key Management Server Max Log Size**Description**

The maximum size, in megabytes, per log file for Key Management Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kms_fd_thresholds

Required

false

Key Management Server Host Health Test**Description**

When computing the overall Key Management Server health, consider the host's health.

Related Name**Default Value**

true

API Name

kms_host_health_enabled

Required

false

Key Management Server Process Health Test**Description**

Enables the health test that the Key Management Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kms_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

*

API Name

hadoop_kms_proxyuser_hue_hosts

Required

false

Mapred Proxy User Groups

Description

Allows the mapred superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.mapred.groups

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_groups

Required

false

Mapred Proxy User Hosts

Description

Comma-delimited list of hosts where you want to allow the mapred user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.mapred.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_hosts

Required

false

Oozie Proxy User Groups

Description

Allows the oozie superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.oozie.groups

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_groups

Required

false

Oozie Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the oozie user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.oozie.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_hosts

Required

false

YARN Proxy User Groups**Description**

Allows the yarn superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.yarn.groups

Default Value

*

API Name

hadoop_kms_proxyuser_yarn_groups

Required

false

YARN Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the yarn user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.yarn.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_yarn_hosts

Required

false

JavaKeyStoreProvider Directory

Description

Directory of the keystore file kms.keystore used by JavaKeyStoreProvider that backs the KMS.

Related Name

hadoop.kms.key.provider.uri

Default Value

/var/lib/kms

API Name

hadoop_security_key_provider_dir

Required

true

KMS Accept Count

Description

The maximum queue length for incoming connection requests when all possible request processing threads are in use. Any requests received when the queue is full will be refused. This configuration is only supported in CDH 5.11 and up.

Related Name

hadoop.http.accept.queue.size

Default Value

500

API Name

kms_accept_count

Required

false

KMS Blacklist Users

Description

A comma-separated list of users (no spaces) for whom to disallow access to key material. These users can still fetch key metadata and create encrypted encryption keys, but are unable to do any other KMS operations. Typically, HDFS superusers will be specified here.

Related Name

kms_blacklist_users

Default Value**API Name**

kms_blacklist_users

Required

false

KMS Heap Size

Description

Maximum heap size of the KMS.

Related Name

kms_heap_size

Default Value

1 GiB

API Name

kms_heap_size

Required

true

Additional Java Configuration Options for KMS**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

Related Name

kms_java_opts

Default Value**API Name**

kms_java_opts

Required

false

KMS Max Threads**Description**

Maximum number of threads used to handle KMS requests.

Related Name

hadoop.http.max.threads

Default Value

250

API Name

kms_max_threads

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

KMS HTTP Port

Description

Port used by clients to interact with the KMS.

Related Name

hadoop.kms.http.port

Default Value

16000

API Name

kms_http_port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Key Management Server TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Key Management Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.server.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Key Management Server TLS/SSL Trust Store Password

Description

The password for the Key Management Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.server.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Key Management Server

Description

Encrypt communication between clients and Key Management Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

hadoop.kms.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Key Management Server TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Key Management Server is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Key Management Server TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Key Management Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Key Management Server TLS/SSL Server Keystore File Password**Description**

The password for the Key Management Server keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_core-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Flume Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Groups parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_flume_groups

Required

true

Suppress Parameter Validation: Flume Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_flume_hosts

Required

true

Suppress Parameter Validation: HDFS Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hdfs_groups

Required

true

Suppress Parameter Validation: HDFS Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hdfs_hosts

Required

true

Suppress Parameter Validation: Hive Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hive_groups

Required

true

Suppress Parameter Validation: Hive Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hive_hosts

Required

true

Suppress Parameter Validation: HTTP Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_http_groups

Required

true

Suppress Parameter Validation: HTTP Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_http_hosts

Required

true

Suppress Parameter Validation: HttpFS Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_httpfs_groups

Required

true

Suppress Parameter Validation: HttpFS Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_httpfs_hosts

Required

true

Suppress Parameter Validation: Hue Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_groups

Required

true

Suppress Parameter Validation: Hue Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_hosts

Required

true

Suppress Parameter Validation: Mapred Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_mapred_groups

Required

true

Suppress Parameter Validation: Mapred Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_mapred_hosts

Required

true

Suppress Parameter Validation: Oozie Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_groups

Required

true

Suppress Parameter Validation: Oozie Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_hosts

Required

true

Suppress Parameter Validation: YARN Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_groups

Required

true

Suppress Parameter Validation: YARN Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_hosts

Required

true

Suppress Parameter Validation: JavaKeyStoreProvider Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JavaKeyStoreProvider Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_security_key_provider_dir

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-acls.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: KMS Blacklist Users**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS Blacklist Users parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_blacklist_users

Required

true

Suppress Parameter Validation: KMS HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS HTTP Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_kms_http_port

Required

true

Suppress Parameter Validation: Additional Java Configuration Options for KMS**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Java Configuration Options for KMS parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_java_opts

Required

true

Suppress Parameter Validation: Key Management Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_role_env_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kms_kms_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_unexpected_exits

Required

true

Service-Wide**Advanced****Java KeyStore KMS Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

KMS_service_env_safety_valve

Required

false

System Group**Description**

The group that this service's processes should run as.

Related Name**Default Value**

kms

API Name

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Kafka Broker**Advanced****Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties****Description**

For advanced use only. A string to be inserted into kafka-monitoring.properties for this role only.

Related Name**Default Value****API Name**

kafka-monitoring.properties_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties**Description**

For advanced use only. A string to be inserted into kafka.properties for this role only.

Related Name**Default Value****API Name**

kafka.properties_role_safety_valve

Required

false

Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KAFKA_BROKER_role_env_safety_valve

Required

false

Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists,

it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-audit.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-audit.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-security.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-security.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

For advanced use only. A string to be inserted into ssl.properties for this role only.

Related Name**Default Value****API Name**

ssl.properties_role_safety_valve

Required

false

Logs**Kafka Broker Log Directory****Description**

The log directory for log files of the role Kafka Broker.

Related Name

`kafka.log4j.dir`**Default Value**`/var/log/kafka`**API Name**`log_dir`**Required**`false`**Kafka Broker Logging Threshold****Description**

The minimum log level for Kafka Broker logs

Related Name**Default Value**`INFO`**API Name**`log_threshold`**Required**`false`**Kafka Broker Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Kafka Broker logs. Typically used by log4j or logback.

Related Name**Default Value**`10`**API Name**`max_log_backup_index`**Required**`false`**Kafka Broker Max Log Size****Description**

The maximum size, in megabytes, per log file for Kafka Broker logs. Typically used by log4j or logback.

Related Name**Default Value**`200 MiB`**API Name**`max_log_size`**Required**`false`

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable Lagging Replicas Test

Description

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**

true

API Name

KAFKA-KAFKA_BROKER-7.1.0-LAGGING_REPLICAS_test_enable

Required

false

Enable Offline Directory Test

Description

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**

true

API Name

KAFKA-KAFKA_BROKER-7.1.0-OFFLINE_DIRECTORIES_test_enable

Required

false

Enable Offline Partitions Test**Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**

true

API Name

KAFKA-KAFKA_BROKER-7.1.0-OFFLINE_PARTITIONS_test_enable

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kafka_broker_fd_thresholds

Required

false

Kafka Broker Host Health Test**Description**

When computing the overall Kafka Broker health, consider the host's health.

Related Name**Default Value**

true

API Name

kafka_broker_host_health_enabled

Required

false

Kafka Broker Process Health Test**Description**

Enables the health test that the Kafka Broker's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

kafka_broker_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following

configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username: $ROLE_PARAM(otelcol_remote_write_user) password: '$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value**

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.

- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Advertised Host****Description**

If set, this is the hostname given out to producers, consumers, and other brokers to use in establishing connections. Never set this property at the group level; it should always be overridden on instance level.

Related Name

advertised.host.name

Default Value**API Name**

advertised.host.name

Required

false

Authenticate Zookeeper Connection**Description**

Enables authentication of SASL connections with zookeeper, if Kerberos authentication is enabled. It also allows a broker to set SASL ACL on zookeeper nodes, which locks these nodes down so that only a Kafka broker can modify it.

Related Name

authenticate.zookeeper.connection

Default Value

true

API Name

authenticate.zookeeper.connection

Required

false

Broker ID**Description**

ID uniquely identifying each broker. Never set this property at the group level; it should always be overridden on instance level.

Related Name

broker.id

Default Value**API Name**

broker.id

Required

false

Additional Broker Java Options**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

Related Name

broker_java_opts

Default Value

```
-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35
-XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -
XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC -Djava.awt.headless=true -
Djava.net.preferIPv4Stack=true -Dcom.sun.management.jmxremote.host=127.0.0.1 -
Dcom.sun.management.jmxremote.local.only=true -Djava.rmi.server.hostname=127.0.0.1
```

API Name

broker_java_opts

Required

false

Java Heap Size of Broker**Description**

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes. Kafka does not generally require setting large heap sizes. It is better to let the file system cache utilize the available memory.

Related Name

broker_max_heap_size

Default Value

1 GiB

API Name

broker_max_heap_size

Required

false

Kafka Broker Diagnostics Collection Timeout**Description**

The timeout in milliseconds to wait for diagnostics collection to complete.

Related Name**Default Value**

5 minute(s)

API Name

csd_role_diagnostics_timeout

Required

false

Graceful Shutdown Timeout**Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

2 minute(s)

API Name

graceful_stop_timeout

Required

false

Enable Authenticated Communication with the JMX Agent**Description**

Enables Authenticated Communication with the JMX Agent.

Related Name

jmx.auth.enabled

Default Value

false

API Name

jmx.auth.enabled

Required

false

Name of User with Read-Write Access to the JMX Agent**Description**

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user

Default Value

controlRole

API Name

jmx.control.user

Required

false

Password of user with read-write access to the JMX agent**Description**

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user.passwd

Default Value**API Name**

jmx.control.user.passwd

Required

false

Name of User with read-only access to the JMX Agent**Description**

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user

Default Value

monitorRole

API Name

jmx.monitor.user

Required

false

Password of User with read-only Access to the JMX agent

Description

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user.passwd

Default Value**API Name**

jmx.monitor.user.passwd

Required

false

Enable TLS client authentication for JMX port

Description

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the Kafka JMX TLS/SSL Server Trust Store file or the global trust store.

Related Name

jmx.ssl.client.auth.enabled

Default Value

false

API Name

jmx.ssl.client.auth.enabled

Required

false

Enable TLS/SSL for Kafka JMX

Description

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

jmx.ssl.enabled

Default Value

false

API Name

jmx.ssl.enabled

Required

false

HTTP Metric Report Host

Description

The host that the HTTP metric reporter binds to.

Related Name

kafka.http.metrics.host

Default Value

0.0.0.0

API Name

kafka.http.metrics.host

Required

false

Data Directories**Description**

A list of one or more directories in which Kafka data is stored.. Each new partition created is placed in the directory that currently has the least amount of partitions.. Each directory should be on its own separate drive.

Related Name

log.dirs

Default Value

/var/local/kafka/data

API Name

log.dirs

Required

true

Data Retention Size**Description**

The amount of data to retain in the log for each topic-partition. This is the limit per partition. Multiply it by the number of partitions to get the total amount of data retained for the topic. This property can take -1 as a value, which is interpreted as unlimited. If both log.retention.ms and log.retention.bytes are set, a segment is deleted when either limit is exceeded.

Related Name

log.retention.bytes

Default Value

-1 B

API Name

log.retention.bytes

Required

false

Data Retention Check Interval**Description**

The frequency, in milliseconds, that the log cleaner checks whether any log segment is eligible for deletion, per retention policies.

Related Name

log.retention.check.interval.ms

Default Value

5 minute(s)

API Name

log.retention.check.interval.ms

Required

false

Data Retention Time**Description**

The maximum time before a new log segment is rolled out. If both `log.retention.ms` and `log.retention.bytes` are set, a segment is deleted when either limit is exceeded. This property can take -1 as a value, which is interpreted as unlimited.

Related Name`log.retention.ms`**Default Value**

7 day(s)

API Name`log.retention.ms`**Required**

true

Data Log Roll Time**Description**

The maximum time before a new log segment is rolled out.

Related Name`log.roll.ms`**Default Value****API Name**`log.roll.ms`**Required**

false

Segment File Size**Description**

The log for a topic partition is stored as a directory of segment files. This setting controls the size to which a segment file can grow before a new segment is rolled over in the log. This value has to be larger than `message.max.bytes`.

Related Name`log.segment.bytes`**Default Value**

1 GiB

API Name`log.segment.bytes`**Required**

false

Maximum Connections per IP Address**Description**

Maximum number of connections allowed from each IP address.

Related Name

max.connections.per.ip

Default Value**API Name**

max.connections.per.ip

Required

false

Number of I/O Threads**Description**

The number of I/O threads that the server uses for executing requests. You should have at least as many threads as you have disks.

Related Name

num.io.threads

Default Value

8

API Name

num.io.threads

Required

false

Number of Network Threads**Description**

Number of threads that the server uses to handle incoming requests and outgoing responses.

Related Name

num.network.threads

Default Value

8

API Name

num.network.threads

Required

false

Number of Recovery Threads per data directory**Description**

Number of threads per data directory that the server uses for log recovery during startup and log flushing during shutdown. Increasing this value may improve broker startup performance if you have a high number of segments. The total number of recovery threads (number of threads per data dir * number of data dirs) should not exceed the number of CPU cores. The default value is 1.

Related Name

num.recovery.threads.per.data.dir

Default Value

1

API Name

num.recovery.threads.per.data.dir

Required

false

Number of Alter Log Dir Threads**Description**

Number of threads that the server uses to move data between log directories. The default value of this property is the same as the number of log directories.

Related Name

num.replica.alter.log.dirs.threads

Default Value**API Name**

num.replica.alter.log.dirs.threads

Required

false

Ranger Kafka Plugin Conf Path**Description**

Staging directory for Ranger Kafka Plugin Configuration. This should generally not be changed.

Related Name

ranger_kafka_plugin_conf_path

Default Value

/etc/ranger/kafka-plugin

API Name

ranger_kafka_plugin_conf_path

Required

true

Ranger Kafka Plugin Audit Hdfs Spool Directory Path**Description**

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/kafka/audit/hdfs/spool

API Name

ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Ranger Kafka Plugin Policy Cache Directory Path**Description**

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.kafka.policy.cache.dir

Default Value

/var/lib/ranger/kafka/policy-cache

API Name

ranger_kafka_plugin_policy_cache_directory

Required

true

Ranger Kafka Plugin Audit Solr Spool Directory Path**Description**

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/kafka/audit/solr/spool

API Name

ranger_kafka_plugin_solr_audit_spool_directory

Required

true

Ranger Plugin Trusted Proxy IP Address**Description**

Accepts a list of IP addresses of proxy servers for trusting.

Related Name

ranger.plugin.kafka.trusted.proxy.ipaddress

Default Value**API Name**

ranger_plugin_trusted_proxy_ipaddress

Required

false

Ranger Plugin Use X-Forwarded For IP Address**Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.kafka.use.x-forwarded-for.ipaddress

Default Value

false

API Name

ranger_plugin_use_x_forwarded_for_ipaddress

Required

false

Inter Broker Protocol**Description**

Protocol to be used for inter-broker communication. INFERRED uses the same protocol that is configured for external clients.

Related Name

security.inter.broker.protocol

Default Value

INFERRED

API Name

security.inter.broker.protocol

Required

false

Socket receive buffer size.**Description**

The SO_RCVBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.

Related Name

socket.receive.buffer.bytes

Default Value

100 KiB

API Name

socket.receive.buffer.bytes

Required

false

Socket receive buffer size.**Description**

The maximum number of bytes in a socket request

Related Name

socket.request.max.bytes

Default Value

100 MiB

API Name

socket.request.max.bytes

Required

false

Socket send buffer size.**Description**

The SO_SNDBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.

Related Name

socket.send.buffer.bytes

Default Value

100 KiB

API Name

socket.send.buffer.bytes

Required

false

SSL Client Authentication**Description**

Client authentication mode for SSL connections. This configuration has three valid values, "required", "requested" and "none". If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

Related Name

ssl.client.auth

Default Value

none

API Name

ssl.client.auth

Required

false

Enable Zookeeper ACL**Description**

Enables brokers to set SASL ACL on zookeeper nodes if `authenticate.zookeeper.connection` is enabled.

Related Name

zookeeper.set.acl

Default Value

true

API Name

zookeeper.set.acl

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Advertised Port

Description

The port to give out to producers, consumers, and other brokers to use in establishing connections. This only needs to be set if this port is different from the port the server should bind to.

Related Name

advertised.port

Default Value**API Name**

advertised.port

Required

false

JMX Port

Description

Port for JMX.

Related Name

jmx_port

Default Value

9393

API Name

jmx_port

Required

false

HTTP Metric Report Port

Description

The port that the HTTP metric reporter listens on.

Related Name

kafka.http.metrics.port

Default Value

24042

API Name

kafka.http.metrics.port

Required

false

TCP Port

Description

Kafka broker port.

Related Name

port

Default Value

9092

API Name

port

Required

false

TLS/SSL Port**Description**

Kafka broker secure port.

Related Name

ssl_port

Default Value

9093

API Name

ssl_port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Kafka Broker TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Broker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Kafka Broker TLS/SSL Trust Store Password**Description**

The password for the Kafka Broker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password.generator

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Kafka Broker**Description**

Encrypt communication between clients and Kafka Broker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Kafka Broker TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Kafka Broker is acting as a TLS/SSL server.

Related Name

ssl.key.password.generator

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Kafka Broker TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Broker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Kafka Broker TLS/SSL Server Keystore File Password

Description

The password for the Kafka Broker keystore file.

Related Name

ssl.keystore.password.generator

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Parameter Validation: Advertised Host

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_advertised.host.name

Required

true

Suppress Parameter Validation: Advertised Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_advertised.port

Required

true

Suppress Parameter Validation: Broker ID

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Broker ID parameter.

Related Name

Default Value

false

API Name

role_config_suppression_broker.id

Required

true

Suppress Parameter Validation: Additional Broker Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Broker Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_java_opts

Required

true

Suppress Parameter Validation: Java Heap Size of Broker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Broker parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_max_heap_size

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user

Required

true

Suppress Parameter Validation: Password of user with read-write access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user.passwd

Required

true

Suppress Parameter Validation: Name of User with read-only access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.monitor.user

Required

true

Suppress Parameter Validation: Password of User with read-only Access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.monitor.user.passwd

Required

true

Suppress Parameter Validation: JMX Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_jmx_port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties parameter.

Related Name

Default Value

false

API Name

role_config_suppression_kafka-monitoring.properties_role_safety_valve

Required

true

Suppress Parameter Validation: HTTP Metric Report Host

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Host parameter.

Related Name

Default Value

false

API Name

role_config_suppression_kafka.http.metrics.host

Required

true

Suppress Parameter Validation: HTTP Metric Report Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_kafka.http.metrics.port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_broker_role_env_safety_valve

Required

true

Suppress Parameter Validation: Data Directories**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Data Directories parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log.dirs

Required

true

Suppress Parameter Validation: Segment File Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Segment File Size parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log.segment.bytes

Required

true

Suppress Parameter Validation: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Number of I/O Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of I/O Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.io.threads

Required

true

Suppress Parameter Validation: Number of Network Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Network Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.network.threads

Required

true

Suppress Parameter Validation: Number of Recovery Threads per data directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Recovery Threads per data directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.recovery.threads.per.data.dir

Required

true

Suppress Parameter Validation: Number of Alter Log Dir Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Alter Log Dir Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.replica.alter.log.dirs.threads

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: TCP Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the TCP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-audit.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-security.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_conf_path

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Audit Hdfs Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Hdfs Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Policy Cache Directory Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_policy_cache_directory

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Audit Solr Spool Directory Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_solr_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: TLS/SSL Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_port

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Lagging Replicas Test

Description

Whether to suppress the results of the Lagging Replicas Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.1.0-lagging_replicas

Required

true

Suppress Health Test: Offline Directory Test

Description

Whether to suppress the results of the Offline Directory Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.1.0-offline_directories

Required

true

Suppress Health Test: Offline Partitions Test**Description**

Whether to suppress the results of the Offline Partitions Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka-kafka_broker-7.1.0-offline_partitions

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_broker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_unexpected_exits

Required

true

Kafka Connect**Advanced****Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties****Description**

For advanced use only. A string to be inserted into connect-distributed.properties for this role only.

Related Name**Default Value****API Name**

connect-distributed.properties_role_safety_valve

Required

false

Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value

API Name

KAFKA_CONNECT_role_env_safety_valve

Required

false

Kafka Connect Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name

Default Value

API Name

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Kafka Connect Log Directory****Description**

The log directory for log files of the role Kafka Connect.

Related Name

kafka_connect.log4j.dir

Default Value

```
/var/log/kafka
```

API Name

```
log_dir
```

Required

```
false
```

Kafka Connect Logging Threshold**Description**

The minimum log level for Kafka Connect logs

Related Name**Default Value**

```
INFO
```

API Name

```
log_threshold
```

Required

```
false
```

Kafka Connect Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Kafka Connect logs. Typically used by log4j or logback.

Related Name**Default Value**

```
10
```

API Name

```
max_log_backup_index
```

Required

```
false
```

Kafka Connect Max Log Size**Description**

The maximum size, in megabytes, per log file for Kafka Connect logs. Typically used by log4j or logback.

Related Name**Default Value**

```
200 MiB
```

API Name

```
max_log_size
```

Required

```
false
```

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kafka_connect_fd_thresholds

Required

false

Kafka Connect Host Health Test

Description

When computing the overall Kafka Connect health, consider the host's health.

Related Name**Default Value**

true

API Name

kafka_connect_host_health_enabled

Required

false

Kafka Connect Process Health Test

Description

Enables the health test that the Kafka Connect's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kafka_connect_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.

- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.

- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Broker List for Kafka Connect

Description

Comma-separated list of IP:port (or hostname:port) pairs of brokers on source cluster for Kafka Connect to connect. This should be more than one, for high availability.

Related Name

bootstrap.servers

Default Value**API Name**

bootstrap.servers

Required

true

config.storage.replication.factor

Description

Default replication factor of Kafka Connect's config storage topic

Related Name

config.storage.replication.factor

Default Value

1

API Name

config.storage.replication.factor

Required

true

config.storage.topic

Description

Topic to use for storing connector and task configurations; This should be a single partition, highly replicated and compacted topic. Kafka Connect will attempt to create the topic automatically when needed before starting Kafka Connect.

Related Name

config.storage.topic

Default Value

connect-configs

API Name

config.storage.topic

Required

true

connect.log4j.connector.context

Description

The ``%X{connector.context}`` parameter in the layout includes connector-specific and task-specific information in the log message, where appropriate. This makes it easier to identify those log messages that apply to a specific connector

Related Name

`connector.context`**Default Value****API Name**`connector.context`**Required**`false`**group.id****Description**

Unique name for the cluster, used in forming the Connect cluster group. Note that this must not conflict with consumer group IDs.

Related Name`group.id`**Default Value**`connect-cluster`**API Name**`group.id`**Required**`true`**Kafka Connect Configuration Directory****Description**

Directory with all configurations for Kafka Connect daemons

Related Name`kafka.connect.conf.directory`**Default Value**`$CONF_DIR`**API Name**`kafka.connect.conf.directory`**Required**`true`**Java Home Path Override****Description**

Java Home Path Override for Kafka Connect

Related Name`kafka.connect.jdk.home`**Default Value****API Name**`kafka.connect.jdk.home`**Required**`false`

KAFKA_HEAP_OPTS**Description**

Memory heap params while using Kafka Connect.

Related Name

KAFKA_HEAP_OPTS

Default Value

-Xms256M -Xmx2G

API Name

KAFKA_HEAP_OPTS

Required

false

key.converter**Description**

The converters specify the format of data in Kafka and how to translate it into Connect data. Every Connect user will need to configure these based on the format they want their data in when loaded from or stored into Kafka

Related Name

key.converter

Default Value

org.apache.kafka.connect.json.JsonConverter

API Name

key.converter

Required

true

key.converter.schemas.enable**Description**

Converter-specific settings can be passed in by prefixing the Converter's setting with the converter we want to apply it to

Related Name

key.converter.schemas.enable

Default Value

true

API Name

key.converter.schemas.enable

Required

true

metrics.jetty.server.port**Description**

Jetty Metrics port to expose JMX Json

Related Name

metrics.jetty.server.port

Default Value

38084

API Name

metrics.jetty.server.port

Required

true

offset.flush.interval.ms**Description**

Offset flush interval in ms.

Related Name

offset.flush.interval.ms

Default Value

1 minute(s)

API Name

offset.flush.interval.ms

Required

true

offset.storage.replication.factor**Description**

Default replication factor of Kafka Connect's offset storage topic

Related Name

offset.storage.replication.factor

Default Value

1

API Name

offset.storage.replication.factor

Required

true

offset.storage.topic**Description**

Topic to use for storing offsets. Kafka Connect will attempt to create the topic automatically when needed, but you can always manually create before starting Kafka Connect.

Related Name

offset.storage.topic

Default Value

connect-offsets

API Name

offset.storage.topic

Required

true

plugin.path**Description**

Path to directories immediately containing jars with plugins and their dependencies, uber-jars with plugins and their dependencies and classes of plugins and their dependencies

Related Name

plugin.path

Default Value

/var/lib/kafka

API Name

plugin.path

Required

false

rest.extension.classes**Description**

JMS Json Rest Extension class

Related Name

rest.extension.classes

Default Value

com.cloudera.dim.kafka.metrics.JmxJsonMetricsRestExtension

API Name

rest.extension.classes

Required

true

kafka.connect.rest.port**Description**

Kafka Connect rest port

Related Name

rest.port

Default Value

38083

API Name

rest.port

Required

true

kafka.connect.secure.rest.port**Description**

Kafka Connect secure rest port

Related Name

secure.rest.port

Default Value

38085

API Name

secure.rest.port

Required

true

SSL Client Authentication**Description**

Client authentication mode for SSL connections. If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

Related Name

ssl.client.auth

Default Value

none

API Name

ssl.client.auth

Required

false

status.storage.replication.factor**Description**

Default replication factor of Kafka Connect's status storage topic

Related Name

status.storage.replication.factor

Default Value

1

API Name

status.storage.replication.factor

Required

true

status.storage.topic**Description**

Topic to use for storing statuses. Kafka Connect will attempt to create the topic automatically when needed, but you can always manually create before starting Kafka Connect.

Related Name

status.storage.topic

Default Value

connect-status

API Name

status.storage.topic

Required

true

value.converter**Description**

The converters specify the format of data in Kafka and how to translate it into Connect data. Every Connect user will need to configure these based on the format they want their data in when loaded from or stored into Kafka

Related Name

value.converter

Default Value

org.apache.kafka.connect.json.JsonConverter

API Name

value.converter

Required

true

value.converter.schemas.enable**Description**

Converter-specific settings can be passed in by prefixing the Converter's setting with the converter we want to apply it to

Related Name

value.converter.schemas.enable

Default Value

true

API Name

value.converter.schemas.enable

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Kafka Connect TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Connect might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Kafka Connect TLS/SSL Trust Store Password**Description**

The password for the Kafka Connect TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password.generator

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Kafka Connect**Description**

Encrypt communication between clients and Kafka Connect using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Kafka Connect TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Kafka Connect is acting as a TLS/SSL server.

Related Name

ssl.key.password.generator

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Kafka Connect TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Connect is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Kafka Connect TLS/SSL Server Keystore File Password

Description

The password for the Kafka Connect keystore file.

Related Name

ssl.keystore.password.generator

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Parameter Validation: Broker List for Kafka Connect****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Broker List for Kafka Connect parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_bootstrap.servers

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: config.storage.replication.factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the config.storage.replication.factor parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_config.storage.replication.factor

Required

true

Suppress Parameter Validation: config.storage.topic**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the config.storage.topic parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_config.storage.topic

Required

true

Suppress Parameter Validation: Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_connect-distributed.properties_role_safety_valve

Required

true

Suppress Parameter Validation: connect.log4j.connector.context**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the connect.log4j.connector.context parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_connector.context

Required

true

Suppress Parameter Validation: group.id**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the group.id parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_group.id

Required

true

Suppress Parameter Validation: Kafka Connect Configuration Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Configuration Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.connect.conf.directory

Required

true

Suppress Parameter Validation: Java Home Path Override**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.connect.jdk.home

Required

true

Suppress Parameter Validation: Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_connect_role_env_safety_valve

Required

true

Suppress Parameter Validation: KAFKA_HEAP_OPTS**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KAFKA_HEAP_OPTS parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_heap_opts

Required

true

Suppress Parameter Validation: key.converter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the key.converter parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_key.converter`**Required**`true`**Suppress Parameter Validation: Kafka Connect Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Parameter Validation: Kafka Connect Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Log Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Parameter Validation: metrics.jetty.server.port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the metrics.jetty.server.port parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_metrics.jetty.server.port`**Required**`true`**Suppress Parameter Validation: offset.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the offset.storage.replication.factor parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.replication.factor

Required

true

Suppress Parameter Validation: offset.storage.topic**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the offset.storage.topic parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.topic

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: plugin.path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the plugin.path parameter.

Related Name

Default Value

false

API Name

role_config_suppression_plugin.path

Required

true

Suppress Parameter Validation: rest.extension.classes**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the rest.extension.classes parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.extension.classes

Required

true

Suppress Parameter Validation: kafka.connect.rest.port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the kafka.connect.rest.port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.port

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: kafka.connect.secure.rest.port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the kafka.connect.secure.rest.port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_secure.rest.port

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: status.storage.replication.factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the status.storage.replication.factor parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.replication.factor

Required

true

Suppress Parameter Validation: status.storage.topic**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the status.storage.topic parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.topic

Required

true

Suppress Parameter Validation: value.converter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the value.converter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_value.converter

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_unexpected_exits

Required

true

Kafka MirrorMaker

Advanced

Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KAFKA_MIRROR_MAKER_role_env_safety_valve

Required

false

Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties**Description**

For advanced use only. A string to be inserted into mirror_maker_consumers.properties for this role only.

Related Name**Default Value****API Name**

mirror_maker_consumers.properties_role_safety_valve

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

For advanced use only. A string to be inserted into mirror_maker_producers.properties for this role only.

Related Name**Default Value****API Name**

mirror_maker_producers.properties_role_safety_valve

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties**Description**

For advanced use only. A string to be inserted into ssl_client.properties for this role only.

Related Name**Default Value****API Name**

ssl_client.properties_role_safety_valve

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties**Description**

For advanced use only. A string to be inserted into ssl_server.properties for this role only.

Related Name

Default Value**API Name**

ssl_server.properties_role_safety_valve

Required

false

Logs**Kafka MirrorMaker Log Directory****Description**

The log directory for log files of the role Kafka MirrorMaker.

Related Name

kafka_mirrormaker.log4j.dir

Default Value

/var/log/kafka

API Name

log_dir

Required

false

Kafka MirrorMaker Logging Threshold**Description**

The minimum log level for Kafka MirrorMaker logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Kafka MirrorMaker Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Kafka MirrorMaker logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Kafka MirrorMaker Max Log Size**Description**

The maximum size, in megabytes, per log file for Kafka MirrorMaker logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kafka_mirror_maker_fd_thresholds

Required

false

Kafka MirrorMaker Host Health Test**Description**

When computing the overall Kafka MirrorMaker health, consider the host's health.

Related Name**Default Value**

true

API Name

kafka_mirror_maker_host_health_enabled

Required

false

Kafka MirrorMaker Process Health Test**Description**

Enables the health test that the Kafka MirrorMaker's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kafka_mirror_maker_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Abort on Send Failure

Description

Stop the entire mirror maker when a send failure occurs.

Related Name

abort.on.send.failure

Default Value

true

API Name

abort.on.send.failure

Required

false

Producer Batch Size

Description

This configuration controls the batch size in bytes. The producer will attempt to batch records together into fewer requests whenever multiple records are being sent to the same partition. This helps performance on both the client and the server.

Related Name

batch.size

Default Value

16 KiB

API Name

batch.size

Required

false

Destination Broker List

Description

Comma-separated list of IP:port (or hostname:port) pairs of brokers on destination cluster. This should be more than one, for high availability, but there's no need to list all brokers.

Related Name

bootstrap.servers

Default Value**API Name**

bootstrap.servers

Required

true

Producer Buffer Memory**Description**

The total bytes of memory the producer can use to buffer records waiting to be sent to the server.

Related Name

buffer.memory

Default Value

32 MiB

API Name

buffer.memory

Required

false

Producer Compression Type**Description**

The compression type for all data generated by the producer.

Related Name

compression.type

Default Value

none

API Name

compression.type

Required

false

MirrorMaker Consumer Rebalance Listener**Description**

A consumer rebalance listener of the ConsumerRebalanceListener type. Invoked when MirrorMaker's consumer rebalances.

Related Name

consumer.rebalance.listener

Default Value**API Name**

consumer.rebalance.listener

Required

false

MirrorMaker Consumer Rebalance Listener Arguments**Description**

Arguments used by MirrorMaker consumer rebalance listener.

Related Name

consumer.rebalance.listener.args

Default Value**API Name**

consumer.rebalance.listener.args

Required

false

Consumer Request Timeout**Description**

The maximum amount of time the consumer will wait for the response of a request. If the response is not received before the timeout elapses, the consumer will resend the request if necessary or fail the request if retries are exhausted.

Related Name

consumer.request.timeout.ms

Default Value

40 second(s)

API Name

consumer.request.timeout.ms

Required

false

Destination Kafka Cluster's Security Protocol**Description**

Protocol used for communication with destination Kafka cluster.

Related Name

destination.security.protocol

Default Value

PLAINTEXT

API Name

destination.security.protocol

Required

false

Destination Kafka Cluster's Client Auth**Description**

Only required if destination Kafka cluster requires client authentication.

Related Name

destination.ssl.client.auth

Default Value

false

API Name

destination.ssl.client.auth

Required

false

Consumer Minimum Fetch Size**Description**

The minimum amount of data the server should return for a fetch request. If insufficient data is available, the request will wait for that much data to accumulate before answering the request. Setting this property to something greater than 1 will cause the server to wait for larger amounts of data to accumulate which can improve server throughput a bit at the cost of some additional latency.

Related Name

fetch.min.bytes

Default Value

1 B

API Name

fetch.min.bytes

Required

false

Consumer Group ID**Description**

Name of the consumer group used by MirrorMaker. When multiple role instances are configured with the same topics and same group ID, the role instances load-balance replication for the topics. When multiple role instances are configured with the same topics but different group ID, each role instance replicates all the events for those topics - this can be used to replicate the source cluster into multiple destination clusters.

Related Name

group.id

Default Value

cloudera_mirrormaker

API Name

group.id

Required

false

Enable Authenticated Communication with the JMX Agent**Description**

Enables Authenticated Communication with the JMX Agent.

Related Name

jmx.auth.enabled

Default Value

false

API Name

jmx.auth.enabled

Required

false

Name of User with Read-Write Access to the JMX Agent**Description**

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user

Default Value

controlRole

API Name

jmx.control.user

Required

false

Password of user with read-write access to the JMX agent**Description**

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user.passwd

Default Value**API Name**

jmx.control.user.passwd

Required

false

Name of User with read-only access to the JMX Agent**Description**

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user

Default Value

monitorRole

API Name

jmx.monitor.user

Required

false

Password of User with read-only Access to the JMX agent**Description**

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user.passwd

Default Value

API Name

jmx.monitor.user.passwd

Required

false

Enable TLS client authentication for JMX port**Description**

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the ZooKeeper JMX TLS/SSL Server Trust Store file or the global trust store.

Related Name

jmx.ssl.client.auth.enabled

Default Value

false

API Name

jmx.ssl.client.auth.enabled

Required

false

Enable TLS/SSL for Kafka JMX**Description**

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

jmx.ssl.enabled

Default Value

false

API Name

jmx.ssl.enabled

Required

false

Producer Linger Time**Description**

The upper bound on the delay for batching. Once the producer gets a batch.size worth of records for a partition it will be sent immediately regardless of this setting. However, if fewer than this many bytes accumulated for this partition the producer will 'linger' for the specified time waiting for more records to show up.

Related Name

linger.ms

Default Value

0 second(s)

API Name

linger.ms

Required

false

MirrorMaker Message Handler

Description

A MirrorMaker message handler of the MirrorMakerMessageHandler type that will process every record in-between producer and consumer.

Related Name

message.handler

Default Value**API Name**

message.handler

Required

false

MirrorMaker Message Handler Arguments

Description

Arguments used by MirrorMaker message handler.

Related Name

message.handler.args

Default Value**API Name**

message.handler.args

Required

false

Additional MirrorMaker Java Options

Description

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

Related Name

mirror_maker_java_opts

Default Value

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35
-XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -
XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC -Djava.awt.headless=true -
Djava.net.preferIPv4Stack=true -Dcom.sun.management.jmxremote.host=127.0.0.1 -
Dcom.sun.management.jmxremote.local.only=true -Djava.rmi.server.hostname=127.0.0.1

API Name

mirror_maker_java_opts

Required

false

Java Heap Size of MirrorMaker

Description

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes.

Related Name

mirror_maker_max_heap_size

Default Value

1 GiB

API Name

mirror_maker_max_heap_size

Required

false

Number of Consumer Threads**Description**

Number of consumer threads.

Related Name

num.streams

Default Value

1

API Name

num.streams

Required

false

Offset Commit Interval**Description**

Offset commit interval in milliseconds.

Related Name

offset.commit.interval.ms

Default Value

60000

API Name

offset.commit.interval.ms

Required

false

Producer Request Timeout**Description**

The maximum amount of time the producer will wait for the response of a request. If the response is not received before the timeout elapses, the producer will resend the request if necessary or fail the request if retries are exhausted.

Related Name

producer.request.timeout.ms

Default Value

30 second(s)

API Name

producer.request.timeout.ms

Required

false

Consumer Session Timeout

Description

The timeout used to detect failures when using the group management facilities of Kafka. When the heartbeat of a consumer is not received within the session timeout, the broker will mark the consumer as failed and rebalance the group. Note that the value must be in the allowable range as configured in the broker by `group.min.session.timeout.ms` and `group.max.session.timeout.ms`.

Related Name

`session.timeout.ms`

Default Value

30 second(s)

API Name

`session.timeout.ms`

Required

false

Source Broker List

Description

Comma-separated list of IP:port (or hostname:port) pairs of brokers on source cluster. This should be more than one, for high availability, but there's no need to list all brokers.

Related Name

`source.bootstrap.servers`

Default Value**API Name**

`source.bootstrap.servers`

Required

true

Source Kafka Cluster's Security Protocol

Description

Protocol used for communication with source Kafka cluster.

Related Name

`source.security.protocol`

Default Value

PLAINTEXT

API Name

`source.security.protocol`

Required

false

Source Kafka Cluster's Client Auth

Description

Only required if the source Kafka cluster requires client authentication.

Related Name

`source.ssl.client.auth`

Default Value

false

API Name

source.ssl.client.auth

Required

false

Topic Whitelist**Description**

Regular expression that represents a set of topics to mirror.

Related Name

whitelist

Default Value**API Name**

whitelist

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**JMX Port****Description**

Port for JMX.

Related Name

jmx_port

Default Value

9394

API Name

jmx_port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Kafka MirrorMaker TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka MirrorMaker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Kafka MirrorMaker TLS/SSL Trust Store Password**Description**

The password for the Kafka MirrorMaker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password.generator

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Kafka MirrorMaker**Description**

Encrypt communication between clients and Kafka MirrorMaker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Kafka MirrorMaker TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Kafka MirrorMaker is acting as a TLS/SSL server.

Related Name

ssl.key.password.generator

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Kafka MirrorMaker TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka MirrorMaker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Kafka MirrorMaker TLS/SSL Server Keystore File Password**Description**

The password for the Kafka MirrorMaker keystore file.

Related Name

ssl.keystore.password.generator

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Parameter Validation: Destination Broker List

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Destination Broker List parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_bootstrap.servers

Required

true

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener

Required

true

Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener Arguments

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener Arguments parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener.args

Required

true

Suppress Parameter Validation: Consumer Group ID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Consumer Group ID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_group.id

Required

true

Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user

Required

true

Suppress Parameter Validation: Password of user with read-write access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user.passwd

Required

true

Suppress Parameter Validation: Name of User with read-only access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.monitor.user

Required

true

Suppress Parameter Validation: Password of User with read-only Access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.monitor.user.passwd

Required

true

Suppress Parameter Validation: JMX Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_port

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_mirror_maker_role_env_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: MirrorMaker Message Handler

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler

Required

true

Suppress Parameter Validation: MirrorMaker Message Handler Arguments

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler Arguments parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler.args

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_consumers.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Additional MirrorMaker Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional MirrorMaker Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_java_opts

Required

true

Suppress Parameter Validation: Java Heap Size of MirrorMaker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of MirrorMaker parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_max_heap_size

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_producers.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Source Broker List**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Source Broker List parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_source.bootstrap.servers

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Topic Whitelist**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Topic Whitelist parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_whitelist

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_audit_health

Required

true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_unexpected_exits

Required

true

Service-Wide

Advanced

Kafka Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

KAFKA_service_env_safety_valve

Required

false

System Group

Description

The group that this service's processes should run as.

Related Name**Default Value**

kafka

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name**Default Value**

kafka

API Name

process_username

Required

true

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Kafka Broker Monitoring Thresholds**Description**

The health test thresholds of the overall Kafka Broker health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Brokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Brokers falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

KAFKA_KAFKA_BROKER_healthy_thresholds

Required

false

Healthy Kafka Connect Monitoring Thresholds**Description**

The health test thresholds of the overall Kafka Connect health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Connects falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Connects falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

KAFKA_KAFKA_CONNECT_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value**

API Name

smon_derived_configs_safety_valve

Required

false

Other**Topic Auto Creation****Description**

Enables auto creation of topics on the server. If set to true, it attempts to produce, consume, or fetch metadata for a non-existent topic automatically create the topic with the default replication factor and number of partitions.

Related Name

auto.create.topics.enable

Default Value

true

API Name

auto.create.topics.enable

Required

false

Enable Automatic Leader Rebalancing**Description**

If automatic leader rebalancing is enabled, the controller tries to balance leadership for partitions among the brokers by periodically returning leadership for each partition to the preferred replica, if that replica is available.

Related Name

auto.leader.rebalance.enable

Default Value

true

API Name

auto.leader.rebalance.enable

Required

false

Enable Controlled Shutdown**Description**

Enables controlled shutdown of the broker. If enabled, the broker moves all leaders on it to other brokers before shutting itself down. This reduces the unavailability window during shutdown.

Related Name

controlled.shutdown.enable

Default Value

true

API Name

controlled.shutdown.enable

Required

false

Controlled Shutdown Maximum Attempts

Description

Number of unsuccessful controlled shutdown attempts before executing an unclean shutdown. For example, the default value of 3 means that the system will attempt a controlled shutdown 3 times before executing an unclean shutdown.

Related Name

controlled.shutdown.max.retries

Default Value

3

API Name

controlled.shutdown.max.retries

Required

false

Default Replication Factor

Description

The default replication factor for automatically created topics.

Related Name

default.replication.factor

Default Value

1

API Name

default.replication.factor

Required

false

Enable Delegation Tokens

Description

Enables authentication with delegation tokens for this Kafka service. When enabled, a secure password is automatically generated and used as the "delegation.token.master.key" property for Kafka Brokers. Only allowed if Kerberos authentication is enabled.

Related Name

delegation.token.enable

Default Value

true

API Name

delegation.token.enable

Required

false

Delegation Token Expiry Time

Description

The expiry time of a delegation token. A delegation token can be renewed before its expiry time to extend its validity up to its maximum lifetime. If it is not renewed, it will expire even if it has time remaining from its maximum lifetime.

Related Name

delegation.token.expiry.time.ms

Default Value

1 day(s)

API Name

delegation.token.expiry.time.ms

Required

false

Delegation Token Maximum Lifetime**Description**

The maximum amount of time that a delegation token can be valid for.

Related Name

delegation.token.max.lifetime.ms

Default Value

7 day(s)

API Name

delegation.token.max.lifetime.ms

Required

false

Enable Delete Topic**Description**

Enables topic deletion using admin tools. When delete topic is disabled, deleting topics through the admin tools has no effect.

Related Name

delete.topic.enable

Default Value

true

API Name

delete.topic.enable

Required

false

Consumer Group Maximum Session Timeout**Description**

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

Related Name

group.max.session.timeout.ms

Default Value

30 minute(s)

API Name

group.max.session.timeout.ms

Required

false

Consumer Group Minimum Session Timeout

Description

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

Related Name

group.min.session.timeout.ms

Default Value

6 second(s)

API Name

group.min.session.timeout.ms

Required

false

HDFS Service

Description

Name of the HDFS service that this Kafka service instance depends on

Related Name**Default Value****API Name**

hdfs_service

Required

false

List of Metric Reporters

Description

List of metric reporter class names. HTTP reporter is included by default.

Related Name

kafka.metrics.reporters

Default Value

nl.techop.kafka.KafkaHttpMetricsReporter

API Name

kafka.metrics.reporters

Required

false

Enable Kerberos Authentication

Description

Enables Kerberos authentication for this Kafka service.

Related Name

kerberos.auth.enable

Default Value

false

API Name

kerberos.auth.enable

Required

false

LDAP URL**Description**

The URL of LDAP for authenticating Kafka clients.

Related Name

ldap.auth.url

Default Value**API Name**

ldap.auth.url

Required

false

LDAP User DN Template**Description**

The LDAP user DN template for authenticating Kafka clients.

Related Name

ldap.auth.user.dn.template

Default Value**API Name**

ldap.auth.user.dn.template

Required

false

Leader Imbalance Check Interval**Description**

Defines the frequency of leader imbalance checks.

Related Name

leader.imbalance.check.interval.seconds

Default Value

5 minute(s)

API Name

leader.imbalance.check.interval.seconds

Required

false

Leader Imbalance Allowed Per Broker

Description

The percentage of leader imbalance allowed per broker. The controller rebalances leadership if the leader imbalance ratio goes above the configured value per broker.

Related Name

leader.imbalance.per.broker.percentage

Default Value

10 %

API Name

leader.imbalance.per.broker.percentage

Required

false

Log Cleaner Deduplication Buffer Size

Description

The total memory used for log deduplication across all cleaner threads. This memory is statically allocated and will not cause GC problems.

Related Name

log.cleaner.dedupe.buffer.size

Default Value

128 MiB

API Name

log.cleaner.dedupe.buffer.size

Required

false

Log Compaction Delete Record Retention Time

Description

The amount of time to retain delete messages for log compacted topics. Once a consumer has seen an original message, it has to be ensured that it also sees the delete message. If the delete message is removed too quickly, this might not happen. The configurable delete retention time helps to circumvent this issue.

Related Name

log.cleaner.delete.retention.ms

Default Value

7 day(s)

API Name

log.cleaner.delete.retention.ms

Required

false

Enable Log Compaction

Description

Enables the log cleaner to compact topics with cleanup.policy=compact on this cluster.

Related Name

log.cleaner.enable

Default Value

true

API Name

log.cleaner.enable

Required

false

Log Cleaner Clean Ratio**Description**

Controls how frequently the log cleaner will attempt to clean the log. This ratio restricts the maximum space wasted by duplicates in the log. For example, if set to 0.5, then at most 50% of the log can be populated by duplicates. A higher ratio results in fewer, more efficient cleaning processes, but more wasted space in the log.

Related Name

log.cleaner.min.cleanable.ratio

Default Value

0.5

API Name

log.cleaner.min.cleanable.ratio

Required

false

Number of Log Cleaner Threads**Description**

The number of background threads used for log cleaning.

Related Name

log.cleaner.threads

Default Value

1

API Name

log.cleaner.threads

Required

false

Log Flush Message Interval**Description**

The number of messages written to a log partition before triggering an fsync on the log. Setting this property to a low value results in more frequent data to disk synchronization, but also has major impact on performance. For durability, Cloudera recommends the use of replication rather than depending on a single-server fsync. However, this setting can be used as an extra safety measure. If used in conjunction with log.flush.interval.ms, the log is flushed when either criteria is met.

Related Name

log.flush.interval.messages

Default Value**API Name**

log.flush.interval.messages

Required

false

Log Flush Time Interval**Description**

The maximum time between fsync calls on the log. If used in conjunction with `log.flush.interval.messages`, the log is flushed when either criteria is met.

Related Name`log.flush.interval.ms`**Default Value****API Name**`log.flush.interval.ms`**Required**

false

Log Flush Scheduler Interval**Description**

The frequency, in milliseconds, with which the log flusher checks whether any log is eligible to be flushed to disk.

Related Name`log.flush.scheduler.interval.ms`**Default Value****API Name**`log.flush.scheduler.interval.ms`**Required**

false

Maximum Message Size**Description**

The maximum size of a message that the server can receive. This property has to be in sync with the maximum fetch size the consumers use. Otherwise, an unruly producer could publish messages that are too large for consumption.

Related Name`message.max.bytes`**Default Value**

1000000 B

API Name`message.max.bytes`**Required**

false

Minimum Number of Replicas in ISR**Description**

The minimum number of replicas in the in-sync replica needed to satisfy a produce request where `required.acks=-1` (that is, all).

Related Name

min.insync.replicas

Default Value

1

API Name

min.insync.replicas

Required

false

Enable Kafka Monitoring**Description**

Enables Kafka monitoring.

Related Name

monitoring.enabled

Default Value

true

API Name

monitoring.enabled

Required

false

Default Number of Partitions**Description**

The default number of partitions for automatically created topics.

Related Name

num.partitions

Default Value

1

API Name

num.partitions

Required

false

Number of Replica Fetchers**Description**

Number of threads used to replicate messages from leaders. Increasing this value increases the degree of I/O parallelism in the follower broker.

Related Name

num.replica.fetchers

Default Value

4

API Name

num.replica.fetchers

Required

false

Offset Retention Time

Description

After a consumer group loses all its consumers (i.e. becomes empty) its offsets will be kept for this retention period before getting discarded. For standalone consumers (using manual assignment), offsets will be expired after the time of last commit plus this retention period.

Related Name

offsets.retention.minutes

Default Value

7 day(s)

API Name

offsets.retention.minutes

Required

false

Offset Commit Topic Number of Partitions

Description

The number of partitions for the offset commit topic. Changing this value after deployment is currently unsupported, therefore, Cloudera recommends using a higher number of partitions (for example, 100-200) for production.

Related Name

offsets.topic.num.partitions

Default Value

50

API Name

offsets.topic.num.partitions

Required

false

Offset Commit Topic Replication Factor

Description

The replication factor for the offset commit topic. A higher setting (for example, 3 or 4) is recommended in order to ensure higher availability. If the offsets topic is created when there are fewer brokers than the replication factor, then the offsets topic is created with fewer replicas.

Related Name

offsets.topic.replication.factor

Default Value

3

API Name

offsets.topic.replication.factor

Required

false

PAM Service

Description

The PAM service name for authenticating Kafka clients. This corresponds to the service name in the PAM configuration.

Related Name

pam.auth.service

Default Value

login

API Name

pam.auth.service

Required

false

Enable Producer Metrics**Description**

Enables producer metrics

Related Name

producer.metrics.enable

Default Value

true

API Name

producer.metrics.enable

Required

false

Default Consumer Quota**Description**

Any consumer distinguished by clientId/consumer group will get throttled if it fetches more bytes than this value per-second.

Related Name

quota.consumer.default

Default Value**API Name**

quota.consumer.default

Required

false

Default Producer Quota**Description**

Any producer distinguished by clientId will get throttled if it produces more bytes than this value per-second.

Related Name

quota.producer.default

Default Value**API Name**

quota.producer.default

Required

false

Ranger Kafka Plugin Hdfs Audit Directory**Description**

The DFS path on which Ranger audits are written.

Related Name

ranger_kafka_plugin_hdfs_audit_directory

Default Value

\$ranger_base_audit_url/kafka

API Name

ranger_kafka_plugin_hdfs_audit_directory

Required

false

'Ranger service' name for this Kafka service**Description**

Name of the 'Ranger service', that is used for authorization by this Kafka service. If this parameter is set to the placeholder value '{{GENERATED_RANGER_SERVICE_NAME}}', a generated service name will be used, and if necessary, created. The generated service name will refer to the name of the cluster and the name of this Kafka service. The name can consist of alphanumeric and '_' characters.

Related Name

ranger.plugin.kafka.service.name

Default Value

cm_kafka

API Name

ranger_plugin_kafka_service_name

Required

false

RANGER Service**Description**

Name of the RANGER service that this Kafka service instance depends on

Related Name**Default Value****API Name**

ranger_service

Required

false

Replica Maximum Fetch Size**Description**

The maximum number of bytes to fetch for each partition in fetch requests that replicas send to the leader. This value should be larger than message.max.bytes.

Related Name

replica.fetch.max.bytes

Default Value

1 MiB

API Name

replica.fetch.max.bytes

Required

false

Allowed Replica Time Lag**Description**

If a follower has not sent any fetch requests, nor has it consumed up to the leader's log end offset during this time, the leader removes the follower from the ISR set.

Related Name

replica.lag.time.max.ms

Default Value

10 second(s)

API Name

replica.lag.time.max.ms

Required

false

SASL/PLAIN Authentication**Description**

Authentication method that the SASL/PLAIN mechanism uses to authenticate clients.

Related Name

sasl.plain.auth

Default Value

none

API Name

sasl.plain.auth

Required

false

Minimum Number of Replicas in ISR for Transaction State Log**Description**

Overridden min.insync.replicas config for the transaction topic.

Related Name

transaction.state.log.min.isr

Default Value

2

API Name

transaction.state.log.min.isr

Required

false

Transaction State Log Replication Factor

Description

The replication factor for the transaction topic (set higher to ensure availability). Internal topic creation will fail until the cluster size meets this replication factor requirement.

Related Name

transaction.state.log.replication.factor

Default Value

3

API Name

transaction.state.log.replication.factor

Required

false

Enable Unclean Leader Election

Description

Enables replicas not in the ISR set to be elected as leader as a last resort, even though doing so might result in data loss.

Related Name

unclean.leader.election.enable

Default Value

false

API Name

unclean.leader.election.enable

Required

false

ZooKeeper Root

Description

The znode in ZooKeeper used as a root for this Kafka cluster.

Related Name

zookeeper.chroot

Default Value

/kafka

API Name

zookeeper.chroot

Required

false

Enable Secure Connection to ZooKeeper

Description

Enables SSL/TLS connection to ZooKeeper for this Kafka service if dependent ZooKeeper service's `zookeeper_tls_enabled` configuration is enabled.

Related Name

`zookeeper.secure.connection.enable`**Default Value**`true`**API Name**`zookeeper.secure.connection.enable`**Required**`false`**ZooKeeper Session Timeout****Description**

If the server fails to send a heartbeat to ZooKeeper within this period of time, it is considered dead. If set to a too low value, ZooKeeper might falsely consider a server dead. If set to a too high value, ZooKeeper might take too long to recognize a dead server.

Related Name`zookeeper.session.timeout.ms`**Default Value**`6 second(s)`**API Name**`zookeeper.session.timeout.ms`**Required**`false`**ZooKeeper Service****Description**

Name of the ZooKeeper service that this Kafka service instance depends on

Related Name**Default Value****API Name**`zookeeper_service`**Required**`true`**Suppressions****Suppress Configuration Validator: Advertised Host****Description**

Whether to suppress configuration warnings produced by the Advertised Host configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_advertised.host.name`**Required**`true`

Suppress Configuration Validator: Advertised Port**Description**

Whether to suppress configuration warnings produced by the Advertised Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_advertised.port

Required

true

Suppress Configuration Validator: Destination Broker List**Description**

Whether to suppress configuration warnings produced by the Destination Broker List configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_bootstrap.servers

Required

true

Suppress Configuration Validator: Broker ID**Description**

Whether to suppress configuration warnings produced by the Broker ID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_broker.id

Required

true

Suppress Configuration Validator: Additional Broker Java Options**Description**

Whether to suppress configuration warnings produced by the Additional Broker Java Options configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_java_opts

Required

true

Suppress Configuration Validator: Java Heap Size of Broker**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Broker configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_max_heap_size

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: config.storage.replication.factor**Description**

Whether to suppress configuration warnings produced by the config.storage.replication.factor configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_config.storage.replication.factor

Required

true

Suppress Configuration Validator: config.storage.topic**Description**

Whether to suppress configuration warnings produced by the config.storage.topic configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_config.storage.topic

Required

true

Suppress Configuration Validator: Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_connect-distributed.properties_role_safety_valve

Required

true

Suppress Configuration Validator: connect.log4j.connector.context**Description**

Whether to suppress configuration warnings produced by the connect.log4j.connector.context configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_connector.context

Required

true

Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener

Required

true

Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener Arguments**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener Arguments configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener.args

Required

true

Suppress Configuration Validator: Consumer Group ID**Description**

Whether to suppress configuration warnings produced by the Consumer Group ID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_group.id

Required

true

Suppress Configuration Validator: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the Name of User with Read-Write Access to the JMX Agent configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user

Required

true

Suppress Configuration Validator: Password of user with read-write access to the JMX agent

Description

Whether to suppress configuration warnings produced by the Password of user with read-write access to the JMX agent configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx.control.user.passwd

Required

true

Suppress Configuration Validator: Name of User with read-only access to the JMX Agent

Description

Whether to suppress configuration warnings produced by the Name of User with read-only access to the JMX Agent configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx.monitor.user

Required

true

Suppress Configuration Validator: Password of User with read-only Access to the JMX agent

Description

Whether to suppress configuration warnings produced by the Password of User with read-only Access to the JMX agent configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx.monitor.user.passwd

Required

true

Suppress Configuration Validator: JMX Port

Description

Whether to suppress configuration warnings produced by the JMX Port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx_port

Required

true

Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf**Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-conf/kafka-client.conf_client_config_safety_valve

Required

true

Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-conf/kafka-cluster-configs.properties_client_config_safety_valve

Required

true

Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-conf/kafka-ranger-repo.properties_client_config_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-monitoring.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Configuration Directory**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Configuration Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.connect.conf.directory

Required

true

Suppress Configuration Validator: Java Home Path Override**Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.connect.jdk.home

Required

true

Suppress Configuration Validator: HTTP Metric Report Host**Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Host configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.host

Required

true

Suppress Configuration Validator: HTTP Metric Report Port**Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.port

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_broker_role_env_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_connect_role_env_safety_valve

Required

true

Suppress Configuration Validator: KAFKA_HEAP_OPTS**Description**

Whether to suppress configuration warnings produced by the KAFKA_HEAP_OPTS configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_heap_opts

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_mirror_maker_role_env_safety_valve

Required

true

Suppress Configuration Validator: key.converter**Description**

Whether to suppress configuration warnings produced by the key.converter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_key.converter

Required

true

Suppress Configuration Validator: Data Directories

Description

Whether to suppress configuration warnings produced by the Data Directories configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log.dirs

Required

true

Suppress Configuration Validator: Segment File Size

Description

Whether to suppress configuration warnings produced by the Segment File Size configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log.segment.bytes

Required

true

Suppress Configuration Validator: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Log Directory

Description

Whether to suppress configuration warnings produced by the Kafka Broker Log Directory configuration validator.

Related Name**Default Value**

	false
API Name	role_config_suppression_log_dir
Required	true

Suppress Configuration Validator: MirrorMaker Message Handler

Description

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_message.handler

Required

true

Suppress Configuration Validator: MirrorMaker Message Handler Arguments

Description

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler Arguments configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_message.handler.args

Required

true

Suppress Configuration Validator: metrics.jetty.server.port

Description

Whether to suppress configuration warnings produced by the metrics.jetty.server.port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_metrics.jetty.server.port

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties

Description

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_consumers.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Additional MirrorMaker Java Options**Description**

Whether to suppress configuration warnings produced by the Additional MirrorMaker Java Options configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_java_opts

Required

true

Suppress Configuration Validator: Java Heap Size of MirrorMaker**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of MirrorMaker configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_max_heap_size

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_producers.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Number of I/O Threads**Description**

Whether to suppress configuration warnings produced by the Number of I/O Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.io.threads

Required

true

Suppress Configuration Validator: Number of Network Threads**Description**

Whether to suppress configuration warnings produced by the Number of Network Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.network.threads

Required

true

Suppress Configuration Validator: Number of Recovery Threads per data directory**Description**

Whether to suppress configuration warnings produced by the Number of Recovery Threads per data directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.recovery.threads.per.data.dir

Required

true

Suppress Configuration Validator: Number of Alter Log Dir Threads**Description**

Whether to suppress configuration warnings produced by the Number of Alter Log Dir Threads configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_num.replica.alter.log.dirs.threads

Required

true

Suppress Configuration Validator: offset.storage.replication.factor**Description**

Whether to suppress configuration warnings produced by the offset.storage.replication.factor configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.replication.factor

Required

true

Suppress Configuration Validator: offset.storage.topic**Description**

Whether to suppress configuration warnings produced by the offset.storage.topic configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.topic

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: plugin.path**Description**

Whether to suppress configuration warnings produced by the plugin.path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_plugin.path

Required

true

Suppress Configuration Validator: TCP Port**Description**

Whether to suppress configuration warnings produced by the TCP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_port

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-audit.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-security.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Conf Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_conf_path

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Audit Hdfs Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Hdfs Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Policy Cache Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_policy_cache_directory

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Solr Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_solr_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address**Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Configuration Validator: rest.extension.classes**Description**

Whether to suppress configuration warnings produced by the rest.extension.classes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.extension.classes

Required

true

Suppress Configuration Validator: kafka.connect.rest.port**Description**

Whether to suppress configuration warnings produced by the kafka.connect.rest.port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.port

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: kafka.connect.secure.rest.port**Description**

Whether to suppress configuration warnings produced by the kafka.connect.secure.rest.port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_secure.rest.port

Required

true

Suppress Configuration Validator: Source Broker List**Description**

Whether to suppress configuration warnings produced by the Source Broker List configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_source.bootstrap.servers

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: TLS/SSL Port**Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_port

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore Key Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: status.storage.replication.factor**Description**

Whether to suppress configuration warnings produced by the status.storage.replication.factor configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.replication.factor

Required

true

Suppress Configuration Validator: status.storage.topic**Description**

Whether to suppress configuration warnings produced by the status.storage.topic configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.topic

Required

true

Suppress Configuration Validator: value.converter**Description**

Whether to suppress configuration warnings produced by the value.converter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_value.converter

Required

true

Suppress Configuration Validator: Topic Whitelist**Description**

Whether to suppress configuration warnings produced by the Topic Whitelist configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_whitelist

Required

true

Suppress Parameter Validation: Controlled Shutdown Maximum Attempts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Controlled Shutdown Maximum Attempts parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_controlled.shutdown.max.retries

Required

true

Suppress Parameter Validation: Default Replication Factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Replication Factor parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_default.replication.factor

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: List of Metric Reporters

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the List of Metric Reporters parameter.

Related Name

Default Value

false

API Name

service_config_suppression_kafka.metrics.reporters

Required

true

Suppress Configuration Validator: Kafka Broker Count Validator

Description

Whether to suppress configuration warnings produced by the Kafka Broker Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_kafka_broker_count_validator

Required

true

Suppress Configuration Validator: Kafka Connect Count Validator

Description

Whether to suppress configuration warnings produced by the Kafka Connect Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_kafka_connect_count_validator

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Count Validator

Description

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_kafka_mirror_maker_count_validator

Required

true

Suppress Parameter Validation: Kafka Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka_service_env_safety_valve

Required

true

Suppress Parameter Validation: LDAP URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap.auth.url

Required

true

Suppress Parameter Validation: LDAP User DN Template**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP User DN Template parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap.auth.user.dn.template

Required

true

Suppress Parameter Validation: Leader Imbalance Check Interval**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Check Interval parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_leader.imbalance.check.interval.seconds

Required

true

Suppress Parameter Validation: Leader Imbalance Allowed Per Broker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Allowed Per Broker parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_leader.imbalance.per.broker.percentage

Required

true

Suppress Parameter Validation: Maximum Message Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Message Size parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_message.max.bytes

Required

true

Suppress Parameter Validation: Minimum Number of Replicas in ISR**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Minimum Number of Replicas in ISR parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_min.insync.replicas

Required

true

Suppress Parameter Validation: Default Number of Partitions

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Number of Partitions parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_num.partitions

Required

true

Suppress Parameter Validation: Number of Replica Fetchers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Replica Fetchers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_num.replica.fetchers

Required

true

Suppress Parameter Validation: Offset Commit Topic Number of Partitions

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Number of Partitions parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_offsets.topic.num.partitions

Required

true

Suppress Parameter Validation: Offset Commit Topic Replication Factor

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Replication Factor parameter.

Related Name**Default Value**

false

API Name`service_config_suppression_offsets.topic.replication.factor`**Required**`true`**Suppress Parameter Validation: PAM Service****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the PAM Service parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_pam.auth.service`**Required**`true`**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_process_groupname`**Required**`true`**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_process_username`**Required**`true`**Suppress Parameter Validation: Ranger Kafka Plugin Hdfs Audit Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_kafka_plugin_hdfs_audit_directory

Required

true

Suppress Parameter Validation: 'Ranger service' name for this Kafka service**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the 'Ranger service' name for this Kafka service parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_plugin_kafka_service_name

Required

true

Suppress Parameter Validation: Replica Maximum Fetch Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replica Maximum Fetch Size parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_replica.fetch.max.bytes

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Transaction State Log Replication Factor

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Transaction State Log Replication Factor parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_transaction.state.log.replication.factor

Required

true

Suppress Parameter Validation: ZooKeeper Root

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Root parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_zookeeper.chroot

Required

true

Suppress Parameter Validation: ZooKeeper Session Timeout

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Session Timeout parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_zookeeper.session.timeout.ms

Required

true

Suppress Health Test: Kafka Broker Health**Description**

Whether to suppress the results of the Kafka Broker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_kafka_kafka_broker_healthy

Required

true

Suppress Health Test: Kafka Connect Health**Description**

Whether to suppress the results of the Kafka Connect Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_kafka_kafka_connect_healthy

Required

true

Key Trustee KMS Properties in Cloudera Runtime 7.1.9

Role groups:

Key Management Server Proxy

Advanced

Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description

For advanced use only. A string to be inserted into core-site.xml for this role only.

Related Name**Default Value****API Name**

core-site.xml_role_safety_valve

Required

false

Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml**Description**

For advanced use only. A string to be inserted into kms-acls.xml for this role only.

Related Name**Default Value****API Name**

kms-acls.xml_role_safety_valve

Required

false

Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml**Description**

For advanced use only. A string to be inserted into kms-site.xml for this role only.

Related Name**Default Value****API Name**

kms-site.xml_role_safety_valve

Required

false

Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KMS_KEYTRUSTEE_role_env_safety_valve

Required

false

Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml**Description**

For advanced use only. A string to be inserted into kts-site.xml for this role only.

Related Name**Default Value****API Name**

kts-site.xml_role_safety_valve

Required

false

Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml**Description**

For advanced use only. A string to be inserted into ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ssl-server.xml_role_safety_valve

Required

false

Logs**Key Management Server Proxy Log Directory****Description**

The log directory for log files of the role Key Management Server Proxy.

Related Name

log.dir

Default Value

/var/log/kms-keytrustee

API Name

log_dir

Required

false

Key Management Server Proxy Logging Threshold**Description**

The minimum log level for Key Management Server Proxy logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Key Management Server Proxy Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Key Management Server Proxy logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Key Management Server Proxy Max Log Size**Description**

The maximum size, in megabytes, per log file for Key Management Server Proxy logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kms_keytrustee_fd_thresholds

Required

false

Key Management Server Proxy Host Health Test**Description**

When computing the overall Key Management Server Proxy health, consider the host's health.

Related Name**Default Value**

true

API Name

kms_keytrustee_host_health_enabled

Required

false

Key Management Server Proxy Process Health Test**Description**

Enables the health test that the Key Management Server Proxy's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kms_keytrustee_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.

- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking [View as JSON](#). In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username: $ROLE_PARAM(otelcol_remote_write_user) password: '$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name

Default Value**API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Key Trustee Server Auth Code****Description**

Key Trustee Server auth code used for KMS to authenticate against the server

Related Name

cloudera.trustee.keyprovider.auth

Default Value**API Name**

cloudera_trustee_keyprovider_auth

Required

true

Active Key Trustee Server**Description**

Active Key Trustee Server hostname that backs the KMS.

Related Name

cloudera.trustee.keyprovider.hostname-ACTIVE

Default Value**API Name**

cloudera_trustee_keyprovider_hostname-ACTIVE

Required

true

Passive Key Trustee Server**Description**

Passive Key Trustee Server hostname that backs the KMS. Only needed for Key Trustee Server high availability.

Related Name

cloudera.trustee.keyprovider.hostname-PASSIVE

Default Value**API Name**

cloudera_trustee_keyprovider_hostname-PASSIVE

Required

false

Key Trustee Server Org Name**Description**

Key Trustee Server Organization that keys are stored against.

Related Name

cloudera.trustee.keyprovider.org

Default Value**API Name**

cloudera_trustee_keyprovider_org

Required

true

Key Trustee Server Key Provider Pool Timeout**Description**

Key Trustee key provider pool timeout.

Related Name

cloudera.trustee.keyprovider.pool.abandoned.timeout

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_groups

Required

false

Mapred Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the mapred user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.mapred.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_hosts

Required

false

Oozie Proxy User Groups**Description**

Allows the oozie superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.oozie.groups

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_groups

Required

false

Oozie Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the oozie user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.oozie.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_hosts

Required

false

YARN Proxy User Groups**Description**

Allows the yarn superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.yarn.groups

Default Value

*

API Name

hadoop_kms_proxyuser_yarn_groups

Required

false

YARN Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the yarn user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.yarn.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_yarn_hosts

Required

false

Key Trustee KeyStoreProvider Directory**Description**

Directory to the keystore file used by Key Trustee KeyStoreProvider that backs the KMS.

Related Name

hadoop.kms.key.provider.uri

Default Value

/var/lib/kms-keytrustee

API Name

hadoop_security_key_provider_dir

Required

true

Key Trustee KeyStoreProvider Configuration Directory**Description**

Directory to store configuration of keystore file used by Key Trustee KeyStoreProvider that backs the KMS.

Related Name

keytrustee.kms.key.provider.conf.uri

Default Value

/var/lib/kms-keytrustee/keytrustee

API Name

keytrustee_security_key_provider_conf_dir

Required

true

KMS Accept Count**Description**

The maximum queue length for incoming connection requests when all possible request processing threads are in use. Any requests received when the queue is full will be refused. This configuration is only supported in CDH 5.11 and up.

Related Name

hadoop.http.accept.queue.size

Default Value

500

API Name

kms_accept_count

Required

false

KMS Blacklist Users**Description**

A comma-separated list of users (no spaces) for whom to disallow access to key material. These users can still fetch key metadata and create encrypted encryption keys, but are unable to do any other KMS operations. Typically, HDFS superusers will be specified here.

Related Name

kms_blacklist_users

Default Value**API Name**

kms_blacklist_users

Required

false

KMS Heap Size**Description**

Maximum heap size of the KMS.

Related Name

kms_heap_size

Default Value

1 GiB

API Name

kms_heap_size

Required

true

Additional Java Configuration Options for KMS**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

Related Name

kms_java_opts

Default Value**API Name**

kms_java_opts

Required

false

KMS Max Threads**Description**

Maximum number of threads used to handle KMS requests.

Related Name

hadoop.http.max.threads

Default Value

250

API Name

kms_max_threads

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

KMS HTTP Port

Description

Port used by clients to interact with the KMS.

Related Name

hadoop.kms.http.port

Default Value

16000

API Name

kms_http_port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Key Management Server Proxy TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Key Management Server Proxy might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Key Management Server Proxy TLS/SSL Trust Store Password

Description

The password for the Key Management Server Proxy TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password.generator

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Key Management Server Proxy

Description

Encrypt communication between clients and Key Management Server Proxy using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

hadoop.kms.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Key Management Server Proxy TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Key Management Server Proxy is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Key Management Server Proxy TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Key Management Server Proxy is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Key Management Server Proxy TLS/SSL Server Keystore File Password**Description**

The password for the Key Management Server Proxy keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Key Trustee Server Auth Code**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Auth Code parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_cloudera_trustee_keyprovider_auth

Required

true

Suppress Parameter Validation: Active Key Trustee Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_cloudera_trustee_keyprovider_hostname-active

Required

true

Suppress Parameter Validation: Passive Key Trustee Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_cloudera_trustee_keyprovider_hostname-passive

Required

true

Suppress Parameter Validation: Key Trustee Server Org Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Org Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_cloudera_trustee_keyprovider_org

Required

true

Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_core-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Flume Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_flume_groups

Required

true

Suppress Parameter Validation: Flume Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_flume_hosts

Required

true

Suppress Parameter Validation: HDFS Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hdfs_groups

Required

true

Suppress Parameter Validation: HDFS Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hdfs_hosts

Required

true

Suppress Parameter Validation: Hive Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hive_groups

Required

true

Suppress Parameter Validation: Hive Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hive_hosts

Required

true

Suppress Parameter Validation: HTTP Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_http_groups

Required

true

Suppress Parameter Validation: HTTP Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_http_hosts

Required

true

Suppress Parameter Validation: HttpFS Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_httpfs_groups

Required

true

Suppress Parameter Validation: HttpFS Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_httpfs_hosts

Required

true

Suppress Parameter Validation: Hue Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_groups

Required

true

Suppress Parameter Validation: Hue Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_hosts

Required

true

Suppress Parameter Validation: Mapred Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_mapred_groups

Required

true

Suppress Parameter Validation: Mapred Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_mapred_hosts

Required

true

Suppress Parameter Validation: Oozie Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_groups

Required

true

Suppress Parameter Validation: Oozie Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_hosts

Required

true

Suppress Parameter Validation: YARN Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Groups parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_groups

Required

true

Suppress Parameter Validation: YARN Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_hosts

Required

true

Suppress Parameter Validation: Key Trustee KeyStoreProvider Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee KeyStoreProvider Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_security_key_provider_dir

Required

true

Suppress Parameter Validation: Key Trustee KeyStoreProvider Configuration Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee KeyStoreProvider Configuration Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_keytrustee_security_key_provider_conf_dir

Required

true

Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-acls.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: KMS Blacklist Users**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS Blacklist Users parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_blacklist_users

Required

true

Suppress Parameter Validation: KMS HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_http_port

Required

true

Suppress Parameter Validation: Additional Java Configuration Options for KMS**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Java Configuration Options for KMS parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_java_opts

Required

true

Suppress Parameter Validation: Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_keytrustee_role_env_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kts-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Proxy Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_otelcol_processors`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Receivers Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_receivers`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_password`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_url`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore Key Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_audit_health

Required

true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_kms_keytrustee_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "I`

F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}}See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Default Value

/kmsZKRoot

API Name

hadoop_kms_authentication_signer_secret_provider_zookeeper_path

Required

true

Authentication Type**Description**

Authentication type for the KMS. Can either be "simple" or "kerberos".

Related Name

hadoop.kms.authentication.type

Default Value

simple

API Name

hadoop_kms_authentication_type

Required

true

KMS Load Balancer**Description**

Key Management Store Load Balancer, used with multiple KMS roles (KMS high availability). In CDH 5.4 and higher, this Key Trustee KMS service typically has the ZooKeeper dependency set, and this property is left blank. In this case, the ZooKeeper-based high availability URL is automatically generated for clients. To use an external load balancer, specify the URL to that load balancer. When using the ZooKeeper-based load balancer, all KMS roles must listen on the same port.

Related Name

Key Trustee Server Properties in Cloudera Runtime 7.1.9

Role groups:

Active Database

Advanced

Active Database Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

DB_ACTIVE_role_env_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Monitoring

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

db_active_fd_thresholds

Required

false

Active Database Host Health Test

Description

When computing the overall Active Database health, consider the host's health.

Related Name**Default Value**

true

API Name

db_active_host_health_enabled

Required

false

Active Database Process Health Test**Description**

Enables the health test that the Active Database's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

db_active_scm_health_enabled

Required

false

Enable Health Alerts for this Role**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)

initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:  
$ROLE_PARAM(otelcol_remote_write_user) password:  
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Active Key Trustee Server**Advanced****Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KEYTRUSTEE_ACTIVE_SERVER_role_env_safety_valve

Required

false

Active Key Trustee Server XML Override**Description**

For advanced use only, replace entire XML in the logback configuration file for Active Key Trustee Server, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf**Description**

For advanced use only. A string to be inserted into logging.conf for this role only.

Related Name**Default Value****API Name**

logging.conf_role_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from

publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties

Description

For advanced use only. A string to be inserted into ssl.properties for this role only.

Related Name**Default Value****API Name**

ssl.properties_role_safety_valve

Required

false

Logs

Active Key Trustee Server Log Directory

Description

The log directory for log files of the role Active Key Trustee Server.

Related Name

log_dir

Default Value

/var/lib/keytrustee/logs

API Name

log_dir

Required

false

Active Key Trustee Server Logging Threshold

Description

The minimum log level for Active Key Trustee Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Active Key Trustee Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Active Key Trustee Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Active Key Trustee Server Max Log Size

Description

The maximum size, in megabytes, per log file for Active Key Trustee Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

keytrustee_active_server_fd_thresholds

Required

false

Active Key Trustee Server Host Health Test**Description**

When computing the overall Active Key Trustee Server health, consider the host's health.

Related Name**Default Value**

true

API Name

keytrustee_active_server_host_health_enabled

Required

false

Active Key Trustee Server Process Health Test

Description

Enables the health test that the Active Key Trustee Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

keytrustee_active_server_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name

Default Value**API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format)**Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Active Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

ssl.privatekey.location

Default Value

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee-pk.pem

API Name

ssl_server_privatekey_location

Required

false

Active Key Trustee Server TLS/SSL Private Key Password**Description**

The password for the private key in the Active Key Trustee Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

Related Name

ssl.privatekey.password

Default Value**API Name**

ssl_server_privatekey_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_keytrustee_active_server_role_env_safety_valve

Required

true

Suppress Parameter Validation: Key Trustee Server Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_keytrustee_port

Required

true

Suppress Parameter Validation: Active Key Trustee Server Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Active Key Trustee Server XML Override**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server XML Override parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_logback_safety_valve

Required

true

Suppress Parameter Validation: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_logging.conf_role_safety_valve

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_ca_certificate_location

Required

true

Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_certificate_location

Required

true

Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_location

Required

true

Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Private Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_password

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_keytrustee_server_keytrustee_active_server_unexpected_exits

Required

true

Passive Database

Advanced

Passive Database Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

DB_PASSIVE_role_env_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Monitoring

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

db_passive_fd_thresholds

Required

false

Passive Database Host Health Test**Description**

When computing the overall Passive Database health, consider the host's health.

Related Name**Default Value**

true

API Name

db_passive_host_health_enabled

Required

false

Passive Database Process Health Test**Description**

Enables the health test that the Passive Database's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

db_passive_scm_health_enabled

Required

false

Enable Health Alerts for this Role**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value**API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Database Storage Directory****Description**

Directory (local file system) where the Key Trustee Server database will be stored. Changing this value after the service has been started will have no effect.

Related Name

db_root

Default Value

/var/lib/keytrustee/db

API Name

db_root

Required

false

Retry Attempts**Description**

Number of times a connection attempt will be made before giving up.

Related Name

retry_attempts

Default Value

30

API Name

retry_attempts

Required

true

Retry Timeout**Description**

Number of seconds to wait between retries.

Related Name

retry_timeout

Default Value

1 second(s)

API Name

retry_timeout

Required

true

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Key Trustee Server Database Port

Description

The Key Trustee Server database server port. Changing this value after the service has been started will have no effect.

Related Name

db_port

Default Value

11381

API Name

db_port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***
Related Name	custom.cgroups
Default Value	
API Name	rm_custom_resources
Required	false

Cgroup I/O Weight

Description	Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name	blkio.weight
Default Value	500
API Name	rm_io_weight
Required	true

Cgroup Memory Hard Limit

Description	Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name	memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_unexpected_exits

Required

true

Passive Key Trustee Server**Advanced****Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KEYTRUSTEE_PASSIVE_SERVER_role_env_safety_valve

Required

false

Passive Key Trustee Server XML Override

Description

For advanced use only, replace entire XML in the logback configuration file for Passive Key Trustee Server, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf

Description

For advanced use only. A string to be inserted into logging.conf for this role only.

Related Name**Default Value****API Name**

logging.conf_role_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties

Description

For advanced use only. A string to be inserted into ssl.properties for this role only.

Related Name

Default Value**API Name**

ssl.properties_role_safety_valve

Required

false

Logs**Passive Key Trustee Server Log Directory****Description**

The log directory for log files of the role Passive Key Trustee Server.

Related Name

log_dir

Default Value

/var/lib/keytrustee/logs

API Name

log_dir

Required

false

Passive Key Trustee Server Logging Threshold**Description**

The minimum log level for Passive Key Trustee Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Passive Key Trustee Server Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Passive Key Trustee Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Passive Key Trustee Server Max Log Size

Description

The maximum size, in megabytes, per log file for Passive Key Trustee Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

keytrustee_passive_server_fd_thresholds

Required

false

Passive Key Trustee Server Host Health Test**Description**

When computing the overall Passive Key Trustee Server health, consider the host's health.

Related Name**Default Value**

true

API Name

keytrustee_passive_server_host_health_enabled

Required

false

Passive Key Trustee Server Process Health Test**Description**

Enables the health test that the Passive Key Trustee Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

keytrustee_passive_server_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking [View as JSON](#). In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Key Trustee Server Port

Description

The Key Trustee Server port number.

Related Name

keytrustee_port

Default Value

11371

API Name

keytrustee_port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Passive Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)****Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

Related Name

ssl.cacert.location

Default Value**API Name**

ssl_server_ca_certificate_location

Required

false

Passive Key Trustee Server TLS/SSL Server Certificate File (PEM Format)**Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

ssl.cert.location

Default Value`/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee.pem`**API Name**`ssl_server_certificate_location`**Required**`false`**Passive Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name`ssl.privatekey.location`**Default Value**`/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee-pk.pem`**API Name**`ssl_server_privatekey_location`**Required**`false`**Passive Key Trustee Server TLS/SSL Private Key Password****Description**

The password for the private key in the Passive Key Trustee Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

Related Name`ssl.privatekey.password`**Default Value****API Name**`ssl_server_privatekey_password`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`

Suppress Parameter Validation: Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

For advanced use only, a string to be inserted into `ssl.properties`. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

`ssl.properties_service_safety_valve`

Required

`false`

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

`true`

API Name

`enable_alerts`

Required

`false`

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

`false`

API Name

`enable_config_alerts`

Required

`false`

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using `tsquery`. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Key-Value Store Indexer Properties in Cloudera Runtime 7.1.9

Role groups:

Lily HBase Indexer

Advanced

Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml

Description

For advanced use only. A string to be inserted into hbase-indexer-site.xml for this role only.

Related Name**Default Value****API Name**

hbase_indexer_config_safety_valve

Required

false

Java Configuration Options for Lily HBase Indexer

Description

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name**Default Value**

JAVA_GC_ARGS

API Name

hbase_indexer_java_opts

Required

false

System Group

Description

The group that the HBase Indexer process should run as.

Related Name**Default Value**

hbase

API Name

hbase_indexer_process_groupname

Required

true

System User

Description

The user that the HBase Indexer process should run as.

Related Name**Default Value**

hbase

API Name

hbase_indexer_process_username

Required

true

Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

HBASE_INDEXER_role_env_safety_valve

Required

false

HBase Indexer ZooKeeper Session Timeout

Description

ZooKeeper session timeout. Controls the amount of time the HBase Indexer will attempt to connect to ZooKeeper before timing out.

Related Name

hbaseindexer.zookeeper.session.timeout

Default Value

1 minute(s)

API Name

hbase_indexer_zk_session_timeout

Required

false

Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs

HBase Indexer Log Directory

Description

Directory where HBase Indexer will place its log files.

Related Name**Default Value**

/var/log/hbase-solr

API Name

hbase_indexer_log_dir

Required

true

Lily HBase Indexer Logging Threshold

Description

The minimum log level for Lily HBase Indexer logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Lily HBase Indexer Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Lily HBase Indexer logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Lily HBase Indexer Max Log Size**Description**

The maximum size, in megabytes, per log file for Lily HBase Indexer logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

hbase_indexer_fd_thresholds

Required

false

Lily HBase Indexer Host Health Test

Description

When computing the overall Lily HBase Indexer health, consider the host's health.

Related Name**Default Value**

true

API Name

hbase_indexer_host_health_enabled

Required

false

Lily HBase Indexer Process Health Test

Description

Enables the health test that the Lily HBase Indexer's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

hbase_indexer_scm_health_enabled

Required

false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

heap_dump_directory_free_space_absolute_thresholds

Required

false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**HBase Indexer HTTP Port****Description**

HTTP port used by HBase Indexer.

Related Name

hbaseindexer.http.port

Default Value

11060

API Name

hbase_indexer_http_port

Required

true

Resource Management**Java Heap Size of Lily HBase Indexer in Bytes****Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

Related Name**Default Value**

1 GiB

API Name

hbase_indexer_java_heapsize

Required

false

Cgroup CPU Shares**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description

Kerberos principal used by the Lily HBase Indexer roles.

Related Name**Default Value**

hbase

API Name

kerberos_role_princ_name

Required

true

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

`stacks_collection_frequency`**Default Value**

5.0 second(s)

API Name`stacks_collection_frequency`**Required**

false

Stacks Collection Method**Description**

The method used to collect stacks. The `jstack` option involves periodically running the `jstack` command against the role's daemon process. The `servlet` method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the `servlet` method is selected, that HTTP endpoint is periodically scraped.

Related Name`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name`role_config_suppression_cdh_version_validator`**Required**

true

Suppress Parameter Validation: Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for `hbase-indexer-site.xml`**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for `hbase-indexer-site.xml` parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_config_safety_valve

Required

true

Suppress Parameter Validation: HBase Indexer HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_http_port

Required

true

Suppress Parameter Validation: Java Configuration Options for Lily HBase Indexer**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Lily HBase Indexer parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_java_opts

Required

true

Suppress Parameter Validation: HBase Indexer Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_log_dir

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_process_username

Required

true

Suppress Parameter Validation: Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_role_env_safety_valve

Required

true

Suppress Parameter Validation: Role-Specific Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kerberos_role_princ_name

Required

true

Suppress Parameter Validation: Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_file_descriptor

Required

true

Suppress Health Test: Heap Dump Directory Free Space**Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_heap_dump_directory_free_space

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_unexpected_exits

Required

true

Service-Wide

Advanced

Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

ks_indexer_env_safety_valve

Required

false

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Lily HBase Indexer Monitoring Thresholds

Description

The health test thresholds of the overall Lily HBase Indexer health. The check returns "Concerning" health if the percentage of "Healthy" Lily HBase Indexers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Lily HBase Indexers falls below the critical threshold.

Related Name**Default Value**

Warning: 95.0 %, Critical: 90.0 %

API Name

ks_indexer_indexers_healthy_thresholds

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name

Default Value**API Name**

smon_derived_configs_safety_valve

Required

false

Morphlines**Custom Mime-types File****Description**

Text that goes verbatim into custom-mimetypes.xml file used by HBase Indexers.

solr_service

Required

true

Security**HBase Indexer Secure Authentication****Description**

Authentication mechanism used by HBase Indexer.

Related Name

hbaseindexer.authentication.type

Default Value

simple

API Name

hbase_indexer_security_authentication

Required

false

HBase Indexer TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that HBase Indexer might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name**Default Value****API Name**

keystore_indexer_truststore_file

Required

false

HBase Indexer TLS/SSL Trust Store Password

Description

The password for the HBase Indexer TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value****API Name**

keystore_indexer_truststore_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

Suppress Parameter Validation: Morphlines File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Morphlines File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_morphlines_conf_file

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Lily HBase Indexer Health**Description**

Whether to suppress the results of the Lily HBase Indexer Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_ks_indexer_hbase_indexers_healthy

Required

true

Knox Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced

Deploy Directory

Description

The directory where the client configs will be deployed

Related Name**Default Value**

/etc/knox

API Name

client_config_root_dir

Required

true

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other

Alternatives Priority

Description

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

50

API Name

client_config_priority

Required

true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

Required

true

Knox Gateway

Advanced

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties

Description

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties for this role only.

Related Name**Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties

Description

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy.properties for this role only.

Related Name**Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy.properties_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml

Description

For advanced use only. A string to be inserted into conf/cdp-descriptors.xml for this role only.

Related Name**Default Value****API Name**

conf/cdp-descriptors.xml_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description

For advanced use only. A string to be inserted into conf/gateway-site.xml for this role only.

Related Name**Default Value****API Name**

conf/gateway-site.xml_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-knox-audit.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-knox-audit.xml_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-knox-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-knox-policymgr-ssl.xml_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-knox-security.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-knox-security.xml_role_safety_valve

Required

false

Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KNOX_GATEWAY_role_env_safety_valve

Required

false

Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Knox Gateway Log Directory****Description**

The log directory for log files of the role Knox Gateway.

Related Name

log_dir

Default Value

/var/log/knox/gateway

API Name

log_dir

Required

false

Knox Gateway Logging Threshold**Description**

The minimum log level for Knox Gateway logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Knox Gateway Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Knox Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Knox Gateway Max Log Size**Description**

The maximum size, in megabytes, per log file for Knox Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

knox_gateway_fd_thresholds

Required

false

Knox Gateway Host Health Test

Description

When computing the overall Knox Gateway health, consider the host's health.

Related Name

Default Value

true

API Name

knox_gateway_host_health_enabled

Required

false

Knox Gateway Process Health Test

Description

Enables the health test that the Knox Gateway's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

knox_gateway_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.

- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking [View as JSON](#). In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more

details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

false

Enable Auto Discovery (cdp-proxy-api) - NiFi**Description**

Enables Knox auto-discovery for the NiFi in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.nifi

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_nifi

Required

false

Enable Auto Discovery (cdp-proxy-api) - NiFi Registry**Description**

Enables Knox auto-discovery for the NiFi Registry in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.nifi-registry

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_nifi_registry

Required

false

Enable Auto Discovery (cdp-proxy-api) - Oozie Server**Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.oozie

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_oozie

Required

false

Enable Auto Discovery (cdp-proxy-api) - Profiler Admin API**Description**

Enables Knox auto-discovery for the Profiler Admin API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-admin-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_profiler_admin_api

Required

false

Enable Auto Discovery (cdp-proxy-api) - Profiler Metrics API**Description**

Enables Knox auto-discovery for the Profiler Metrics API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-metrics-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_profiler_metrics_api

Required

false

Enable Auto Discovery (cdp-proxy-api) - Profiler Scheduler API**Description**

Enables Knox auto-discovery for the Profiler Scheduler API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-scheduler-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_profiler_scheduler_api

Required

false

Enable Auto Discovery (cdp-proxy-api) - Ranger Admin**Description**

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.ranger

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_ranger

Required

false

Enable Auto Discovery (cdp-proxy-api) - ResourceManager**Description**

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.resourcemanager

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_resourcemanager

Required

false

Enable Auto Discovery (cdp-proxy-api) - Schema Registry API**Description**

Enables Knox auto-discovery for the Schema Registry API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.schema-registry

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_schema_registry

Required

false

Enable Auto Discovery (cdp-proxy-api) - Stream Messaging Manager API**Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.smm-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_smm

Required

false

Enable Auto Discovery (cdp-proxy-api) - Solr Server**Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.solr

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_solr

Required

false

Enable Auto Discovery (cdp-proxy-api) - HBase Master API**Description**

Enables Knox auto-discovery for the HBase Master API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.webhbase

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_webhbase

Required

false

Enable Auto Discovery (cdp-proxy-api) - WebHDFS API**Description**

Enables Knox auto-discovery for the WebHDFS API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.webhdfs

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_webhdfs

Required

false

Enable Auto Discovery (cdp-proxy-api) - Zeppelin Server**Description**

Enables Knox auto-discovery for the Zeppelin Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.zeppelinws

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_zeppelin_ws

Required

false

Enable Auto Discovery (cdp-proxy) - Atlas API**Description**

Enables Knox auto-discovery for the Atlas API in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.atlas-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_atlas

Required

false

Enable Auto Discovery (cdp-proxy) - Atlas Web UI**Description**

Enables Knox auto-discovery for the Atlas Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.atlas

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_atlas_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Cloudera Manager API**Description**

Enables Knox auto-discovery for the Cloudera Manager API in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.cm-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_cm_api

Required

false

Enable Auto Discovery (cdp-proxy) - Cloudera Manager Admin Console**Description**

Enables Knox auto-discovery for the Cloudera Manager Admin Console in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.cm-ui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_cm_ui

Required

false

Enable Auto Discovery (cdp-proxy) - HBase Web UI**Description**

Enables Knox auto-discovery for the HBase Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.hbaseui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_hbase_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Namenode Web UI**Description**

Enables Knox auto-discovery for the Namenode Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.hdfsui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_hdfs_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Impala Catalog Server**Description**

Enables Knox auto-discovery for the Impala Catalog Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.impala

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_impala

Required

false

Enable Auto Discovery (cdp-proxy) - Impala Catalog Server Web UI**Description**

Enables Knox auto-discovery for the Impala Catalog Server Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.impalaui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_impala_ui

Required

false

Enable Auto Discovery (cdp-proxy) - HistoryServer Web UI**Description**

Enables Knox auto-discovery for the HistoryServer Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.jobhistoryui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_jobhistory_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Kudu Master Web UI**Description**

Enables Knox auto-discovery for the Kudu Master Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.kuduui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_kudu_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Livy Server Web UI**Description**

Enables Knox auto-discovery for the Livy Server Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.livyserver

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_livyserver

Required

false

Enable Auto Discovery (cdp-proxy) - NameNode**Description**

Enables Knox auto-discovery for the NameNode in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.namenode

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_namenode

Required

false

Enable Auto Discovery (cdp-proxy) - Oozie Server**Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.oozie

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_oozie

Required

false

Enable Auto Discovery (cdp-proxy) - Oozie Web UI

Description

Enables Knox auto-discovery for the Oozie Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.oozieui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_oozie_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Ranger Admin

Description

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.ranger

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_ranger

Required

false

Enable Auto Discovery (cdp-proxy) - Ranger Admin Web UI

Description

Enables Knox auto-discovery for the Ranger Admin Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.rangerui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_ranger_ui

Required

false

Enable Auto Discovery (cdp-proxy) - ResourceManager

Description

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.resourcemanager

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_resourcemanager

Required

false

Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager API**Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.smm-api

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_smm

Required

false

Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager Web UI**Description**

Enables Knox auto-discovery for the Stream Messaging Manager Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.smm-ui

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_smm_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Solr Server**Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.solr

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_solr

Required

false

Enable Auto Discovery (cdp-proxy) - Spark History Server Web UI**Description**

Enables Knox auto-discovery for the Spark History Server Web UI in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.sparkhistoryui`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_sparkhistory_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI****Description**

Enables Knox auto-discovery for the ResourceManager Web UI in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.yarnui`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_yarn_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI V2****Description**

Enables Knox auto-discovery for the ResourceManager Web UI V2 in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.yarnuiv2`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_yarn_ui_v2`**Required**`false`**Enable Auto Discovery (cdp-proxy) - Zeppelin Server Web UI****Description**

Enables Knox auto-discovery for the Zeppelin Server Web UI in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.zeppelinui`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ui`**Required**`false`

Enable Auto Discovery (cdp-proxy) - Zeppelin Server

Description

Enables Knox auto-discovery for the Zeppelin Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.zeppelinws

Default Value

false

API Name

gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ws

Required

false

Auto Discovery - Cluster

Description

The cluster where you would like Knox activates the auto-discovery feature

Related Name

gateway.auto.discovery.cluster

Default Value

false

API Name

gateway_auto_discovery_cluster

Required

false

Enable/Disable Service Auto-Discovery

Description

Whether Knox's service auto-discovery feature is enabled

Related Name

gateway.auto.discovery.enabled

Default Value

false

API Name

gateway_auto_discovery_enabled

Required

false

Auto Discovery - Password

Description

The password which Knox's service auto-discovery feature uses to connect to CM

Related Name

gateway.auto.discovery.password

Default Value

false

API Name

gateway_auto_discovery_password

Required

false

Auto Discovery - User

Description

The user name which Knox's service auto-discovery feature uses to connect to CM

Related Name

gateway.auto.discovery.user

Default Value

admin

API Name

gateway_auto_discovery_user

Required

false

Knox Simplified Topology Management - Monitoring Interval

Description

Defines the frequency of Cloudera Manager descriptors file (cdp-descriptors.xml) monitoring.

Related Name

gateway.cloudera.manager.descriptors.monitor.interval

Default Value

10 second(s)

API Name

gateway_cloudera_manager_descriptors_monitor_interval

Required

false

Knox Gateway Configuration Directory

Description

Contains configuration files that apply to the gateway globally (i.e. not cluster specific).

Related Name

gateway_conf_dir

Default Value

/var/lib/knox/gateway/conf

API Name

gateway_conf_dir

Required

false

Knox Gateway Data Directory

Description

Contains security and topology specific artifacts as well as important applications for admin-ui

Related Name

gateway_data_dir

Default Value

/var/lib/knox/gateway/data

API Name

gateway_data_dir

Required

false

Gateway - Default App Topology Name**Description**

When a topology file is deployed with a file name that matches the configured default topology name, a specialized mapping for URLs is installed for that particular topology. This allows the URLs that are expected by the existing Hadoop CLIs for WebHDFS to be used in interacting with the specific Hadoop cluster that is represented by the default topology file.

Related Name

default.app.topology.name

Default Value**API Name**

gateway_default_topology_name

Required

false

Knox Simplified Topology Management - cdp-proxy**Description**

Knox descriptor block for 'cdp-proxy' topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of an service information entry is: \$SERVICE_NAME[:\$PARAMETER_NAME=\$PARAMETER_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:test.pramameter.name=test.parameter.value

Related Name

cdp-proxy

Default Value

providerConfigRef=sso CM-API:httpclient.connectionTimeout=5m CM-API:httpclient.socketTimeout=5m IMPALA:httpclient.connectionTimeout=5m IMPALA:httpclient.socketTimeout=5m RANGER:replayBufferSize=65

API Name

gateway_descriptor_cdp_proxy

Required

false

Knox Simplified Topology Management - cdp-proxy-api**Description**

Knox descriptor block for 'cdp-proxy-api topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of an service information entry is: \$SERVICE_NAME[:\$PARAMETER_NAME=\$PARAMETER_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: NIFI, HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:test.pramameter.name=test.parameter.value

Related Name

cdp-proxy-api

Default Value

providerConfigRef=pam CM-API:httpclient.connectionTimeout=5m CM-API:httpclient.socketTimeout=5m HIVE:httpclient.connectionTimeout=5m HIVE:httpclient.socketTimeout=5m IMPALA:httpclient.connectionTimeout=5m IMPALA:httpclient.socketTimeout=5m NIFI:useTwoWaySsl=true NIFI-REGISTRY:useTwoWaySsl=true RANGER:replayBufferSize=65

API Name

gateway_descriptor_cdp_proxy_api

Required

false

Knox Gateway Dispatch Whitelist**Description**

The whitelist to be applied for dispatches associated with the service roles specified by gateway.dispatch.whitelist.services. By default this is replaced with DEFAULT or HTTPS_ONLY based on if TLS is enabled.

Related Name

gateway.dispatch.whitelist

Default Value

WHITELIST_CONFIG_REPLACEME

API Name

gateway_dispatch_whitelist

Required

false

Knox Gateway Dispatch Whitelist Services**Description**

The comma-delimited list of service roles for which the 'gateway.dispatch.whitelist' should be applied

Related Name

gateway.dispatch.whitelist.services

Default Value

DATANODE, HBASEUI, HDFSUI, IMPALAUUI, JOBHISTORYUI, KUDUUI, NODEUI, YARNUI, YARNUIV2, Knoxauth

API Name

gateway_dispatch_whitelist_services

Required

false

Gateway Config Directory**Description**

The directory within 'gateway_data_dir' that contains gateway topology files and deployments.

Related Name

gateway.gateway.conf.dir

Default Value

deployments

API Name

gateway_gateway_conf_dir

Required

false

Knox Gateway Initial/Max Heapsize**Description**

Initial/Maximum size for the Java Process heap. Passed to Java -Xmx/-Xms. Measured in megabytes.

Related Name

gateway_heap_size

Default Value

1 GiB

API Name

gateway_heap_size

Required

true

Additional Gateway Java Options**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here. -Xmx/-Xms should not be specified here: to set the heapsize use the 'Knox Gateway Initial/Max Heapsize' parameter

Related Name

gateway_java_opts

Default Value**API Name**

gateway_java_opts

Required

false

Admin Groups**Description**

Admin groups for Knox

Related Name

gateway.knox.admin.groups

Default Value

admin

API Name

gateway_knox_admin_groups

Required

false

Knox Gateway Log Level

Description

The logging level of Knox Gateway

Related Name

gateway_log_level

Default Value

ERROR

API Name

gateway_log_level

Required

false

Knox Master Secret

Description

The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores

Related Name

gateway_master_secret

Default Value**API Name**

gateway_master_secret

Required

true

Gateway Path

Description

The default context path for the gateway.

Related Name

gateway.path

Default Value

gateway

API Name

gateway_path

Required

true

Ranger Knox Plugin Conf Path

Description

Staging directory for Ranger Knox Plugin Configuration. This should generally not be changed.

Related Name

gateway_ranger_knox_plugin_conf_path

Default Value

/var/lib/knox/ranger-knox-plugin

API Name

gateway_ranger_knox_plugin_conf_path

Required

true

Ranger Knox Plugin Audit Hdfs Spool Directory Path**Description**

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/knox/gateway/audit/hdfs/spool

API Name

gateway_ranger_knox_plugin_hdfs_audit_spool_directory

Required

true

Ranger Knox Plugin Policy Cache Directory Path**Description**

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.knox.policy.cache.dir

Default Value

/var/lib/ranger/knox/gateway/policy-cache

API Name

gateway_ranger_knox_plugin_policy_cache_directory

Required

true

Ranger Knox Plugin Audit Solr Spool Directory Path**Description**

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/knox/gateway/audit/solr/spool

API Name

gateway_ranger_knox_plugin_solr_audit_spool_directory

Required

true

Ranger Plugin Trusted Proxy IP Address**Description**

Accepts a list of IP addresses of proxy servers for trusting.

Related Name

ranger.plugin.knox.trusted.proxy.ipaddress

Default Value**API Name**

gateway_ranger_plugin_trusted_proxy_ipaddress

Required

false

Ranger Plugin Use X-Forwarded For IP Address**Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.knox.use.x-forwarded-for.ipaddress

Default Value

false

API Name

gateway_ranger_plugin_use_x_forwarded_for_ipaddress

Required

false

Cookie Scoping Enabled**Description**

Enable/Disable cookie scoping feature.

Related Name

gateway.scope.cookies.feature.enabled

Default Value

false

API Name

gateway_scope_cookies_feature_enabled

Required

false

Security - Signing Key Alias**Description**

The alias for the signing keypair within the keystore specified via gateway_signing_keystore_name

Related Name

gateway.signing.key.alias

Default Value**API Name**

gateway_signing_key_alias

Required

false

Security - Signing Keystore Name

Description

The filename of keystore file that contains the signing keypair

Related Name

gateway.signing.keystore.name

Default Value**API Name**

gateway_signing_keystore_name

Required

false

Security - Signing Keystore Type

Description

The type of the keystore file where the signing keypair is stored. See gateway_signing_keystore_name

Related Name

gateway.signing.keystore.type

Default Value**API Name**

gateway_signing_keystore_type

Required

false

Security - TLS Certificate Alias (Optional)

Description

The alias for the Gateway's TLS certificate and keypair within the default keystore or the keystore specified via gateway.tls.keystore.path

Related Name

gateway_tls_certificate_alias

Default Value**API Name**

gateway_tls_certificate_alias

Required

false

Security - TLS Certificate Path (Optional)

Description

The path for the TLS certificate which Knox will import in the CM generated/distributed keystore in case SSL is enabled (if any).

Related Name

gateway_tls_certificate_path

Default Value**API Name**

gateway_tls_certificate_path

Required

false

Websockets Enabled**Description**

Enable/Disable websocket feature.

Related Name

gateway.websocket.feature.enabled

Default Value

true

API Name

gateway_websocket_feature_enabled

Required

false

X-Forwarded Header Context Service Name**Description**

The service name to be added in x-forward-context header.

Related Name

gateway.xforwarded.header.context.append.servicename

Default Value

LIVYSERVER

API Name

gateway_xforwarded_header_context_append_servicename

Required

false

Admin Group Mapping - Class Name**Description**

The class name used for Hadoop admin group mapping

Related Name

gateway.group.config.hadoop.security.group.mapping

Default Value

org.apache.hadoop.security.ShellBasedUnixGroupsMapping

API Name

hadoop_security_group_mapping_class

Required

false

Hadoop Group Mapping - Negative Cache Expiration**Description**

The Hadoop group mapping negative cache expiration in seconds

Related Name

gateway.group.config.hadoop.security.groups.negative-cache.secs

Default Value

5 second(s)

API Name

hadoop_security_group_negative_cache_expiration_seconds

Required

false

Hadoop Group Mapping - Positive Cache Expiration**Description**

The Hadoop group mapping positive cache expiration in seconds

Related Name

gateway.group.config.hadoop.security.groups.cache.secs

Default Value

10 second(s)

API Name

hadoop_security_group_positive_cache_expiration_seconds

Required

false

krb5.conf Location**Description**

Absolute path to krb5.conf file

Related Name

java.security.krb5.conf

Default Value

/etc/krb5.conf

API Name

java_security_krb5_conf

Required

false

KRB5 Debug**Description**

Boolean flag indicating whether to enable debug messages for krb5 authentication

Related Name

sun.security.krb5.debug

Default Value

false

API Name

sun_security_krb5_debug

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Gateway HTTP Port

Description

The HTTP port for the Gateway.

Related Name

gateway.port

Default Value

8443

API Name

gateway_port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Knox Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

gateway.httpClient.truststore.path

Default Value**API Name**

ssl_client_truststore_location

Required

false

Knox Gateway TLS/SSL Trust Store Password**Description**

The password for the Knox Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value****API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Knox Gateway**Description**

Encrypt communication between clients and Knox Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

knox.enableTLS

Default Value

false

API Name

ssl_enabled

Required

false

Knox Gateway TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

gateway.tls.keystore.path

Default Value**API Name**

ssl_server_keystore_location

Required

false

Knox Gateway TLS/SSL Server Keystore File Password**Description**

The password for the Knox Gateway keystore file.

Related Name**Default Value****API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/cdp-descriptors.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/gateway-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-audit.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-security.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Auto Discovery - Address**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_auto_discovery_address

Required

true

Suppress Parameter Validation: Auto Discovery - Cluster**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Cluster parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_auto_discovery_cluster

Required

true

Suppress Parameter Validation: Auto Discovery - Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_auto_discovery_password

Required

true

Suppress Parameter Validation: Auto Discovery - User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_auto_discovery_user

Required

true

Suppress Parameter Validation: Knox Gateway Configuration Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Configuration Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_conf_dir

Required

true

Suppress Parameter Validation: Knox Gateway Data Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Data Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_data_dir

Required

true

Suppress Parameter Validation: Gateway - Default App Topology Name

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway - Default App Topology Name parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_default_topology_name

Required

true

Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy

Required

true

Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy-api

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy-api parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy_api

Required

true

Suppress Parameter Validation: Knox Gateway Dispatch Whitelist**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist

Required

true

Suppress Parameter Validation: Knox Gateway Dispatch Whitelist Services**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist Services parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist_services

Required

true

Suppress Parameter Validation: Gateway Config Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_gateway_conf_dir

Required

true

Suppress Parameter Validation: Knox Gateway Initial/Max Heapsize**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Initial/Max Heapsize parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_heap_size

Required

true

Suppress Parameter Validation: Additional Gateway Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Gateway Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_java_opts

Required

true

Suppress Parameter Validation: Admin Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_knox_admin_groups

Required

true

Suppress Parameter Validation: Knox Master Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Master Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_master_secret

Required

true

Suppress Parameter Validation: Gateway Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_path

Required

true

Suppress Parameter Validation: Gateway HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_port

Required

true

Suppress Parameter Validation: Ranger Knox Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_knox_plugin_conf_path

Required

true

Suppress Parameter Validation: Ranger Knox Plugin Audit Hdfs Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Hdfs Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_gateway_ranger_knox_plugin_hdfs_audit_spool_directory`**Required**`true`**Suppress Parameter Validation: Ranger Knox Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_knox_plugin_policy_cache_directory`**Required**`true`**Suppress Parameter Validation: Ranger Knox Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_knox_plugin_solr_audit_spool_directory`**Required**`true`**Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_plugin_trusted_proxy_ipaddress`**Required**`true`**Suppress Parameter Validation: Security - Signing Key Alias****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_signing_key_alias

Required

true

Suppress Parameter Validation: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_keystore_name

Required

true

Suppress Parameter Validation: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_keystore_type

Required

true

Suppress Parameter Validation: Security - TLS Certificate Alias (Optional)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Alias (Optional) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_alias

Required

true

Suppress Parameter Validation: Security - TLS Certificate Path (Optional)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Path (Optional) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_path

Required

true

Suppress Parameter Validation: X-Forwarded Header Context Service Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the X-Forwarded Header Context Service Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_xforwarded_header_context_append_servicename

Required

true

Suppress Parameter Validation: Admin Group Mapping - Class Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_security_group_mapping_class

Required

true

Suppress Parameter Validation: krb5.conf Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_java_security_krb5_conf

Required

true

Suppress Parameter Validation: Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_knox_gateway_role_env_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_unexpected_exits

Required

true

Knox IDBroker**Advanced****Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml****Description**

For advanced use only. A string to be inserted into conf/gateway-reloadable.xml for this role only.

Related Name**Default Value****API Name**

conf/gateway-reloadable.xml_role_safety_valve

Required

false

Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml**Description**

For advanced use only. A string to be inserted into conf/gateway-site.xml for this role only.

Related Name**Default Value****API Name**

conf/gateway-site.xml_role_safety_valve

Required

false

Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

IDBROKER_role_env_safety_valve

Required

false

Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from

publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs

Knox IDBroker Log Directory

Description

The log directory for log files of the role Knox IDBroker.

Related Name

log_dir

Default Value

/var/log/knox/idbroker

API Name

log_dir

Required

false

Knox IDBroker Logging Threshold**Description**

The minimum log level for Knox IDBroker logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Knox IDBroker Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Knox IDBroker logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Knox IDBroker Max Log Size**Description**

The maximum size, in megabytes, per log file for Knox IDBroker logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

`enable_alerts`

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

`enable_config_alerts`

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

`idbroker_fd_thresholds`

Required

false

Knox IDBroker Host Health Test

Description

When computing the overall Knox IDBroker health, consider the host's health.

Related Name**Default Value**

true

API Name

`idbroker_host_health_enabled`

Required

false

Knox IDBroker Process Health Test

Description

Enables the health test that the Knox IDBroker's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

idbroker_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.

- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

`otelcol_extensions`

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.

- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

Required

false

Knox IDBroker AZURE VM Assumer Identity

Description

A user assigned managed identity that has Virtual Machine Contributor and Managed Identity Operator roles scoped at the resource group where IDBroker Virtual Machine is running.

Related Name

idbroker_azure_vm_assumer_identity

Default Value**API Name**

idbroker_azure_vm_assumer_identity

Required

false

Knox IDBroker Configuration Directory

Description

Contains configuration files that apply to the gateway globally (i.e. not cluster specific).

Related Name

idbroker_conf_dir

Default Value

/var/lib/knox/idbroker/conf

API Name

idbroker_conf_dir

Required

false

Knox IDBroker Data Directory

Description

Contains security and topology specific artifacts as well as important applications for admin-ui

Related Name

idbroker_data_dir

Default Value

/var/lib/knox/idbroker/data

API Name

idbroker_data_dir

Required

false

Gateway Config Directory**Description**

The directory within 'idbroker_data_dir' that contains gateway topology files and deployments.

Related Name

gateway.gateway.conf.dir

Default Value

deployments

API Name

idbroker_gateway_gateway_conf_dir

Required

false

Admin Groups**Description**

Admin groups for Knox

Related Name

gateway.knox.admin.groups

Default Value

admin

API Name

idbroker_gateway_knox_admin_groups

Required

false

Gateway Path**Description**

The default context path for the gateway.

Related Name

gateway.path

Default Value

gateway

API Name

idbroker_gateway_path

Required

true

Cookie Scoping Enabled**Description**

Enable/Disable cookie scoping feature.

Related Name

gateway.scope.cookies.feature.enabled

Default Value

false

API Name

idbroker_gateway_scope_cookies_feature_enabled

Required

false

Security - Signing Key Alias**Description**

The alias for the signing keypair within the keystore specified via idbroker_gateway_signing_keystore_name

Related Name

gateway.signing.key.alias

Default Value**API Name**

idbroker_gateway_signing_key_alias

Required

false

Security - Signing Keystore Name**Description**

The filename of keystore file that contains the signing keypair

Related Name

gateway.signing.keystore.name

Default Value**API Name**

idbroker_gateway_signing_keystore_name

Required

false

Security - Signing Keystore Type**Description**

The type of the keystore file where the signing keypair is stored. See idbroker_gateway_signing_keystore_name

Related Name

gateway.signing.keystore.type

Default Value**API Name**

idbroker_gateway_signing_keystore_type

Required

false

Knox IDBroker GCP Credential Key**Description**

The GCP Credential Key

Related Name

idbroker_gcp_credential_key

Default Value**API Name**

idbroker_gcp_credential_key

Required

false

Knox IDBroker GCP Credential Secret**Description**

The GCP Credential Secret

Related Name

idbroker_gcp_credential_secret

Default Value**API Name**

idbroker_gcp_credential_secret

Required

false

Knox IDBroker GCP Group Mapping**Description**

The list of GCP group-role mappings in 'group=role[;group=role]...[;group=role]' format. A 'group=role' declaration indicates that all authenticated users that are member of the specified group should be able to assume the specified role. For instance: admin=storage-admin@XYZ.iam.gserviceaccount.com;audit=storage-read-only@XYZ.iam.gserviceaccount.com

Related Name

idbroker.gcp.group.role.mapping

Default Value**API Name**

idbroker_gcp_group_mapping

Required

false

Knox IDBroker GCP User Mapping**Description**

The list of GCP user-role mappings in 'user=role[;user=role]...[;user=role]' format. A 'user=role' declaration indicates that this is a mapping of the authenticated user's primary principal to the specified role. For instance: admin=storage-admin@XYZ.iam.gserviceaccount.com;guest=storage-read-only@XYZ.iam.gserviceaccount.com

Related Name

idbroker.gcp.user.role.mapping

Default Value**API Name**

idbroker_gcp_user_mapping

Required

false

Admin Group Mapping - Class Name**Description**

The class name used for Hadoop admin group mapping

Related Name

gateway.group.config.hadoop.security.group.mapping

Default Value

org.apache.hadoop.security.ShellBasedUnixGroupsMapping

API Name

idbroker_hadoop_security_group_mapping_class

Required

false

IDBroker Initial/Max Heapsize**Description**

Initial/Maximum size for the Java Process heap. Passed to Java -Xmx/-Xms. Measured in megabytes.

Related Name

idbroker_heap_size

Default Value

1 GiB

API Name

idbroker_heap_size

Required

true

Additional IDBroker Java Options**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here. -Xmx/-Xms should not be specified here: to set the heapsize use the 'Knox Gateway Initial/Max Heapsize' parameter

Related Name

idbroker_java_opts

Default Value**API Name**

krb5.conf Location**Description**

Absolute path to krb5.conf file

Related Name

java.security.krb5.conf

Default Value

/etc/krb5.conf

API Name

idbroker_java_security_krb5_conf

Required

false

Kerberos Proxyuser Block**Description**

Proxyuser configuration used in Knox's 'dt' topology in case Kerberos is enabled. Must conform a valid JSON key-value format!

Related Name

idbroker_kerberos_dt_proxyuser_block

Default Value

hadoop.proxyuser.livy.hosts: * hadoop.proxyuser.livy.groups: * hadoop.proxyuser.hive.hosts: *
hadoop.proxyuser.hive.groups: * hadoop.proxyuser.httpfs.hosts: * hadoop.proxyuser.httpfs.groups:
* hadoop.proxyuser.hue.hosts: * hadoop.proxyuser.hue.groups: * hadoop.proxyuser.oozie.hosts:
* hadoop.proxyuser.oozie.groups: * hadoop.proxyuser.impala.hosts: *
hadoop.proxyuser.impala.groups: *

API Name

idbroker_kerberos_dt_proxyuser_block

Required

false

IDBroker Knox Token TTL**Description**

This indicates the lifespan of the token. Once it expires a new token must be acquired from KnoxToken service. This is in milliseconds.

Related Name

idbroker_knox_token_ttl_ms

Default Value

7 day(s)

API Name

idbroker_knox_token_ttl_ms

Required

false

Knox IDBroker Log Directory**Description**

The folder where Knox IDBroker puts its logs

Related Name

idbroker_log_dir

Default Value

/var/log/knox/idbroker

API Name

idbroker_log_dir

Required

false

IDBroker Log Level**Description**

The logging level of IDBroker

Related Name

idbroker_log_level

Default Value

ERROR

API Name

idbroker_log_level

Required

false

IDBroker Master Secret**Description**

The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores

Related Name

idbroker_master_secret

Default Value**API Name**

idbroker_master_secret

Required

true

Gateway Config Refresh Interval**Description**

Defines the frequency of gateway configuration refresh.

Related Name

gateway.config.refresh.interval

Default Value

10 second(s)

API Name

idbroker_relaodable_refresh_interval_ms

Required

false

KRB5 Debug**Description**

Boolean flag indicating whether to enable debug messages for krb5 authentication

Related Name

sun.security.krb5.debug

Default Value

false

API Name

idbroker_sun_security_krb5_debug

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Gateway HTTP Port****Description**

The HTTP port for the Gateway.

Related Name

gateway.port

Default Value

8444

API Name

idbroker_gateway_port

Required

true

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Knox IDBroker TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox IDBroker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

gateway.httpClient.truststore.path

Default Value**API Name**

ssl_client_truststore_location

Required

false

Knox IDBroker TLS/SSL Trust Store Password

Description

The password for the Knox IDBroker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value**

API Name

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Knox IDBroker**Description**

Encrypt communication between clients and Knox IDBroker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

knox.enableTLS

Default Value

false

API Name

ssl_enabled

Required

false

Knox IDBroker TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox IDBroker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

gateway.tls.keystore.path

Default Value**API Name**

ssl_server_keystore_location

Required

false

Knox IDBroker TLS/SSL Server Keystore File Password**Description**

The password for the Knox IDBroker keystore file.

Related Name**Default Value****API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

`stacks_collection_frequency`**Required**`false`**Stacks Collection Method****Description**

The method used to collect stacks. The `jstack` option involves periodically running the `jstack` command against the role's daemon process. The `servlet` method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the `servlet` method is selected, that HTTP endpoint is periodically scraped.

Related Name`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for `conf/gateway-reloadable.xml` parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_conf/gateway-reloadable.xml_role_safety_valve`**Required**`true`

Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/gateway-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Credentials Key**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Key parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_key

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Credentials Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AWS User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_user_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE ADLS2 Tenant Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE ADLS2 Tenant Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_adls2_tenant_name

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' ClientID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' ClientID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_clientid

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' ClientID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' ClientID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_clientid

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_user_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE VM Assumer Identity**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE VM Assumer Identity parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_vm_assumer_identity

Required

true

Suppress Parameter Validation: Knox IDBroker Configuration Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Configuration Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_conf_dir

Required

true

Suppress Parameter Validation: Knox IDBroker Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_data_dir

Required

true

Suppress Parameter Validation: Gateway Config Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_gateway_conf_dir

Required

true

Suppress Parameter Validation: Admin Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_knox_admin_groups

Required

true

Suppress Parameter Validation: Gateway Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_path

Required

true

Suppress Parameter Validation: Gateway HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_idbroker_gateway_port

Required

true

Suppress Parameter Validation: Security - Signing Key Alias**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_key_alias

Required

true

Suppress Parameter Validation: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_name

Required

true

Suppress Parameter Validation: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_type

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Credential Key**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Key parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_key

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Credential Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_secret

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker GCP User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_user_mapping

Required

true

Suppress Parameter Validation: Admin Group Mapping - Class Name

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_hadoop_security_group_mapping_class

Required

true

Suppress Parameter Validation: IDBroker Initial/Max Heapsize

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Initial/Max Heapsize parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_heap_size

Required

true

Suppress Parameter Validation: Additional IDBroker Java Options

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional IDBroker Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_java_opts

Required

true

Suppress Parameter Validation: krb5.conf Location

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_java_security_krb5_conf

Required

true

Suppress Parameter Validation: Kerberos Proxyuser Block**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Proxyuser Block parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_kerberos_dt_proxyuser_block

Required

true

Suppress Parameter Validation: Knox IDBroker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_log_dir

Required

true

Suppress Parameter Validation: IDBroker Master Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Master Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_master_secret

Required

true

Suppress Parameter Validation: Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_role_env_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Location

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_idbroker_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_unexpected_exits

Required

true

Service-Wide**Advanced****Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

For advanced use only, a string to be inserted into conf/gateway-site.xml. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

conf/gateway-site.xml_service_safety_valve

Required

false

Knox Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

KNOX_service_env_safety_valve

Required

false

System Group

Description

The group that this service's processes should run as.

Related Name**Default Value**

knox

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name**Default Value**

knox

API Name

process_username

Required

true

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Knox IDBroker Monitoring Thresholds**Description**

The health test thresholds of the overall Knox IDBroker health. The check returns "Concerning" health if the percentage of "Healthy" Knox IDBrokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox IDBrokers falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 49.0 %

API Name

KNOX_IDBROKER_healthy_thresholds

Required

false

Healthy Knox Gateway Monitoring Thresholds**Description**

The health test thresholds of the overall Knox Gateway health. The check returns "Concerning" health if the percentage of "Healthy" Knox Gateways falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox Gateways falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 49.0 %

API Name

KNOX_KNOX_GATEWAY_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Other**Automatic Restart on Stop****Description**

Automatically restart the service when a stop is issued.

Related Name

autorestart_on_stop

Default Value

false

API Name

autorestart_on_stop

Required

false

HDFS Service**Description**

Name of the HDFS service that this Knox service instance depends on

Related Name**Default Value****API Name**

hdfs_service

Required

false

Enable Kerberos Authentication**Description**

Boolean flag indicating whether the Hadoop cluster protected by Gateway is secured with Kerberos

Related Name

gateway.hadoop.kerberos.secured

Default Value

false

API Name

kerberos.auth.enabled

Required

false

Ranger Knox Plugin Hdfs Audit Directory**Description**

The HDFS path on which Ranger audits are written.

Related Name

ranger_knox_plugin_hdfs_audit_directory

Default Value

\$ranger_base_audit_url/knox

API Name

ranger_knox_plugin_hdfs_audit_directory

Required

false

RANGER Service**Description**

Name of the RANGER service that this Knox service instance depends on

Related Name**Default Value****API Name**

ranger_service

Required

false

Security**Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

Related Name

Default Value

knox

API Name

kerberos_princ_name

Required

true

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve

API Name

role_config_suppression_gateway_data_dir

Required

true

Suppress Configuration Validator: Gateway - Default App Topology Name**Description**

Whether to suppress configuration warnings produced by the Gateway - Default App Topology Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_default_topology_name

Required

true

Suppress Configuration Validator: Knox Simplified Topology Management - cdp-proxy

Description

Whether to suppress configuration warnings produced by the Knox Simplified Topology Management - cdp-proxy configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy

Required

true

Suppress Configuration Validator: Knox Simplified Topology Management - cdp-proxy-api

Description

Whether to suppress configuration warnings produced by the Knox Simplified Topology Management - cdp-proxy-api configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy_api

Required

true

Suppress Configuration Validator: Knox Gateway Dispatch Whitelist

Description

Whether to suppress configuration warnings produced by the Knox Gateway Dispatch Whitelist configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist

Required

true

Suppress Configuration Validator: Knox Gateway Dispatch Whitelist Services

Description

Whether to suppress configuration warnings produced by the Knox Gateway Dispatch Whitelist Services configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist_services

Required

true

Suppress Configuration Validator: Gateway Config Directory**Description**

Whether to suppress configuration warnings produced by the Gateway Config Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_gateway_conf_dir

Required

true

Suppress Configuration Validator: Knox Gateway Initial/Max Heapsize**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Initial/Max Heapsize configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_heap_size

Required

true

Suppress Configuration Validator: Additional Gateway Java Options**Description**

Whether to suppress configuration warnings produced by the Additional Gateway Java Options configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_java_opts

Required

true

Suppress Configuration Validator: Admin Groups**Description**

Whether to suppress configuration warnings produced by the Admin Groups configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_knox_admin_groups

Required

true

Suppress Configuration Validator: Knox Master Secret**Description**

Whether to suppress configuration warnings produced by the Knox Master Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_master_secret

Required

true

Suppress Configuration Validator: Gateway Path**Description**

Whether to suppress configuration warnings produced by the Gateway Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_path

Required

true

Suppress Configuration Validator: Gateway HTTP Port**Description**

Whether to suppress configuration warnings produced by the Gateway HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_port

Required

true

Suppress Configuration Validator: Ranger Knox Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Conf Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_knox_plugin_conf_path

Required

true

Suppress Configuration Validator: Ranger Knox Plugin Audit Hdfs Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Audit Hdfs Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_knox_plugin_hdfs_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Knox Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Policy Cache Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_knox_plugin_policy_cache_directory

Required

true

Suppress Configuration Validator: Ranger Knox Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Audit Solr Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_knox_plugin_solr_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address**Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Configuration Validator: Security - Signing Key Alias**Description**

Whether to suppress configuration warnings produced by the Security - Signing Key Alias configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_key_alias

Required

true

Suppress Configuration Validator: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_keystore_name

Required

true

Suppress Configuration Validator: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Type configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_signing_keystore_type

Required

true

Suppress Configuration Validator: Security - TLS Certificate Alias (Optional)**Description**

Whether to suppress configuration warnings produced by the Security - TLS Certificate Alias (Optional) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_alias

Required

true

Suppress Configuration Validator: Security - TLS Certificate Path (Optional)**Description**

Whether to suppress configuration warnings produced by the Security - TLS Certificate Path (Optional) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_path

Required

true

Suppress Configuration Validator: X-Forwarded Header Context Service Name**Description**

Whether to suppress configuration warnings produced by the X-Forwarded Header Context Service Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_xforwarded_header_context_append_servicename

Required

true

Suppress Configuration Validator: Admin Group Mapping - Class Name**Description**

Whether to suppress configuration warnings produced by the Admin Group Mapping - Class Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_security_group_mapping_class

Required

true

Suppress Configuration Validator: Knox IDBroker AWS Credentials Key**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Credentials Key configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_key

Required

true

Suppress Configuration Validator: Knox IDBroker AWS Credentials Secret**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Credentials Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_secret

Required

true

Suppress Configuration Validator: Knox IDBroker AWS Group Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Group Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_group_mapping

Required

true

Suppress Configuration Validator: Knox IDBroker AWS User Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS User Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_user_mapping

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE ADLS2 Tenant Name**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE ADLS2 Tenant Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_adls2_tenant_name

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE 'blob-contributor' ClientID**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-contributor' ClientID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_clientid

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE 'blob-contributor' Secret**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-contributor' Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_secret

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE 'blob-reader' ClientID**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-reader' ClientID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_clientid

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE 'blob-reader' Secret**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-reader' Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_secret

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE Group Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE Group Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_group_mapping

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE User Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE User Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_user_mapping

Required

true

Suppress Configuration Validator: Knox IDBroker AZURE VM Assumer Identity**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE VM Assumer Identity configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_vm_assumer_identity

Required

true

Suppress Configuration Validator: Knox IDBroker Configuration Directory**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Configuration Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_conf_dir

Required

true

Suppress Configuration Validator: Knox IDBroker Data Directory**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_data_dir

Required

true

Suppress Configuration Validator: Gateway Config Directory**Description**

Whether to suppress configuration warnings produced by the Gateway Config Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_gateway_conf_dir

Required

true

Suppress Configuration Validator: Admin Groups**Description**

Whether to suppress configuration warnings produced by the Admin Groups configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_knox_admin_groups

Required

true

Suppress Configuration Validator: Gateway Path**Description**

Whether to suppress configuration warnings produced by the Gateway Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_path

Required

true

Suppress Configuration Validator: Gateway HTTP Port**Description**

Whether to suppress configuration warnings produced by the Gateway HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_port

Required

true

Suppress Configuration Validator: Security - Signing Key Alias**Description**

Whether to suppress configuration warnings produced by the Security - Signing Key Alias configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_key_alias

Required

true

Suppress Configuration Validator: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_name

Required

true

Suppress Configuration Validator: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_type

Required

true

Suppress Configuration Validator: Knox IDBroker GCP Credential Key**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Credential Key configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_key

Required

true

Suppress Configuration Validator: Knox IDBroker GCP Credential Secret**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Credential Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_secret

Required

true

Suppress Configuration Validator: Knox IDBroker GCP Group Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Group Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_group_mapping

Required

true

Suppress Configuration Validator: Knox IDBroker GCP User Mapping**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP User Mapping configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_user_mapping

Required

true

Suppress Configuration Validator: Admin Group Mapping - Class Name**Description**

Whether to suppress configuration warnings produced by the Admin Group Mapping - Class Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_hadoop_security_group_mapping_class

Required

true

Suppress Configuration Validator: IDBroker Initial/Max Heapsize**Description**

Whether to suppress configuration warnings produced by the IDBroker Initial/Max Heapsize configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_heap_size

Required

true

Suppress Configuration Validator: Additional IDBroker Java Options**Description**

Whether to suppress configuration warnings produced by the Additional IDBroker Java Options configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_java_opts

Required

true

Suppress Configuration Validator: krb5.conf Location**Description**

Whether to suppress configuration warnings produced by the krb5.conf Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_java_security_krb5_conf

Required

true

Suppress Configuration Validator: Kerberos Proxyuser Block

Description

Whether to suppress configuration warnings produced by the Kerberos Proxyuser Block configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_kerberos_dt_proxyuser_block

Required

true

Suppress Configuration Validator: Knox IDBroker Log Directory

Description

Whether to suppress configuration warnings produced by the Knox IDBroker Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_log_dir

Required

true

Suppress Configuration Validator: IDBroker Master Secret

Description

Whether to suppress configuration warnings produced by the IDBroker Master Secret configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_master_secret

Required

true

Suppress Configuration Validator: Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_role_env_safety_valve

Required

true

Suppress Configuration Validator: krb5.conf Location**Description**

Whether to suppress configuration warnings produced by the krb5.conf Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_java_security_krb5_conf

Required

true

Suppress Configuration Validator: Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_knox_gateway_role_env_safety_valve

Required

true

Suppress Configuration Validator: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Knox Gateway Log Directory

Description

Whether to suppress configuration warnings produced by the Knox Gateway Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_conf/gateway-site.xml_service_safety_valve

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Configuration Validator: Knox IDBroker Count Validator**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_idbroker_count_validator

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Configuration Validator: Knox Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_knox_gateway_count_validator

Required

true

Suppress Parameter Validation: Knox Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_knox_service_env_safety_valve

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger Knox Plugin Hdfs Audit Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_knox_plugin_hdfs_audit_directory

Required

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Knox IDBroker Health

Description

Whether to suppress the results of the Knox IDBroker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_knox_idbroker_healthy

Required

true

Suppress Health Test: Knox Gateway Health

Description

Whether to suppress the results of the Knox Gateway Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

	false
API Name	service_health_suppression_knox_knox_gateway_healthy
Required	true

Livy Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced

Deploy Directory

Description

The directory where the client configs will be deployed

Related Name

Default Value

/etc/livy

API Name

client_config_root_dir

Required

true

Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

Description

For advanced use only, a string to be inserted into the client configuration for livy-conf/livy-client.conf.

Related Name

Default Value

API Name

livy-conf/livy-client.conf_client_config_safety_valve

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Other**Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

50

API Name

client_config_priority

Required

true

Security**Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

livy.truststore

Default Value**API Name**

ssl_client_truststore_location

Required

false

Gateway TLS/SSL Trust Store Password**Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

livy.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy-conf/livy-client.conf_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Livy Server

Advanced

Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf**Description**

For advanced use only. A string to be inserted into livy-conf/livy.conf for this role only.

Related Name**Default Value****API Name**

livy-conf/livy.conf_role_safety_valve

Required

false

Livy Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

LIVY_SERVER_role_env_safety_valve

Required

false

Livy Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Livy Server Log Directory****Description**

The log directory for log files of the role Livy Server.

Related Name

log_dir

Default Value

/var/log/livy

API Name

log_dir

Required

false

Livy Server Logging Threshold**Description**

The minimum log level for Livy Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Livy Server Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Livy Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Livy Server Max Log Size**Description**

The maximum size, in megabytes, per log file for Livy Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

livy_server_fd_thresholds

Required

false

Livy Server Host Health Test**Description**

When computing the overall Livy Server health, consider the host's health.

Related Name**Default Value**

true

API Name

livy_server_host_health_enabled

Required

false

Livy Server Process Health Test**Description**

Enables the health test that the Livy Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

livy_server_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name

Default Value

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Other**Enable Access Control****Description**

Perform access control when processing user requests.

Related Name

livy.server.access-control.enabled

Default Value

true

API Name

livy_access_control_enabled

Required

false

Admin Users**Description**

List of users with admin permissions (can view and modify any session).

Related Name

livy.superusers

Default Value

knox zeppelin

API Name

livy_admin_users

Required

false

Extra JVM Options**Description**

Command line options to add to the Livy Server JVM. May be used also to override options automatically added by CM.

Related Name

livy_extra_java_opts

Default Value**API Name**

livy_extra_java_opts

Required

false

Enable User Impersonation**Description**

Start applications as the requesting user, instead of using the Livy account.

Related Name

livy.impersonation.enabled

Default Value

true

API Name

livy_impersonation_enabled

Required

false

Max Header Size**Description**

Maximum size of a header field accepted by the Livy server. May need to be increased in certain environments where SPNEGO is enabled.

Related Name

livy.server.request-header.size

Default Value

128 KiB

API Name

livy_max_header_size

Required

false

Java Heap Size of Livy Server**Description**

Maximum size for the Java process heap memory.

Related Name

livy_max_heapsize

Default Value

512 MiB

API Name

livy_max_heapsize

Required

false

Enable RPC Encryption**Description**

Enable encryption of communication between the Livy session and managed Spark sessions.

Related Name

livy_rpc_encryption_enabled

Default Value

true

API Name

livy_rpc_encryption_enabled

Required

false

Enable Livy Thrift Server**Description**

Enables the Livy Thrift server

Related Name

livy.server.thrift.enabled

Default Value

false

API Name

livy_server_thrift_enabled

Required

false

Livy Thrift Server Transport Mode**Description**

Transport mode used by the Livy Thrift server

Related Name

livy.server.thrift.transport.mode

Default Value

binary

API Name

livy_server_thrift_transport_mode

Required

false

Enable Session Recovery**Description**

Enable recovery of live sessions when the Livy server restarts. Uses HDFS to store recovery information.

Related Name

livy_session_recovery_enabled

Default Value

true

API Name

livy_session_recovery_enabled

Required

false

Enable User Authentication**Description**

Enables user authentication using SPNEGO when Kerberos is enabled.

Related Name

livy_spnego_enabled

Default Value

true

API Name

livy_spnego_enabled

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Livy Server Port

Description

The port of the Livy server

Related Name

livy.server.port

Default Value

8998

API Name

livy_server_port

Required

false

Livy Thrift Server Port

Description

The port of the Livy Thrift server

Related Name

Default Value

10090

API Name

livy_server_thrift_port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when

the process starts. Use the same format as used for arguments to the cgexec command:
resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2'
These settings override other cgroup settings.

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page

cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Enable TLS/SSL for Livy Server****Description**

Encrypt communication between clients and Livy Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

livy.tls.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Livy Server TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Livy Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

livy.keystore

Default Value**API Name**

ssl_server_keystore_location

Required

false

Livy Server TLS/SSL Server Keystore File Password**Description**

The password for the Livy Server keystore file.

Related Name

livy.keystore.password

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Livy Server Health

Description

Whether to suppress the results of the Livy Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_livy_livy_livy_server_health

Required

true

Livy for Spark 3 Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced

Deploy Directory

Description

The directory where the client configs will be deployed

Related Name**Default Value**

/etc/livy3

API Name

client_config_root_dir

Required

true

Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf

Description

For advanced use only, a string to be inserted into the client configuration for livy3-conf/livy-client.conf.

Related Name**Default Value****API Name**

livy3-conf/livy-client.conf_client_config_safety_valve

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other**Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

50

API Name

client_config_priority

Required

true

Security**Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

livy.truststore

Default Value**API Name**

ssl_client_truststore_location

Required

false

Gateway TLS/SSL Trust Store Password**Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

livy.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy3-conf/livy-client.conf_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Livy Server for Spark 3

Advanced

Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf**Description**

For advanced use only. A string to be inserted into livy3-conf/livy.conf for this role only.

Related Name**Default Value****API Name**

livy3-conf/livy.conf_role_safety_valve

Required

false

Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

LIVY_SERVER_FOR_SPARK3_role_env_safety_valve

Required

false

Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Livy Server for Spark 3 Log Directory****Description**

The log directory for log files of the role Livy Server for Spark 3.

Related Name

log_dir

Default Value

/var/log/livy3

API Name

log_dir

Required

false

Livy Server for Spark 3 Logging Threshold**Description**

The minimum log level for Livy Server for Spark 3 logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Livy Server for Spark 3 Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Livy Server for Spark 3 logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Livy Server for Spark 3 Max Log Size**Description**

The maximum size, in megabytes, per log file for Livy Server for Spark 3 logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

livy_server_for_spark3_fd_thresholds

Required

false

Livy Server for Spark 3 Host Health Test**Description**

When computing the overall Livy Server for Spark 3 health, consider the host's health.

Related Name**Default Value**

true

API Name

livy_server_for_spark3_host_health_enabled

Required

false

Livy Server for Spark 3 Process Health Test**Description**

Enables the health test that the Livy Server for Spark 3's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

livy_server_for_spark3_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Enable Access Control****Description**

Perform access control when processing user requests.

Default Value

true

API Name

livy_impersonation_enabled

Required

false

Max Header Size

Description

Maximum size of a header field accepted by the Livy server. May need to be increased in certain environments where SPNEGO is enabled.

Related Name

livy.server.request-header.size

Default Value

128 KiB

API Name

livy_max_header_size

Required

false

Java Heap Size of Livy Server**Description**

Maximum size for the Java process heap memory.

Related Name

livy_max_heapsize

Default Value

512 MiB

API Name

livy_max_heapsize

Required

false

Enable RPC Encryption**Description**

Enable encryption of communication between the Livy session and managed Spark sessions.

Related Name

livy_rpc_encryption_enabled

Default Value

true

API Name

livy_rpc_encryption_enabled

Required

false

Enable Livy Thrift Server**Description**

Enables the Livy Thrift server

Related Name

livy.server.thrift.enabled

Default Value

false

API Name

livy_server_thrift_enabled

Required

false

Livy Thrift Server Transport Mode**Description**

Transport mode used by the Livy Thrift server

Related Name

livy.server.thrift.transport.mode

Default Value

binary

API Name

livy_server_thrift_transport_mode

Required

false

Enable Session Recovery**Description**

Enable recovery of live sessions when the Livy server restarts. Uses HDFS to store recovery information.

Related Name

livy_session_recovery_enabled

Default Value

true

API Name

livy_session_recovery_enabled

Required

false

Enable User Authentication**Description**

Enables user authentication using SPNEGO when Kerberos is enabled.

Related Name

livy_spnego_enabled

Default Value

true

API Name

livy_spnego_enabled

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Livy Server Port

Description

The port of the Livy server

Related Name

livy.server.port

Default Value

28998

API Name

livy_server_port

Required

false

Livy Thrift Server Port

Description

The port of the Livy Thrift server

Related Name

livy.server.thrift.port

Default Value

20091

API Name

livy_server_thrift_port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when

the process starts. Use the same format as used for arguments to the cgexec command:
resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2'
These settings override other cgroup settings.

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page

cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Enable TLS/SSL for Livy Server for Spark 3****Description**

Encrypt communication between clients and Livy Server for Spark 3 using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

livy.tls.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Livy Server for Spark 3 TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Livy Server for Spark 3 is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

livy.keystore

Default Value**API Name**

ssl_server_keystore_location

Required

false

Livy Server for Spark 3 TLS/SSL Server Keystore File Password**Description**

The password for the Livy Server for Spark 3 keystore file.

Related Name

livy.keystore.password

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy3-conf/livy.conf_role_safety_valve

Required

true

Suppress Parameter Validation: Admin Users**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy_admin_users

Required

true

Suppress Parameter Validation: Extra JVM Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra JVM Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy_extra_java_opts

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy_server_for_spark3_role_env_safety_valve

Required

true

Suppress Parameter Validation: Livy Server Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy_server_port

Required

true

Suppress Parameter Validation: Livy Thrift Server Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Thrift Server Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_livy_server_thrift_port

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Log Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Livy Server for Spark 3 TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_livy_for_spark3_livy_server_for_spark3_unexpected_exits

Required

true

Service-Wide

Advanced

Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

LIVY_FOR_SPARK3_service_env_safety_valve

Required

false

System Group

Description

The group that this service's processes should run as.

Related Name**Default Value**

livy

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name**Default Value**

livy

API Name

process_username

Required

true

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Livy Server for Spark 3 Role Health Test**Description**

When computing the overall LIVY_FOR_SPARK3 health, consider Livy Server for Spark 3's health

Related Name**Default Value**

true

API Name

LIVY_FOR_SPARK3_LIVY_SERVER_FOR_SPARK3_health_enabled

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Other**HMS Service****Description**

Name of the HMS service that this Livy for Spark 3 service instance depends on

Related Name**Default Value****API Name**

hms_service

Required

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_livy_for_spark3_service_env_safety_valve

Required

true

Suppress Parameter Validation: Recovery Directory (HDFS)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recovery Directory (HDFS) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_livy_recovery_dir

Required

true

Suppress Configuration Validator: Livy Server for Spark 3 Count Validator

Description

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_livy_server_for_spark3_count_validator

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Livy Server for Spark 3 Health**Description**

Whether to suppress the results of the Livy Server for Spark 3 Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_livy_for_spark3_livy_for_spark3_livy_server_for_spark3_health

Required

true

Oozie Properties in Cloudera Runtime 7.1.9

Role groups:

Oozie Server

Advanced

Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists,

it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml**Description**

For advanced use only. A string to be inserted into action-conf/default.xml for this role only.

Related Name**Default Value****API Name**

oozie_action_config_default_safety_valve

Required

false

Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml**Description**

For advanced use only. A string to be inserted into oozie-site.xml for this role only.

Related Name**Default Value****API Name**

oozie_config_safety_valve

Required

false

Oozie ActionService Executor Extension Classes**Description**

Comma-separated list of ActionService executor extension classes. Only action types with associated executors can be used in workflows. For CDH 5.4 and higher, this parameter is used only to specify additional classes for workflows. All executor extension classes included in that release will be added automatically and do not need to be specified.

Related Name

oozie.service.ActionService.executor.ext.classes

Default Value**API Name**

oozie_executor_extension_classes

Required

false

Java Configuration Options for Oozie Server**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name**Default Value**

-XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -
XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -XX:MaxMetaspaceFreeRatio=80
-XX:+DisableExplicitGC

API Name

oozie_java_opts

Required

false

Directory For JSP Temp Files**Description**

Directory to use to for temporary JSP file storage.

Related Name

`oozie.jsp.tmp.dir`**Default Value**`/tmp`**API Name**`oozie_jsp_tmp_dir`**Required**`false`**Default Launcher Max Attempts****Description**

The default YARN maximal attempt count of the Launcher ApplicationMaster.

Related Name`oozie.launcher.default.max.attempts`**Default Value**`2`**API Name**`oozie_launcher_default_max_attempts`**Required**`false`**Default Launcher Memory****Description**

The default amount of memory in MiB that is allocated for the Launcher ApplicationMasters.

Related Name`oozie.launcher.default.memory.mb`**Default Value**`2 GiB`**API Name**`oozie_launcher_default_memory`**Required**`false`**Default Launcher Queue****Description**

The default YARN pool where the Launcher ApplicationMaster is placed.

Related Name`oozie.launcher.default.queue`**Default Value**`default`**API Name**`oozie_launcher_default_queue`**Required**`false`

Oozie Server Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OOZIE_SERVER_role_env_safety_valve

Required

false

Oozie HTTP Request Header Size

Description

Controls the size of the HTTP request header.

Related Name

oozie.http.request.header.size

Default Value

64 KiB

API Name

oozie_service_http_request_header_size

Required

false

Oozie HTTP Response Header Size

Description

Controls the size of the HTTP response header.

Related Name

oozie.http.response.header.size

Default Value

64 KiB

API Name

oozie_service_http_response_header_size

Required

false

Oozie SchemaService Workflow Extension Schemas

Description

Comma-separated list of SchemaService workflow extension schemas for additional action types. From CDH 5.4 and higher, this parameter is used only to specify additional schemas for workflows. All schemas included in that release will be added automatically and do not need to be specified.

Related Name

oozie.service.SchemaService.wf.ext.schemas

Default Value**API Name**

oozie_workflow_extension_schemas

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Database**Oozie Server Data Directory****Description**

Directory where the Oozie Server places its data. Only applicable when using Derby as the database type.

Related Name**Default Value**

/var/lib/oozie/data

API Name

oozie_data_dir

Required

false

Oozie Database Connection Properties**Description**

Properties to set on the database connection directly. See `oozie_datasource_properties` for setting properties on the Datasource object.

Related Name**Default Value****API Name**

oozie_database_connection_properties

Required

false

Oozie Server Database Host**Description**

Hostname of the database used by Oozie Server. If the port is non-default for your database type, use host:port notation. Does not apply if you are using Derby as the database type.

Related Name**Default Value**

localhost

API Name

oozie_database_host

Required

false

Oozie Server Database Is Secure**Description**

Whether Oozie should connect to its database through a secure connection or not

Related Name**Default Value**

false

API Name

oozie_database_is_secure

Required

false

Oozie Server Database Name**Description**

Name of the database used by Oozie Server.

Related Name**Default Value**

oozie

API Name

oozie_database_name

Required

false

Oozie Server Database Password**Description**

Password for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

Related Name

oozie.service.JPIService.jdbc.password

Default Value**API Name**

oozie_database_password

Required

false

Oozie Server Database Type**Description**

Type of the database used by Oozie Server.

Related Name**Default Value**

derby

API Name

oozie_database_type

Required

false

Oozie Server Database User**Description**

Username for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

Related Name

oozie.service.JPAService.jdbc.username

Default Value

sa

API Name

oozie_database_user

Required

false

Oozie Datasource Properties**Description**

Properties to set on the Datasource object (e.g.: lock timeout). NOTE: This will not be set on the database connection, but on the Datasource object wrapping the connection. See also: oozie_database_connection_properties.

Related Name**Default Value****API Name**

oozie_datasource_properties

Required

false

Logs**Oozie Server Logging Threshold****Description**

The minimum log level for Oozie Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Oozie Server Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Oozie Server logs. Typically used by log4j or logback.

Related Name**Default Value**

720

API Name

max_log_backup_index

Required

false

Oozie Server Log Directory**Description**

Directory where Oozie Server will place its log files.

Related Name**Default Value**

/var/log/oozie

API Name

oozie_log_dir

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

heap_dump_directory_free_space_absolute_thresholds

Required

false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Workflow Status Metrics Collection Interval****Description**

Workflow Status metrics collection interval.

Related Name`oozie.service.DBLiteWorkflowStoreService.status.metrics.collection.interval`**Default Value**`1 minute(s)`**API Name**`oozie_job_metric_collection_interval`**Required**`false`

Oozie Server Callable Queue Monitoring Threshold

Description

The health test thresholds of the weighted average size of the Oozie Server callable queue over a recent period. See also Oozie Server Callable Queue Monitoring Period.

Related Name**Default Value**

Warning: 80.0 %, Critical: 95.0 %

API Name

oozie_server_callable_queue_threshold

Required

false

Oozie Server Callable Queue Monitoring Period

Description

The period over which to compute the moving average of the callable queue size.

Related Name**Default Value**

5 minute(s)

API Name

oozie_server_callable_queue_window

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

oozie_server_fd_thresholds

Required

false

Oozie Server Host Health Test

Description

When computing the overall Oozie Server health, consider the host's health.

Related Name**Default Value**

true

API Name

oozie_server_host_health_enabled

Required

false

Pause Duration Thresholds

Description

The health test thresholds for the weighted average extra time the pause monitor spent paused. Specified as a percentage of elapsed wall clock time.

Related Name

Default Value

Warning: 30.0, Critical: 60.0

API Name

oozie_server_pause_duration_thresholds

Required

false

Pause Duration Monitoring Period

Description

The period to review when computing the moving average of extra time the pause monitor spent paused.

Related Name

Default Value

5 minute(s)

API Name

oozie_server_pause_duration_window

Required

false

Oozie Server Process Health Test

Description

Enables the health test that the Oozie Server's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

oozie_server_scm_health_enabled

Required

false

Enable Oozie Server Shared Libraries Version Check

Description

If true, enables version check for Oozie Server and installed shared libraries.

Related Name

Default Value

true

API Name

oozie_server_shared_lib_version_check_enabled

Required

false

Web Metric Collection**Description**

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

Related Name**Default Value**

true

API Name

oozie_server_web_metric_collection_enabled

Required

false

Web Metric Collection Duration**Description**

The health test thresholds on the duration of the metrics request to the web server.

Related Name**Default Value**

Warning: 10 second(s), Critical: Never

API Name

oozie_server_web_metric_collection_thresholds

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:  
$ROLE_PARAM(otelcol_remote_write_user) password:  
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

```
otelcol_extensions
```

Required

```
false
```

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

```
otelcol_processors
```

Required

```
false
```

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

```
otelcol_receivers
```

Required

```
false
```

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name

Default Value

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name

Default Value

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Oozie Email Action From Address****Description**

The from address to be used for mailing all emails for Oozie email action

Related Name

oozie.email.from.address

Default Value

oozie@localhost

API Name

oozie_email_from_address

Required

false

Oozie Email Action SMTP Authentication Enabled**Description**

Enable SMTP authentication for Oozie email action

Related Name

oozie.email.smtp.auth

Default Value

false

API Name

oozie_email_smtp_auth

Required

false

Oozie Email Action SMTP Host**Description**

The SMTP server host to use for Oozie email action

Related Name

oozie.email.smtp.host

Default Value

localhost

API Name

oozie_email_smtp_host

Required

false

Oozie Email Action SMTP Authentication Password**Description**

SMTP password for Oozie email action

Related Name

oozie.email.smtp.password

Default Value**API Name**

oozie_email_smtp_password

Required

false

Oozie Email Action SMTP Authentication Username**Description**

SMTP username for Oozie email action

Related Name

oozie.email.smtp.username

Default Value**API Name**

oozie_email_smtp_username

Required

false

Oozie Server Plugins**Description**

Comma-separated list of Oozie plug-ins to be activated. If one plugin cannot be loaded, all the plugins are ignored.

Related Name

oozie.services.ext

Default Value**API Name**

oozie_plugins_list

Required

false

Maximum concurrency for a given callable type**Description**

Maximum concurrency for a given callable type.. Each command is a callable type: submit, start, run, etc.. Each action type is a callable type: MapReduce, SSH, sub-workflow, etc. All commands that use action executors (action-start, action-end. etc.) use the action type as the callable type.

Related Name

oozie.service.CallableQueueService.callable.concurrency

Default Value

10

API Name

oozie_service_callablequeueservice_callable_concurrency

Required

false

Maximum Callable Queue Size

Description

Maximum callable queue size

Related Name

oozie.service.CallableQueueService.queue.size

Default Value

10000

API Name

oozie_service_callablequeueservice_queue_size

Required

false

Number Threads For Executing Callables

Description

Number of threads used for executing callables

Related Name

oozie.service.CallableQueueService.threads

Default Value

50

API Name

oozie_service_callablequeueservice_threads

Required

false

Enable The Metrics Instrumentation Service

Description

Whether to use the Codehale-based metrics for instrumentation. Enabling this disables the 'instrumentation' REST endpoint and enables the 'metrics' REST endpoint (*hostname:port*/v2/admin/metrics).

Related Name**Default Value**

true

API Name

oozie_use_metric_instrumentation

Required

false

Enable Oozie Server Web Console

Description

If true, enables the Oozie Server web console. ExtJS 2.2 zip archive must be extracted to /var/lib/oozie on the same host as the Oozie Server.

Related Name**Default Value**

false

API Name

oozie_web_console

Required

false

Days to Keep Completed Bundle Jobs**Description**

Completed bundle jobs older than this value, in days, will be purged by the PurgeService.

Related Name

oozie.service.PurgeService.bundle.older.than

Default Value

7 day(s)

API Name

purgeservice_bundle_older_than

Required

false

Days to Keep Completed Coordinator Jobs**Description**

Completed coordinator jobs older than this value, in days, will be purged by the PurgeService.

Related Name

oozie.service.PurgeService.coord.older.than

Default Value

7 day(s)

API Name

purgeservice_coord_older_than

Required

false

Days to Keep Completed Workflow Jobs**Description**

Completed workflow jobs older than this value, in days, will be purged by the PurgeService.

Related Name

oozie.service.PurgeService.older.than

Default Value

30 day(s)

API Name

purgeservice_older_than

Required

false

Enable Purge for Long-Running Coordinator Jobs**Description**

Whether to purge completed workflows and their corresponding coordinator actions of long-running coordinator jobs if the completed workflow jobs are older than the value specified in `oozie.service.PurgeService.older.than`.

Related Name

`oozie.service.PurgeService.purge.old.coord.action`

Default Value

`true`

API Name

`purgeservice_purge_old_coord_action`

Required

`false`

Performance**Default Launcher Virtual CPU Cores****Description**

The default number of Virtual CPU Cores that are allocated for the Launcher ApplicationMasters.

Related Name

`oozie.launcher.default.vcores`

Default Value

`1`

API Name

`oozie_launcher_default_vcores`

Required

`false`

Oozie Server Threadpool Size**Description**

Controls the threadpool size for the Oozie Server (both Jetty and Tomcat).

Related Name

`oozie.server.threadpool.max.threads`

Default Value

`150`

API Name

`oozie_service_threadpool_max_threads`

Required

`false`

Maximum Process File Descriptors**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Oozie Email Action SMTP Port****Description**

The SMTP server port to use for Oozie email action

Related Name

oozie.email.smtp.port

Default Value

25

API Name

oozie_email_smtp_prt

Required

false

Oozie HTTP Port**Description**

Port of Oozie Server

Related Name

oozie.http.port

Default Value

11000

API Name

oozie_http_port

Required

false

Oozie HTTPS Port**Description**

Port of the Oozie Server when using TLS/SSL.

Related Name

oozie.https.port

Default Value

11443

API Name

oozie_https_port

Required

false

Resource Management**Java Heap Size of Oozie Server in Bytes****Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

Related Name**Default Value**

1 GiB

API Name

oozie_java_heapsize

Required

false

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Excluded Cipher Suites****Description**

List of cipher suite names that should be excluded.

Related Name

oozie.https.exclude.cipher.suites

Default Value

TLS_ECDHE_RSA_WITH_RC4_128_SHA
SSL_DHE_RSA_EXPORT_WITH_DES40_CBC_SHA SSL_RSA_WITH_DES_CBC_SHA
SSL_DHE_RSA_WITH_DES_CBC_SHA SSL_RSA_EXPORT_WITH_RC4_40_MD5
SSL_RSA_EXPORT_WITH_DES40_CBC_SHA SSL_RSA_WITH_RC4_128_MD5

API Name

oozie_https_exclude_cipher_suites

Required

false

Enabled TLS Protocols**Description**

TLS protocols accepted by the Oozie Server.

Related Name

oozie.https.include.protocols

Default Value

SSLv2Hello, TLSv1, TLSv1.1, TLSv1.2

API Name

oozie_https_include_protocols

Required

false

Oozie TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Oozie is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

oozie.https.keystore.file

Default Value

/var/lib/oozie/.keystore

API Name

oozie_https_keystore_file

Required

false

Oozie TLS/SSL Server Keystore File Password**Description**

The password for the Oozie keystore file.

Related Name

oozie.https.keystore.pass

Default Value**API Name**

oozie_https_keystore_password

Required

false

Oozie TLS/SSL Trust Store File**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Oozie might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

oozie.https.truststore.file

Default Value**API Name**

oozie_https_truststore_file

Required

false

Oozie TLS/SSL Trust Store Password**Description**

The password for the Oozie TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

oozie.https.truststore.pass

Default Value**API Name**

oozie_https_truststore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_action_config_default_safety_valve

Required

true

Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_config_safety_valve

Required

true

Suppress Parameter Validation: Oozie Server Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_data_dir

Required

true

Suppress Parameter Validation: Oozie Database Connection Properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Database Connection Properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_connection_properties

Required

true

Suppress Parameter Validation: Oozie Server Database Host**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_host

Required

true

Suppress Parameter Validation: Oozie Server Database Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_name

Required

true

Suppress Parameter Validation: Oozie Server Database Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_password

Required

true

Suppress Parameter Validation: Oozie Server Database User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_user

Required

true

Suppress Parameter Validation: Oozie Datasource Properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Datasource Properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_datasource_properties

Required

true

Suppress Parameter Validation: Oozie Email Action From Address**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action From Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_from_address

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Host**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_host

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Authentication Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_password

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_prt

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Authentication Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_username

Required

true

Suppress Parameter Validation: Oozie ActionService Executor Extension Classes

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie ActionService Executor Extension Classes parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_executor_extension_classes

Required

true

Suppress Parameter Validation: Oozie HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_http_port

Required

true

Suppress Parameter Validation: Excluded Cipher Suites**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Excluded Cipher Suites parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_exclude_cipher_suites

Required

true

Suppress Parameter Validation: Oozie TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_keystore_file

Required

Monitoring**Enable Service Level Health Alerts****Description**When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`**Related Name****Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Oozie Server Monitoring Thresholds

Description

The health test thresholds of the overall Oozie Server health. The check returns "Concerning" health if the percentage of "Healthy" Oozie Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Oozie Servers falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 51.0 %

API Name

oozie_servers_healthy_thresholds

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Other**Hive Service****Description**

Name of the Hive service that this Oozie service instance depends on. This is used to configure Oozie HCat integration.

Related Name**Default Value****API Name**

hive_service

Required

false

MapReduce Service**Description**

Service to run MapReduce jobs against

Related Name**Default Value****API Name**

mapreduce_yarn_service

Required

true

Oozie Event Listeners**Description**

List of event listeners used by the Oozie service. Listeners needed for JMS or SLA integration are automatically emitted if they are enabled.

Related Name`oozie.service.EventHandlerService.event.listeners`**Default Value****API Name**`oozie_event_listeners`**Required**`false`**JMS Broker****Description**

URL of the JMS Broker used by the Oozie service in JMS integration is enabled.

Related Name`oozie.jms.producer.connection.properties`**Default Value**`tcp://localhost:61616`**API Name**`oozie_jms_broker`**Required**`false`**Oozie Load Balancer Hostname****Description**

Hostname of the load balancer used if Oozie HA is enabled.

Related Name**Default Value****API Name**`oozie_load_balancer`**Required**`false`**Coordinator Job Lookup Interval****Description**

Coordinator Job Lookup trigger command is scheduled at this interval (in seconds).

Related Name`oozie.service.CoordMaterializeTriggerService.lookup.interval`**Default Value**`5 minute(s)`**API Name**`oozie_service_coord_lookup_interval`**Required**`false`**Coordinator Action Input Check Default Timeout****Description**

Default timeout for a Coordinator Action input check (in minutes) for a Coordinator Job.

Related Name

oozie.service.coord.normal.default.timeout

Default Value

2 hour(s)

API Name

oozie_service_coord_normal_default_timeout

Required

false

ShareLib Root Directory

Description

Root of the directory in HDFS where the Oozie ShareLibs are stored. The libraries are stored in the share/lib subdirectory under the specified root directory.

Related Name

oozie.service.WorkflowAppService.system.libpath

Default Value

/user/oozie

API Name

oozie_sharelib_rootdir

Required

true

Oozie Upload ShareLib Command Timeout

Description

The timeout in seconds used for the Oozie Upload ShareLib command. When the value is zero, there is no timeout for the command.

Related Name**Default Value**

270

API Name

oozie_upload_sharelib_cmd_timeout

Required

false

Oozie Upload ShareLib Command Concurrency Level

Description

The number of threads that Oozie will use for the Upload ShareLib command.

Related Name**Default Value**

8

API Name

oozie_upload_sharelib_concurrency

Required

false

Enable JMS Integration

Description

Whether to configure Oozie properties needed for JMS integration

Related Name

Default Value

false

API Name

oozie_use_jms

Required

false

Enable SLA Integration

Description

Whether to configure Oozie properties needed for SLA integration

Related Name

Default Value

false

API Name

oozie_use_sla

Required

false

Use ACLs on Znode

Description

Use ACLs on Znode while a secure ZooKeeper is used for Oozie High Availability. Note: This config is not emitted if ZooKeeper is not secure.

Related Name

oozie.zookeeper.secure

Default Value

true

API Name

oozie_zk_secure

Required

false

ZooKeeper Namespace

Description

Namespace used by this Oozie service in ZooKeeper when High Availability is enabled.

Related Name

oozie.zookeeper.namespace

Default Value

oozie

API Name

oozie_zookeeper_namespace

Required

false

Spark on Yarn Service**Description**

Name of the Spark on Yarn service that this Oozie service instance depends on

Related Name**Default Value****API Name**

spark_on_yarn_service

Required

false

ZooKeeper Service**Description**

Name of the ZooKeeper service that this Oozie service instance depends on

Related Name**Default Value****API Name**

zookeeper_service

Required

false

Ports and Addresses**Oozie Load Balancer HTTP Port****Description**

HTTP port of the load balancer used if Oozie HA is enabled and SSL is disabled.

Related Name**Default Value****API Name**

oozie_load_balancer_http_port

Required

false

Oozie Load Balancer HTTPS Port**Description**

HTTPS port of the load balancer used if Oozie HA is enabled and SSL is enabled.

Related Name**Default Value****API Name**

oozie_load_balancer_https_port

Required

false

Security**Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

Related Name**Default Value**

oozie

API Name

kerberos_princ_name

Required

true

Oozie Credential Classes**Description**

A list of credential class mappings for CredentialsProvider.

Related Name

oozie.credentials.credentialclasses

Default Value

hcat=org.apache.oozie.action.hadoop.HCatCredentials
hbase=org.apache.oozie.action.hadoop.HbaseCredentials
hive2=org.apache.oozie.action.hadoop.Hive2Credentials

API Name

oozie_credential_classes

Required

false

Enable TLS/SSL for Oozie**Description**

Encrypt communication between clients and Oozie using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

oozie.https.enabled

Default Value

false

API Name

oozie_use_ssl

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml

Description

Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_action_config_default_safety_valve

Required

true

Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml**Description**

Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_config_safety_valve

Required

true

Suppress Configuration Validator: Oozie Server Data Directory**Description**

Whether to suppress configuration warnings produced by the Oozie Server Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_data_dir

Required

true

Suppress Configuration Validator: Oozie Database Connection Properties**Description**

Whether to suppress configuration warnings produced by the Oozie Database Connection Properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_connection_properties

Required

true

Suppress Configuration Validator: Oozie Server Database Host**Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Host configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_host

Required

true

Suppress Configuration Validator: Oozie Server Database Name**Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_name

Required

true

Suppress Configuration Validator: Oozie Server Database Password**Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_password

Required

true

Suppress Configuration Validator: Oozie Server Database User**Description**

Whether to suppress configuration warnings produced by the Oozie Server Database User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_database_user

Required

true

Suppress Configuration Validator: Oozie Datasource Properties**Description**

Whether to suppress configuration warnings produced by the Oozie Datasource Properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_datasource_properties

Required

true

Suppress Configuration Validator: Oozie Email Action From Address**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action From Address configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_from_address

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Host**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Host configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_host

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Authentication Password**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Password configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_email_smtp_password

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Port**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_prt

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Authentication Username**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_username

Required

true

Suppress Configuration Validator: Oozie ActionService Executor Extension Classes**Description**

Whether to suppress configuration warnings produced by the Oozie ActionService Executor Extension Classes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_executor_extension_classes

Required

true

Suppress Configuration Validator: Oozie HTTP Port**Description**

Whether to suppress configuration warnings produced by the Oozie HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_http_port

Required

true

Suppress Configuration Validator: Excluded Cipher Suites**Description**

Whether to suppress configuration warnings produced by the Excluded Cipher Suites configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_exclude_cipher_suites

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_keystore_file

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_keystore_password

Required

true

Suppress Configuration Validator: Oozie HTTPS Port

Description

Whether to suppress configuration warnings produced by the Oozie HTTPS Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_port

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_truststore_file

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_truststore_password

Required

true

Suppress Configuration Validator: Java Configuration Options for Oozie Server

Description

Whether to suppress configuration warnings produced by the Java Configuration Options for Oozie Server configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_java_opts

Required

true

Suppress Configuration Validator: Directory For JSP Temp Files**Description**

Whether to suppress configuration warnings produced by the Directory For JSP Temp Files configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_jsp_tmp_dir

Required

true

Suppress Configuration Validator: Default Launcher Queue**Description**

Whether to suppress configuration warnings produced by the Default Launcher Queue configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_launcher_default_queue

Required

true

Suppress Configuration Validator: Oozie Server Log Directory**Description**

Whether to suppress configuration warnings produced by the Oozie Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_log_dir

Required

true

Suppress Configuration Validator: Oozie Server Plugins**Description**

Whether to suppress configuration warnings produced by the Oozie Server Plugins configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_plugins_list

Required

true

Suppress Configuration Validator: Oozie Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Oozie Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Oozie SchemaService Workflow Extension Schemas**Description**

Whether to suppress configuration warnings produced by the Oozie SchemaService Workflow Extension Schemas configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_workflow_extension_schemas

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Database Dump File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Database Dump File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_dump_file

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: Oozie Credential Classes**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Credential Classes parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_credential_classes

Required

true

Suppress Parameter Validation: Oozie Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_env_safety_valve

Required

true

Suppress Parameter Validation: Oozie Event Listeners**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Event Listeners parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_event_listeners

Required

true

Suppress Parameter Validation: JMS Broker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMS Broker parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_jms_broker

Required

true

Suppress Parameter Validation: Oozie Load Balancer Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer Hostname parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_load_balancer

Required

true

Suppress Parameter Validation: Oozie Load Balancer HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTP Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_load_balancer_http_port

Required

true

Suppress Parameter Validation: Oozie Load Balancer HTTPS Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTPS Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_load_balancer_https_port

Required

true

Suppress Configuration Validator: Oozie Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Oozie Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_server_count_validator

Required

true

Suppress Parameter Validation: ShareLib Root Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ShareLib Root Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_sharelib_rootdir

Required

true

Suppress Parameter Validation: ZooKeeper Namespace**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Namespace parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_oozie_zookeeper_namespace

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Oozie Server Health**Description**

Whether to suppress the results of the Oozie Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_oozie_oozie_servers_healthy

Required

true

Ozone Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced**Deploy Directory****Description**

The directory where the client configs will be deployed

Related Name**Default Value***/etc/ozone***API Name**

client_config_root_dir

Required

true

Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

For advanced use only, a string to be inserted into the client configuration for ozone-conf/ozone-site.xml.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_client_config_safety_valve

Required

false

Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description

For advanced use only, a string to be inserted into the client configuration for ozone-conf/ssl-client.xml.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_client_config_safety_valve

Required

false

Logs

Gateway Logging Threshold

Description

The minimum log level for Gateway logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other**Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

50

API Name

client_config_priority

Required

true

Security**Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Gateway TLS/SSL Trust Store Password**Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_client_config_safety_valve

Required

true

Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Ozone DataNode

Advanced

Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties**Description**

For advanced use only. A string to be inserted into ozone-conf/dn-audit-log4j2.properties for this role only.

Related Name**Default Value****API Name**

ozone-conf/dn-audit-log4j2.properties_role_safety_valve

Required

false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.
Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OZONE_DATANODE_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Ozone DataNode Log Directory****Description**

The log directory for log files of the role Ozone DataNode.

Related Name

log.dir

Default Value

```
/var/log/hadoop-ozone
```

API Name

```
log_dir
```

Required

```
false
```

Ozone DataNode Logging Threshold**Description**

The minimum log level for Ozone DataNode logs

Related Name**Default Value**

```
INFO
```

API Name

```
log_threshold
```

Required

```
false
```

Ozone DataNode Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Ozone DataNode logs. Typically used by log4j or logback.

Related Name**Default Value**

```
10
```

API Name

```
max_log_backup_index
```

Required

```
false
```

Ozone DataNode Max Log Size**Description**

The maximum size, in megabytes, per log file for Ozone DataNode logs. Typically used by log4j or logback.

Related Name**Default Value**

```
200 MiB
```

API Name

```
max_log_size
```

Required

```
false
```

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name

Default Value**API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_datanode_fd_thresholds

Required

false

Ozone DataNode Host Health Test**Description**

When computing the overall Ozone DataNode health, consider the host's health.

Related Name**Default Value**

true

API Name

ozone_datanode_host_health_enabled

Required

false

Ozone DataNode Process Health Test**Description**

Enables the health test that the Ozone DataNode's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ozone_datanode_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.

- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Datanode Ratis Metadata Directory

Description

This directory is used for storing Datanode Ratis metadata. Ideally, this should be mapped to a fast disk like an SSD.

Related Name

dfs.container.ratis.datanode.storage.dir

Default Value

/var/lib/hadoop-ozone/datanode/ratis/data

API Name

dfs.container.ratis.datanode.storage.dir

Required

true

Datanode Data Directory

Description

Determines where on the local filesystem HDDS data will be stored.

Related Name

hdds.datanode.dir

Default Value

/var/lib/hadoop-ozone/datanode/data

API Name

hdds.datanode.dir

Required

true

Ozone Log Directory

Description

Directory where Ozone DataNode logs will be written to

Related Name

ozone.log.dir

Default Value

/var/log/hadoop-ozone

API Name

ozone.log.dir

Required

false

Datanode Metadata Directory

Description

Determines where on the local filesystem datanode security certificates will be stored.

Related Name

ozone.metadata.dirs

Default Value

/var/lib/hadoop-ozone/datanode/ozone-metadata

API Name

ozone.metadata.dirs

Required

true

Datanode ID Directory**Description**

Ozone Datanode ID Directory

Related Name

ozone.scm.datanode.id.dir

Default Value

/var/lib/hadoop-ozone/datanode

API Name

ozone.scm.datanode.id.dir

Required

true

Java Heap Size of DataNode**Description**

Maximum size for the Java process heap memory.

Related Name

ozone_datanode_heap_size

Default Value

4 GiB

API Name

ozone_datanode_heap_size

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Ozone Datanode HTTP Web UI Port

Description

The base port that the Ozone Datanode web user interface listens on. The host name is combined with this port to form the 'hdds.datanode.http-address'.

Related Name

ozone.datanode.http-port

Default Value

9882

API Name

ozone.datanode.http-port

Required

true

Ozone Datanode Port (TLS/SSL)

Description

The base port that the Ozone Datanode web user interface listens on when using HTTPS. The host name is combined with this port to form the 'hdds.datanode.https-address'.

Related Name

ozone.datanode.https-port

Default Value

9883

API Name

ozone.datanode.https-port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Ozone DataNode TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone DataNode might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ozone DataNode TLS/SSL Trust Store Password**Description**

The password for the Ozone DataNode TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ozone DataNode**Description**

Encrypt communication between clients and Ozone DataNode using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ozone DataNode TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Ozone DataNode is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Ozone DataNode TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone DataNode is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ozone DataNode TLS/SSL Server Keystore File Password**Description**

The password for the Ozone DataNode keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Datanode Ratis Metadata Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Ratis Metadata Directory parameter.

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_datanode_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_datanode_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_datanode_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_datanode_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_unexpected_exits

Required

true

Ozone Manager

Advanced

Ozone Manager Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties**Description**

For advanced use only. A string to be inserted into ozone-conf/om-audit-log4j2.properties for this role only.

Related Name**Default Value****API Name**

ozone-conf/om-audit-log4j2.properties_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-audit.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ranger-ozone-audit.xml_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ranger-ozone-policymgr-ssl.xml_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-security.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ranger-ozone-security.xml_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OZONE_MANAGER_role_env_safety_valve

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Ozone Manager Log Directory****Description**

The log directory for log files of the role Ozone Manager.

Related Name

log.dir

Default Value

/var/log/hadoop-ozon

API Name

log_dir

Required

false

Ozone Manager Logging Threshold

Description

The minimum log level for Ozone Manager logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Ozone Manager Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Ozone Manager logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Ozone Manager Max Log Size

Description

The maximum size, in megabytes, per log file for Ozone Manager logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.

- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_manager_fd_thresholds

Required

false

Ozone Manager Host Health Test**Description**

When computing the overall Ozone Manager health, consider the host's health.

Related Name**Default Value**

true

API Name

ozone_manager_host_health_enabled

Required

false

Ozone Manager Process Health Test**Description**

Enables the health test that the Ozone Manager's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ozone_manager_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.

- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Java Heap Size of Ozone Manager****Description**

Maximum size for the Java process heap memory.

Related Name

om_max_heap_size

Default Value

4 GiB

API Name

om_max_heap_size

Required

false

Ozone Log Directory**Description**

Directory where Ozone Manager logs will be written to

Related Name

ozone.log.dir

Default Value

/var/log/hadoop-ozone

API Name

ozone.log.dir

Required

false

Ozone Manager Metadata Directory**Description**

Determines where on the local filesystem Ozone Manager security certificates will be stored.

Related Name

ozone.metadata.dirs

Default Value

/var/lib/hadoop-ozone/om/ozone-metadata

API Name

ozone.metadata.dirs

Required

true

Ozone Manager Data Directory**Description**

Directory where the OzoneManager stores its metadata.

Related Name

ozone.om.db.dirs

Default Value

/var/lib/hadoop-ozone/om/data

API Name

ozone.om.db.dirs

Required

true

Ozone Manager HTTP Bind Hostname**Description**

The actual address the OM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.om.http-address'.

Related Name

ozone.om.http-bind-host

Default Value

0.0.0.0

API Name

ozone.om.http-bind-host

Required

false

Secure Ozone Manager HTTPS Bind Hostname**Description**

The actual address the OM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.om.https-address'.

Related Name

ozone.om.https-bind-host

Default Value

0.0.0.0

API Name

ozone.om.https-bind-host

Required

false

Ozone Manager Ratis Storage Directory**Description**

This directory is used for storing Ozone Manager's Ratis metadata like logs. Ideally, this should be mapped to a fast disk like an SSD.

Related Name

ozone.om.ratis.storage.dir

Default Value

/var/lib/hadoop-ozone/om/ratis

API Name

ozone.om.ratis.storage.dir

Required

true

Ranger Ozone Plugin Conf Path**Description**

Staging directory for Ranger Ozone Plugin Configuration. This should generally not be changed.

Related Name

ranger_ozone_plugin_conf_path

Default Value

/etc/ranger/ozone-plugin

API Name

ranger_ozone_plugin_conf_path

Required

true

Ranger Ozone Plugin Policy Cache Directory Path**Description**

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.ozone.policy.cache.dir

Default Value

/var/lib/ranger/ozone/policy-cache

API Name

ranger_ozone_plugin_policy_cache_directory

Required

true

Ranger Ozone Plugin Audit Solr Spool Directory Path**Description**

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/hadoop-ozone/ranger-audit/solr/spool

API Name

ranger_ozone_plugin_solr_audit_spool_directory

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Ozone Manager HTTP Web UI Port****Description**

The base port that the Ozone Manager HTTP web user interface listens on. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.http-address'.

Related Name

ozone.om.http-port

Default Value

9874

API Name

ozone.om.http-port

Required

true

Secure Ozone Manager Web UI Port (TLS/SSL)**Description**

The base port that the Ozone Manager HTTP web user interface listens on when using HTTPS. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.https-address'.

Related Name

ozone.om.https-port

Default Value

9875

API Name

ozone.om.https-port

Required

false

Ozone Manager Ratis port**Description**

The base port that Ozone Manager's Ratis Server listens on if multiple Ozone Manager's are configured.

Related Name

ozone.om.ratis-port

Default Value

9872

API Name

ozone.om.ratis-port

Required

false

Ozone Manager RPC port**Description**

The base port that Ozone Manager listens on when serving RPCs. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.address'.

Related Name

ozone.om.rpc-port

Default Value

9862

API Name

ozone.om.rpc-port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name`memory.limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_hard_limit`**Required**`true`**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name`memory.soft_limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_soft_limit`**Required**`true`**Security****Ozone Manager TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Manager might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name`ssl.client.truststore.location`

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ozone Manager TLS/SSL Trust Store Password**Description**

The password for the Ozone Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ozone Manager**Description**

Encrypt communication between clients and Ozone Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ozone Manager TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Ozone Manager is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Ozone Manager TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ozone Manager TLS/SSL Server Keystore File Password

Description

The password for the Ozone Manager keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

`stacks_collection_directory`**Default Value****API Name**`stacks_collection_directory`**Required**`false`**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

Related Name`stacks_collection_enabled`**Default Value**`false`**API Name**`stacks_collection_enabled`**Required**`true`**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

Related Name`stacks_collection_frequency`**Default Value**`5.0 second(s)`**API Name**`stacks_collection_frequency`**Required**`false`**Stacks Collection Method****Description**

The method used to collect stacks. The `jstack` option involves periodically running the `jstack` command against the role's daemon process. The `servlet` method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the `servlet` method is selected, that HTTP endpoint is periodically scraped.

Related Name`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**`false`

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ozone Manager Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ozone Manager Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Java Heap Size of Ozone Manager

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Ozone Manager parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_om_max_heap_size

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/om-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-audit.xml_role_safety_valve

Required

API Name

role_config_suppression_ozone.om.db.dirs

Required

true

Suppress Parameter Validation: Ozone Manager HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Bind Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-bind-host

Required

true

Suppress Parameter Validation: Ozone Manager HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Web UI Port parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_ozone.om.http-port`**Required**

true

Suppress Parameter Validation: Secure Ozone Manager HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager HTTPS Bind Hostname parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_ozone.om.https-bind-host`**Required**

true

Suppress Parameter Validation: Secure Ozone Manager Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager Web UI Port (TLS/SSL) parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_ozone.om.https-port`**Required**

true

Suppress Parameter Validation: Ozone Manager Ratis port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Ratis port parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_ozone.om.ratis-port`**Required**

true

Suppress Parameter Validation: Ozone Manager Ratis Storage Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Ratis Storage Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.om.ratis.storage.dir

Required

true

Suppress Parameter Validation: Ozone Manager RPC port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager RPC port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.rpc-port

Required

true

Suppress Parameter Validation: Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_manager_role_env_safety_valve

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_conf_path

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_policy_cache_directory

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_solr_audit_spool_directory

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_role_triggers`**Required**`true`**Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store File parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_location`**Required**`true`**Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store Password parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Location parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_audit_health

Required

true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozon_ozon_manager_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_manager_unexpected_exits

Required

true

Ozone Prometheus

Advanced

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml

Description

For advanced use only. A string to be inserted into ozone-conf/ozone-prometheus.yml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-prometheus.yml_role_safety_valve

Required

false

Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token

Description

For advanced use only. A string to be inserted into ozone-conf/prometheus-token for this role only.

Related Name**Default Value****API Name**

ozone-conf/prometheus-token_role_safety_valve

Required

false

Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value**

API Name

OZONE_PROMETHEUS_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs

Ozone Prometheus Log Directory

Description

The log directory for log files of the role Ozone Prometheus.

Related Name

log.dir

Default Value

/var/log/hadoop-ozon

API Name

log_dir

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking [View as JSON](#). In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username: $ROLE_PARAM(otelcol_remote_write_user) password: '$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_prometheus_fd_thresholds

Required

false

Ozone Prometheus Host Health Test**Description**

When computing the overall Ozone Prometheus health, consider the host's health.

Related Name**Default Value**

true

API Name

ozone_prometheus_host_health_enabled

Required

false

Ozone Prometheus Process Health Test**Description**

Enables the health test that the Ozone Prometheus's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ozone_prometheus_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Ozone Log Directory****Description**

Directory where Prometheus logs will be written to

Related Name

ozone.log.dir

Default Value

/var/log/hadoop-ozone

API Name

ozone.log.dir

Required

false

Prometheus Data Retention time.**Description**

How long to retain samples in storage. Units Supported: y, w, d, h, m, s, ms.

Related Name

ozone.prometheus.data.retention.time

Default Value

15d

API Name

ozone.prometheus.data.retention.time

Required

false

Prometheus Data Directory**Description**

Directory where the Prometheus Server stores its metadata.

Related Name

ozone.prometheus.db.dir

Default Value

/var/lib/hadoop-ozone/prometheus/data

API Name

ozone.prometheus.db.dir

Required

true

Prometheus server extra flags.**Description**

Extra command line flags that can be used while starting up the server. For example, '--query.timeout=2m --query.max-samples=5000'

Related Name

ozone.prometheus.extra.flags

Default Value**API Name**

ozone.prometheus.extra.flags

Required

false

Prometheus server log level.**Description**

Only log messages with the given severity or above. One of: [debug, info, warn, error]

Related Name

ozone.prometheus.log.level

Default Value

info

API Name

ozone.prometheus.log.level

Required

false

Prometheus Binary Location**Description**

Location of the unarchived Prometheus binary.

Related Name

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Prometheus HTTP Port

Description

The base port that the prometheus web user interface listens on.

Related Name

ozone.prometheus.http-port

Default Value

9090

API Name

ozone.prometheus.http-port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ozone Prometheus Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.db.dir

Required

true

Suppress Parameter Validation: Prometheus server extra flags.**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus server extra flags. parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.extra.flags

Required

true

Suppress Parameter Validation: Prometheus HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.http-port

Required

true

Suppress Parameter Validation: Prometheus server log level.**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus server log level. parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.log.level

Required

true

Suppress Parameter Validation: Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_prometheus_role_env_safety_valve

Required

true

Suppress Parameter Validation: Prometheus Binary Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Binary Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_prometheus.location

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_prometheus_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_prometheus_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_prometheus_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_prometheus_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_prometheus_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_prometheus_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_prometheus_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_prometheus_unexpected_exits

Required

true

Ozone Recon

Advanced

Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name

Default Value**API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OZONE_RECON_role_env_safety_valve

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Ozone Recon Log Directory****Description**

The log directory for log files of the role Ozone Recon.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

Ozone Recon Logging Threshold**Description**

The minimum log level for Ozone Recon logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Ozone Recon Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Ozone Recon logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Ozone Recon Max Log Size**Description**

The maximum size, in megabytes, per log file for Ozone Recon logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_recon_fd_thresholds

Required

false

Ozone Recon Host Health Test**Description**

When computing the overall Ozone Recon health, consider the host's health.

Related Name**Default Value**

true

API Name

ozone_recon_host_health_enabled

Required

false

Ozone Recon Process Health Test**Description**

Enables the health test that the Ozone Recon's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ozone_recon_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

`unexpected_exits_thresholds`

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

`unexpected_exits_window`

Required

false

Other

Ozone Log Directory

Description

Directory where Recon logs will be written to

Related Name

`ozone.log.dir`

Default Value

`/var/log/hadoop-ozone`

API Name

`ozone.log.dir`

Required

false

Recon Metadata Directory

Description

Determines where on the local filesystem recon security certificates will be stored.

Related Name

`ozone.metadata.dirs`

Default Value

`/var/lib/hadoop-ozone/recon/ozone-metadata`

API Name

`ozone.metadata.dirs`**Required**`true`**Recon Data Directory****Description**

Directory where the Recon Server stores its metadata.

Related Name`ozone.recon.db.dir`**Default Value**`/var/lib/hadoop-ozone/recon/data`**API Name**`ozone.recon.db.dir`**Required**`true`**Recon HTTP Bind Hostname****Description**

The actual address the Recon web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.http-address'.

Related Name`ozone.recon.http-bind-host`**Default Value**`0.0.0.0`**API Name**`ozone.recon.http-bind-host`**Required**`false`**Secure Recon HTTPS Bind Hostname****Description**

The actual address the Recon web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.https-address'.

Related Name`ozone.recon.https-bind-host`**Default Value**`0.0.0.0`**API Name**`ozone.recon.https-bind-host`**Required**`false`**Recon OzoneManager Data Directory****Description**

Directory where the Recon Server stores OzoneManager's metadata

Related Name

ozone.recon.om.db.dir

Default Value

Secure Recon Web UI Port (TLS/SSL)

Description

The base port that the Recon web user interface listens on when using HTTPS. The host name of the Recon web user interface is combined with this port to form the 'ozone.recon.https-address'.

Related Name

ozone.recon.https-port

Default Value

9889

API Name

ozone.recon.https-port

Required

false

Recon RPC Port

Description

The base port that Recon listens on when serving RPCs. The host name of Recon is combined with this port to form the 'ozone.recon.address'.

Related Name

ozone.recon.rpc-port

Default Value

9891

API Name

ozone.recon.rpc-port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ozone Recon TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Recon might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ozone Recon TLS/SSL Trust Store Password

Description

The password for the Ozone Recon TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ozone Recon**Description**

Encrypt communication between clients and Ozone Recon using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ozone Recon TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Ozone Recon is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Ozone Recon TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Recon is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

`ssl_server_keystore_location`**Required**`false`**Ozone Recon TLS/SSL Server Keystore File Password****Description**

The password for the Ozone Recon keystore file.

Related Name`ssl.server.keystore.password`**Default Value****API Name**`ssl_server_keystore_password`**Required**`false`**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name`stacks_collection_data_retention`**Default Value**`100 MiB`**API Name**`stacks_collection_data_retention`**Required**`false`**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name`stacks_collection_directory`**Default Value****API Name**`stacks_collection_directory`**Required**`false`**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ozone Recon Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.log.dir

Required

true

Suppress Parameter Validation: Recon Metadata Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon Metadata Directory parameter.

Related Name**Default Value**

false

API Name

Suppress Parameter Validation: Ozone Recon TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_recon_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozon_ozon_recon_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozzone_ozzone_recon_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozzone_ozzone_recon_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozzone_ozzone_recon_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozzone_ozzone_recon_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozzone_ozzone_recon_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozzone_ozzone_recon_unexpected_exits

Required

true

S3 Gateway**Advanced****S3 Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

S3_GATEWAY_role_env_safety_valve

Required

false

Logs

S3 Gateway Log Directory

Description

The log directory for log files of the role S3 Gateway.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

S3 Gateway Logging Threshold

Description

The minimum log level for S3 Gateway logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

S3 Gateway Maximum Log File Backups

Description

The maximum number of rolled log files to keep for S3 Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

S3 Gateway Max Log Size**Description**

The maximum size, in megabytes, per log file for S3 Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

s3_gateway_fd_thresholds

Required

false

S3 Gateway Host Health Test**Description**

When computing the overall S3 Gateway health, consider the host's health.

Related Name**Default Value**

true

API Name

s3_gateway_host_health_enabled

Required

false

S3 Gateway Process Health Test**Description**

Enables the health test that the S3 Gateway's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

s3_gateway_scm_health_enabled

Required

false

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Ozone S3 Gateway HTTP Bind Hostname****Description**

The actual address the S3 Gateway web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.http-address'.

Related Name

ozone.s3g.http-bind-host

Default Value

0.0.0.0

API Name

ozone.s3g.http-bind-host

Required

false

Secure Ozone S3 Gateway HTTPS Bind Hostname**Description**

The actual address the S3 Gateway web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.https-address'.

Related Name

ozone.s3g.https-bind-host

Default Value

0.0.0.0

API Name

ozone.s3g.https-bind-host

Required

false

Java Heap Size of S3 Gateway

Description

Maximum size for the Java process heap memory.

Related Name

ozone_s3_gateway_max_heap_size

Default Value

1 GiB

API Name

ozone_s3_gateway_max_heap_size

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Ozone S3 Gateway HTTP Web UI Port

Description

The base port that the S3 Gateway web user interface listens on. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.http-address'.

Related Name

ozone.s3g.http-port

Default Value

9878

API Name

ozone.s3g.http-port

Required

true

Secure Ozone S3 Gateway Web UI Port (TLS/SSL)

Description

The base port that the S3 Gateway web user interface listens on when using HTTPS. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.https-address'.

Related Name

ozone.s3g.https-port

Default Value

9879

API Name

ozone.s3g.https-port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

	blkio.weight
Default Value	500
API Name	rm_io_weight
Required	true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

S3 Gateway TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that S3 Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

S3 Gateway TLS/SSL Trust Store Password

Description

The password for the S3 Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for S3 Gateway

Description

Encrypt communication between clients and S3 Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

S3 Gateway TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when S3 Gateway is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value

API Name

ssl_server_keystore_keypassword

Required

false

S3 Gateway TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when S3 Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

S3 Gateway TLS/SSL Server Keystore File Password**Description**

The password for the S3 Gateway keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: S3 Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

false

Ozone Replication Factor**Description**

Default replication factor value for keys stored in Ozone. The actual number of replications can be specified when writing the key. The default is used if replication value is not specified. Supported values: 1 and 3.

Related Name

ozone.replication

Default Value

3

API Name

ozone.replication

Required

true

Enable Kerberos Authentication**Description**

Enables Kerberos authentication for Ozone.

Related Name

ozone.security.enabled

Default Value

false

API Name

ozone.security.enabled

Required

false

Enable Kerberos Authentication for HTTP web consoles**Description**

Enables Kerberos authentication for Ozone HTTP web consoles for all roles of this service using the SPNEGO protocol. Note: This is effective only if Kerberos is enabled for the Ozone service.

Related Name

ozone.security.http.kerberos.enabled

Default Value

false

API Name

ozone.security.http.kerberos.enabled

Required

false

Ozone Service ID**Description**

A logical name for this Ozone service. Note: No special characters.

Related Name

ozone.service.id

Default Value**API Name**

ozone.service.id

Required

true

Ozone Java Options**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags would be passed here.

Related Name

ozone_java_opts

Default Value

java_args

API Name

ozone_java_opts

Required

false

Ranger Ozone Plugin Hdfs Audit Directory**Description**

The DFS path on which Ranger audits are written.

Related Name

ranger_ozone_plugin_hdfs_audit_directory

Default Value

\$ranger_base_audit_url/ozone

API Name

ranger_ozone_plugin_hdfs_audit_directory

Required

false

RANGER Service**Description**

Name of the RANGER service that this Ozone service instance depends on

Related Name**Default Value****API Name**

ranger_service

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Datanode Ratis Metadata Directory**Description**

Whether to suppress configuration warnings produced by the Datanode Ratis Metadata Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_dfs.container.ratis.datanode.storage.dir

Required

true

Suppress Configuration Validator: Datanode Data Directory**Description**

Whether to suppress configuration warnings produced by the Datanode Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.datanode.dir

Required

true

Suppress Configuration Validator: Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Log Directory

Description

Whether to suppress configuration warnings produced by the Storage Container Manager Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Topology Script File Name

Description

Whether to suppress configuration warnings produced by the Topology Script File Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_net.topology.script.file.name

Required

true

Suppress Configuration Validator: Java Heap Size of Ozone Manager

Description

Whether to suppress configuration warnings produced by the Java Heap Size of Ozone Manager configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_om_max_heap_size`**Required**`true`**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Exporters Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_exporters`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Extensions Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_extensions`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Processors Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/dn-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/om-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-prometheus.yml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_client_config_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/prometheus-token_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-audit.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-security.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/scm-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_client_config_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Datanode HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the Ozone Datanode HTTP Web UI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.datanode.http-port

Required

true

Suppress Configuration Validator: Ozone Datanode Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the Ozone Datanode Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.datanode.https-port

Required

true

Suppress Configuration Validator: Ozone Log Directory**Description**

Whether to suppress configuration warnings produced by the Ozone Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.log.dir

Required

true

Suppress Configuration Validator: Storage Container Manager Metadata Directory**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Metadata Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.metadata.dirs

Required

true

Suppress Configuration Validator: Ozone Manager Data Directory**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.db.dirs

Required

true

Suppress Configuration Validator: Ozone Manager HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-bind-host

Required

true

Suppress Configuration Validator: Ozone Manager HTTP Web UI Port

Description

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Web UI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-port

Required

true

Suppress Configuration Validator: Secure Ozone Manager HTTPS Bind Hostname

Description

Whether to suppress configuration warnings produced by the Secure Ozone Manager HTTPS Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.https-bind-host

Required

true

Suppress Configuration Validator: Secure Ozone Manager Web UI Port (TLS/SSL)

Description

Whether to suppress configuration warnings produced by the Secure Ozone Manager Web UI Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.https-port

Required

true

Suppress Configuration Validator: Ozone Manager Ratis port

Description

Whether to suppress configuration warnings produced by the Ozone Manager Ratis port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.ratis-port

Required

true

Suppress Configuration Validator: Ozone Manager Ratis Storage Directory**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Ratis Storage Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.ratis.storage.dir

Required

true

Suppress Configuration Validator: Ozone Manager RPC port**Description**

Whether to suppress configuration warnings produced by the Ozone Manager RPC port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.rpc-port

Required

true

Suppress Configuration Validator: Prometheus Data Retention time.**Description**

Whether to suppress configuration warnings produced by the Prometheus Data Retention time. configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.data.retention.time

Required

true

Suppress Configuration Validator: Prometheus Data Directory**Description**

Whether to suppress configuration warnings produced by the Prometheus Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.db.dir

Required

true

Suppress Configuration Validator: Prometheus server extra flags.**Description**

Whether to suppress configuration warnings produced by the Prometheus server extra flags configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.extra.flags

Required

true

Suppress Configuration Validator: Prometheus HTTP Port**Description**

Whether to suppress configuration warnings produced by the Prometheus HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.http-port

Required

true

Suppress Configuration Validator: Prometheus server log level.**Description**

Whether to suppress configuration warnings produced by the Prometheus server log level configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.log.level

Required

true

Suppress Configuration Validator: Recon Data Directory**Description**

Whether to suppress configuration warnings produced by the Recon Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.db.dir

Required

true

Suppress Configuration Validator: Recon HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Recon HTTP Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.http-bind-host

Required

true

Suppress Configuration Validator: Recon HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the Recon HTTP Web UI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.http-port

Required

true

Suppress Configuration Validator: Secure Recon HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Secure Recon HTTPS Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.https-bind-host

Required

true

Suppress Configuration Validator: Secure Recon Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the Secure Recon Web UI Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.https-port

Required

true

Suppress Configuration Validator: Recon OzoneManager Data Directory**Description**

Whether to suppress configuration warnings produced by the Recon OzoneManager Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.om.db.dir

Required

true

Suppress Configuration Validator: Recon RPC Port**Description**

Whether to suppress configuration warnings produced by the Recon RPC Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.rpc-port

Required

true

Suppress Configuration Validator: Recon StorageContainerManager Data Directory**Description**

Whether to suppress configuration warnings produced by the Recon StorageContainerManager Data Directory configuration validator.

Related Name

true

Suppress Parameter Validation: Ozone Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Java Options parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_java_opts

Required

true

Suppress Configuration Validator: Ozone Manager Count Validator**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_manager_count_validator

Required

true

Suppress Configuration Validator: Ozone Prometheus Count Validator**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_prometheus_count_validator

Required

true

Suppress Configuration Validator: Ozone Recon Count Validator**Description**

Whether to suppress configuration warnings produced by the Ozone Recon Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_recon_count_validator

Required

true

Suppress Parameter Validation: Ozone Service Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_service_env_safety_valve

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Hdfs Audit Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_ozone_plugin_hdfs_audit_directory

Required

true

Suppress Configuration Validator: S3 Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the S3 Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_s3_gateway_count_validator

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Count Validator**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_storage_container_manager_count_validator

Required

true

Storage Container Manager

Advanced

Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**`true`**API Name**`oom_heap_dump_enabled`**Required**`true`**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**`true`**API Name**`oom_sigkill_enabled`**Required**`true`**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into `ozone-conf/ozone-site.xml` for this role only.

Related Name**Default Value****API Name**`ozone-conf/ozone-site.xml_role_safety_valve`**Required**`false`**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties****Description**

For advanced use only. A string to be inserted into `ozone-conf/scm-audit-log4j2.properties` for this role only.

Related Name**Default Value****API Name**

ozone-conf/scm-audit-log4j2.properties_role_safety_valve

Required

false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STORAGE_CONTAINER_MANAGER_role_env_safety_valve

Required

false

Logs**Storage Container Manager Log Directory****Description**

The log directory for log files of the role Storage Container Manager.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

Storage Container Manager Logging Threshold**Description**

The minimum log level for Storage Container Manager logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Storage Container Manager Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Storage Container Manager logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Storage Container Manager Max Log Size**Description**

The maximum size, in megabytes, per log file for Storage Container Manager logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name

Default Value

API Name

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

```
otelcol_exporters
```

Required

```
false
```

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

```
otelcol_extensions
```

Required

```
false
```

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

```
otelcol_processors
```

Required

```
false
```

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name

Default Value**API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

storage_container_manager_fd_thresholds

Required

false

Storage Container Manager Host Health Test**Description**

When computing the overall Storage Container Manager health, consider the host's health.

Related Name**Default Value**

true

API Name

storage_container_manager_host_health_enabled

Required

false

Storage Container Manager Process Health Test**Description**

Enables the health test that the Storage Container Manager's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

storage_container_manager_scm_health_enabled

Required

false

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Topology Script File Name

Description

Full path to a custom topology script on the host file system. The topology script is used to determine the rack location of nodes. If left with "{{DEFAULT_TOPOLOGY_SCRIPT}}", a topology script will be provided that uses your hosts' rack information, visible in the "Hosts" page.

Related Name

net.topology.script.file.name

Default Value

DEFAULT_TOPOLOGY_SCRIPT

API Name

net.topology.script.file.name

Required

false

Ozone Log Directory

Description

Directory where Storage Container Manager logs will be written to

Related Name

ozone.log.dir

Default Value

/var/log/hadoop-ozone

API Name

ozone.log.dir

Required

false

Storage Container Manager Metadata Directory

Description

Determines where on the local filesystem SCM security certificates will be stored.

Related Name

ozone.metadata.dirs

Default Value

/var/lib/hadoop-ozone/scm/ozone-metadata

API Name

ozone.metadata.dirs

Required

true

Storage Container Manager Data Directory**Description**

Directory where the StorageContainerManager stores its metadata

Related Name

ozone.scm.db.dirs

Default Value

/var/lib/hadoop-ozone/scm/data

API Name

ozone.scm.db.dirs

Required

true

Storage Container Manager HTTP Bind Hostname**Description**

The actual address the SCM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.http-address'.

Related Name

ozone.scm.http-bind-host

Default Value

0.0.0.0

API Name

ozone.scm.http-bind-host

Required

false

Secure Storage Container Manager HTTPS Bind Hostname**Description**

The actual address the SCM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.https-address'.

Related Name

ozone.scm.https-bind-host

Default Value

0.0.0.0

API Name

ozone.scm.https-bind-host

Required

false

Java Heap Size of Storage Container Manager

Description

Maximum size for the Java process heap memory.

Related Name

scm_max_heap_size

Default Value

4 GiB

API Name

scm_max_heap_size

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Storage Container Manager HTTP Web UI Port

Description

The base port that the Storage Container Manager web user interface listens on. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.http-address'.

Related Name

ozone.scm.http-port

Default Value

9876

API Name

ozone.scm.http-port

Required

true

Secure Storage Container Manager Web UI Port (TLS/SSL)

Description

The base port that the Storage Container Manager web user interface listens on when using HTTPS. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.https-address'.

Related Name

ozone.scm.https-port

Default Value

9877

API Name

ozone.scm.https-port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Storage Container Manager TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Storage Container Manager might connect to. This trust store must contain the

certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Storage Container Manager TLS/SSL Trust Store Password**Description**

The password for the Storage Container Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Storage Container Manager**Description**

Encrypt communication between clients and Storage Container Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Storage Container Manager TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Storage Container Manager is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Storage Container Manager TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Storage Container Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Storage Container Manager TLS/SSL Server Keystore File Password**Description**

The password for the Storage Container Manager keystore file.

Related Name

ssl.server.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

Phoenix Properties in Cloudera Runtime 7.1.9

Role groups:

Query Server

Advanced

Query Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml**Description**

For advanced use only. A string to be inserted into phoenix-site.xml for this role only.

Related Name**Default Value****API Name**

phoenix-site.xml_role_safety_valve

Required

false

Query Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

PHOENIX_QUERY_SERVER_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Query Server Log Directory****Description**

The log directory for log files of the role Query Server.

Related Name

log_dir

Default Value

/var/log/phoenix

API Name

log_dir

Required

false

Query Server Logging Threshold**Description**

The minimum log level for Query Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Query Server Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Query Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Query Server Max Log Size**Description**

The maximum size, in megabytes, per log file for Query Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true

```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

phoenix_query_server_fd_thresholds

Required

false

Query Server Host Health Test

Description

When computing the overall Query Server health, consider the host's health.

Related Name**Default Value**

true

API Name

phoenix_query_server_host_health_enabled

Required

false

Query Server Process Health Test**Description**

Enables the health test that the Query Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

phoenix_query_server_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Enable Remote User Extractor

Description

Boolean which controls if a remote user to impersonate should be extracted from the HTTP request parameter made by that user instead of the HTTP-authenticated user name (which is the default). Required for accessing Phoenix Query Server via Knox.

Related Name

phoenix_queryserver.withRemoteUserExtractor

Default Value

true

API Name

phoenix_query_server_with_remote_user_extractor

Required

false

Additional Phoenix Query Server Options

Description

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

Related Name

phoenix_queryserver_java_opts

Default Value**API Name**

phoenix_queryserver_java_opts

Required

false

Phoenix Query Server Max Heapsize

Description

Maximum size for the Phoenix Query Server Java Process heap. Passed to Java -Xmx.

Related Name

phoenix_queryserver_max_heap_size

Default Value

2 GiB

API Name

phoenix_queryserver_max_heap_size

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Phoenix Query Server Port****Description**

The port Phoenix Query Server will listen on

Related Name

phoenix_queryserver.http.port

Default Value

8765

API Name

phoenix_query_server_port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

API Name

enable_config_alerts

Required

false

Healthy Query Server Monitoring Thresholds

Description

The health test thresholds of the overall Query Server health. The check returns "Concerning" health if the percentage of "Healthy" Query Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Query Servers falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 90.0 %

API Name

PHOENIX_PHOENIX_QUERY_SERVER_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Ranger Properties in Cloudera Runtime 7.1.9

Role groups:

Ranger Admin

Advanced

Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-admin-site.xml for this role only.

Related Name

Default Value**API Name**`conf/ranger-admin-site.xml_role_safety_valve`**Required**`false`**Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into `log4j.properties` for this role only.

Related Name**Default Value****API Name**`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

RANGER_ADMIN_role_env_safety_valve

Required

false

Logs**Ranger Admin Log Directory****Description**

The log directory for log files of the role Ranger Admin.

Related Name

ranger.logs.base.dir

Default Value

/var/log/ranger/admin

API Name

log_dir

Required

false

Ranger Admin Logging Threshold**Description**

The minimum log level for Ranger Admin logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Ranger Admin Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Ranger Admin logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Ranger Admin Max Log Size**Description**

The maximum size, in megabytes, per log file for Ranger Admin logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ranger_admin_fd_thresholds

Required

false

Ranger Admin Host Health Test**Description**

When computing the overall Ranger Admin health, consider the host's health.

Related Name**Default Value**

true

API Name

ranger_admin_host_health_enabled

Required

false

Ranger Admin Process Health Test**Description**

Enables the health test that the Ranger Admin's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ranger_admin_scm_health_enabled

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Ranger Admin Diagnostics Collection Timeout

Description

The timeout in milliseconds to wait for diagnostics collection to complete.

Related Name**Default Value**

5 minute(s)

API Name

csd_role_diagnostics_timeout

Required

false

Graceful Shutdown Timeout

Description

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

18 second(s)

API Name

graceful_stop_timeout

Required

false

Exclude Users from Audit Access Tab

Description

A single user, or a comma-separated list of multiple users that are excluded from Ranger audits when the Exclude Service Users checkbox is selected on the Ranger Audit Access tab in the Ranger Admin Web UI.

Related Name

ranger.accesslogs.exclude.users.list

Default Value

rangertagsync

API Name

ranger.accesslogs.exclude.users.list

Required

false

Kerberos Cookie Path

Description

Kerberos Cookie path

Related Name

ranger.admin.kerberos.cookie.path

Default Value

/

API Name

ranger.admin.kerberos.cookie.path

Required

false

Kerberos Token Valid Seconds**Description**

Kerberos token validity

Related Name

ranger.admin.kerberos.token.valid.seconds

Default Value

30

API Name

ranger.admin.kerberos.token.valid.seconds

Required

false

Maximum Shards for Solr Collection of Ranger Audits**Description**

Maximum number of shards for the Ranger Audit Solr collection. The recommended value is, number of replica given multiple by number of shards given for the collection.

Related Name

ranger.audit.solr.max.shards.per.node

Default Value

1

API Name

ranger.audit.solr.max.shards.per.node

Required

true

Replicas for Solr Collection of Ranger Audits**Description**

Number of replicas for Ranger Audit Solr collection. The recommended value is, number of Solr servers running in the current cluster divided by number of shards for the collection.

Related Name

ranger.audit.solr.no.replica

Default Value

1

API Name

ranger.audit.solr.no.replica

Required

true

Shards for Solr Collection of Ranger Audits**Description**

Number of shards required for Ranger Audit Solr collection. The recommended number of shards is equal or less than the number of Solr Server running in the current cluster.

Related Name

ranger.audit.solr.no.shards

Default Value

1

API Name

ranger.audit.solr.no.shards

Required

true

Enable Knox Trusted Proxy Support

Description

Determine if the Ranger service should allow authentication using Knox trusted proxy.

Related Name

ranger.authentication.allow.trustedproxy

Default Value

false

API Name

ranger.authentication.allow.trustedproxy

Required

false

Default Policy Groups

Description

Single or comma separated list of groups that are required in default policies for Ranger plugin services. The groups will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.groups

Default Value**API Name**

ranger.default.policy.groups

Required

false

Default Policy Users

Description

Single or comma separated list of users that are required in default policies for Ranger plugin services. The users will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.users

Default Value**API Name**

ranger.default.policy.users

Required

false

Admin AD Auth Base DN**Description**

This parameter is only used if Authentication method is AD. The Distinguished Name (DN) of the starting point for directory server searches.

Related Name

ranger.ldap.ad.base.dn

Default Value**API Name**

ranger.ldap.ad.base.dn

Required

false

Admin AD Auth Bind DN**Description**

Full distinguished name (DN), including common name (CN), of an AD user account that has privileges to search for users. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.bind.dn

Default Value**API Name**

ranger.ldap.ad.bind.dn

Required

false

Admin AD Auth Domain Name**Description**

AD domain. Only used if Authentication method is AD.

Related Name

ranger.ldap.ad.domain

Default Value**API Name**

ranger.ldap.ad.domain

Required

false

Admin AD Auth Referral**Description**

This parameter is only used if Authentication method is AD. Set to follow if multiple AD servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed.

Related Name

ranger.ldap.ad.referral

Default Value

ignore

API Name

ranger.ldap.ad.referral

Required

false

Admin AD Auth URL**Description**

AD URL. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.url

Default Value**API Name**

ranger.ldap.ad.url

Required

false

Admin AD Auth User Search Filter**Description**

AD user search filter. Only used if Authentication method is AD.

Related Name

ranger.ldap.ad.user.searchfilter

Default Value**API Name**

ranger.ldap.ad.user.searchfilter

Required

false

Admin LDAP Auth Base DN**Description**

The Distinguished Name (DN) of the starting point for directory server searches. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.base.dn

Default Value**API Name**

ranger.ldap.base.dn

Required

false

Admin LDAP Auth Bind User**Description**

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

Related Name

ranger.ldap.bind.dn

Default Value**API Name**

ranger.ldap.bind.dn

Required

false

Admin LDAP Auth Group Role Attribute**Description**

LDAP group role attribute. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.roleattribute

Default Value**API Name**

ranger.ldap.group.roleattribute

Required

false

Admin LDAP Auth Group Search Base**Description**

LDAP group searchbase. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.searchbase

Default Value**API Name**

ranger.ldap.group.searchbase

Required

false

Admin LDAP Auth Group Search Filter**Description**

LDAP group search filter. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.searchfilter

Default Value**API Name**

ranger.ldap.group.searchfilter

Required

false

Admin LDAP Auth Referral

Description

This parameter is only used if Authentication method is LDAP. Set to follow if multiple LDAP servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the ReferralException is thrown.

Related Name

ranger.ldap.referral

Default Value

ignore

API Name

ranger.ldap.referral

Required

false

Admin LDAP Auth URL

Description

LDAP server URL. Example: value = ldap://localhost:389 or ldaps://localhost:636

Related Name

ranger.ldap.url

Default Value**API Name**

ranger.ldap.url

Required

false

Admin LDAP Auth User DN Pattern

Description

LDAP user DN. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.user.dnpattern

Default Value**API Name**

ranger.ldap.user.dnpattern

Required

false

Admin LDAP Auth User Search Filter

Description

LDAP user search filter. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.user.searchfilter

Default Value**API Name**

ranger.ldap.user.searchfilter

Required

false

SSO Browser Useragent**Description**

Comma separated values of browser agent

Related Name

ranger.sso.browser.useragent

Default Value

Mozilla, chrome

API Name

ranger.sso.browser.useragent

Required

false

Enable Ranger SSO**Description**

Determine if Ranger is Knox SSO enabled or not ?

Related Name

ranger.sso.enabled

Default Value

false

API Name

ranger.sso.enabled

Required

false

SSO Provider Url**Description**

SSO provider url Example: https://KNOX_HOST:KNOX_PORT/gateway/KNOXSSO_TOPOLOGY_NAME/api/v1/websso

Related Name

ranger.sso.providerurl

Default Value**API Name**

ranger.sso.providerurl

Required

false

SSO Public Key**Description**

Public key for SSO cookie verification

Related Name

ranger.sso.publicKey

Default Value**API Name**

ranger.sso.publicKey

Required

false

Enable Auto Create Tag Service**Description**

Whether to create tag service in Ranger Admin.

Related Name

ranger.tagservice.auto.create

Default Value

true

API Name

ranger.tagservice.auto.create

Required

false

Enable Tag Service Auto Link**Description**

Whether to link the Tag service set in "Tag Service Name" parameter to all available services in Ranger Admin.

Related Name

ranger.tagservice.auto.link

Default Value

true

API Name

ranger.tagservice.auto.link

Required

false

Tag Service Name**Description**

Name of the tag service that will be created in Ranger Admin when "Enable Auto Create Tag Service" parameter is enabled.

Related Name

ranger.tagservice.auto.name

Default Value

cm_tag

API Name

ranger.tagservice.auto.name

Required

false

Admin UNIX Auth Remote Login

Description

Whether remote login is enabled. Only used if Authentication method is UNIX.

Related Name

ranger.unixauth.remote.login.enabled

Default Value

true

API Name

ranger.unixauth.remote.login.enabled

Required

false

Admin UNIX Auth Service Hostname

Description

Host where unix authentication service is running. Only used if Authentication method is UNIX. {{RANGER_USERSYNC_HOST}} is a placeholder value which will be replaced with the host where Ranger Usersync will be installed in the current cluster.

Related Name

ranger.unixauth.service.hostname

Default Value

RANGER_USERSYNC_HOST

API Name

ranger.unixauth.service.hostname

Required

false

Ranger Admin Conf Path

Description

Staging directory for Ranger Admin Configuration. This should generally not be changed.

Related Name

ranger_admin_conf_path

Default Value

/etc/ranger/admin

API Name

ranger_admin_conf_path

Required

true

Ranger Admin Max Heapsize

Description

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

Related Name

ranger_admin_max_heap_size

Default Value

1 GiB

API Name

ranger_admin_max_heap_size

Required

true

Admin Authentication Method**Description**

Authentication Method for login to Ranger Admin.

Related Name

ranger.authentication.method

Default Value

UNIX

API Name

ranger_authentication_method

Required

false

Ranger Database Host**Description**

Hostname of the database used by Ranger Admin. If the port is non-default for your database type, use host:port notation.

Related Name

ranger_database_host

Default Value**API Name**

ranger_database_host

Required

true

Ranger Database Name**Description**

Name of Ranger Admin database.

Related Name

ranger_database_name

Default Value

ranger

API Name

ranger_database_name

Required

true

Ranger Database User Password**Description**

Password for Ranger Admin database.

Related Name

ranger.jpa.jdbc.password

Default Value**API Name**

ranger_database_password

Required

true

Ranger Database Type**Description**

Database type to be used.

Related Name

ranger_database_type

Default Value

PostgreSQL

API Name

ranger_database_type

Required

true

Ranger Database User**Description**

User for Ranger Admin database.

Related Name

ranger.jpa.jdbc.user

Default Value

rangeradmin

API Name

ranger_database_user

Required

true

Admin AD Auth Bind Password**Description**

Password for the account that can search for users. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.bind.password

Default Value**API Name**

ranger_ldap_ad_bind_password

Required

false

Admin LDAP Auth Bind User Password**Description**

Password for the account that can search for users.

Related Name

ranger.ldap.bind.password

Default Value**API Name**

ranger_ldap_bind_password

Required

false

Knox Proxy User Groups**Description**

Accepts a list of group names. The Knox user can impersonate only the users that belong to the groups specified in the list. The wildcard value * may be used to allow impersonation of any user belonging to any group.

Related Name

ranger.proxyuser.knox.groups

Default Value

*

API Name

ranger_proxyuser_knox_groups

Required

false

Knox Proxy User Hosts**Description**

Accepts a list of IP addresses, IP address ranges in CIDR format and/or host names. The Knox user can impersonate only the requests coming from hosts specified in the list. The wildcard value * may be used to allow impersonation from any host.

Related Name

ranger.proxyuser.knox.hosts

Default Value

*

API Name

ranger_proxyuser_knox_hosts

Required

false

Knox Proxy User Users**Description**

Accepts a list of usernames. The Knox user can impersonate only the users specified in the list. The wildcard value * may be used to allow impersonation of any user.

Related Name

ranger.proxyuser.knox.users

Default Value

*

API Name

ranger_proxyuser_knox_users

Required

false

Ranger Tomcat Work Dir**Description**

Tomcat work directory for Ranger Admin. This should generally not be changed.

Related Name

ranger_tomcat_work_dir

Default Value

/var/lib/ranger/admin

API Name

ranger_tomcat_work_dir

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Admin Unix Auth Service Port****Description**

Port for unix authentication service. Only used if Authentication method is UNIX.

Related Name

ranger.unixauth.service.port

Default Value

5151

API Name

ranger.unixauth.service.port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger Admin TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Admin might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ranger.truststore.file

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ranger Admin TLS/SSL Trust Store Password**Description**

The password for the Ranger Admin TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ranger.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ranger Admin**Description**

Encrypt communication between clients and Ranger Admin using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ranger.service.https.attrib.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ranger Admin TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Admin is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ranger.https.attrib.keystore.file

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ranger Admin TLS/SSL Server Keystore File Password**Description**

The password for the Ranger Admin keystore file.

Related Name

ranger.service.https.attrib.keystore.pass

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

`stacks_collection_enabled`**Required**`true`**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

Related Name`stacks_collection_frequency`**Default Value**`5.0 second(s)`**API Name**`stacks_collection_frequency`**Required**`false`**Stacks Collection Method****Description**

The method used to collect stacks. The `jstack` option involves periodically running the `jstack` command against the role's daemon process. The `servlet` method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the `servlet` method is selected, that HTTP endpoint is periodically scraped.

Related Name`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`

Suppress Parameter Validation: Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-admin-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ranger Admin Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Exclude Users from Audit Access Tab

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Exclude Users from Audit Access Tab parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.accesslogs.exclude.users.list

Required

true

Suppress Parameter Validation: Kerberos Cookie Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Cookie Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.admin.kerberos.cookie.path

Required

true

Suppress Parameter Validation: Default Policy Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Groups parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_ranger.default.policy.groups`**Required**`true`**Suppress Parameter Validation: Default Policy Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Users parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.default.policy.users`**Required**`true`**Suppress Parameter Validation: Admin AD Auth Base DN****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Base DN parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.ad.base.dn`**Required**`true`**Suppress Parameter Validation: Admin AD Auth Bind DN****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Bind DN parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.ad.bind.dn`**Required**`true`**Suppress Parameter Validation: Admin AD Auth Domain Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Domain Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.domain

Required

true

Suppress Parameter Validation: Admin AD Auth URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth URL parameter.

Related Name**Default Value**

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name`role_health_suppression_ranger_ranger_admin_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_admin_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_admin_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_admin_swap_memory_usage_rate`**Required**`true`

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_unexpected_exits

Required

true

Ranger Tagsync

Advanced

Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties

Description

For advanced use only. A string to be inserted into conf/atlas-application.properties for this role only.

Related Name**Default Value****API Name**

conf/atlas-application.properties_role_safety_valve

Required

false

Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml

Description

For advanced use only. A string to be inserted into conf/ranger-tagsync-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve

Required

false

Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml

Description

For advanced use only. A string to be inserted into conf/ranger-tagsync-site.xml for this role only.

Related Name

Default Value**API Name**`conf/ranger-tagsync-site.xml_role_safety_valve`**Required**`false`**Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into `log4j.properties` for this role only.

Related Name**Default Value****API Name**`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

RANGER_TAGSYNC_role_env_safety_valve

Required

false

Logs**Ranger Tagsync Log Directory****Description**

The log directory for log files of the role Ranger Tagsync.

Related Name

ranger.tagsync.logdir

Default Value

/var/log/ranger/tagsync

API Name

log_dir

Required

false

Ranger Tagsync Logging Threshold**Description**

The minimum log level for Ranger Tagsync logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Ranger Tagsync Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Ranger Tagsync logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Ranger Tagsync Max Log Size**Description**

The maximum size, in megabytes, per log file for Ranger Tagsync logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ranger_tagsync_fd_thresholds

Required

false

Ranger Tagsync Host Health Test**Description**

When computing the overall Ranger Tagsync health, consider the host's health.

Related Name**Default Value**

true

API Name

ranger_tagsync_host_health_enabled

Required

false

Ranger Tagsync Process Health Test**Description**

Enables the health test that the Ranger Tagsync's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ranger_tagsync_scm_health_enabled

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Required

false

Enable File Tag Source**Description**

Whether to sync tags from file.

Related Name

ranger.tagsync.source.file

Default Value

false

API Name

ranger.tagsync.source.file

Required

false

File Source: File Update Polling Interval**Description**

Sync Interval for updating tags from file.

Related Name

ranger.tagsync.source.file.check.interval.millis

Default Value

1 minute(s)

API Name

ranger.tagsync.source.file.check.interval.millis

Required

false

File Source: Filename**Description**

Filename containing tags.

Related Name

ranger.tagsync.source.file.filename

Default Value**API Name**`ranger.tagsync.source.file.filename`**Required**`false`**Ranger Tagsync Conf Path****Description**

Staging directory for Ranger Tagsync Configuration. This should generally not be changed.

Related Name`ranger_tagsync_conf_path`**Default Value**`/etc/ranger/tagsync`**API Name**`ranger_tagsync_conf_path`**Required**`true`**Ranger Tagsync Max Heapsize****Description**

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

Related Name`ranger_tagsync_max_heap_size`**Default Value**`1 GiB`**API Name**`ranger_tagsync_max_heap_size`**Required**`true`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**`false`

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger Tagsync TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Tagsync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

xasecure.policymgr.clientssl.truststore

Default Value

API Name

ssl_client_truststore_location

Required

false

Ranger Tagsync TLS/SSL Trust Store Password**Description**

The password for the Ranger Tagsync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

xasecure.policymgr.clientssl.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ranger Tagsync**Description**

Encrypt communication between clients and Ranger Tagsync using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name**Default Value**

false

API Name

ssl_enabled

Required

false

Ranger Tagsync TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Tagsync is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

xasecure.policymgr.clientssl.keystore

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ranger Tagsync TLS/SSL Server Keystore File Password**Description**

The password for the Ranger Tagsync keystore file.

Related Name

xasecure.policymgr.clientssl.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Parameter Validation: Atlas Source: Kafka Consumer Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas Source: Kafka Consumer Group parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_atlas.kafka.entities.group.id

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/atlas-application.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml parameter.

Related Name

Default Value

false

API Name

role_config_suppression_conf/ranger-tagsync-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Capture Cluster name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Capture Cluster name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.tagsync.atlas.default.cluster.name

Required

true

Suppress Parameter Validation: Ranger Tagsync Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.tagsync.dest.ranger.username

Required

true

Suppress Parameter Validation: File Source: Filename**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the File Source: Filename parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.tagsync.source.file.filename

Required

true

Suppress Parameter Validation: Ranger Tagsync Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_tagsync_conf_path

Required

true

Suppress Parameter Validation: Ranger Tagsync Max Heapsize**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Max Heapsize parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_tagsync_max_heap_size

Required

true

Suppress Parameter Validation: Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_tagsync_role_env_safety_valve

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Ranger Tagsync TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Ranger Tagsync TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Ranger Tagsync TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ranger Tagsync TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_tagsync_unexpected_exits

Required

true

Ranger Usersync

Advanced

Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml

Description

For advanced use only. A string to be inserted into conf/ranger-ugsync-site.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-ugsync-site.xml_role_safety_valve

Required

false

Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**`true`**API Name**`oom_heap_dump_enabled`**Required**`true`**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**`true`**API Name**`oom_sigkill_enabled`**Required**`true`**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**`false`**API Name**`process_auto_restart`**Required**`true`

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value**API Name**

RANGER_USERSYNC_role_env_safety_valve

Required

false

Logs**Ranger Usersync Log Directory****Description**

The log directory for log files of the role Ranger Usersync.

Related Name

ranger.usersync.logdir

Default Value

/var/log/ranger/usersync

API Name

log_dir

Required

false

Ranger Usersync Logging Threshold**Description**

The minimum log level for Ranger Usersync logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Ranger Usersync Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Ranger Usersync logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Ranger Usersync Max Log Size**Description**

The maximum size, in megabytes, per log file for Ranger Usersync logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

ranger_usersync_fd_thresholds

Required

false

Ranger Usersync Host Health Test**Description**

When computing the overall Ranger Usersync health, consider the host's health.

Related Name**Default Value**

true

API Name

ranger_usersync_host_health_enabled

Required

false

Ranger Usersync Process Health Test**Description**

Enables the health test that the Ranger Usersync's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

ranger_usersync_scm_health_enabled

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Graceful Shutdown Timeout

Description

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

18 second(s)

API Name

graceful_stop_timeout

Required

false

Enable Ranger Usersync Cookie Authentication

Description

Enable cookie-based authentication for requests going from Ranger Usersync to Ranger Admin.

Related Name

ranger.usersync.cookie.enabled

Default Value

true

API Name

ranger.usersync.cookie.enabled

Required

false

Enable User Sync

Description

Should users and groups be synchronized to Ranger Database? Required to setup Ranger policies.

Related Name

ranger.usersync.enabled

Default Value

true

API Name

ranger.usersync.enabled

Required

false

Usersync Filesource File Name**Description**

Path to the file with the users and groups information. Only used when Usersync Sync Source is set to "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder". Example: /tmp/usergroup.json or /tmp/usergroup.csv or /tmp/usergroup.txt

Related Name

ranger.usersync.filesource.file

Default Value**API Name**

ranger.usersync.filesource.file

Required

false

Usersync Filesource Delimiter**Description**

Delimiter used in file, if File based user sync is used

Related Name

ranger.usersync.filesource.text.delimiter

Default Value

,

API Name

ranger.usersync.filesource.text.delimiter

Required

false

Ranger Usersync Group Based Role Assignment Rules**Description****Related Name**

ranger.usersync.group.based.role.assignment.rules

Default Value**API Name**

ranger.usersync.group.based.role.assignment.rules

Required

false

Usersync Group Member Attribute**Description**

LDAP group member attribute name. Example: member

Related Name

ranger.usersync.group.memberattributename

Default Value**API Name**

ranger.usersync.group.memberattributename

Required

false

Usersync Group Name Attribute**Description**

LDAP group name attribute. Example: cn

Related Name

ranger.usersync.group.nameattribute

Default Value**API Name**

ranger.usersync.group.nameattribute

Required

false

Usersync Group Object Class**Description**

LDAP Group object class. Example: group

Related Name

ranger.usersync.group.objectclass

Default Value**API Name**

ranger.usersync.group.objectclass

Required

false

Usersync Enable Group Search First**Description**

Enable Group Search First.

Related Name

ranger.usersync.group.search.first.enabled

Default Value

false

API Name

ranger.usersync.group.search.first.enabled

Required

false

Usersync Group Search Base**Description**

Search base for groups. Sample value would be ou=groups,dc=hadoop,dc=apache,dc=org.
The parameter overrides value specified in ranger.usersync.ldap.searchBase,

ranger.usersync.ldap.user.searchbase. If a value is not specified, takes the value of ranger.usersync.ldap.searchBase. If ranger.usersync.ldap.searchBase is also not specified, takes the value of ranger.usersync.ldap.user.searchbase. Multiple Ous can be configured with ; (semicolon) separated eg: ou=groups,DC=example,DC=com;ou=group1,ou=group2

Related Name

ranger.usersync.group.searchbase

Default Value**API Name**

ranger.usersync.group.searchbase

Required

false

Usersync Enable Group Sync**Description**

Whether Usersync should use ldapsearch to find groups instead of relying on user entry attributes.

Related Name

ranger.usersync.group.searchenabled

Default Value

true

API Name

ranger.usersync.group.searchenabled

Required

false

Usersync Group Search Filter**Description**

Optional additional filter constraining the groups selected for syncing. A sample value would be (dept=eng)

Related Name

ranger.usersync.group.searchfilter

Default Value**API Name**

ranger.usersync.group.searchfilter

Required

false

Usersync Group Search Scope**Description**

Search scope for the groups. Value "base" indicates that only the entry specified as the search base in ranger.usersync.group.searchbase should be considered. One "indicates" that only the immediate children of the entry specified as the search base in ranger.usersync.group.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.group.searchbase, and all of its subordinates to any depth, should be considered.

Related Name

ranger.usersync.group.searchscope

Default Value

sub

API Name

ranger.usersync.group.searchscope

Required

false

Usersync Group Usermap Sync**Description**

Whether to sync all groups for a user.

Related Name

ranger.usersync.group.usermapsyncenabled

Default Value

true

API Name

ranger.usersync.group.usermapsyncenabled

Required

false

Usersync Bind User**Description**

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

Related Name

ranger.usersync.ldap.binddn

Default Value**API Name**

ranger.usersync.ldap.binddn

Required

false

Usersync Incremental Sync**Description**

Enable Incremental Sync.

Related Name

ranger.usersync.ldap.deltasync

Default Value

true

API Name

ranger.usersync.ldap.deltasync

Required

false

Usersync Group Hierarchy Levels

Description

Levels of LDAP directory tree where the groups need to be searched.

Related Name

ranger.usersync.ldap.grouphierarchylevels

Default Value

0

API Name

ranger.usersync.ldap.grouphierarchylevels

Required

false

Usersync Groupname Case Conversion

Description

Used for converting syncing groups to the selected case conversion.

Related Name

ranger.usersync.ldap.groupname.caseconversion

Default Value

none

API Name

ranger.usersync.ldap.groupname.caseconversion

Required

false

Usersync Referral

Description

Set to follow if multiple LDAP/AD servers are configured to return continuation references for results. Set to ignore if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the ReferralException is thrown.

Related Name

ranger.usersync.ldap.referral

Default Value

ignore

API Name

ranger.usersync.ldap.referral

Required

false

Usersync Search Base

Description

Search base for users and groups. Sample value would be dc=hadoop,dc=apache,dc=org. Multiple Ous can be configured with ; (semicolon) separated.

Related Name

ranger.usersync.ldap.searchBase

Default Value

API Name

ranger.usersync.ldap.searchBase

Required

false

Usersync Enable STARTTLS**Description**

Enable LDAP STARTTLS.

Related Name

ranger.usersync.ldap.starttls

Default Value

false

API Name

ranger.usersync.ldap.starttls

Required

false

Usersync LDAP/AD URL**Description**

LDAP server URL. Example: value = ldap://localhost:389 or ldaps://localhost:636

Related Name

ranger.usersync.ldap.url

Default Value**API Name**

ranger.usersync.ldap.url

Required

false

Usersync User Group Name Attribute**Description**

LDAP user group name attribute. Generally it is the same as username attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

Related Name

ranger.usersync.ldap.user.groupnameattribute

Default Value**API Name**

ranger.usersync.ldap.user.groupnameattribute

Required

false

Usersync User Name Attribute**Description**

LDAP user name attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

Related Name

ranger.usersync.ldap.user.nameattribute

Default Value**API Name**

ranger.usersync.ldap.user.nameattribute

Required

false

Usersync User Object Class**Description**

LDAP User Object Class. Example: person or user

Related Name

ranger.usersync.ldap.user.objectclass

Default Value**API Name**

ranger.usersync.ldap.user.objectclass

Required

false

Usersync User Search Base**Description**

Search base for users. Sample value would be ou=users,dc=hadoop,dc=apache,dc=org. Overrides value specified in ranger.usersync.ldap.searchBase. Multiple Ous can be configured with ; (semicolon) separated eg: cn=users,dc=example,dc=com;ou=example1,ou=example2

Related Name

ranger.usersync.ldap.user.searchbase

Default Value**API Name**

ranger.usersync.ldap.user.searchbase

Required

false

Usersync User Search Filter**Description**

Optional additional filter constraining the users selected for syncing. A sample value would be (dept=eng). Customize the value to suit your deployment.

Related Name

ranger.usersync.ldap.user.searchfilter

Default Value**API Name**

ranger.usersync.ldap.user.searchfilter

Required

false

Usersync User Search Scope

Description

Search scope for the users. Value "base" indicates that only the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "One" indicates that only the immediate children of the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.ldap.user.searchbase, and all of its subordinates to any depth, should be considered.

Related Name

ranger.usersync.ldap.user.searchscope

Default Value

sub

API Name

ranger.usersync.ldap.user.searchscope

Required

false

Usersync Username Case Conversion

Description

Used for converting syncing users to the selected case conversion.

Related Name

ranger.usersync.ldap.username.caseconversion

Default Value

none

API Name

ranger.usersync.ldap.username.caseconversion

Required

false

Enable Results to be Paged for User/Group Request

Description

Whether results can be paged for User/Group requests.

Related Name

ranger.usersync.pagedresultsenabled

Default Value

true

API Name

ranger.usersync.pagedresultsenabled

Required

false

User/Group Request Page size.

Description

Enter Page size for User/Group Request.

Related Name

ranger.usersync.pagedresultssize

Default Value

500

API Name

ranger.usersync.pagedresultssize

Required

false

Maximum Records Per API Call**Description**

Maximum number of records to be returned per API call.

Related Name

ranger.usersync.policymanager.maxrecordsperapicall

Default Value

1000

API Name

ranger.usersync.policymanager.maxrecordsperapicall

Required

true

Ranger Usersync Policymgr Username**Description**

Ranger Usersync username in Ranger Admin.

Related Name

ranger.usersync.policymgr.username

Default Value

rangerusersync

API Name

ranger.usersync.policymgr.username

Required

false

Ranger Usersync Unix Service Port**Description**

Port for Unix authentication service.

Related Name

ranger.usersync.port

Default Value

5151

API Name

ranger.usersync.port

Required

true

Ranger Usersync Role Assignment List Delimiter**Description**

The parameter is used to specify delimiter while syncing roles to users and groups in Ranger Admin. It is a delimiter for roles. Example - "ROLE_SYS_ADMIN:u:username1,username2&ROLE_KEY_ADMIN:g:groupname1", where ROLE_SYS_ADMIN and ROLE_KEY_ADMIN are roles in Ranger Admin separated by delimiter &. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.role.assignment.list.delimiter

Default Value

&

API Name

ranger.usersync.role.assignment.list.delimiter

Required

false

Usersync Sleeptime interval

Description

Sleep time interval between user sync operations in milliseconds.

Related Name

ranger.usersync.sleeptimeinmillisbetweensynccycle

Default Value

1 minute(s)

API Name

ranger.usersync.sleeptimeinmillisbetweensynccycle

Required

false

Source for Syncing User and Groups

Description

For syncing from Ldap source, use "org.apache.ranger.ldapusersync.process.LdapUserGroupBuilder". For syncing from Unix source, use "org.apache.ranger.unixusersync.process.UnixUserGroupBuilder". For syncing from File source, use "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder"

Related Name

ranger.usersync.source.impl.class

Default Value

org.apache.ranger.unixusersync.process.UnixUserGroupBuilder

API Name

ranger.usersync.source.impl.class

Required

true

Ranger Usersync Unix Backend

Description

The backend mechanism to read users and groups from a UNIX system. The value is applicable only on UNIX-based systems.

Related Name

ranger.usersync.unix.backend

Default Value

nss

API Name

ranger.usersync.unix.backend

Required

false

Usersync UNIX Minimum User ID**Description**

Minimum User ID to start syncing. This should be set to avoid syncing of UNIX system-level users in the Ranger Admin.

Related Name

ranger.usersync.unix.minUserId

Default Value

500

API Name

ranger.usersync.unix.minUserId

Required

false

Usersync Enable User Search**Description**

Enable User Search, when ranger.usersync.group.search.first.enabled is set to true.

Related Name

ranger.usersync.user.searchenabled

Default Value

false

API Name

ranger.usersync.user.searchenabled

Required

false

Ranger Usersync Username Groupname Assignment List Delimiter**Description**

The parameter is used to specify a delimiter while syncing users and groups in Ranger Admin. Used as a delimiter to differentiate between two or more users and groups. Example - "ROLE_SYS_ADMIN:u:username1,username2", where username1 and username2 are separated by ,. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.username.groupname.assignment.list.delimiter

Default Value

,

API Name

ranger.usersync.username.groupname.assignment.list.delimiter

Required

false

Ranger Usersync User Groups Assignment List Delimiter**Description**

The parameter is used to specify delimiter while syncing users and groups along with specified roles in Ranger Admin. It is a delimiter to differentiate between users and groups from respective roles. Example - "ROLE_SYS_ADMIN:u:username1,username2&ROLE_SYS_ADMIN:g:groupname1,groupname2", where ROLE_SYS_ADMIN is a role. "u" is used to denote the list of users followed by actual usernames which are username1 and username2. While "g" is used to denote the list of groups followed by actual groupnames which are groupname1 and groupname2. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.users.groups.assignment.list.delimiter

Default Value

:

API Name

ranger.usersync.users.groups.assignment.list.delimiter

Required

false

Ranger Usersync Conf Path**Description**

Staging directory for Ranger Usersync Configuration. This should generally not be changed.

Related Name

ranger_usersync_conf_path

Default Value

/etc/ranger/usersync

API Name

ranger_usersync_conf_path

Required

true

Usersync Bind User Password**Description**

Password for the LDAP bind user used for searching users.

Related Name

ranger.usersync.ldap.ldapbindpassword

Default Value**API Name**`ranger_usersync_ldap_ldapbindpassword`**Required**`false`**Ranger Usersync Max Heapsize****Description**

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

Related Name`ranger_usersync_max_heap_size`**Default Value**`1 GiB`**API Name**`ranger_usersync_max_heap_size`**Required**`true`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**`false`**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger Usersync TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Usersync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ranger.usersync.truststore.file

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ranger Usersync TLS/SSL Trust Store Password

Description

The password for the Ranger Usersync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ranger.usersync.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

`stacks_collection_frequency`**Default Value**

5.0 second(s)

API Name`stacks_collection_frequency`**Required**

false

Stacks Collection Method**Description**

The method used to collect stacks. The `jstack` option involves periodically running the `jstack` command against the role's daemon process. The `servlet` method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the `servlet` method is selected, that HTTP endpoint is periodically scraped.

Related Name`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name`role_config_suppression_cdh_version_validator`**Required**

true

Suppress Parameter Validation: Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Advanced Configuration Snippet (Safety Valve) for `conf/ranger-ugsync-site.xml` parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_conf/ranger-ugsync-site.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Usersync Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Log Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Exporters Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Usersync Filesource File Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Filesource File Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.filesource.file

Required

true

Suppress Parameter Validation: Usersync Filesource Delimiter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Filesource Delimiter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.filesource.text.delimiter

Required

true

Suppress Parameter Validation: Ranger Usersync Group Based Role Assignment Rules**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Group Based Role Assignment Rules parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.based.role.assignment.rules

Required

true

Suppress Parameter Validation: Usersync Group Member Attribute**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Member Attribute parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.memberattributename

Required

true

Suppress Parameter Validation: Usersync Group Name Attribute**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Name Attribute parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.nameattribute

Required

true

Suppress Parameter Validation: Usersync Group Object Class**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Object Class parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.objectclass

Required

true

Suppress Parameter Validation: Usersync Group Search Base**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Search Base parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.searchbase

Required

true

Suppress Parameter Validation: Usersync Group Search Filter

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Search Filter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.searchfilter

Required

true

Suppress Parameter Validation: Usersync Bind User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Bind User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.binddn

Required

true

Suppress Parameter Validation: Usersync Search Base

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Search Base parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.searchbase

Required

true

Suppress Parameter Validation: Usersync LDAP/AD URL

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync LDAP/AD URL parameter.

Related Name**Default Value**

false

API Name

```
role_config_suppression_ranger.usersync.ldap.url
```

Required

```
true
```

Suppress Parameter Validation: Usersync User Group Name Attribute**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Group Name Attribute parameter.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_ranger.usersync.ldap.user.groupnameattribute
```

Required

```
true
```

Suppress Parameter Validation: Usersync User Name Attribute**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Name Attribute parameter.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_ranger.usersync.ldap.user.nameattribute
```

Required

```
true
```

Suppress Parameter Validation: Usersync User Object Class**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Object Class parameter.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_ranger.usersync.ldap.user.objectclass
```

Required

```
true
```

Suppress Parameter Validation: Usersync User Search Base**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Search Base parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ranger.usersync.ldap.user.searchbase

Required

true

Suppress Parameter Validation: Usersync User Search Filter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Search Filter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.user.searchfilter

Required

true

Suppress Parameter Validation: Ranger Usersync Policymgr Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Policymgr Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.policymgr.username

Required

true

Suppress Parameter Validation: Ranger Usersync Unix Service Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Unix Service Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.port

Required

true

Suppress Parameter Validation: Ranger Usersync Role Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Role Assignment List Delimiter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.role.assignment.list.delimiter

Required

true

Suppress Parameter Validation: Ranger Usersync Username Groupname Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Username Groupname Assignment List Delimiter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.username.groupname.assignment.list.delimiter

Required

true

Suppress Parameter Validation: Ranger Usersync User Groups Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync User Groups Assignment List Delimiter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.users.groups.assignment.list.delimiter

Required

true

Suppress Parameter Validation: Ranger Usersync Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_conf_path

Required

true

Suppress Parameter Validation: Usersync Bind User Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Bind User Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_ldap_ldapbindpassword

Required

true

Suppress Parameter Validation: Ranger Usersync Max Heapsize

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Max Heapsize parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_max_heap_size

Required

true

Suppress Parameter Validation: Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_role_env_safety_valve

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Ranger Usersync TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Ranger Usersync TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_usersync_unexpected_exits

Required

true

Service-Wide**Advanced****System Group****Description**

The group that this service's processes should run as.

Related Name**Default Value**

ranger

API Name

process_groupname

Required

true

System User**Description**

The user that this service's processes should run as.

Related Name**Default Value**

ranger

API Name

process_username

Required

true

Ranger Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

RANGER_service_env_safety_valve

Required

false

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Ranger Admin Monitoring Thresholds**Description**

The health test thresholds of the overall Ranger Admin health. The check returns "Concerning" health if the percentage of "Healthy" Ranger Admins falls below the warning threshold. The check

is unhealthy if the total percentage of "Healthy" and "Concerning" Ranger Admins falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 49.0 %

API Name

RANGER_RANGER_ADMIN_healthy_thresholds

Required

false

Ranger Tagsync Role Health Test

Description

When computing the overall RANGER health, consider Ranger Tagsync's health

Related Name**Default Value**

true

API Name

RANGER_RANGER_TAGSYNC_health_enabled

Required

false

Ranger Usersync Role Health Test

Description

When computing the overall RANGER health, consider Ranger Usersync's health

Related Name**Default Value**

true

API Name

RANGER_RANGER_USERSYNC_health_enabled

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.

- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using `tsquery`. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`service_triggers`

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

`smon_derived_configs_safety_valve`

Required

false

Other**HDFS Service****Description**

Name of the HDFS service that this Ranger service instance depends on

Related Name**Default Value****API Name**

`hdfs_service`

Required

true

Ranger KMS Keyadmin User Initial Password**Description**

Password for the Ranger administrator, whose login name is "keyadmin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` . Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

Related Name

keyadmin_user_password

Default Value**API Name**

keyadmin_user_password

Required

true

Load Balancer Address**Description**

Load Balancer Address used by clients to access Ranger Admin. Only required when Ranger Admin is running with High Availability. Example: http://load-balancer-host:load-balancer-port

Related Name

ranger.externalurl

Default Value**API Name**

load_balancer_url

Required

false

Ranger Plugin DFS Audit Enabled**Description**

Whether DFS audit is enabled.

Related Name

ranger_plugin_hdfs_audit_enabled

Default Value

true

API Name

ranger_plugin_hdfs_audit_enabled

Required

false

Ranger Plugin DFS Audit URL**Description**

An absolute URL with no trailing slash should be entered, or leave the value empty. Allows setting up a centralized storage location for Ranger audits. This URL is used as the base for audit directories: all services plugging into Ranger will prepend this URL to their configured path used to store Ranger audits.

Related Name

ranger_plugin_hdfs_audit_url

Default Value

/ranger/audit

API Name

ranger_plugin_hdfs_audit_url

Required

false

Ranger Admin User Initial Password

Description

Password for the Ranger administrator, whose login name is "admin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

Related Name

rangeradmin_user_password

Default Value

API Name

rangeradmin_user_password

Required

true

Ranger Tagsync User Initial Password

Description

Password for the Ranger administrator, whose login name is "rangertagsync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

Related Name

rangertagsync_user_password

Default Value

API Name

rangertagsync_user_password

Required

true

Ranger Usersync User Initial Password

Description

Password for the Ranger administrator, whose login name is "rangerusersync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

S3 Connector Properties in Cloudera Runtime 7.1.9

Role groups:

Service-Wide

Advanced

S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

```
AWS_S3_service_env_safety_valve
```

Required

```
false
```

Default S3 Endpoint

Description

Optional, default endpoint used by CDH services accessing S3, indicating the AWS region. To see a list of valid values for this parameter please consult [AWS Regions and Endpoints for S3](#); use one of the values listed in the 'Endpoint' column, eg. 's3.us-east-2.amazonaws.com'. When not specified the endpoint used is s3.amazonaws.com

Related Name

```

```

Required

```
false
```

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

```
false
```

API Name

enable_config_alerts

Required

false

Other**Cloud Account Name****Description**

Name of an AWS account. The associated AWS keys are emitted to Hue, Impala and the Hive Metastore Server.

Related Name**Default Value****API Name**

cloud_account

Required

true

Security**Credentials Protection Policy****Description**

Determines a security policy for the distribution of AWS account credentials to cluster services. 'More Secure': Encrypted at all times and directly available to a limited set of services. 'Less Secure': Credentials may be in plain text in some configuration files for specific services in the cluster. When IAM profiles are used, credentials are externally managed in AWS and there are no AWS credentials in any configuration files, so this setting is not applicable.

Related Name**Default Value**

SECURE

API Name

key_distribution_policy

Required

true

Suppressions**Suppress Parameter Validation: S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

false

API Name

service_config_suppression_s3guard_unsupported_cdh_validator

Required

true

Schema Registry Properties in Cloudera Runtime 7.1.9

Role groups:

Schema Registry Server

Advanced**Schema Registry Server XML Override****Description**

For advanced use only, replace entire XML in the logback configuration file for Schema Registry Server, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml

Description

For advanced use only. A string to be inserted into registry.yaml for this role only.

Related Name

Default Value

API Name

registry.yaml_role_safety_valve

Required

false

Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value

API Name

SCHEMA_REGISTRY_SERVER_role_env_safety_valve

Required

false

Logs

Schema Registry Server Log Directory

Description

The log directory for log files of the role Schema Registry Server.

Related Name

log_dir

Default Value

/var/log/schemaregistry

API Name

log_dir

Required

false

Schema Registry Server Logging Threshold**Description**

The minimum log level for Schema Registry Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Schema Registry Server Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for Schema Registry Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Schema Registry Server Max Log Size**Description**

The maximum size, in megabytes, per log file for Schema Registry Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

`enable_alerts`

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

`enable_config_alerts`

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

`log_directory_free_space_absolute_thresholds`

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

`log_directory_free_space_percentage_thresholds`

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name

Default Value**API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

schema_registry_server_fd_thresholds

Required

false

Schema Registry Server Host Health Test**Description**

When computing the overall Schema Registry Server health, consider the host's health.

Related Name**Default Value**

true

API Name

schema_registry_server_host_health_enabled

Required

false

Schema Registry Server Process Health Test**Description**

Enables the health test that the Schema Registry Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

schema_registry_server_scm_health_enabled

Required

false

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Schema Registry Admin Port

Description

The admin port for the server.

Related Name

schema.registry.adminPort

Default Value

7789

API Name

schema.registry.adminPort

Required

true

Schema Registry Allowed Resources

Description

Allowed resources for Schema Registry.

Related Name

schema.registry.allowed.resources

Default Value

401.html, back-default.png, favicon.ico

API Name

schema.registry.allowed.resources

Required

false

Schema Version Cache Expiry Interval

Description

Schema version cache expiry interval.

Related Name

schema.registry.cache.expiry.interval

Default Value

3600

API Name

schema.registry.cache.expiry.interval

Required

true

Schema Registry Cache Size

Description

Schema Registry cache size.

Related Name

schema.registry.cache.size

Default Value

1000

API Name

schema.registry.cache.size

Required

true

Password For HTTP Proxy Server Username**Description**

Password For HTTP Proxy Server Username.

Related Name

schema.registry.httpProxyPassword

Default Value**API Name**

schema.registry.httpProxyPassword

Required

false

HTTP Proxy Server**Description**

URL for http proxy server. Please enter it in format protocol_name://host_name:port_number.

Related Name

schema.registry.httpProxyServer

Default Value**API Name**

schema.registry.httpProxyServer

Required

false

HTTP Proxy Server Availability**Description**

Boolean to set if HTTP Proxy Server is available or not.

Related Name

schema.registry.httpProxyServer.available

Default Value

false

API Name

schema.registry.httpProxyServer.available

Required

false

Username For HTTP Proxy Server**Description**

Username for http proxy server.

Related Name

schema.registry.httpProxyUsername

Default Value**API Name**

schema.registry.httpProxyUsername

Required

false

Schema Registry Jar Storage Directory Path**Description**

Jar storage directory path.

Related Name

schema.registry.jar.storage.directory.path

Default Value

/tmp/schema-registry/local-jars

API Name

schema.registry.jar.storage.directory.path

Required

false

Schema Registry Jar Storage HDFS URL**Description**

URL of the directory to be used for storing jars on HDFS when HDFS is not selected as an optional dependency.

Related Name

schema.registry.jar.storage.hdfs.url

Default Value

hdfs://localhost:8020

API Name

schema.registry.jar.storage.hdfs.url

Required

false

Schema Registry Jar Storage Type**Description**

Jar storage type for storing jars on the local filesystem or on HDFS. If 'hdfs' is set but HDFS is not selected as an optional dependency, please provide a value for the 'Schema Registry Jar Storage HDFS URL' property.

Related Name

schema.registry.jar.storage.type

Default Value

local

API Name

schema.registry.jar.storage.type

Required

false

Java Home Path Override

Description

Java home path override for Schema Registry.

Related Name

schema.registry.jdk.home

Default Value**API Name**

schema.registry.jdk.home

Required

false

Schema Registry Kerberos Name Rules

Description

Kerberos name rules for Schema Registry.

Related Name

schema.registry.kerberos.name.rules

Default Value

RULE:[2:\$1@\$0]([jt]t@.*EXAMPLE.COM)s/.*/\$MAPRED_USER/ RULE:[2:\$1@\$0]
([nd]n@.*EXAMPLE.COM)s/.*/\$HDFS_USER/DEFAULT

API Name

schema.registry.kerberos.name.rules

Required

false

Schema Registry Kerberos Non Browser User Agents

Description

Non browser user agents if kerberos is enabled.

Related Name

schema.registry.kerberos.non.browser.user.agents

Default Value**API Name**

schema.registry.kerberos.non.browser.user.agents

Required

false

Schema Registry Port

Description

The port on which server accepts connections.

Related Name

schema.registry.port

Default Value

7788

API Name

schema.registry.port

Required

true

Schema Registry Servlet Filter**Description**

Schema Registry servlet filter class.

Related Name

schema.registry.servlet.filter

Default Value

com.hortonworks.registries.auth.server.AuthenticationFilter

API Name

schema.registry.servlet.filter

Required

true

Schema Registry Admin Port (SSL)**Description**

HTTPS admin port Schema Registry node runs on when SSL is enabled.

Related Name

schema.registry.ssl.adminPort

Default Value

7791

API Name

schema.registry.ssl.adminPort

Required

false

SSL Keystore Type**Description**

The keystore type. It is blank by default but required if schema registry's ssl is enabled. e.g. PKCS12 or JKS.

Related Name

schema.registry.ssl.keyStoreType

Default Value

jks

API Name

schema.registry.ssl.keyStoreType

Required

false

Schema Registry Port (SSL)**Description**

HTTPS port Schema Registry node runs on when SSL is enabled.

Related Name

schema.registry.ssl.port

Default Value

7790

API Name

schema.registry.ssl.port

Required

false

SSL TrustStore Type**Description**

The truststore type. It is blank by default but required if schema registry's ssl is enabled. e.g. PKCS12 or JKS.

Related Name

schema.registry.ssl.trustStoreType

Default Value

jks

API Name

schema.registry.ssl.trustStoreType

Required

false

SSL ValidateCerts**Description**

Whether or not to validate TLS certificates before starting. If enabled, it will refuse to start with expired or otherwise invalid certificates.

Related Name

schema.registry.ssl.validateCerts

Default Value

false

API Name

schema.registry.ssl.validateCerts

Required

false

SSL ValidatePeers**Description**

Whether or not to validate TLS peer certificates.

Related Name

schema.registry.ssl.validatePeers

Default Value

false

API Name

schema.registry.ssl.validatePeers

Required

false

Schema Registry Query Timeout

Description

Schema Registry query timeout.

Related Name

schema.registry.storage.query.timeout

Default Value

30 second(s)

API Name

schema.registry.storage.query.timeout

Required

true

Schema Registry Token Validity

Description

Kerberos token validity for Schema Registry in ms.

Related Name

schema.registry.token.validity

Default Value

36000

API Name

schema.registry.token.validity

Required

false

Schema Registry Log Max Backup Index

Description

The number of backup files.

Related Name

schema_registry_log_maxbackupindex

Default Value

20

API Name

schema_registry_log_maxbackupindex

Required

false

Schema Registry Log Max File Size

Description

The maximum size of backup file before the log is rotated.

Related Name

schema_registry_log_maxfilesize

Default Value

256MB

API Name

`schema_registry_log_maxfilesize`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**`false`**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Schema Registry Server TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Schema Registry Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

schema.registry.ssl.trustStorePath

Default Value**API Name**

ssl_client_truststore_location

Required

false

Schema Registry Server TLS/SSL Trust Store Password**Description**

The password for the Schema Registry Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

schema.registry.ssl.trustStorePassword

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Schema Registry Server**Description**

Encrypt communication between clients and Schema Registry Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl.enable

Default Value

false

API Name

ssl_enabled

Required

false

Schema Registry Server TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Schema Registry Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

schema.registry.ssl.keyStorePath

Default Value**API Name**

ssl_server_keystore_location

Required

false

Schema Registry Server TLS/SSL Server Keystore File Password

Description

The password for the Schema Registry Server keystore file.

Related Name

schema.registry.ssl.keyStorePassword

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Schema Registry Server Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Schema Registry Server XML Override

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server XML Override parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_logback_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_registry.yaml_role_safety_valve

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Schema Registry Admin Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Admin Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.adminport

Required

true

Suppress Parameter Validation: Schema Registry Allowed Resources**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Allowed Resources parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.allowed.resources

Required

true

Suppress Parameter Validation: Password For HTTP Proxy Server Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password For HTTP Proxy Server Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.httpproxypassword

Required

true

Suppress Parameter Validation: HTTP Proxy Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.httpproxyserver

Required

true

Suppress Parameter Validation: Username For HTTP Proxy Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Username For HTTP Proxy Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.httpproxyusername

Required

true

Suppress Parameter Validation: Schema Registry Jar Storage Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Jar Storage Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.jar.storage.directory.path

Required

Suppress Parameter Validation: Schema Registry Jar Storage HDFS URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Jar Storage HDFS URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.jar.storage.hdfs.url

Required

true

Suppress Parameter Validation: Java Home Path Override

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.jdk.home

Required

true

Suppress Parameter Validation: Schema Registry Kerberos Name Rules

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Kerberos Name Rules parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.kerberos.name.rules

Required

true

Suppress Parameter Validation: Schema Registry Kerberos Non Browser User Agents

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Kerberos Non Browser User Agents parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.kerberos.non.browser.user.agents

Required

true

Suppress Parameter Validation: Schema Registry Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.port

Required

true

Suppress Parameter Validation: Schema Registry Servlet Filter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Servlet Filter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.servlet.filter

Required

true

Suppress Parameter Validation: Schema Registry Admin Port (SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Admin Port (SSL) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.adminport

Required

true

Suppress Parameter Validation: SSL Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL Keystore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.keystoretype

Required

true

Suppress Parameter Validation: Schema Registry Port (SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Port (SSL) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_schema.registry.ssl.port

Required

true

Suppress Parameter Validation: SSL TrustStore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL TrustStore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.truststoretype

Required

true

Suppress Parameter Validation: SSL ValidateCerts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidateCerts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.validatecerts

Required

true

Suppress Parameter Validation: SSL ValidatePeers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidatePeers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.validatepeers

Required

true

Suppress Parameter Validation: Schema Registry Log Max Backup Index**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Log Max Backup Index parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_log_maxbackupindex

Required

true

Suppress Parameter Validation: Schema Registry Log Max File Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Log Max File Size parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_log_maxfilesize

Required

true

Suppress Parameter Validation: Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_server_role_env_safety_valve

Required

true

Suppress Parameter Validation: Schema Registry Server TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Schema Registry Server TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Schema Registry Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Schema Registry Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_schemaregistry_schema_registry_server_unexpected_exits

Required

true

Service-Wide**Advanced****System Group****Description**

The group that this service's processes should run as.

Related Name**Default Value**

hadoop

API Name

process_groupname

Required

true

System User**Description**

The user that this service's processes should run as.

Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

SCHEMAREGISTRY_service_env_safety_valve

Required

false

Database

Schema Registry Database Host

Description

Hostname of the database used by Schema Registry. If the port is non-default for your database type, use host:port notation.

Related Name

schema.registry.storage.connector.host

Default Value

localhost

API Name

database_host

Required

true

Schema Registry Database Name

Description

Name of Schema Registry database.

Related Name

schema.registry.storage.connector.name

Default Value

schemaregistry

API Name

database_name

Required

true

Schema Registry Database User Password

Description

Password for Schema Registry database.

Related Name

schema.registry.storage.connector.password

Default Value**API Name**

database_password

Required

true

Schema Registry Database Port**Description**

Port for Schema Registry database.

Related Name

schema.registry.storage.connector.port

Default Value

3306

API Name

database_port

Required

true

Schema Registry Database Type**Description**

Database type to be used (postgres).

Related Name

schema.registry.storage.connector.type

Default Value

mysql

API Name

database_type

Required

Schema Registry Database User**Description**

User for Schema Registry database.

Related Name

schema.registry.storage.connector.user

Default Value

schemaregistry

API Name

database_user

Required

true

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Schema Registry Server Monitoring Thresholds**Description**

The health test thresholds of the overall Schema Registry Server health. The check returns "Concerning" health if the percentage of "Healthy" Schema Registry Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Schema Registry Servers falls below the critical threshold.

Related Name**Default Value**

Warning: 99.99 %, Critical: 49.99 %

API Name

SCHEMAREGISTRY_SCHEMA_REGISTRY_SERVER_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.

- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `{ "triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true" }` See the trigger rules documentation for more details on how to write triggers using `tsquery`. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`service_triggers`

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

`smon_derived_configs_safety_valve`

Required

false

Other**Enable Kerberos Authentication****Description**

Enables Kerberos authentication for this Schema Registry service.

Related Name

`kerberos.auth.enable`

Default Value

false

API Name

`kerberos.auth.enable`

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Schema Registry Server Log Directory**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Schema Registry Server XML Override**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server XML Override configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_logback_safety_valve

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_registry.yaml_role_safety_valve

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Schema Registry Admin Port**Description**

Whether to suppress configuration warnings produced by the Schema Registry Admin Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.adminport

Required

true

Suppress Configuration Validator: Schema Registry Allowed Resources**Description**

Whether to suppress configuration warnings produced by the Schema Registry Allowed Resources configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.allowed.resources

Required

true

Suppress Configuration Validator: Password For HTTP Proxy Server Username**Description**

Whether to suppress configuration warnings produced by the Password For HTTP Proxy Server Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.httpproxypassword

Required

true

Suppress Configuration Validator: HTTP Proxy Server**Description**

Whether to suppress configuration warnings produced by the HTTP Proxy Server configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_schema.registry.httpproxyserver`**Required**`true`**Suppress Configuration Validator: Username For HTTP Proxy Server****Description**

Whether to suppress configuration warnings produced by the Username For HTTP Proxy Server configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_schema.registry.httpproxyusername`**Required**`true`**Suppress Configuration Validator: Schema Registry Jar Storage Directory Path****Description**

Whether to suppress configuration warnings produced by the Schema Registry Jar Storage Directory Path configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_schema.registry.jar.storage.directory.path`**Required**`true`**Suppress Configuration Validator: Schema Registry Jar Storage HDFS URL****Description**

Whether to suppress configuration warnings produced by the Schema Registry Jar Storage HDFS URL configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_schema.registry.jar.storage.hdfs.url`**Required**`true`**Suppress Configuration Validator: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_schema.registry.jdk.home

Required

true

Suppress Configuration Validator: Schema Registry Kerberos Name Rules**Description**

Whether to suppress configuration warnings produced by the Schema Registry Kerberos Name Rules configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.kerberos.name.rules

Required

true

Suppress Configuration Validator: Schema Registry Kerberos Non Browser User Agents**Description**

Whether to suppress configuration warnings produced by the Schema Registry Kerberos Non Browser User Agents configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.kerberos.non.browser.user.agents

Required

true

Suppress Configuration Validator: Schema Registry Port**Description**

Whether to suppress configuration warnings produced by the Schema Registry Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.port

Required

true

Suppress Configuration Validator: Schema Registry Servlet Filter**Description**

Whether to suppress configuration warnings produced by the Schema Registry Servlet Filter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.servlet.filter

Required

true

Suppress Configuration Validator: Schema Registry Admin Port (SSL)**Description**

Whether to suppress configuration warnings produced by the Schema Registry Admin Port (SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.adminport

Required

true

Suppress Configuration Validator: SSL Keystore Type**Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.keystoretype

Required

true

Suppress Configuration Validator: Schema Registry Port (SSL)**Description**

Whether to suppress configuration warnings produced by the Schema Registry Port (SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.port

Required

true

Suppress Configuration Validator: SSL TrustStore Type

Description

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.truststoretype

Required

true

Suppress Configuration Validator: SSL ValidateCerts

Description

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.validatecerts

Required

true

Suppress Configuration Validator: SSL ValidatePeers

Description

Whether to suppress configuration warnings produced by the SSL ValidatePeers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema.registry.ssl.validatepeers

Required

true

Suppress Configuration Validator: Schema Registry Log Max Backup Index

Description

Whether to suppress configuration warnings produced by the Schema Registry Log Max Backup Index configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_log_maxbackupindex

Required

true

Suppress Configuration Validator: Schema Registry Log Max File Size**Description**

Whether to suppress configuration warnings produced by the Schema Registry Log Max File Size configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_log_maxfilesize

Required

true

Suppress Configuration Validator: Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_schema_registry_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Schema Registry Server TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Schema Registry Server TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Schema Registry Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Schema Registry Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Schema Registry Database Host**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Host parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_host

Required

true

Suppress Parameter Validation: Schema Registry Database Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Name parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_name

Required

true

Suppress Parameter Validation: Schema Registry Database User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database User Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_password

Required

true

Suppress Parameter Validation: Schema Registry Database Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_port

Required

true

Suppress Parameter Validation: Schema Registry Database User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_database_user

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Configuration Validator: Schema Registry Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_schema_registry_server_count_validator

Required

true

Suppress Parameter Validation: Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_schemaregistry_service_env_safety_valve

Required

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Schema Registry Server Health**Description**

Whether to suppress the results of the Schema Registry Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_schemaregistry_schema_registry_server_healthy

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on

how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**`[]`**API Name**`service_triggers`**Required**`true`

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**`smon_derived_configs_safety_valve`**Required**`false`

Healthy Solr Server Monitoring Thresholds

Description

The health test thresholds of the overall Solr Server health. The check returns "Concerning" health if the percentage of "Healthy" Solr Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Solr Servers falls below the critical threshold.

Related Name**Default Value**`Warning: 95.0 %, Critical: 90.0 %`**API Name**`solr_solr_servers_healthy_thresholds`**Required**`false`

Other

HDFS Data Directory

Description

HDFS directory used for storage by this Solr service.

Related Name**Default Value**`/solr`**API Name**`hdfs_data_dir`

Required

true

HDFS Service**Description**

Name of the HDFS service that this Search service instance depends on

Related Name**Default Value****API Name**

hdfs_service

Required

true

Ranger Plugin Trusted Proxy IP Address**Description**

Accepts a list of IP addresses of proxy servers for trusting.

Related Name

ranger.plugin.solr.trusted.proxy.ipaddress

Default Value**API Name**

ranger_plugin_trusted_proxy_ipaddress

Required

false

Ranger Plugin Use X-Forwarded for IP Address**Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.solr.use.x-forwarded-for.ipaddress

Default Value

false

API Name

ranger_plugin_use_x_forwarded_for_ipaddress

Required

false

Ranger Service**Description**

Name of the Ranger service that this Solr service instance depends on. This config is used for enabling Ranger authorization in the Solr instance not used by Ranger.

Related Name**Default Value****API Name**

ranger_service

Required

false

Solr Server for Upgrade**Description**

Solr server to be used while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7.

Related Name**Default Value****API Name**

solr_server_for_upgrade

Required

false

Upgrade Backup Directory**Description**

Directory on the HDFS file system that is used as the backup directory while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7.

Related Name**Default Value**

/user/solr/upgrade_backup

API Name

solr_upgrade_backup_dir

Required

false

Upgrade Metadata Directory**Description**

Directory on the local file system containing the migrated configurations and metadata required while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7. Note: This directory should be present in the Solr Server specified in 'Solr Server for Upgrade'.

Related Name**Default Value**

/var/lib/upgrade/solr_config

API Name

solr_upgrade_metadata_dir

Required

true

Solr Watchdog Timeout**Description**

If Solr does not respond on its web URL within this time interval, the Catalina process is killed.

Related Name**Default Value**

1 minute(s), 10 second(s)

API Name

solrd_watchdog_timeout

Required

false

ZooKeeper Service**Description**

Name of the ZooKeeper service that this Search service instance depends on

Related Name**Default Value****API Name**

zookeeper_service

Required

true

ZooKeeper Znode**Description**

ZooKeeper znode used to store information about this Solr service.

Related Name**Default Value**

/solr

API Name

zookeeper_znode

Required

true

Security**Enable Ranger Authorization for the Infrastructure Solr Service****Description**

Enable fine-grained security using Ranger for the infrastructure (infra) Solr service. This option is only for the Solr service that the Ranger service is using (for ranger-audits, etc.). No other Solr service can or should enable this option.

Related Name**Default Value**

false

API Name

enable_ranger_authorization

Required

false

Kerberos Principal**Description**

Kerberos principal short name used by all roles of this service.

Related Name**Default Value**

solr

API Name

kerberos_princ_name

Required

true

Active Directory Domain**Description**

Use this field for Active Directory configurations only, when combined with a simple username value in the "LDAP Bind User Distinguished Name" field, it will result in a UPM of user@example.com used for search/bind operations for authenticated user lookups.

Related Name**Default Value****API Name**

ldap_domain

Required

false

Ranger DFS Audit Path**Description**

The DFS path on which Ranger audits are written. The special placeholder '\${ranger_base_audit_url}' should be used as the prefix, in order to use the centralized location defined in the Ranger service.

Related Name

xasecure.audit.destination.hdfs.dir

Default Value

\$ranger_base_audit_url/solr

API Name

ranger_audit_hdfs_dir

Required

false

Ranger Audit DFS Spool Dir**Description**

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/solr/audit/hdfs/spool

API Name

ranger_audit_hdfs_spool_dir

Required

false

Ranger Audit Solr Spool Dir

Description

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/solr/audit/solr/spool

API Name

ranger_audit_solr_spool_dir

Required

false

Ranger Policy Cache Directory

Description

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.solr.policy.cache.dir

Default Value

/var/lib/ranger/solr/policy-cache

API Name

ranger_policy_cache_dir

Required

false

Enable LDAP Authentication

Description

When checked, LDAP-based authentication for users is enabled.

Related Name**Default Value**

false

API Name

solr_enable_ldap_auth

Required

false

Solr TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Solr is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name**Default Value**

API Name

solr_https_keystore_file

Required

false

Solr TLS/SSL Server Keystore File Password**Description**

The password for the Solr keystore file.

Related Name

solr.jetty.keystore.password

Default Value**API Name**

solr_https_keystore_password

Required

false

Solr TLS/SSL Trust Store File**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Solr might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name**Default Value****API Name**

solr_https_truststore_file

Required

false

Solr TLS/SSL Trust Store Password**Description**

The password for the Solr TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

solr.jetty.truststore.password

Default Value**API Name**

solr_https_truststore_password

Required

false

LDAP BaseDN**Description**

This parameter is useful when authenticating against a non-Active Directory server, such as OpenLDAP. When set, this parameter is used to convert the username into the LDAP Distinguished Name (DN), so that the resulting DN looks like uid=username,*this parameter*. For example, if this parameter is set to "ou=People,dc=cloudera,dc=com", and the username passed in is "mike", the resulting authentication passed to the LDAP server look like "uid=mike,ou=People,dc=cloudera,dc=com". This parameter is mutually exclusive with Active Directory Domain.

Related Name**Default Value****API Name**

solr_ldap_basedn

Required

false

Enable LDAP TLS**Description**

If true, attempts to establish a TLS (Transport Layer Security) connection with an LDAP server that was specified with ldap://. Not required when using an LDAP URL with prefix ldaps://, because that already specifies TLS. This option is also known as "Use StartTLS".

Related Name**Default Value**

false

API Name

solr_ldap_enable_starttls

Required

false

LDAP URL**Description**

The URL of the LDAP Server. The URL must be prefixed with ldap:// or ldaps://. The URL can optionally specify a custom port if necessary, but by default the ldap:// will connect to port 389, and the ldaps:// will connect to port 636. Note that passwords will be in the clear if ldap:// is used, and by fall 2020 Active directory servers will no longer allow non LDAPS connections to bind to AD hosts with LDAP signing enabled. See microsoft knowledge document 935834 for more information.

Related Name**Default Value****API Name**

solr_ldap_uri

Required

false

Solr Secure Authentication**Description**

Choose the authentication mechanism used by Solr.

Related Name

Default Value

simple

API Name

solr_security_authentication

Required

false

Enable TLS/SSL for Solr**Description**

Encrypt communication between clients and Solr using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)). Additional manual steps must be performed; see [Enabling TLS/SSL for Solr](#).

Related Name**Default Value**

false

API Name

solr_use_ssl

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Solr Server Logging Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Solr Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Solr Admin Port**Description**

Whether to suppress configuration warnings produced by the Solr Admin Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_admin_port

Required

true

Suppress Configuration Validator: Solr Data Directory**Description**

Whether to suppress configuration warnings produced by the Solr Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_data_dir

Required

true

Suppress Configuration Validator: Solr HTTP Port**Description**

Whether to suppress configuration warnings produced by the Solr HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_http_port

Required

true

Suppress Configuration Validator: Solr HTTPS port**Description**

Whether to suppress configuration warnings produced by the Solr HTTPS port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_https_port

Required

true

Suppress Configuration Validator: Java Heap Size of Solr Server in Bytes**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Solr Server in Bytes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_java_heapsize

Required

true

Suppress Configuration Validator: Java Configuration Options for Solr Server**Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Solr Server configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_java_opts

Required

true

Suppress Configuration Validator: Solr Load Balancer**Description**

Whether to suppress configuration warnings produced by the Solr Load Balancer configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_load_balancer

Required

true

Suppress Configuration Validator: Solr Server Log Directory**Description**

Whether to suppress configuration warnings produced by the Solr Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_log_dir

Required

true

Suppress Configuration Validator: Solr Plugins Directory**Description**

Whether to suppress configuration warnings produced by the Solr Plugins Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_plugins_dir

Required

true

Suppress Configuration Validator: Solr Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Solr Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_solr_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: HDFS Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Data Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_hdfs_data_dir

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: Active Directory Domain

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Directory Domain parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap_domain

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger DFS Audit Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger DFS Audit Path parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_audit_hdfs_dir

Required

true

Suppress Parameter Validation: Ranger Audit DFS Spool Dir**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Audit DFS Spool Dir parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_audit_hdfs_spool_dir

Required

true

Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-audit.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-audit.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_audit_safety_valve

Required

true

Suppress Parameter Validation: Ranger Audit Solr Spool Dir**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Audit Solr Spool Dir parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_audit_solr_spool_dir

Required

true

Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Parameter Validation: Ranger Policy Cache Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Policy Cache Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_policy_cache_dir

Required

true

Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_policymgr_ssl_safety_valve

Required

true

Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-security.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_security_safety_valve

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for core-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_core_site_safety_valve

Required

true

Suppress Parameter Validation: Solr Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_env_safety_valve

Required

true

Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for hdfs-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for hdfs-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_hdfs_site_safety_valve

Required

true

Suppress Parameter Validation: Solr TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_https_keystore_file

Required

true

Suppress Parameter Validation: Solr TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_https_keystore_password

Required

true

Suppress Parameter Validation: Solr TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_https_truststore_file

Required

true

Suppress Parameter Validation: Solr TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_https_truststore_password

Required

true

Suppress Parameter Validation: LDAP BaseDN**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP BaseDN parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_ldap_basedn

Required

true

Suppress Configuration Validator: LDAP TLS Validator**Description**

Whether to suppress configuration warnings produced by the LDAP TLS Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_ldap_tls_validator

Required

true

Suppress Parameter Validation: LDAP URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_ldap_uri

Required

true

Suppress Configuration Validator: LDAP Secure URI and Start TLS Validator**Description**

Whether to suppress configuration warnings produced by the LDAP Secure URI and Start TLS Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_ldaps_or_tls_validator

Required

true

Suppress Configuration Validator: Solr Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Solr Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_server_count_validator

Required

true

Suppress Parameter Validation: Upgrade Backup Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Upgrade Backup Directory parameter.

Related Name

Default Value

false

API Name

service_config_suppression_solr_upgrade_backup_dir

Required

true

Suppress Parameter Validation: Upgrade Metadata Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Upgrade Metadata Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solr_upgrade_metadata_dir

Required

true

Suppress Parameter Validation: Solrd Watchdog Timeout**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solrd Watchdog Timeout parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_solrd_watchdog_timeout

Required

true

Suppress Parameter Validation: ZooKeeper Znode**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Znode parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_zookeeper_znode

Required

true

Suppress Health Test: Solr Server Health**Description**

Whether to suppress the results of the Solr Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_solr_solr_servers_healthy

Required

true

Solr Server

Advanced

Solr Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**`true`**API Name**`oom_heap_dump_enabled`**Required**`true`**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**`true`**API Name**`oom_sigkill_enabled`**Required**`true`**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**`false`**API Name**`process_auto_restart`**Required**`true`

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Java Configuration Options for Solr Server

Description

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name**Default Value**

JAVA_GC_ARGS

API Name

solr_java_opts

Required

false

Solr Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

SOLR_SERVER_role_env_safety_valve

Required

false

ZooKeeper Client Timeout**Description**

The time in milliseconds a client is allowed to not talk to ZooKeeper before its session expires.

Related Name

zkClientTimeout

Default Value

15 second(s)

API Name

zookeeper_client_timeout

Required

true

Logs**Solr Server Logging Threshold****Description**

The minimum log level for Solr Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Solr Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Solr Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

Solr Server Max Log Size

Description

The maximum size, in megabytes, per log file for Solr Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Solr Server Log Directory

Description

Directory where Solr Server will place its log files.

Related Name**Default Value**

/var/log/solr

API Name

solr_log_dir

Required

true

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Heap Dump Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

heap_dump_directory_free_space_absolute_thresholds

Required

false

Heap Dump Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Navigator Audit Failure Thresholds**Description**

The health test thresholds for failures encountered when monitoring audits within a recent period specified by the mgmt_navigator_failure_window configuration for the role. The value that can be specified for this threshold is the number of bytes of audits data that is left to be sent to audit server.

Related Name

mgmt.navigator.failure.thresholds

Default Value

Warning: Never, Critical: Any

API Name

mgmt_navigator_failure_thresholds

Required

false

Monitoring Period For Audit Failures**Description**

The period to review when checking if audits are blocked and not getting processed.

Related Name

mgmt.navigator.failure.window

Default Value

20 minute(s)

API Name

mgmt_navigator_failure_window

Required

false

Navigator Audit Pipeline Health Check

Description

Enable test of audit events processing pipeline. This will test if audit events are not getting processed by Audit Server for a role that generates audit.

Related Name

mgmt.navigator.status.check.enabled

Default Value

true

API Name

mgmt_navigator_status_check_enabled

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/common: endpoint: \$ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value**API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Solr Server API Liveness

Description

Enables the health test that the Cloudera Manager Agent can successfully contact and gather status of Solr Cores from the Solr Server with a simple API request.

Related Name**Default Value**

true

API Name

solr_core_status_collection_health_enabled

Required

false

Solr Server API Liveness Request Duration**Description**

The health test thresholds on the duration of the Solr Server API request.

Related Name**Default Value**

Warning: 10 second(s), Critical: Never

API Name

solr_core_status_collection_thresholds

Required

false

Solr Critical State Cores**Description**

Enables the health test that checks for Solr cores in Down or Recovery Failed state on a Solr Server.

Related Name**Default Value**

false

API Name

solr_critical_core_health_enabled

Required

false

Solr Critical State Cores Percentage**Description**

The health test thresholds for the percentage of Solr cores in Down or Recovery Failed state on a Solr Server.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

solr_critical_core_thresholds

Required

false

Solr Recovering Cores**Description**

Enables the health test that checks for Recovering Solr cores on a Solr Server.

Related Name**Default Value**

false

API Name

solr_recovering_core_health_enabled

Required

false

Solr Recovering Cores Percentage

Description

The health test thresholds for the percentage of Solr cores in Recovering state on a Solr Server.

Related Name**Default Value**

Warning: Any, Critical: Never

API Name

solr_recovering_core_thresholds

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

solr_server_fd_thresholds

Required

false

Garbage Collection Duration Thresholds

Description

The health test thresholds for the weighted average time spent in Java garbage collection. Specified as a percentage of elapsed wall clock time.

Related Name**Default Value**

Warning: 30.0, Critical: 60.0

API Name

solr_server_gc_duration_thresholds

Required

false

Garbage Collection Duration Monitoring Period

Description

The period to review when computing the moving average of garbage collection time.

Related Name**Default Value**

5 minute(s)

API Name

solr_server_gc_duration_window

Required

false

Solr Server Host Health Test

Description

When computing the overall Solr Server health, consider the host's health.

Related Name**Default Value**

true

API Name

solr_server_host_health_enabled

Required

false

Solr Server Process Health Test

Description

Enables the health test that the Solr Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

solr_server_scm_health_enabled

Required

false

Web Metric Collection

Description

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

Related Name**Default Value**

true

API Name

solr_server_web_metric_collection_enabled

Required

false

Web Metric Collection Duration

Description

The health test thresholds on the duration of the metrics request to the web server.

Related Name**Default Value**

Warning: 10 second(s), Critical: Never

API Name

solr_server_web_metric_collection_thresholds

Required

false

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Solr Data Directory

Description

Directory on local file system where Solr Server keeps the configurations for collections.

Related Name**Default Value**

/var/lib/solr

API Name

solr_data_dir

Required

true

Graceful Shutdown Timeout**Description**

Timeout (in seconds) for graceful shutdown of this Solr server. Once this timeout is reached, Solr server is abruptly shutdown. A value of 0 means no timeout.

Related Name**Default Value**

3 minute(s)

API Name

solr_graceful_stop_timeout

Required

false

Solr Load Balancer**Description**

Address of the load balancer, specified in host:port format.

Related Name**Default Value****API Name**

solr_load_balancer

Required

false

Solr Plugins Directory**Description**

Directory on local file system where Solr Server can find additional JARs. This directory is not monitored for changes during the lifetime of a solr server, and a restart is required to read any updates to the directory contents.

Related Name**Default Value****API Name**

solr_plugins_dir

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value**

API Name

rlimit_fds

Required

false

Solr Max Connector Threads**Description**

The maximum number of request processing threads to be created by Solr server, which determines the maximum number of simultaneous requests that can be handled.

Related Name**Default Value**

10000

API Name

solr_max_connector_thread

Required

true

Ports and Addresses**Solr Admin Port****Description**

Admin port of the Solr Server.

Related Name**Default Value**

8984

API Name

solr_admin_port

Required

true

Solr HTTP Port**Description**

HTTP port of Solr Server.

Related Name

solr_http_port

Default Value

8983

API Name

solr_http_port

Required

true

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

HDFS Block Cache Blocks per Slab**Description**

Number of blocks per cache slab. The size of the cache is 8 KB (the block size) times the number of blocks per slab times the number of slabs.

Related Name

solr.hdfs.blockcache.blocksperbank

Default Value

16384

API Name

solr_hdfs_blockcache_blocksperbank

Required

true

HDFS Block Cache Off-Heap Memory**Description**

Use off-heap memory when caching HDFS blocks in Solr.

Related Name

solr.hdfs.blockcache.direct.memory.allocation

Default Value

true

API Name

solr_hdfs_blockcache_direct_memory_allocation

Required

true

HDFS Block Cache**Description**

Enable caching of HDFS blocks in Solr. There is one block cache per Solr collection. configured to use off-heap memory, Maximum Off-Heap Memory must be set high enough to account for all block caches.

Related Name

solr.hdfs.blockcache.enabled

Default Value

true

API Name

solr_hdfs_blockcache_enabled

Required

true

HDFS Block Cache Number of Slabs**Description**

Number of slabs per block cache. The size of the cache is 8 KB (the block size) times the number of blocks per slab times the number of slabs.

Related Name

solr.hdfs.blockcache.slab.count

Default Value

1

API Name

solr_hdfs_blockcache_slab_count

Required

true

Java Direct Memory Size of Solr Server in Bytes**Description**

Maximum amount of off-heap memory in bytes that may be allocated by the Java process. Passed to Java `-XX:MaxDirectMemorySize`. If unset, defaults to the size of the heap.

Related Name**Default Value**

1 GiB

API Name

solr_java_direct_memory_size

Required

false

Java Heap Size of Solr Server in Bytes

Description

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

Related Name**Default Value**

1 GiB

API Name

solr_java_heapsize

Required

false

Security

Solr HTTPS port

Description

HTTPS port of Solr Server.

Related Name

solr_https_port

Default Value

8985

API Name

solr_https_port

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_file_descriptor

Required

true

Suppress Health Test: GC Duration

Description

Whether to suppress the results of the GC Duration health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_gc_duration

Required

true

Suppress Health Test: Heap Dump Directory Free Space

Description

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_heap_dump_directory_free_space

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_solr_server_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_unexpected_exits

Required

true

Suppress Health Test: Web Server Status

Description

Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_solr_server_web_metric_collection

Required

true

Spark Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced

Deploy Directory

Description

The directory where the client configs will be deployed

Related Name**Default Value**

/etc/spark

API Name

client_config_root_dir

Required

true

Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf

Description

For advanced use only, a string to be inserted into the client configuration for spark-conf/spark-defaults.conf.

Related Name**Default Value****API Name**

spark-conf/spark-defaults.conf_client_config_safety_valve

Required

false

Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh

Description

For advanced use only, a string to be inserted into the client configuration for spark-conf/spark-env.sh.

Related Name**Default Value****API Name**

spark-conf/spark-env.sh_client_config_safety_valve

Required

false

Logs

Gateway Logging Threshold

Description

The minimum log level for Gateway logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other

Alternatives Priority

Description

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

51

API Name

client_config_priority

Required

true

Spark Data Serializer

Description

Name of class implementing org.apache.spark.serializer.Serializer to use in Spark applications.

Related Name

spark.serializer

Default Value

org.apache.spark.serializer.KryoSerializer

API Name

spark_data_serializer

Required

true

Default Application Deploy Mode

Description

Which deploy mode to use by default. Can be overridden by users when launching applications.

Related Name

spark_deploy_mode

Default Value

	client
API Name	spark_deploy_mode
Required	false

Caching Executor Idle Timeout

Description

When dynamic allocation is enabled, time after which idle executors with cached RDDs blocks will be stopped. By default, they're never stopped.

Related Name

spark.dynamicAllocation.cachedExecutorIdleTimeout

Default Value

API Name

spark_dynamic_allocation_cached_idle_timeout

Required

false

Enable Dynamic Allocation

Description

Enable dynamic allocation of executors in Spark applications.

Related Name

spark.dynamicAllocation.enabled

Default Value

true

API Name

spark_dynamic_allocation_enabled

Required

false

Executor Idle Timeout

Description

When dynamic allocation is enabled, time after which idle executors will be stopped.

Related Name

spark.dynamicAllocation.executorIdleTimeout

Default Value

1 minute(s)

API Name

spark_dynamic_allocation_idle_timeout

Required

false

Initial Executor Count

Description

When dynamic allocation is enabled, number of executors to allocate when the application starts. By default, this is the same value as the minimum number of executors.

Related Name

spark.dynamicAllocation.initialExecutors

Default Value**API Name**

spark_dynamic_allocation_initial_executors

Required

false

Maximum Executor Count**Description**

When dynamic allocation is enabled, maximum number of executors to allocate. By default, Spark relies on YARN to control the maximum number of executors for the application.

Related Name

spark.dynamicAllocation.maxExecutors

Default Value**API Name**

spark_dynamic_allocation_max_executors

Required

false

Minimum Executor Count**Description**

When dynamic allocation is enabled, minimum number of executors to keep alive while the application is running.

Related Name

spark.dynamicAllocation.minExecutors

Default Value

0

API Name

spark_dynamic_allocation_min_executors

Required

false

Scheduler Backlog Timeout**Description**

When dynamic allocation is enabled, timeout before requesting new executors when there are backlogged tasks.

Related Name

spark.dynamicAllocation.schedulerBacklogTimeout

Default Value

1 second(s)

API Name

spark_dynamic_allocation_scheduler_backlog_timeout

Required

false

Sustained Scheduler Backlog Timeout**Description**

When dynamic allocation is enabled, timeout before requesting new executors after the initial backlog timeout has already expired. By default this is the same value as the initial backlog timeout.

Related Name

spark.dynamicAllocation.sustainedSchedulerBacklogTimeout

Default Value**API Name**

spark_dynamic_allocation_sustained_scheduler_backlog_timeout

Required

false

Shell Logging Threshold**Description**

The minimum log level for the Spark shell.

Related Name

spark_gateway_shell_logging_threshold

Default Value

WARN

API Name

spark_gateway_shell_logging_threshold

Required

true

Enable Kill From UI**Description**

Whether to allow users to kill running stages from the Spark Web UI.

Related Name

spark.ui.killEnabled

Default Value

true

API Name

spark_gateway_ui_kill_enabled

Required

true

Enable History**Description**

Write Spark application history logs to HDFS.

Related Name

spark.eventLog.enabled

Default Value

true

API Name

spark_history_enabled

Required

false

Enable I/O Encryption**Description**

Whether to encrypt temporary shuffle and cache files stored by Spark on the local disks.

Related Name

spark.io.encryption.enabled

Default Value

false

API Name

spark_io_encryption_enabled

Required

false

Enable Spark Lineage**Description**

Whether to enable spark lineage support. If enabled, spark lineage is sent to Atlas.

Related Name

spark.lineage.enabled

Default Value

true

API Name

spark_lineage_enabled

Required

false

Enable Network Encryption**Description**

Whether to encrypt communication between Spark processes belonging to the same application.
Requires authentication (spark.authenticate) to be enabled.

Related Name

spark.network.crypto.enabled

Default Value

false

API Name

spark_network_encryption_enabled

Required

false

Enable Optimized S3 Committers**Description**

Whether use optimized committers when writing data to S3.

Related Name

spark.cloudera.s3_committers.enabled

Default Value

true

API Name

spark_optimized_s3_committers_enabled

Required

false

Extra Python Path**Description**

Python library paths to add to PySpark applications.

Related Name

spark_python_path

Default Value**API Name**

spark_python_path

Required

false

Enable Shuffle Service**Description**

Enables the external shuffle service. The external shuffle service preserves shuffle files written by executors so that the executors can be deallocated without losing work. Must be enabled if Enable Dynamic Allocation is enabled. Recommended and enabled by default.

Related Name

spark.shuffle.service.enabled

Default Value

true

API Name

spark_shuffle_service_enabled

Required

true

Enable Spark Web UI**Description**

Whether to enable the Spark Web UI on individual applications. It's recommended that the UI be disabled in secure clusters.

Related Name

spark.ui.enabled

Default Value

true

API Name

spark_ui_enabled

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-defaults.conf_client_config_safety_valve

Required

true

Suppress Parameter Validation: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-env.sh_client_config_safety_valve

Required

true

Suppress Parameter Validation: Spark Data Serializer

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Data Serializer parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_data_serializer

Required

true

Suppress Parameter Validation: Extra Python Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra Python Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_python_path

Required

true

History Server

Advanced

History Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

For advanced use only. A string to be inserted into spark-conf/spark-env.sh for this role only.

Related Name**Default Value****API Name**

spark-conf/spark-env.sh_role_safety_valve

Required

false

History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf**Description**

For advanced use only. A string to be inserted into spark-conf/spark-history-server.conf for this role only.

Related Name**Default Value****API Name**

spark-conf/spark-history-server.conf_role_safety_valve

Required

false

History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

SPARK_YARN_HISTORY_SERVER_role_env_safety_valve

Required

false

Logs**History Server Log Directory****Description**

The log directory for log files of the role History Server.

Related Name

log_dir

Default Value

/var/log/spark

API Name

log_dir

Required

false

History Server Logging Threshold**Description**

The minimum log level for History Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

History Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for History Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

History Server Max Log Size

Description

The maximum size, in megabytes, per log file for History Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.

- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking [View as JSON](#). In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more

details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

spark_yarn_history_server_fd_thresholds

Required

false

History Server Host Health Test

Description

When computing the overall History Server health, consider the host's health.

Related Name**Default Value**

true

API Name

spark_yarn_history_server_host_health_enabled

Required

false

History Server Process Health Test

Description

Enables the health test that the History Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

spark_yarn_history_server_scm_health_enabled

Required

false

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

`unexpected_exits_thresholds`

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

`unexpected_exits_window`

Required

false

Other

Use Local Storage

Description

Whether to use local storage for caching application history data, which reduces memory usage and makes service restarts faster.

Related Name

`enable_local_storage`

Default Value

false

API Name

`enable_local_storage`

Required

false

Enable Event Log Cleaner

Description

Specifies whether the History Server should periodically clean up event logs from storage.

Related Name

`spark.history.fs.cleaner.enabled`

Default Value

true

API Name

event_log_cleaner_enabled

Required

false

Event Log Cleaner Interval**Description**

How often the History Server will clean up event log files.

Related Name

spark.history.fs.cleaner.interval

Default Value

1 day(s)

API Name

event_log_cleaner_interval

Required

false

Maximum Event Log Age**Description**

Specifies the maximum age of the event logs.

Related Name

spark.history.fs.cleaner.maxAge

Default Value

7 day(s)

API Name

event_log_cleaner_max_age

Required

false

Admin Users**Description**

Comma-separated list of users who can view all applications when authentication is enabled.

Related Name

spark.history.ui.admin.acls

Default Value

knox

API Name

history_server_admin_users

Required

false

HDFS Polling Interval**Description**

How often to poll HDFS for new applications.

Related Name

spark.history.fs.update.interval.seconds

Default Value

10 second(s)

API Name

history_server_fs_poll_interval

Required

false

Java Heap Size of History Server in Bytes

Description

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in bytes.

Related Name

history_server_max_heapsize

Default Value

512 MiB

API Name

history_server_max_heapsize

Required

true

Retained App Count

Description

Max number of application UIs to keep in the History Server's memory. All applications will still be available, but may take longer to load if they're not in memory.

Related Name

spark.history.retainedApplications

Default Value

50

API Name

history_server_retained_apps

Required

false

Enable User Authentication

Description

Enables user authentication using SPNEGO (requires Kerberos), and enables access control to application history data.

Related Name

history_server_spnego_enabled

Default Value

false

API Name

history_server_spnego_enabled

Required

false

Local Storage Directory

Description

Directory where to keep local caches of application history data.

Related Name

spark.history.store.path

Default Value

/var/lib/spark/history

API Name

local_storage_dir

Required

false

Max Local Storage Size

Description

Approximate maximum amount of data to use in local storage for caching application history data.

Related Name

spark.history.store.maxDiskUsage

Default Value

10 GiB

API Name

local_storage_max_usage

Required

false

Enabled SSL/TLS Algorithms

Description

A comma-separated list of algorithm names to enable when TLS/SSL is enabled. By default, all algorithms supported by the JRE are enabled.

Related Name

spark.ssl.historyServer.enabledAlgorithms

Default Value**API Name**

ssl_server_algorithms

Required

false

TLS/SSL Protocol

Description

The version of the TLS/SSL protocol to use when TLS/SSL is enabled.

Related Name

spark.ssl.historyServer.protocol

Default Value

TLSv1.2

API Name

`ssl_server_protocol`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**`false`**Ports and Addresses****History Server WebUI Port****Description**

The port of the history server WebUI

Related Name`spark.history.ui.port`**Default Value**`18088`**API Name**`history_server_web_port`**Required**`true`**TLS/SSL Port Number****Description**

Port where to listen for TLS/SSL connections. HTTP connections will be redirected to this port when TLS/SSL is enabled.

Related Name`spark.ssl.historyServer.port`**Default Value**`18488`**API Name**`ssl_server_port`**Required**`false`

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Enable TLS/SSL for History Server

Description

Encrypt communication between clients and History Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

spark.ssl.historyServer.enabled

Default Value

false

API Name

ssl_enabled

Required

false

History Server TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when History Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

spark.ssl.historyServer.keyStore

Default Value

API Name

ssl_server_keystore_location

Required

false

History Server TLS/SSL Server Keystore File Password

Description

The password for the History Server keystore file.

Related Name

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Admin Users

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_admin_users

Required

true

Suppress Parameter Validation: History Server WebUI Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server WebUI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_web_port

Required

true

Suppress Parameter Validation: Local Storage Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Local Storage Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_local_storage_dir

Required

true

Suppress Parameter Validation: History Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: History Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-env.sh_role_safety_valve

Required

true

Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-history-server.conf_role_safety_valve

Required

true

Suppress Parameter Validation: History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_yarn_history_server_role_env_safety_valve

Required

true

Suppress Parameter Validation: Enabled SSL/TLS Algorithms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Enabled SSL/TLS Algorithms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_algorithms

Required

true

Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: TLS/SSL Port Number**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port Number parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_port

Required

true

Suppress Parameter Validation: TLS/SSL Protocol**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Protocol parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_protocol

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark_on_yarn_spark_yarn_history_server_unexpected_exits

Required

true

Service-Wide**Advanced****System Group****Description**

The group that this service's processes should run as.

Related Name**Default Value**

spark

API Name

process_groupname

Required

true

System User**Description**

The user that this service's processes should run as.

Related Name**Default Value**

spark

API Name

process_username

Required

true

Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

For advanced use only, a string to be inserted into spark-conf/spark-env.sh. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

spark-conf/spark-env.sh_service_safety_valve

Required

false

Spark Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

SPARK_ON_YARN_service_env_safety_valve

Required

false

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

History Server Role Health Test

Description

When computing the overall SPARK_ON_YARN health, consider History Server's health

Related Name**Default Value**

true

API Name

SPARK_ON_YARN_SPARK_YARN_HISTORY_SERVER_health_enabled

Required

false

Other

Atlas Service

Description

Name of the Atlas service that this Spark service instance depends on

Related Name**Default Value****API Name**

atlas_service

Required

false

HBase Service

Description

Name of the HBase service that this Spark service instance depends on

Related Name**Default Value****API Name**

hbase_service

Required

false

Spark Authentication

Description

Enable whether the Spark communication protocols do authentication using a shared secret.

Related Name

spark.authenticate

Default Value

false

API Name

spark_authenticate

Required

true

Spark Driver Log Location (HDFS)

Description

The location of Spark driver logs in HDFS when Spark application runs in client mode. Changing this value will not move existing logs to the new location.

Related Name

spark.driver.log.dfsDir

Default Value

/user/spark/driverLogs

API Name

spark_driver_log_dfs_dir

Required

true

Persist Driver Logs to Dfs

Description

If enabled, driver logs in YARN client mode will be persisted to the configured Spark Driver Log Location (HDFS)

Related Name

spark.driver.log.persistToDfs.enabled

Default Value

true

API Name

spark_driver_log_persist_to_dfs

Required

true

Spark History Location (HDFS)

Description

The location of Spark application history logs in HDFS. Changing this value will not move existing logs to the new location.

Related Name

spark.eventLog.dir

Default Value

/user/spark/applicationHistory

API Name

spark_history_log_dir

Required

true

Shuffle Service AES Encryption

Description

Whether to enable AES-based authentication and encryption in the shuffle service. Requires authentication to be enabled to take effect.

Related Name

spark_shuffle_aes_enabled

Default Value

true

API Name

spark_shuffle_aes_enabled

Required

true

YARN Service**Description**

Name of the YARN service that this Spark service instance depends on

Related Name**Default Value****API Name**

yarn_service

Required

true

Ports and Addresses**Spark Shuffle Service Port****Description**

The port the Spark Shuffle Service listens for fetch requests.

Related Name

spark.shuffle.service.port

Default Value

7337

API Name

spark_shuffle_service_port

Required

true

Security**Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

Related Name**Default Value**

spark

API Name

kerberos_princ_name

Required

true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory

Description

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Admin Users

Description

Whether to suppress configuration warnings produced by the Admin Users configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_admin_users

Required

true

Suppress Configuration Validator: History Server WebUI Port

Description

Whether to suppress configuration warnings produced by the History Server WebUI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_web_port

Required

true

Suppress Configuration Validator: Local Storage Directory**Description**

Whether to suppress configuration warnings produced by the Local Storage Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_local_storage_dir

Required

true

Suppress Configuration Validator: History Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the History Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: History Server Log Directory**Description**

Whether to suppress configuration warnings produced by the History Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf**Description**

Whether to suppress configuration warnings produced by the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-defaults.conf_client_config_safety_valve

Required

true

Suppress Configuration Validator: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-env.sh_client_config_safety_valve

Required

true

Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-env.sh_role_safety_valve

Required

true

Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf**Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark-conf/spark-history-server.conf_role_safety_valve

Required

true

Suppress Configuration Validator: Spark Data Serializer**Description**

Whether to suppress configuration warnings produced by the Spark Data Serializer configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_data_serializer

Required

true

Suppress Configuration Validator: Extra Python Path**Description**

Whether to suppress configuration warnings produced by the Extra Python Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_python_path

Required

true

Suppress Configuration Validator: History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the History Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_yarn_history_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Enabled SSL/TLS Algorithms**Description**

Whether to suppress configuration warnings produced by the Enabled SSL/TLS Algorithms configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_algorithms

Required

true

Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: TLS/SSL Port Number**Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port Number configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_port

Required

true

Suppress Configuration Validator: TLS/SSL Protocol**Description**

Whether to suppress configuration warnings produced by the TLS/SSL Protocol configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_protocol

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark-conf/spark-env.sh_service_safety_valve

Required

true

Suppress Parameter Validation: Spark Driver Log Location (HDFS)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Driver Log Location (HDFS) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_driver_log_dfs_dir

Required

true

Suppress Parameter Validation: Spark History Location (HDFS)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark History Location (HDFS) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_history_log_dir

Required

true

Suppress Configuration Validator: Hive Gateway for Spark Validator**Description**

Whether to suppress configuration warnings produced by the Hive Gateway for Spark Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_hive_gateway_validator

Required

true

Suppress Parameter Validation: Spark Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_on_yarn_service_env_safety_valve

Required

true

Suppress Parameter Validation: Spark Shuffle Service Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Shuffle Service Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_shuffle_service_port

Required

true

Suppress Configuration Validator: History Server Count Validator**Description**

Whether to suppress configuration warnings produced by the History Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_yarn_history_server_count_validator

Required

true

Suppress Health Test: History Server Health**Description**

Whether to suppress the results of the History Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_spark_on_yarn_spark_on_yarn_spark_yarn_history_server_health

Required

true

Spark 3 Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced**Deploy Directory****Description**

The directory where the client configs will be deployed

Related Name**Default Value**

/etc/spark3

API Name

client_config_root_dir

Required

true

Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version

Description

For advanced use only, a string to be inserted into the client configuration for meta/version.

Related Name**Default Value****API Name**

meta/version_client_config_safety_valve

Required

false

Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf

Description

For advanced use only, a string to be inserted into the client configuration for spark3-conf/spark-defaults.conf.

Related Name**Default Value****API Name**

spark3-conf/spark-defaults.conf_client_config_safety_valve

Required

false

Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh

Description

For advanced use only, a string to be inserted into the client configuration for spark3-conf/spark-env.sh.

Related Name**Default Value****API Name**

spark3-conf/spark-env.sh_client_config_safety_valve

Required

false

Logs

Gateway Logging Threshold

Description

The minimum log level for Gateway logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Monitoring**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other**Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

51

API Name

client_config_priority

Required

true

Spark Data Serializer**Description**

Name of class implementing org.apache.spark.serializer.Serializer to use in Spark applications.

Related Name

spark.serializer

Default Value

org.apache.spark.serializer.KryoSerializer

API Name

spark_data_serializer

Required

true

Default Application Deploy Mode**Description**

Which deploy mode to use by default. Can be overridden by users when launching applications.

Related Name

`spark_deploy_mode`**Default Value**`client`**API Name**`spark_deploy_mode`**Required**`false`**Caching Executor Idle Timeout****Description**

When dynamic allocation is enabled, time after which idle executors with cached RDDs blocks will be stopped. By default, they're never stopped.

Related Name`spark.dynamicAllocation.cachedExecutorIdleTimeout`**Default Value****API Name**`spark_dynamic_allocation_cached_idle_timeout`**Required**`false`**Enable Dynamic Allocation****Description**

Enable dynamic allocation of executors in Spark applications.

Related Name`spark.dynamicAllocation.enabled`**Default Value**`true`**API Name**`spark_dynamic_allocation_enabled`**Required**`false`**Executor Idle Timeout****Description**

When dynamic allocation is enabled, time after which idle executors will be stopped.

Related Name`spark.dynamicAllocation.executorIdleTimeout`**Default Value**`1 minute(s)`**API Name**`spark_dynamic_allocation_idle_timeout`**Required**`false`

Initial Executor Count

Description

When dynamic allocation is enabled, number of executors to allocate when the application starts. By default, this is the same value as the minimum number of executors.

Related Name

spark.dynamicAllocation.initialExecutors

Default Value**API Name**

spark_dynamic_allocation_initial_executors

Required

false

Maximum Executor Count

Description

When dynamic allocation is enabled, maximum number of executors to allocate. By default, Spark relies on YARN to control the maximum number of executors for the application.

Related Name

spark.dynamicAllocation.maxExecutors

Default Value**API Name**

spark_dynamic_allocation_max_executors

Required

false

Minimum Executor Count

Description

When dynamic allocation is enabled, minimum number of executors to keep alive while the application is running.

Related Name

spark.dynamicAllocation.minExecutors

Default Value

0

API Name

spark_dynamic_allocation_min_executors

Required

false

Scheduler Backlog Timeout

Description

When dynamic allocation is enabled, timeout before requesting new executors when there are backlogged tasks.

Related Name

spark.dynamicAllocation.schedulerBacklogTimeout

Default Value

1 second(s)

API Name`spark_dynamic_allocation_scheduler_backlog_timeout`**Required**`false`**Sustained Scheduler Backlog Timeout****Description**

When dynamic allocation is enabled, timeout before requesting new executors after the initial backlog timeout has already expired. By default this is the same value as the initial backlog timeout.

Related Name`spark.dynamicAllocation.sustainedSchedulerBacklogTimeout`**Default Value****API Name**`spark_dynamic_allocation_sustained_scheduler_backlog_timeout`**Required**`false`**Shell Logging Threshold****Description**

The minimum log level for the Spark shell.

Related Name`spark_gateway_shell_logging_threshold`**Default Value**`WARN`**API Name**`spark_gateway_shell_logging_threshold`**Required**`true`**Enable Kill From UI****Description**

Whether to allow users to kill running stages from the Spark Web UI.

Related Name`spark.ui.killEnabled`**Default Value**`true`**API Name**`spark_gateway_ui_kill_enabled`**Required**`true`**Enable History****Description**

Write Spark application history logs to HDFS.

Related Name

spark.eventLog.enabled

Default Value

true

API Name

spark_history_enabled

Required

false

Enable I/O Encryption**Description**

Whether to encrypt temporary shuffle and cache files stored by Spark on the local disks.

Related Name

spark.io.encryption.enabled

Default Value

false

API Name

spark_io_encryption_enabled

Required

false

Enable Spark Lineage**Description**

Whether to enable spark lineage support. If enabled, spark lineage is sent to Atlas.

Related Name

spark.lineage.enabled

Default Value

true

API Name

spark_lineage_enabled

Required

false

Enable Network Encryption**Description**

Whether to encrypt communication between Spark processes belonging to the same application. Requires authentication (spark.authenticate) to be enabled.

Related Name

spark.network.crypto.enabled

Default Value

false

API Name

spark_network_encryption_enabled

Required

false

Enable Optimized S3 Committers

Description

Whether use optimized committers when writing data to S3.

Related Name

spark.cloudera.s3_committers.enabled

Default Value

true

API Name

spark_optimized_s3_committers_enabled

Required

false

Extra Python Path

Description

Python library paths to add to PySpark applications.

Related Name

spark_python_path

Default Value**API Name**

spark_python_path

Required

false

Enable Shuffle Service

Description

Enables the external shuffle service. The external shuffle service preserves shuffle files written by executors so that the executors can be deallocated without losing work. Must be enabled if Enable Dynamic Allocation is enabled. Recommended and enabled by default.

Related Name

spark.shuffle.service.enabled

Default Value

true

API Name

spark_shuffle_service_enabled

Required

true

Enable Spark Web UI

Description

Whether to enable the Spark Web UI on individual applications. It's recommended that the UI be disabled in secure clusters.

Related Name

spark.ui.enabled

Default Value

true

API Name

spark_ui_enabled

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_meta/version_client_config_safety_valve

Required

true

Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-defaults.conf_client_config_safety_valve

Required

true

Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-env.sh_client_config_safety_valve

Required

true

Suppress Parameter Validation: Spark Data Serializer**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Data Serializer parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_data_serializer

Required

true

Suppress Parameter Validation: Extra Python Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra Python Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_python_path

Required

true

History Server**Advanced****History Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

History Server Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

For advanced use only. A string to be inserted into meta/version for this role only.

Related Name**Default Value****API Name**

meta/version_role_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**Description**

For advanced use only. A string to be inserted into spark3-conf/spark-env.sh for this role only.

Related Name**Default Value****API Name**

spark3-conf/spark-env.sh_role_safety_valve

Required

false

History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf**Description**

For advanced use only. A string to be inserted into spark3-conf/spark-history-server.conf for this role only.

Related Name**Default Value****API Name**

spark3-conf/spark-history-server.conf_role_safety_valve

Required

false

History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

SPARK3_YARN_HISTORY_SERVER_role_env_safety_valve

Required

false

Logs

History Server Log Directory

Description

The log directory for log files of the role History Server.

Related Name

log_dir

Default Value

/var/log/spark3

API Name

log_dir

Required

false

History Server Logging Threshold

Description

The minimum log level for History Server logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

History Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for History Server logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

History Server Max Log Size

Description

The maximum size, in megabytes, per log file for History Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value**API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

spark3_yarn_history_server_fd_thresholds

Required

false

History Server Host Health Test**Description**

When computing the overall History Server health, consider the host's health.

Related Name**Default Value**

true

API Name

spark3_yarn_history_server_host_health_enabled

Required

false

History Server Process Health Test**Description**

Enables the health test that the History Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

spark3_yarn_history_server_scm_health_enabled

Required

false

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Use Local Storage****Description**

Whether to use local storage for caching application history data, which reduces memory usage and makes service restarts faster.

Related Name

enable_local_storage

Default Value

false

API Name

enable_local_storage

Required

false

Enable Event Log Cleaner**Description**

Specifies whether the History Server should periodically clean up event logs from storage.

Related Name

spark.history.fs.cleaner.enabled

Default Value

true

API Name

event_log_cleaner_enabled

Required

false

Event Log Cleaner Interval**Description**

How often the History Server will clean up event log files.

Related Name

spark.history.fs.cleaner.interval

Default Value

1 day(s)

API Name

event_log_cleaner_interval

Required

false

Maximum Event Log Age

Description

Specifies the maximum age of the event logs.

Related Name

spark.history.fs.cleaner.maxAge

Default Value

7 day(s)

API Name

event_log_cleaner_max_age

Required

false

Admin Users

Description

Comma-separated list of users who can view all applications when authentication is enabled.

Related Name

spark.history.ui.admin.acls

Default Value

knox

API Name

history_server_admin_users

Required

false

HDFS Polling Interval

Description

How often to poll HDFS for new applications.

Related Name

spark.history.fs.update.interval.seconds

Default Value

10 second(s)

API Name

history_server_fs_poll_interval

Required

false

Java Heap Size of History Server in Bytes

Description

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in bytes.

Related Name

history_server_max_heapsize

Default Value

512 MiB

API Name

history_server_max_heapsize

Required

true

Retained App Count**Description**

Max number of application UIs to keep in the History Server's memory. All applications will still be available, but may take longer to load if they're not in memory.

Related Name

spark.history.retainedApplications

Default Value

50

API Name

history_server_retained_apps

Required

false

Enable User Authentication**Description**

Enables user authentication using SPNEGO (requires Kerberos), and enables access control to application history data.

Related Name

history_server_spnego_enabled

Default Value

false

API Name

history_server_spnego_enabled

Required

false

Local Storage Directory**Description**

Directory where to keep local caches of application history data.

Related Name

spark.history.store.path

Default Value

/var/lib/spark3/history

API Name

local_storage_dir

Required

false

Max Local Storage Size**Description**

Approximate maximum amount of data to use in local storage for caching application history data.

Related Name`spark.history.store.maxDiskUsage`**Default Value**`10 GiB`**API Name**`local_storage_max_usage`**Required**`false`**Enabled SSL/TLS Algorithms****Description**

A comma-separated list of algorithm names to enable when TLS/SSL is enabled. By default, all algorithms supported by the JRE are enabled.

Related Name`spark.ssl.historyServer.enabledAlgorithms`**Default Value****API Name**`ssl_server_algorithms`**Required**`false`**TLS/SSL Protocol****Description**

The version of the TLS/SSL protocol to use when TLS/SSL is enabled.

Related Name`spark.ssl.historyServer.protocol`**Default Value**`TLSv1.2`**API Name**`ssl_server_protocol`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**

false

Ports and Addresses

History Server WebUI Port

Description

The port of the history server WebUI

Related Name

spark.history.ui.port

Default Value

18089

API Name

history_server_web_port

Required

true

TLS/SSL Port Number

Description

Port where to listen for TLS/SSL connections. HTTP connections will be redirected to this port when TLS/SSL is enabled.

Related Name

spark.ssl.historyServer.port

Default Value

18489

API Name

ssl_server_port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Enable TLS/SSL for History Server****Description**

Encrypt communication between clients and History Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

spark.ssl.historyServer.enabled

Default Value

false

API Name

ssl_enabled

Required

false

History Server TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when History Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

spark.ssl.historyServer.keyStore

Default Value**API Name**

ssl_server_keystore_location

Required

false

History Server TLS/SSL Server Keystore File Password**Description**

The password for the History Server keystore file.

Related Name**Default Value****API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled**Description**

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Admin Users**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_admin_users

Required

true

Suppress Parameter Validation: History Server WebUI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server WebUI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_web_port

Required

true

Suppress Parameter Validation: Local Storage Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Local Storage Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_local_storage_dir

Required

true

Suppress Parameter Validation: History Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: History Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_meta/version_role_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

Related Name

Default Value

false

API Name

role_config_suppression_spark3-conf/spark-env.sh_role_safety_valve

Required

true

Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-history-server.conf_role_safety_valve

Required

true

Suppress Parameter Validation: History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3_yarn_history_server_role_env_safety_valve

Required

true

Suppress Parameter Validation: Enabled SSL/TLS Algorithms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Enabled SSL/TLS Algorithms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_algorithms

Required

true

Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: TLS/SSL Port Number**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port Number parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_port

Required

true

Suppress Parameter Validation: TLS/SSL Protocol**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Protocol parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_protocol

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_log_directory_free_space

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_unexpected_exits

Required

true

Service-Wide**Advanced****Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

For advanced use only, a string to be inserted into meta/version. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

meta/version_service_safety_valve

Required

false

System Group**Description**

The group that this service's processes should run as.

Related Name**Default Value**

spark

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name**Default Value**

spark

API Name

process_username

Required

true

Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh

Description

For advanced use only, a string to be inserted into spark3-conf/spark-env.sh. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

spark3-conf/spark-env.sh_service_safety_valve

Required

false

Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

SPARK3_ON_YARN_service_env_safety_valve

Required

false

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

History Server Role Health Test**Description**

When computing the overall SPARK3_ON_YARN health, consider History Server's health

Related Name**Default Value**

true

API Name

SPARK3_ON_YARN_SPARK3_YARN_HISTORY_SERVER_health_enabled

Required

false

Other**Atlas Service****Description**

Name of the Atlas service that this Spark 3 service instance depends on

Related Name**Default Value****API Name**

atlas_service

Required

false

HBase Service**Description**

Name of the HBase service that this Spark 3 service instance depends on

Related Name**Default Value****API Name**

hbase_service

Required

false

Spark Authentication**Description**

Enable whether the Spark communication protocols do authentication using a shared secret. If using SPARK_ON_YARN service (i.e. Spark 1 based service), ensure that value of this property is the same in both services.

Related Name

spark.authenticate

Default Value

false

API Name

spark_authenticate

Required

true

Spark Driver Log Location (HDFS)**Description**

The location of Spark driver logs in HDFS when Spark application runs in client mode. Changing this value will not move existing logs to the new location.

Related Name

spark.driver.log.dfsDir

Default Value

/user/spark/driver3Logs

API Name

spark_driver_log_dfs_dir

Required

true

Persist Driver Logs to Dfs**Description**

If enabled, driver logs in YARN client mode will be persisted to the configured Spark Driver Log Location (HDFS)

Related Name

spark.driver.log.persistToDfs.enabled

Default Value

true

API Name

spark_driver_log_persist_to_dfs

Required

true

Spark History Location (HDFS)**Description**

The location of Spark application history logs in HDFS. Changing this value will not move existing logs to the new location.

Related Name

spark.eventLog.dir

Default Value

/user/spark/spark3ApplicationHistory

API Name

spark_history_log_dir

Required

true

YARN Service**Description**

Name of the YARN service that this Spark 3 service instance depends on

Related Name**Default Value****API Name**

yarn_service

Required

true

Ports and Addresses**Spark Shuffle Service Port****Description**

The port the Spark Shuffle Service listens for fetch requests. If using SPARK_ON_YARN service (i.e. Spark 2 based service), ensure a unique port is given here.

Related Name

spark.shuffle.service.port

Default Value

7447

API Name

spark_shuffle_service_port

Required

true

Security**Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

Related Name**Default Value**

spark

API Name

kerberos_princ_name

Required

true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory

Description

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Admin Users

Description

Whether to suppress configuration warnings produced by the Admin Users configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_admin_users

Required

true

Suppress Configuration Validator: History Server WebUI Port

Description

Whether to suppress configuration warnings produced by the History Server WebUI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_history_server_web_port

Required

true

Suppress Configuration Validator: Local Storage Directory**Description**

Whether to suppress configuration warnings produced by the Local Storage Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_local_storage_dir

Required

true

Suppress Configuration Validator: History Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the History Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: History Server Log Directory**Description**

Whether to suppress configuration warnings produced by the History Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_meta/version_client_config_safety_valve

Required

true

Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for meta/version configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_meta/version_role_safety_valve

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf**Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-defaults.conf_client_config_safety_valve

Required

true

Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-env.sh_client_config_safety_valve

Required

true

Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-env.sh_role_safety_valve

Required

true

Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf**Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3-conf/spark-history-server.conf_role_safety_valve

Required

true

Suppress Configuration Validator: History Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the History Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark3_yarn_history_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Spark Data Serializer**Description**

Whether to suppress configuration warnings produced by the Spark Data Serializer configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_data_serializer

Required

true

Suppress Configuration Validator: Extra Python Path**Description**

Whether to suppress configuration warnings produced by the Extra Python Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_spark_python_path

Required

true

Suppress Configuration Validator: Enabled SSL/TLS Algorithms**Description**

Whether to suppress configuration warnings produced by the Enabled SSL/TLS Algorithms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_algorithms

Required

true

Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: TLS/SSL Port Number

Description

Whether to suppress configuration warnings produced by the TLS/SSL Port Number configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_port

Required

true

Suppress Configuration Validator: TLS/SSL Protocol

Description

Whether to suppress configuration warnings produced by the TLS/SSL Protocol configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_protocol

Required

true

Suppress Configuration Validator: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_meta/version_service_safety_valve

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark3-conf/spark-env.sh_service_safety_valve

Required

true

Suppress Parameter Validation: Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark3_on_yarn_service_env_safety_valve

Required

true

Suppress Configuration Validator: History Server Count Validator**Description**

Whether to suppress configuration warnings produced by the History Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_spark3_yarn_history_server_count_validator

Required

true

Suppress Parameter Validation: Spark Driver Log Location (HDFS)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Driver Log Location (HDFS) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_driver_log_dfs_dir

Required

true

Suppress Parameter Validation: Spark History Location (HDFS)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark History Location (HDFS) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_history_log_dir

Required

true

Suppress Parameter Validation: Spark Shuffle Service Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Shuffle Service Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_spark_shuffle_service_port

Required

true

Suppress Health Test: History Server Health**Description**

Whether to suppress the results of the History Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_spark3_on_yarn_spark3_on_yarn_spark3_yarn_history_server_health

Required

true

SQOOP_CLIENT Properties in Cloudera Runtime 7.1.9

Role groups:

Gateway

Advanced

Deploy Directory

Description

The directory where the client configs will be deployed

Related Name**Default Value**

/etc/sqoop

API Name

client_config_root_dir

Required

true

Gateway Advanced Configuration Snippet (Safety Valve) for cm_manager_overrides

Description

For advanced use only. A string to be inserted into cm_manager_overrides for this role only.

Related Name**Default Value****API Name**

sqoop-conf/managers.d/cm_manager_overrides_client_config_safety_valve

Required

false

Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh

Description

For advanced use only. A string to be inserted into sqoop-env.sh for this role only.

Related Name**Default Value****API Name**

sqoop-conf/sqoop-env.sh_client_config_safety_valve

Required

false

Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml

Description

For advanced use only. A string to be inserted into sqoop-site.xml for this role only.

Related Name

Default Value**API Name**

sqoop-conf/sqoop-site.xml_client_config_safety_valve

Required

false

Monitoring**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other**Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name**Default Value**

90

API Name

client_config_priority

Required

true

Sqoop Connection Factories**Description**

A list of ManagerFactory implementations which are consulted, in order to instantiate ConnManager instances used to drive connections to databases.

Related Name

sqoop.connection.factories

Default Value**API Name**

sqoop_connection_factories

Required

false

Sqoop Tool Plugins

Description

A list of ToolPlugin implementations which are consulted, in order to register SqoopTool instances which allow third-party tools to be used.

Related Name

sqoop.tool.plugins

Default Value**API Name**

sqoop_tool_plugins

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for cm_manager_overrides

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for cm_manager_overrides parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop-conf/managers.d/cm_manager_overrides_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop-conf/sqoop-env.sh_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop-conf/sqoop-site.xml_client_config_safety_valve

Required

true

Suppress Parameter Validation: Sqoop Connection Factories**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Sqoop Connection Factories parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop_connection_factories

Required

true

Suppress Parameter Validation: Sqoop Tool Plugins

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Sqoop Tool Plugins parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop_tool_plugins

Required

true

Service-Wide

Advanced

SQOOP_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

SQOOP_CLIENT_service_env_safety_valve

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Other

Parquet Writer Implementation

Description

Configure the library used during parquet jobs for writing and reading data. Possible values: hadoop, kite (legacy).

Related Name`parquetjob.configurator.implementation`**Default Value**`hadoop`**API Name**`parquetjob.configurator.implementation`**Required**`false`**Sqoop Decimal Padding****Description**

Enables padding for fixed point number types (decimal, number, numeric) in case of Avro and Parquet imports.

Related Name`sqoop.avro.decimal_padding.enable`**Default Value**`true`**API Name**`sqoop.avro.decimal_padding.enable`**Required**`false`**Default Precision for Logical Types****Description**

Specifies the default precision for fixed point number types. This value is only used if the precision was not specified in the source table.

Related Name`sqoop.avro.logical_types.decimal.default.precision`**Default Value**`38`**API Name**`sqoop.avro.logical_types.decimal.default.precision`**Required**`false`**Default Scale for Logical Types****Description**

Default scale for fixed point number types. This value is only used if the scale was not specified in the source table.

Related Name`sqoop.avro.logical_types.decimal.default.scale`**Default Value**`10`**API Name**`sqoop.avro.logical_types.decimal.default.scale`

Required

false

Enable Avro Logical Types**Description**

Enables the use of logical types in avro files, so that fixed point number types are converted to decimal during an import. Fixed point number types are converted to String if this property is set to false.

Related Name

sqoop.avro.logical_types.decimal.enable

Default Value

true

API Name

sqoop.avro.logical_types.decimal.enable

Required

false

Enable Parquet Logical Types**Description**

Enables the use of logical types in parquet files, so that fixed point number types are converted to decimal during an import. Fixed point number types are converted to String if this property is set to false.

Related Name

sqoop.parquet.logical_types.decimal.enable

Default Value

true

API Name

sqoop.parquet.logical_types.decimal.enable

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for cm_manager_overrides**Description**

Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for cm_manager_overrides configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop-conf/managers.d/cm_manager_overrides_client_config_safety_valve

Required

true

Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh**Description**

Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop-conf/sqoop-env.sh_client_config_safety_valve

Required

true

Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml**Description**

Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_sqoop-conf/sqoop-site.xml_client_config_safety_valve

Required

true

Suppress Configuration Validator: Sqoop Connection Factories**Description**

Whether to suppress configuration warnings produced by the Sqoop Connection Factories configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop_connection_factories

Required

true

Suppress Configuration Validator: Sqoop Tool Plugins**Description**

Whether to suppress configuration warnings produced by the Sqoop Tool Plugins configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_sqoop_tool_plugins

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: Parquet Writer Implementation**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Parquet Writer Implementation parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_parquetjob.configurator.implementation

Required

true

Suppress Parameter Validation: SQOOP_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SQOOP_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_sqoop_client_service_env_safety_valve

Required

true

Streams Messaging Manager Properties in Cloudera Runtime 7.1.9

Role groups:

Service-Wide

Advanced

System Group

Description

The group that this service's processes should run as.

Related Name**Default Value**

streamsmgmgr

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name**Default Value**

streamsmgmgr

API Name

process_username

Required

true

Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

STREAMS_MESSAGING_MANAGER_service_env_safety_valve

Required

false

Database**Streams Messaging Manager Database Host****Description**

Hostname of the database used by Streams Messaging Manager. If the port is non-default for your database type, use host:port notation.

Related Name

streams.messaging.manager.storage.connector.host

Default Value

localhost

API Name

smm_database_host

Required

true

Streams Messaging Manager Database Name**Description**

Name of Streams Messaging Manager database.

Related Name

streams.messaging.manager.storage.connector.name

Default Value

streamsmgmgr

API Name

smm_database_name

Required

true

Streams Messaging Manager Database User Password

Description

Password for Streams Messaging Manager database.

Related Name

streams.messaging.manager.storage.connector.password

Default Value**API Name**

smm_database_password

Required

true

Streams Messaging Manager Database Port

Description

Port for Streams Messaging Manager database.

Related Name

streams.messaging.manager.storage.connector.port

Default Value

3306

API Name

smm_database_port

Required

true

Streams Messaging Manager Database Type

Description

Database type to be used (postgres).

Related Name

streams.messaging.manager.storage.connector.type

Default Value

mysql

API Name

smm_database_type

Required

true

Streams Messaging Manager Database User

Description

User for Streams Messaging Manager database.

Related Name

streams.messaging.manager.storage.connector.user

Default Value

streamsmgmgr

API Name

smm_database_user

Required

true

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I`

F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}}See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Streams Messaging Manager Rest Admin Server Role Health Test**Description**

When computing the overall STREAMS_MESSAGING_MANAGER health, consider Streams Messaging Manager Rest Admin Server's health

Related Name**Default Value**

true

API Name

STREAMS_MESSAGING_MANAGER_STREAMS_MESSAGING_MANAGER_SERVER_health_enabled

Required

false

Streams Messaging Manager UI Server Role Health Test**Description**

When computing the overall STREAMS_MESSAGING_MANAGER health, consider Streams Messaging Manager UI Server's health

Related Name**Default Value**

true

API Name

STREAMS_MESSAGING_MANAGER_STREAMS_MESSAGING_MANAGER_UI_health_enabled

Required

false

Other**Kafka Service****Description**

Name of the Kafka service that this Streams Messaging Manager service instance depends on

Related Name**Default Value****API Name**

kafka_service

Required

true

Enable Kerberos Authentication**Description**

Enables Kerberos authentication for this Streams Messaging Manager.

Related Name

kerberos.auth.enable

Default Value

false

API Name

kerberos.auth.enable

Required

false

Sentry Service**Description**

Name of the Sentry service that this Streams Messaging Manager service instance depends on

Related Name**Default Value****API Name**

sentry_service

Required

false

Streams Messaging Manager Port**Description**

The port on which server accepts connections.

Related Name

streams.messaging.manager.port

Default Value

8585

API Name

streams.messaging.manager.port

Required

true

Streams Messaging Manager port (SSL)**Description**

HTTPS port Streams Messaging Manager rest server runs on when SSL is enabled.

Related Name

streams.messaging.manager.ssl.port

Default Value

8587

API Name

streams.messaging.manager.ssl.port

Required

false

ZooKeeper Service**Description**

Name of the ZooKeeper service that this Streams Messaging Manager service instance depends on

Related Name**Default Value****API Name**

zookeeper_service

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Cloudera Manager Service Monitor Port**Description**

Whether to suppress configuration warnings produced by the Cloudera Manager Service Monitor Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cm.metrics.service.monitor.port

Required

true

Suppress Configuration Validator: Cloudera Manager Metrics TrustStore Type**Description**

Whether to suppress configuration warnings produced by the Cloudera Manager Metrics TrustStore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cm.metrics.truststore.type

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_config.json_role_safety_valve

Required

true

Suppress Configuration Validator: consumer.group.refresh.interval.ms**Description**

Whether to suppress configuration warnings produced by the consumer.group.refresh.interval.ms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.group.refresh.interval.ms

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_env.sh_role_safety_valve

Required

true

Suppress Configuration Validator: Inactive Group Timeout**Description**

Whether to suppress configuration warnings produced by the Inactive Group Timeout configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_inactive.group.timeout.ms

Required

true

Suppress Configuration Validator: inactive.producer.timeout.ms**Description**

Whether to suppress configuration warnings produced by the inactive.producer.timeout.ms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_inactive.producer.timeout.ms

Required

true

Suppress Configuration Validator: LatencyMetricsConfig Metrics 15m Ttl Secs**Description**

Whether to suppress configuration warnings produced by the LatencyMetricsConfig Metrics 15m Ttl Secs configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_latencymetricsconfig.metrics.15m.ttl.secs

Required

true

Suppress Configuration Validator: LatencyMetricsConfig Metrics Clean Frequency ms**Description**

Whether to suppress configuration warnings produced by the LatencyMetricsConfig Metrics Clean Frequency ms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_latencymetricsconfig.metrics.clean.frequency.ms

Required

true

Suppress Configuration Validator: Latency Metrics Data Storage Path**Description**

Whether to suppress configuration warnings produced by the Latency Metrics Data Storage Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_latencymetricsconfig.metrics.storage

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Log Directory**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Metrics Cache Refresh Interval ms**Description**

Whether to suppress configuration warnings produced by the Metrics Cache Refresh Interval ms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.cache.refresh.interval.ms

Required

true

Suppress Configuration Validator: Metrics Fetcher Class**Description**

Whether to suppress configuration warnings produced by the Metrics Fetcher Class configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.fetcher.class

Required

true

Suppress Configuration Validator: Number of Metrics Fetcher Threads**Description**

Whether to suppress configuration warnings produced by the Number of Metrics Fetcher Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.fetcher.threads

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Java Heap Size of SMM**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of SMM configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_smm_heap_size

Required

true

Suppress Configuration Validator: SMM_JMX_OPTS**Description**

Whether to suppress configuration warnings produced by the SMM_JMX_OPTS configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_smm_jmx_opts

Required

true

Suppress Configuration Validator: SMM_JVM_PERF_OPTS**Description**

Whether to suppress configuration warnings produced by the SMM_JVM_PERF_OPTS configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_smm_jvm_perf_opts

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_ca_certificate_location

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_certificate_location

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_location

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Private Key Password configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_privatekey_password

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams-messaging-manager.yaml_role_safety_valve

Required

true

Suppress Configuration Validator: Streams Messaging Manager Admin Port**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Admin Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.adminport

Required

true

Suppress Configuration Validator: Allow All Alert Notifications

Description

Whether to suppress configuration warnings produced by the Allow All Alert Notifications configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.allow.all.alert.notifications

Required

true

Suppress Configuration Validator: Allowed resources

Description

Whether to suppress configuration warnings produced by the Allowed resources configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.allowed.resources

Required

true

Suppress Configuration Validator: Java Home Path Override

Description

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.jdk.home

Required

true

Suppress Configuration Validator: Kafka Alert Notification Topic

Description

Whether to suppress configuration warnings produced by the Kafka Alert Notification Topic configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.kafka.alert.notifications.topic

Required

true

Suppress Configuration Validator: Kafka Cache Refresh Interval ms**Description**

Whether to suppress configuration warnings produced by the Kafka Cache Refresh Interval ms configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.kafka.cache.refresh.interval.ms

Required

true

Suppress Configuration Validator: Kerberos Name Rules**Description**

Whether to suppress configuration warnings produced by the Kerberos Name Rules configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.kerberos.name.rules

Required

true

Suppress Configuration Validator: Kerberos Non Browser User Agents**Description**

Whether to suppress configuration warnings produced by the Kerberos Non Browser User Agents configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.kerberos.non.browser.user.agents

Required

true

Suppress Configuration Validator: Streams Messaging Manager Log Max Backup Index**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Log Max Backup Index configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_streams.messaging.manager.log.maxbackupindex

Required

true

Suppress Configuration Validator: Streams Messaging Manager Log Max File Size**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Log Max File Size configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.log.maxfilesize

Required

true

Suppress Configuration Validator: Streams Messaging Manager NotifierProviders Config Classes**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager NotifierProviders Config Classes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.providerclasses

Required

true

Suppress Configuration Validator: Save Notification Read Status Per User**Description**

Whether to suppress configuration warnings produced by the Save Notification Read Status Per User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.save.notification.read.status.per.user

Required

true

Suppress Configuration Validator: Schema Registry API url**Description**

Whether to suppress configuration warnings produced by the Schema Registry API url configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.schema.registry.url

Required

true

Suppress Configuration Validator: Servlet filter**Description**

Whether to suppress configuration warnings produced by the Servlet filter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.servlet.filter

Required

true

Suppress Configuration Validator: Streams Messaging Manager Admin Port (SSL)**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Admin Port (SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ssl.adminport

Required

true

Suppress Configuration Validator: SSL Keystore Type**Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ssl.keystoretype

Required

true

Suppress Configuration Validator: SSL TrustStore Type**Description**

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ssl.truststoretype

Required

true

Suppress Configuration Validator: SSL ValidateCerts**Description**

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ssl.validatecerts

Required

true

Suppress Configuration Validator: SSL validatePeers**Description**

Whether to suppress configuration warnings produced by the SSL validatePeers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ssl.validatepeers

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Port**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Port configuration validator.

Related Name**Default Value**

false

API Name

```
role_config_suppression_streams.messaging.manager.ui.port
```

Required

```
true
```

Suppress Configuration Validator: Streams Messaging Manager Configuration Directory**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Configuration Directory configuration validator.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_streams.messaging.manager.working.directory
```

Required

```
true
```

Suppress Configuration Validator: Streams Replication Manager Rest Host**Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Rest Host configuration validator.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_streams.replication.manager.host
```

Required

```
true
```

Suppress Configuration Validator: Streams Replication Manager Rest Port**Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Rest Port configuration validator.

Related Name**Default Value**

```
false
```

API Name

```
role_config_suppression_streams.replication.manager.port
```

Required

```
true
```

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_messaging_manager_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_messaging_manager_ui_role_env_safety_valve

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Streams Messaging Manager Database Host**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Host parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smm_database_host

Required

true

Suppress Parameter Validation: Streams Messaging Manager Database Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Name parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smm_database_name

Required

true

Suppress Parameter Validation: Streams Messaging Manager Database User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database User Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smm_database_password

Required

true

Suppress Parameter Validation: Streams Messaging Manager Database Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smm_database_port

Required

true

Suppress Parameter Validation: Streams Messaging Manager Database User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smm_database_user

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Streams Messaging Manager Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Port parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_streams.messaging.manager.port

Required

true

Suppress Parameter Validation: Streams Messaging Manager port (SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager port (SSL) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_streams.messaging.manager.ssl.port

Required

true

Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_messaging_manager_server_count_validator

Required

true

Suppress Parameter Validation: Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_messaging_manager_service_env_safety_valve

Required

true

Suppress Configuration Validator: Streams Messaging Manager UI Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_messaging_manager_ui_count_validator

Required

true

Suppress Health Test: Streams Messaging Manager Rest Admin Server Health**Description**

Whether to suppress the results of the Streams Messaging Manager Rest Admin Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_streams_messaging_manager_streams_messaging_manager_streams_messaging_manager_server_health

Required

true

Suppress Health Test: Streams Messaging Manager UI Server Health**Description**

Whether to suppress the results of the Streams Messaging Manager UI Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_streams_messaging_manager_streams_messaging_manager_streams_messaging_manager_ui_health

Required

true

Streams Messaging Manager Rest Admin Server

Advanced

Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh

Description

For advanced use only. A string to be inserted into env.sh for this role only.

Related Name**Default Value****API Name**

env.sh_role_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml**Description**

For advanced use only. A string to be inserted into streams-messaging-manager.yaml for this role only.

Related Name**Default Value****API Name**

streams-messaging-manager.yaml_role_safety_valve

Required

false

Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STREAMS_MESSAGING_MANAGER_SERVER_role_env_safety_valve

Required

false

Logs**Streams Messaging Manager Rest Admin Server Log Directory****Description**

The log directory for log files of the role Streams Messaging Manager Rest Admin Server.

Related Name

log_dir

Default Value

/var/log/streams-messaging-manager

API Name

log_dir

Required

false

Monitoring**Enable Health Alerts for this Role****Description**When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`**Related Name****Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name

Default Value

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

streams_messaging_manager_server_fd_thresholds

Required

false

Streams Messaging Manager Rest Admin Server Host Health Test**Description**

When computing the overall Streams Messaging Manager Rest Admin Server health, consider the host's health.

Related Name**Default Value**

true

API Name

streams_messaging_manager_server_host_health_enabled

Required

false

Streams Messaging Manager Rest Admin Server Process Health Test**Description**

Enables the health test that the Streams Messaging Manager Rest Admin Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

streams_messaging_manager_server_scm_health_enabled

Required

false

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

`unexpected_exits_thresholds`

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

`unexpected_exits_window`

Required

false

Other

Cloudera Manager Service Monitor Port

Description

Port of Cloudera Manager's Service Monitor.

Related Name

`cm.metrics.service.monitor.port`

Default Value

9997

API Name

`cm.metrics.service.monitor.port`

Required

true

Cloudera Manager Metrics TrustStore Type

Description

Cloudera Manager's truststore type.

Related Name

`cm.metrics.truststore.type`

Default Value

jks

API Name

cm.metrics.truststore.type

Required

true

consumer.group.refresh.interval.ms**Description**

Refresh interval for consumer group's consumption.

Related Name

consumer.group.refresh.interval.ms

Default Value

50000

API Name

consumer.group.refresh.interval.ms

Required

true

Graceful Shutdown Timeout**Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

30 second(s)

API Name

graceful_stop_timeout

Required

false

Inactive Group Timeout**Description**

Timeout in ms for inactive group.

Related Name

inactive.group.timeout.ms

Default Value

1800000

API Name

inactive.group.timeout.ms

Required

true

inactive.producer.timeout.ms**Description**

Timeout in ms for Inactive producer.

Related Name

inactive.producer.timeout.ms

Default Value

1800000

API Name

inactive.producer.timeout.ms

Required

true

Enable Latency Metrics Processing**Description**

To enable Latency Metrics Processing and Servicing, SMM will launch a service which continuously processes metrics received from producers and consumers and be able to provide responses to queries.

Related Name

latencyMetricsConfig.enable.latency.metrics.processing

Default Value

true

API Name

latencyMetricsConfig.enable.latency.metrics.processing

Required

true

LatencyMetricsConfig Metrics 15m Ttl Secs**Description**

Determines the default TTL (Time To Live) for 15m granularity metrics (metrics are queryable in 15m).

Related Name

latencyMetricsConfig.metrics.15m.ttl.secs

Default Value

1209600

API Name

latencyMetricsConfig.metrics.15m.ttl.secs

Required

false

LatencyMetricsConfig Metrics Clean Frequency ms**Description**

Frequency with which the metrics are cleaned from the above store in ms.

Related Name

latencyMetricsConfig.metrics.clean.frequency.ms

Default Value

21600000

API Name

latencyMetricsConfig.metrics.clean.frequency.ms

Required

false

Latency Metrics Data Storage Path

Description

Path to store latency metrics data.

Related Name

latencyMetricsConfig.metrics.storage

Default Value

/var/lib/streamsmgmr/latencymetrics/data

API Name

latencyMetricsConfig.metrics.storage

Required

false

logging threshold for logger appenders

Description

logging threshold for logger appenders

Related Name

loggers.appenders.threshold

Default Value

TRACE

API Name

loggers.appenders.threshold

Required

false

logging level of all loggers

Description

logging level of all loggers

Related Name

logging.level

Default Value

INFO

API Name

logging.level

Required

false

Logger org.apache.kafka Logging Level

Description

Logger org.apache.kafka logging level.

Related Name

logging.org.apache.kafka.level

Default Value

INFO

API Name

logging.org.apache.kafka.level

Required

false

Logger `smm.kafka.webservice.common` Logging Level**Description**

Logger `smm.kafka.webservice.common` logging level.

Related Name

logging.smm.kafka.webservice.common.level

Default Value

DEBUG

API Name

logging.smm.kafka.webservice.common.level

Required

false

Metrics Cache Refresh Interval ms**Description**

Refresh interval for data collection from CM Metrics's Collector cache.

Related Name

metrics.cache.refresh.interval.ms

Default Value

50000

API Name

metrics.cache.refresh.interval.ms

Required

true

Metrics Fetcher Class**Description**

SMM's kafka metrics fetcher class.

Related Name

metrics.fetcher.class

Default Value

com.hortonworks.smm.kafka.services.metric.cm.CMMetricsFetcher

API Name

metrics.fetcher.class

Required

true

Number of Metrics Fetcher Threads**Description**

Number of metrics fetcher threads.

Related Name

metrics.fetcher.threads

Default Value

25

API Name

metrics.fetcher.threads

Required

true

Java Heap Size of SMM**Description**

Maximum size for the SMM Java process heap memory. Passed to Java -Xmx. Measured in megabytes.

Related Name

SMM_HEAP_SIZE

Default Value

6 GiB

API Name

SMM_HEAP_SIZE

Required

false

SMM_JMX_OPTS**Description**

Change parameters to setup jmxremote.

Related Name

SMM_JMX_OPTS

Default Value

-Dcom.sun.management.jmxremote -Dcom.sun.management.jmxremote.authenticate=false -
Dcom.sun.management.jmxremote.ssl=false

API Name

SMM_JMX_OPTS

Required

false

SMM_JVM_PERF_OPTS**Description**

SMM JVM perf and gc opts.

Related Name

SMM_JVM_PERF_OPTS

Default Value

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -
XX:+ExplicitGCInvokesConcurrent -Djava.awt.headless=true

API Name

SMM_JVM_PERF_OPTS

Required

false

Streams Messaging Manager Admin Port

Description

The admin port for the server.

Related Name

streams.messaging.manager.adminPort

Default Value

8586

API Name

streams.messaging.manager.adminPort

Required

true

AlertTopicConsumerConfig Poll Timeout ms

Description

Alert topic Consumer config poll timeout in ms.

Related Name

streams.messaging.manager.alertTopicConsumerConfig.poll.timeout.ms

Default Value

1 second(s)

API Name

streams.messaging.manager.alertTopicConsumerConfig.poll.timeout.ms

Required

false

Allow All Alert Notifications

Description

Whether to send the alert notifications periodically.

Related Name

streams.messaging.manager.allow.all.alert.notifications

Default Value

true

API Name

streams.messaging.manager.allow.all.alert.notifications

Required

false

Allowed resources

Description

Allowed resources for Streams Messaging Manager.

Related Name

streams.messaging.manager.allowed.resources

Default Value

401.html, back-default.png, favicon.ico

API Name

streams.messaging.manager.allowed.resources

Required

false

Streams Messaging Manager Executor Thread Count**Description**

Alerts config executor thread count.

Related Name

streams.messaging.manager.executor.thread.count

Default Value

30

API Name

streams.messaging.manager.executor.thread.count

Required

true

Streams Messaging Manager Executor Thread Pool Size**Description**

NotifierProviders executor thread pool size.

Related Name

streams.messaging.manager.executor.thread.pool.size

Default Value

16

API Name

streams.messaging.manager.executor.thread.pool.size

Required

true

Java Home Path Override**Description**

Java Home Path Override for Streams Messaging Manager

Related Name

streams.messaging.manager.jdk.home

Default Value**API Name**

streams.messaging.manager.jdk.home

Required

false

Kafka Alert Notification Topic**Description**

Kafka alert notification topic name.

Related Name

streams.messaging.manager.kafka.alert.notifications.topic

Default Value`__smm_alert_notifications`**API Name**`streams.messaging.manager.kafka.alert.notifications.topic`**Required**`true`**Kafka Cache Refresh Interval ms****Description**

SMM's cache refresh interval in ms for kafka.

Related Name`streams.messaging.manager.kafka.cache.refresh.interval.ms`**Default Value**`60000`**API Name**`streams.messaging.manager.kafka.cache.refresh.interval.ms`**Required**`false`**Kafka Client Security Protocol****Description**

Protocol to be used for communicating with Kafka, INFERRED setup assumes that Kafka service is set up the same as SMM regarding kerberos and ssl.

Related Name`streams.messaging.manager.kafka.client.security.protocol`**Default Value**`INFERRED`**API Name**`streams.messaging.manager.kafka.client.security.protocol`**Required**`false`**Streams Messaging Manager KafkaConsumerClient Poll Timeout ms****Description**

SMM's Kafka Consumer Client poll timeout in ms.

Related Name`streams.messaging.manager.kafkaConsumerClient.poll.timeout.ms`**Default Value**`1 second(s)`**API Name**`streams.messaging.manager.kafkaConsumerClient.poll.timeout.ms`**Required**`false`

Kerberos Name Rules

Description

Kerberos name rules for Streams Messaging Manager.

Related Name

streams.messaging.manager.kerberos.name.rules

Default Value

RULE:[2:\$1@\$0]([jt]t@.*EXAMPLE.COM)s/*/\$MAPRED_USER/ RULE:[2:\$1@\$0]
([nd]n@.*EXAMPLE.COM)s/*/\$HDFS_USER/DEFAULT

API Name

streams.messaging.manager.kerberos.name.rules

Required

false

Kerberos Non Browser User Agents

Description

Non browser user agents if kerberos is enabled.

Related Name

streams.messaging.manager.kerberos.non.browser.user.agents

Default Value**API Name**

streams.messaging.manager.kerberos.non.browser.user.agents

Required

false

Streams Messaging Manager Log Max Backup Index

Description

The number of backup files

Related Name

streams.messaging.manager.log.maxbackupindex

Default Value

20

API Name

streams.messaging.manager.log.maxbackupindex

Required

false

Streams Messaging Manager Log Max File Size

Description

The maximum size of backup file before the log is rotated

Related Name

streams.messaging.manager.log.maxfilesize

Default Value

256MB

API Name

streams.messaging.manager.log.maxfilesize

Required

false

Streams Messaging Manager NotifierProviders Config Classes**Description**

NotifierProviders config classes in list format.

Related Name

streams.messaging.manager.providerClasses

Default Value

[com.hortonworks.smm.notifier.http.HttpNotifierProvider,
com.hortonworks.smm.notifier.email.EmailNotifierProvider]

API Name

streams.messaging.manager.providerClasses

Required

true

Save Notification Read Status Per User**Description**

Alert notification save status flag per user.

Related Name

streams.messaging.manager.save.notification.read.status.per.user

Default Value

true

API Name

streams.messaging.manager.save.notification.read.status.per.user

Required

false

Schema Registry API url**Description**

Provide API URL for Schema Registry. e.g http://SR_HOST:7788/api/v1 or https://
SR_HOST:7790/api/v1

Related Name

streams.messaging.manager.schema.registry.url

Default Value**API Name**

streams.messaging.manager.schema.registry.url

Required

false

Servlet filter**Description**

Streams Messaging Manager servlet filter class.

Related Name

streams.messaging.manager.servlet.filter

Default Value

com.hortonworks.registries.auth.server.AuthenticationFilter

API Name

streams.messaging.manager.servlet.filter

Required

true

Streams Messaging Manager Admin Port (SSL)**Description**

HTTPS admin port Streams Messaging Manager rest server runs on when SSL is enabled.

Related Name

streams.messaging.manager.ssl.adminPort

Default Value

8588

API Name

streams.messaging.manager.ssl.adminPort

Required

false

SSL Keystore Type**Description**

The keystore type. Required if Streams Messaging Manager rest server's SSL is enabled. e.g. PKCS12 or JKS.

Related Name

streams.messaging.manager.ssl.keyStoreType

Default Value

jks

API Name

streams.messaging.manager.ssl.keyStoreType

Required

false

SSL TrustStore Type**Description**

The truststore type. Required if streams messaging manager's ssl is enabled. e.g. PKCS12 or JKS.

Related Name

streams.messaging.manager.ssl.trustStoreType

Default Value

jks

API Name

streams.messaging.manager.ssl.trustStoreType

Required

false

SSL ValidateCerts

Description

Whether or not to validate TLS certificates before starting. If enabled, it will refuse to start with expired or otherwise invalid certificates.

Related Name

streams.messaging.manager.ssl.validateCerts

Default Value

false

API Name

streams.messaging.manager.ssl.validateCerts

Required

false

SSL validatePeers

Description

Whether or not to validate TLS peer certificates.

Related Name

streams.messaging.manager.ssl.validatePeers

Default Value

false

API Name

streams.messaging.manager.ssl.validatePeers

Required

false

Streams Messaging Manager Query Timeout

Description

Streams Messaging Manager query timeout.

Related Name

streams.messaging.manager.storage.query.timeout

Default Value

30 millisecond(s)

API Name

streams.messaging.manager.storage.query.timeout

Required

true

Token validity

Description

Kerberos token validity for Streams Messaging Manager in ms.

Related Name

streams.messaging.manager.token.validity

Default Value

36000

API Name

streams.messaging.manager.token.validity

Required

false

Streams Messaging Manager Configuration Directory**Description**

Directory to Streams messaging manager additional libs, jars, isos, etc.

Related Name

streams.messaging.manager.working.directory

Default Value

/var/lib/streamsmgmgr

API Name

streams.messaging.manager.working.directory

Required

false

Configure Streams Replication Manager**Description**

Configure Streams Replication Manager.

Related Name

streams.replication.manager.configure

Default Value

false

API Name

streams.replication.manager.configure

Required

false

Streams Replication Manager Rest Host**Description**

Streams Replication Manager rest host.

Related Name

streams.replication.manager.host

Default Value**API Name**

streams.replication.manager.host

Required

false

Streams Replication Manager Rest Port**Description**

Streams Replication Manager rest port.

Related Name

streams.replication.manager.port

Default Value

6670

API Name

streams.replication.manager.port

Required

false

Streams Replication Manager Rest Protocol**Description**

Streams Replication Manager rest protocol.

Related Name

streams.replication.manager.protocol

Default Value

http

API Name

streams.replication.manager.protocol

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Streams Messaging Manager Rest Admin Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

streams.messaging.manager.ssl.trustStorePath

Default Value**API Name**

ssl_client_truststore_location

Required

false

Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password

Description

The password for the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value****API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Streams Messaging Manager Rest Admin Server

Description

Encrypt communication between clients and Streams Messaging Manager Rest Admin Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl.enable

Default Value

false

API Name

ssl_enabled

Required

false

Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Streams Messaging Manager Rest Admin Server is acting as a TLS/SSL server.

Related Name**Default Value****API Name**

ssl_server_keystore_keypassword

Required

false

Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Streams Messaging Manager Rest Admin Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

streams.messaging.manager.ssl.keyStorePath

Default Value**API Name**

ssl_server_keystore_location

Required

false

Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password

Description

The password for the Streams Messaging Manager Rest Admin Server keystore file.

Related Name**Default Value****API Name**

`ssl_server_keystore_password`**Required**`false`**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name`stacks_collection_data_retention`**Default Value**`100 MiB`**API Name**`stacks_collection_data_retention`**Required**`false`**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name`stacks_collection_directory`**Default Value****API Name**`stacks_collection_directory`**Required**`false`**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

Related Name`stacks_collection_enabled`**Default Value**`false`**API Name**`stacks_collection_enabled`**Required**`true`

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Cloudera Manager Service Monitor Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Cloudera Manager Service Monitor Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_cm.metrics.service.monitor.port

Required

true

Suppress Parameter Validation: Cloudera Manager Metrics TrustStore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Cloudera Manager Metrics TrustStore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_cm.metrics.truststore.type

Required

true

Suppress Parameter Validation: consumer.group.refresh.interval.ms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the consumer.group.refresh.interval.ms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.group.refresh.interval.ms

Required

true

Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_env.sh_role_safety_valve

Required

true

Suppress Parameter Validation: Inactive Group Timeout**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Inactive Group Timeout parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_inactive.group.timeout.ms

Required

true

Suppress Parameter Validation: inactive.producer.timeout.ms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the inactive.producer.timeout.ms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_inactive.producer.timeout.ms

Required

true

Suppress Parameter Validation: LatencyMetricsConfig Metrics 15m Ttl Secs**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LatencyMetricsConfig Metrics 15m Ttl Secs parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_latencymetricsconfig.metrics.15m.ttl.secs

Required

true

Suppress Parameter Validation: LatencyMetricsConfig Metrics Clean Frequency ms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LatencyMetricsConfig Metrics Clean Frequency ms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_latencymetricsconfig.metrics.clean.frequency.ms

Required

true

Suppress Parameter Validation: Latency Metrics Data Storage Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Latency Metrics Data Storage Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_latencymetricsconfig.metrics.storage

Required

true

Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Metrics Cache Refresh Interval ms**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Metrics Cache Refresh Interval ms parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.cache.refresh.interval.ms

Required

true

Suppress Parameter Validation: Metrics Fetcher Class**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Metrics Fetcher Class parameter.

Related Name

Default Value

false

API Name

role_config_suppression_metrics.fetcher.class

Required

true

Suppress Parameter Validation: Number of Metrics Fetcher Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Metrics Fetcher Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.fetcher.threads

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_unexpected_exits

Required

true

Streams Messaging Manager UI Server

Advanced

Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json

Description

For advanced use only. A string to be inserted into config.json for this role only.

Related Name**Default Value****API Name**

config.json_role_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STREAMS_MESSAGING_MANAGER_UI_role_env_safety_valve

Required

false

Logs

Streams Messaging Manager UI Server Log Directory

Description

The log directory for log files of the role Streams Messaging Manager UI Server.

Related Name

log_dir

Default Value

/var/log/streams-messaging-manager

API Name

log_dir

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:

```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The

follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

streams_messaging_manager_ui_fd_thresholds

Required

false

Streams Messaging Manager UI Server Host Health Test

Description

When computing the overall Streams Messaging Manager UI Server health, consider the host's health.

Related Name**Default Value**

true

API Name

streams_messaging_manager_ui_host_health_enabled

Required

false

Streams Messaging Manager UI Server Process Health Test

Description

Enables the health test that the Streams Messaging Manager UI Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

streams_messaging_manager_ui_scm_health_enabled

Required

false

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Graceful Shutdown Timeout****Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

30 second(s)

API Name

graceful_stop_timeout

Required

false

Streams Messaging Manager UI Port**Description**

The port on which server accepts connections.

Related Name

streams.messaging.manager.ui.port

Default Value

9991

API Name

streams.messaging.manager.ui.port

Required

true

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Streams Messaging Manager UI Server TLS/SSL Certificate Trust Store File****Description**

The location on disk of the trust store, in .pem format, used to confirm the authenticity of TLS/SSL servers that Streams Messaging Manager UI Server might connect to. This is used when Streams Messaging Manager UI Server is the client in a TLS/SSL connection. This trust store must contain

the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

streams.messaging.manager.ui.ssl.trust.store.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Enable TLS/SSL for Streams Messaging Manager UI Server

Description

Encrypt communication between clients and Streams Messaging Manager UI Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

streams.messaging.manager.ui.ssl.enable

Default Value

false

API Name

ssl_enabled

Required

false

Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format)

Description

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

Related Name

streams.messaging.manager.ui.ssl.ca.cert.location

Default Value**API Name**

ssl_server_ca_certificate_location

Required

false

Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)

Description

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

streams.messaging.manager.ui.ssl.cert.location

Default Value

API Name

ssl_server_certificate_location

Required

false

Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)**Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

streams.messaging.manager.ui.ssl.private.key.location

Default Value**API Name**

ssl_server_privatekey_location

Required

false

Streams Messaging Manager UI Server TLS/SSL Private Key Password**Description**

The password for the private key in the Streams Messaging Manager UI Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

Related Name**Default Value****API Name**

ssl_server_privatekey_password

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_config.json_role_safety_valve

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_certificate_location

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_location

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Private Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_password

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.messaging.manager.ui.port

Required

true

Suppress Parameter Validation: Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_messaging_manager_ui_role_env_safety_valve

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_host_health

Required

Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties**Description**

For advanced use only, a string to be inserted into srm.properties. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

srm.properties_service_safety_valve

Required

false

Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

STREAMS_REPLICATION_MANAGER_service_env_safety_valve

Required

false

Monitoring**Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Healthy SRM Driver Monitoring Thresholds**Description**

The health test thresholds of the overall SRM Driver health. The check returns "Concerning" health if the percentage of "Healthy" SRM Drivers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" SRM Drivers falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

STREAMS_REPLICATION_MANAGER_STREAMS_REPLICATION_MANAGER_DRIVER_healthy_thresholds

Required

false

Healthy SRM Service Monitoring Thresholds**Description**

The health test thresholds of the overall SRM Service health. The check returns "Concerning" health if the percentage of "Healthy" SRM Services falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" SRM Services falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

STREAMS_REPLICATION_MANAGER_STREAMS_REPLICATION_MANAGER_SERVICE_healthy_thresholds

Required

false

Other

Streams Replication Manager Cluster alias

Description

Specifies cluster aliases for the clusters SRM is connecting to. Cluster aliases are comma delimited. For example, 'primary, backup'.

Related Name

clusters

Default Value**API Name**

clusters

Required

true

Emit Checkpoints Interval Seconds

Description

The interval at which SRM emits checkpoint information.

Related Name

emit.checkpoints.interval.seconds

Default Value

5 second(s)

API Name

emit.checkpoints.interval.seconds

Required

true

Kafka Service

Description

Name of the Kafka service that this Streams Replication Manager service instance depends on

Related Name**Default Value****API Name**

kafka_service

Required

false

Enable Kerberos Authentication

Description

Enables Kerberos authentication for this Streams Replication Manager.

Related Name

kerberos.auth.enable

Default Value

false

API Name

kerberos.auth.enable

Required

false

Replication Factor for Metrics Topics**Description**

Replication factor for all metrics topics.

Related Name

Default Value

3

API Name

metrics.topic.replication.factor

Required

false

Refresh Groups Interval Seconds**Description**

The interval at which SRM looks for new consumer groups on source clusters.

Related Name

refresh.groups.interval.seconds

Default Value

10 minute(s)

API Name

refresh.groups.interval.seconds

Required

true

Refresh Topics Interval Seconds**Description**

The interval at which SRM looks for new topics on source clusters.

Related Name

refresh.topics.interval.seconds

Default Value

10 minute(s)

API Name

refresh.topics.interval.seconds

Required

true

SRM_HEAP_OPTS**Description**

Memory heap params.

Related Name

SRM_HEAP_OPTS

Default Value`-Xmx8G -Xms1G`**API Name**`SRM_HEAP_OPTS`**Required**`false`**SRM_JMX_OPTS****Description**

Change parameters to setup jmxremote.

Related Name`SRM_JMX_OPTS`**Default Value**`-Dcom.sun.management.jmxremote -Dcom.sun.management.jmxremote.authenticate=false -
Dcom.sun.management.jmxremote.ssl=false`**API Name**`SRM_JMX_OPTS`**Required**`false`**SRM_JVM_PERF_OPTS****Description**

SRM JVM perf and gc opts.

Related Name`SRM_JVM_PERF_OPTS`**Default Value**`-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -
XX:+ExplicitGCInvokesConcurrent -Djava.awt.headless=true`**API Name**`SRM_JVM_PERF_OPTS`**Required**`false`**Streams Replication Manager's Replication Configs****Description**

Specifies cluster bootstrap server information and cluster replication pairs. Bootstrap information for each alias defined in the clusters property has to be added as follows: 'primary.bootstrap.servers=mycluster1.example.com:9092,primary.bootstrap.servers=mycluster2.example.com:9092'.. Each cluster has to be added in a new line, if cluster has multiple nodes, add all nodes to the same line and delimit each with a comma. Cluster replication pairs can be defined as follows: 'primary->backup.enabled=true'.. Each unique replication pair has to be added in a new line.

Related Name`streams.replication.manager.config`**Default Value****API Name**`streams.replication.manager.config`

Required

role_config_suppression_streams.replication.manager.service.port

Required

true

Suppress Configuration Validator: SRM Service Rpc Port**Description**

Whether to suppress configuration warnings produced by the SRM Service Rpc Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.service.rpcport

Required

true

Suppress Configuration Validator: SRM Service Https Port**Description**

Whether to suppress configuration warnings produced by the SRM Service Https Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.service.ssl.port

Required

true

Suppress Configuration Validator: Streams Replication Manager Service Target Cluster**Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Service Target Cluster configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.service.target.cluster

Required

true

Suppress Configuration Validator: SSL Keystore Type**Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.ssl.keystoretype

Required

true

Suppress Configuration Validator: SSL TrustStore Type**Description**

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.ssl.truststoretype

Required

true

Suppress Configuration Validator: SSL ValidateCerts**Description**

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.ssl.validatecerts

Required

true

Suppress Configuration Validator: SSL ValidatePeers**Description**

Whether to suppress configuration warnings produced by the SSL ValidatePeers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.ssl.validatepeers

Required

true

Suppress Configuration Validator: SRM Driver Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the SRM Driver Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_replication_manager_driver_role_env_safety_valve

Required

true

Suppress Configuration Validator: SRM Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the SRM Service Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_replication_manager_service_role_env_safety_valve

Required

true

Suppress Parameter Validation: Streams Replication Manager Cluster alias**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Cluster alias parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_clusters

Required

true

Suppress Parameter Validation: Replication Factor for Metrics Topics**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replication Factor for Metrics Topics parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_metrics.topic.replication.factor

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_srm.properties_service_safety_valve

Required

true

Suppress Parameter Validation: SRM_HEAP_OPTS

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM_HEAP_OPTS parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_srm_heap_opts

Required

true

Suppress Parameter Validation: SRM_JMX_OPTS

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM_JMX_OPTS parameter.

Related Name

Default Value

false

API Name

service_config_suppression_srm_jmx_opts

Required

true

Suppress Parameter Validation: SRM_JVM_PERF_OPTS**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM_JVM_PERF_OPTS parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_srm_jvm_perf_opts

Required

true

Suppress Parameter Validation: Streams Replication Manager's Replication Configs**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager's Replication Configs parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_streams.replication.manager.config

Required

true

Suppress Configuration Validator: SRM Driver Count Validator**Description**

Whether to suppress configuration warnings produced by the SRM Driver Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_replication_manager_driver_count_validator

Required

true

Suppress Configuration Validator: SRM Service Count Validator**Description**

Whether to suppress configuration warnings produced by the SRM Service Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_replication_manager_service_count_validator

Required

true

Suppress Parameter Validation: Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_streams_replication_manager_service_env_safety_valve

Required

true

Suppress Health Test: SRM Driver Health**Description**

Whether to suppress the results of the SRM Driver Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

service_health_suppression_streams_replication_manager_streams_replication_manager_driver_he
althy

Required

true

Suppress Health Test: SRM Service Health**Description**

Whether to suppress the results of the SRM Service Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Nameservice_health_suppression_streams_replication_manager_streams_replication_manager_service_h
ealthy**Required**

true

SRM Driver

Advanced

SRM Driver XML Override

Description

For advanced use only, replace entire XML in the logback configuration file for SRM Driver, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties**Description**

For advanced use only. A string to be inserted into srm.properties for this role only.

Related Name**Default Value****API Name**

srm.properties_role_safety_valve

Required

false

SRM Driver Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STREAMS_REPLICATION_MANAGER_DRIVER_role_env_safety_valve

Required

false

Logs**SRM Driver Log Directory****Description**

The log directory for log files of the role SRM Driver.

Related Name

log_dir

Default Value

/var/log/streams-replication-manager

API Name

log_dir

Required

false

SRM Driver Logging Threshold**Description**

The minimum log level for SRM Driver logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

SRM Driver Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for SRM Driver logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

SRM Driver Max Log Size**Description**

The maximum size, in megabytes, per log file for SRM Driver logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression.

Related Name**Default Value****API Name**

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAM and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

streams_replication_manager_driver_fd_thresholds

Required

false

SRM Driver Host Health Test**Description**

When computing the overall SRM Driver health, consider the host's health.

Related Name**Default Value**

true

API Name

streams_replication_manager_driver_host_health_enabled

Required

false

SRM Driver Process Health Test**Description**

Enables the health test that the SRM Driver's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

streams_replication_manager_driver_scm_health_enabled

Required

false

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Streams Replication Manager Driver Target Cluster****Description**

Target cluster aliases for the srm-driver. When set, the srm-driver will collect data from all clusters, but will only write to the clusters specified here. Cluster aliases are comma separated.

Related Name

streams.replication.manager.driver.target.cluster

Default Value**API Name**

streams.replication.manager.driver.target.cluster

Required

false

Java Home Path Override**Description**

Java Home Path Override for Streams Replication Manager. If left empty, the java shipped with CM is used.

Related Name

streams.replication.manager.jdk.home

Default Value**API Name**

streams.replication.manager.jdk.home

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

SRM Driver TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that SRM Driver might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

SRM Driver TLS/SSL Trust Store Password

Description

The password for the SRM Driver TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for SRM Driver

Description

Encrypt communication between clients and SRM Driver using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

SRM Driver TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when SRM Driver is acting as a TLS/SSL server.

Related Name

ssl.key.password

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

SRM Driver TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when SRM Driver is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

SRM Driver TLS/SSL Server Keystore File Password**Description**

The password for the SRM Driver keystore file.

Related Name

ssl.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection**Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: SRM Driver Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Log Directory parameter.

Required

true

Suppress Parameter Validation: SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_srm.properties_role_safety_valve

Required

true

Suppress Parameter Validation: SRM Driver TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: SRM Driver TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Streams Replication Manager Driver Target Cluster****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Driver Target Cluster parameter.

Related Name

Default Value

false

API Name

role_config_suppression_streams.replication.manager.driver.target.cluster

Required

true

Suppress Parameter Validation: Java Home Path Override**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_streams.replication.manager.jdk.home

Required

true

Suppress Parameter Validation: SRM Driver Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_streams_replication_manager_driver_role_env_safety_valve

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_audit_health

Required

true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_s
cm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_swap_
memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_swap_
memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_streams_replication_manager_streams_replication_manager_driver_unexpected_exits

Required

true

SRM Service

Advanced

SRM Service XML Override

Description

For advanced use only, replace entire XML in the logback configuration file for SRM Service, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml**Description**

For advanced use only. A string to be inserted into srm-service.yaml for this role only.

Related Name**Default Value****API Name**

srm-service.yaml_role_safety_valve

Required

false

SRM Service Advanced Configuration Snippet (Safety Valve) for srm.properties**Description**

For advanced use only. A string to be inserted into srm.properties for this role only.

Related Name**Default Value****API Name**

srm.properties_role_safety_valve

Required

false

SRM Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STREAMS_REPLICATION_MANAGER_SERVICE_role_env_safety_valve

Required

false

Logs**SRM Service Log Directory****Description**

The log directory for log files of the role SRM Service.

Related Name

log_dir

Default Value

/var/log/streams-replication-manager

API Name

log_dir

Required

false

SRM Service Logging Threshold**Description**

The minimum log level for SRM Service logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

SRM Service Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for SRM Service logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

SRM Service Max Log Size**Description**

The maximum size, in megabytes, per log file for SRM Service logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/common: endpoint: $ROLE_PARAM(otelcol_remote_write_url)
auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true
initial_interval: 1s max_interval: 20m max_elapsed_time: 1h`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'`

API Name

`otelcol_extensions`

Required

`false`

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: `$HOST_NAME`, `$CLUSTER_NAME`, `$CLUSTER_ID`, `$SERVICE_TYPE`, `$SERVICE_NAME`, `$ROLE_NAME`, `$ROLE_TYPE`, `$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.
