Download location of CSA

The Cloudera Streaming Analytics (CSA) software artifacts can be downloaded from the Cloudera Archive. To access the Flink and SQL Stream Builder (SSB) artifacts, you must have an active subscription agreement and a license key file along with the required authentication credentials (username and password).

Download instructions

The license key file and authentication credentials are provided in an email sent to customer accounts from Cloudera as part of the subscription fulfillment process.

Important: You must have your authentication credentials (username and password) to access the CSA artifacts in the Cloudera Archive. Your authentication credentials are not the same as the credentials you use to access the support portal.

In case you did not receive an email or do not have access to your authentication credentials, you can retrieve them in the following ways:

- Contact your Cloudera sales representative.
- File a non-technical case within the [Cloudera support portal](#) for our Support team to assist you.
- Use the CDP Private Cloud Credential Generator (requires a license key):
 1. Log in to the account associated with your license and subscription agreement on cloudera.com.
 2. Go to the [CDP Private Cloud Base Downloads](#) page.
 3. Click Download Now.
 4. Enter the text of the “PGP Signed Message” within your license key in the Generate Credentials text box.
 5. Click Generate Credentials.

The Credential Generator returns your username and password.

Once you have obtained your credentials, you can use them to access the software artifacts on the Cloudera Archive.

You can directly click any of the links provided in the following tables and provide your credentials through a browser prompt. Alternatively, you can also manually construct a URL that contains the credentials. For example:

```
https://username:password@archive.cloudera.com/p/product/version/OS/artifact
```

Download location of CSA Trial

You can download a trial version of Cloudera Streaming Analytics (CSA) that includes Apache Flink and SQL Stream Builder (SSB) through the Cloudera Downloads Page using your Cloudera account information.

You can download and try the trial edition of CSA that includes Apache Flink and SSB without obtaining a license key. To download the CSA trial, you need to visit the [Cloudera Downloads Page](#), and follow the download instructions. Before you can download the CSA artifacts, you must log in to your Cloudera account or sign up for the trial version.

The trial version of CSA includes every feature of the product and is valid for 60 days from the time of installation. When the trial period expires, you can enable CSA permanently with the appropriate license. For more information, contact your Cloudera sales representative or file a non-technical case within the [Cloudera support portal](#) for our Support team to assist you.
