Creating new user accounts

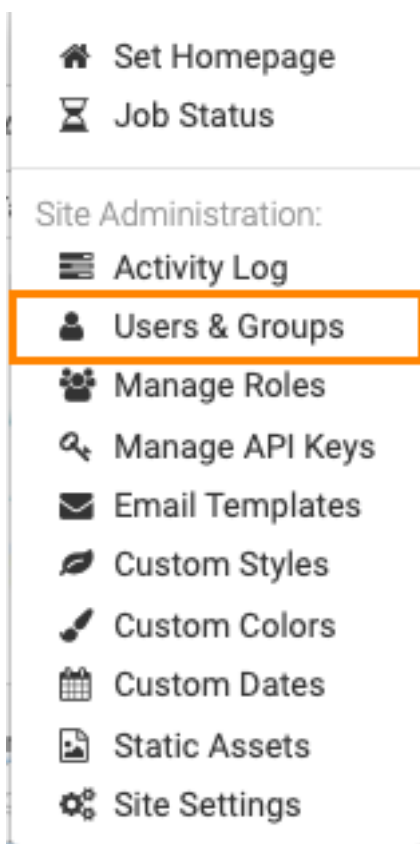

The following steps demonstrate how to create a new user account.

Before you begin

You must have administrative privileges to perform this action.

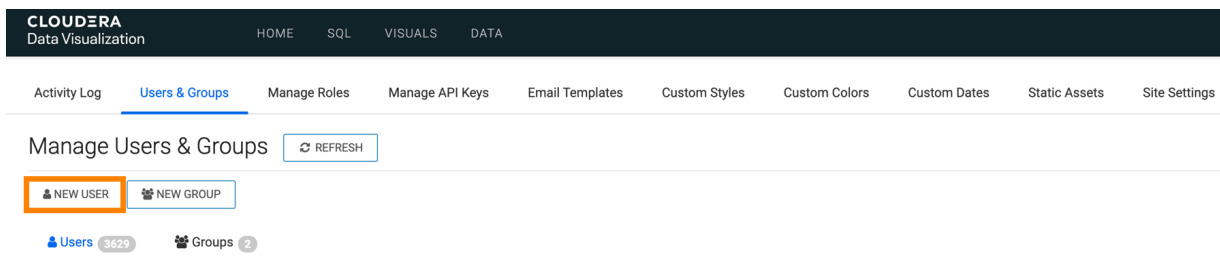

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.
2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. Click NEW USER.

The New User modal window appears.

4. Fill in the new user details:

- Name & password

- Username
- First Name and Last Name

You can also pick these values from LDAP user definitions.

- Password

Important: When you enter your password, ensure that the password meets the minimum security requirements specified for Data Visualization.

For more information, see *Setting user password requirements*.

After five failed login attempts, Data Visualization locks out the user. For instructions on how to change the account lockout configuration settings or to unlock the user, see *Configuring account lockout*. You can check the Show Password option to display the password.

- Permissions

- Normal user and Admin user

Select Normal user.

- [Optional] On the Groups tab, under Group Membership, you can use the Search box to find user groups, and assign the new user to existing groups by selecting user groups on the left list, and then clicking Add

to move them to the right. For more information on how to add users to groups see, *Creating new user groups*.

- [Optional] On the Roles tab, under Roles, you can use the Search box to find roles, and assign the new user to existing roles by selecting roles on the left list, and then clicking Add to move them to the right. For more information on users and roles, see *Assigning roles to users*.

Note: If you have not defined at least one User Group, the New User modal window does not contain Group Membership information.

5. Click SAVE.

Results

After the operation succeeds, you can see the Manage Users & Groups page, showing the Users tab with the new user's information.

When a user logs in, their first name and last name appear in the top right corner of the navigation bar.

After a new user logs in, notice that the date joined changes and the last login changes from Never to a few seconds ago.

Editing accounts

You can change the profile of any user or administrator account in Cloudera Data Visualization (CDV).

Before you begin

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to change the username and permissions for a CDV user account. The process is the same for changing the administrative account.

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.

2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. In the list of registered users, do one of the following:
 - Click the Username of the user that you want to edit.
 - Click the Pencil icon next to the account that you want to edit.

The Edit User modal window appears.

4. You can change the following details:

- Name & password
 - Username
 - First Name and Last Name
 - Password
- Permissions
 - Normal user and Admin user
 - Group Membership
 - Roles
- Active or Inactive

Changing user passwords

An administrator may reset the password of any user or of another administrator in Cloudera Data Visualization (CDV).

Before you begin

You must have administrative privileges to perform this action.

About this task

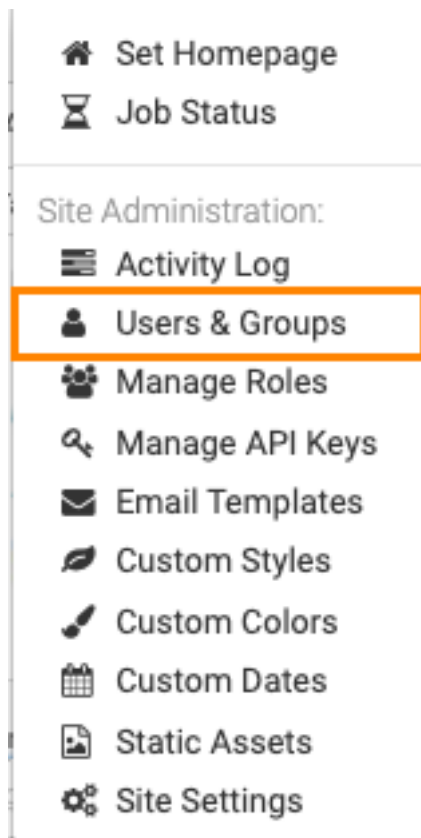

Note: The 'change password' option is not available for LDAP and SAML user accounts.

The following steps demonstrate how to change the password for any CDV user account.

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.
2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. In the list of registered users, do one of the following:

- Click the Username of the account you want to change.
- Click the Pencil/Edit icon that corresponds to the account you want to change.

The Edit User modal window appears.

4. In the Edit User modal window, click Change password.

Promoting a user to administrator

You can promote any user to an administrator in Cloudera Data Visualization.

Before you begin

You must have administrative privileges to perform this action.

Procedure

1. To promote the user to administrator, open the user account in Edit mode and change the Permissions by selecting Admin user.

The image displays two side-by-side screenshots of the 'Edit User' dialog box in Cloudera Data Visualization. Both dialogs show the same fields: Username (User1), First Name (Sara), Last Name (Lee), Password (user1), and a 'Show Password' checkbox. The 'Permissions' section is highlighted with an orange box in both. In the left dialog, 'Normal user - can access Arcadia site' is selected. In the right dialog, 'Admin user - have all permissions to site' is selected. An orange arrow points from the 'Admin user' option in the left dialog to the 'Admin user' option in the right dialog. Below the permissions section, there are tabs for 'Groups' and 'Roles', and a 'Group Membership' section with a search bar and a list of groups. The 'SAVE' button is visible at the bottom right of each dialog.

2. To demote an administrator to plain user, select Normal User under Permissions.

Creating new administrator accounts

An administrator can create new administrator accounts in Cloudera Data Visualization.

Before you begin

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to create a new admin account.

Procedure

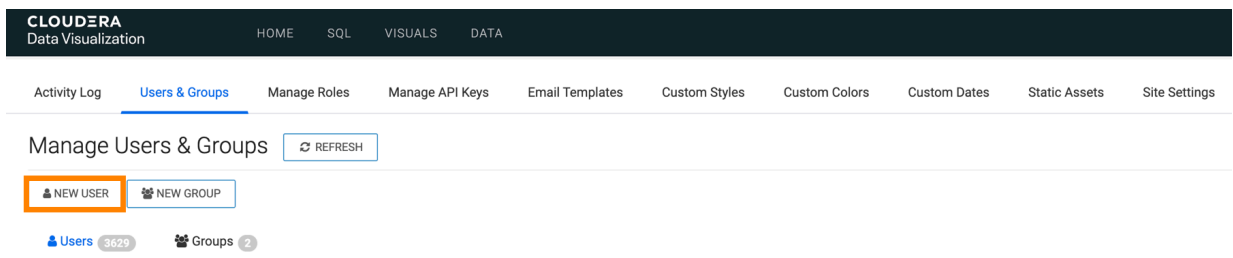

1. Click the Gear icon on the main navigation bar to open the Administration menu.

2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. Click NEW USER.

The New User modal window appears.

4. Fill in the new admin details:

- Name & password

- Username
- First Name and Last Name

You can also pick these values from LDAP user definitions.

- Password

Important: When you enter your password, ensure that the password meets the minimum security requirements specified for Data Visualization.

For more information, see *Setting user password requirements*.

After five failed login attempts, Data Visualization locks out the user. For instructions on how to change the account lockout configuration settings or to unlock the user, see *Configuring account lockout*. You can check the Show Password option to display the password.

- Permissions

- Normal user and Admin user

Select Admin user.

- [Optional] On the Groups tab, under Group Membership, you can use the Search box to find user groups, and assign the new user to existing groups by selecting user groups on the left list, and then clicking Add

to move them to the right. For more information on how to add users to groups see, *Creating new user groups*.

- [Optional] On the Roles tab, under Roles, you can use the Search box to find roles, and assign the new user to existing roles by selecting roles on the left list, and then clicking Add to move them to the right. For more information on users and roles, see *Assigning roles to users*.

Note: If you have not defined at least one User Group, the New User modal window does not contain Group Membership information.

Inactivating user accounts

If it is necessary, you can inactivate a user's account without removing it from the system in Cloudera Data Visualization (CDV).

Before you begin

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to inactivate a CDV user account.

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.
2. Click Users & Groups.
The Manage Users & Groups interface appears, open on the Users tab.
3. In the list of Users, click either the Username of the account you want to inactivate, or the Edit (Pencil) icon.
4. In the Edit User modal window, select Inactive.
5. Click SAVE.
- 6.

Results

After the operation succeeds, you can see the Users list on the screen. The inactivated user is part of the list, and the status shown is set to inactive.

Assigning roles to users

You can assign roles to users in Cloudera Data Visualization.

Note: This feature is only available to users with *Manage roles and users* privileges.

An administrator can assign users to roles in several ways:

Assigning roles to a single user

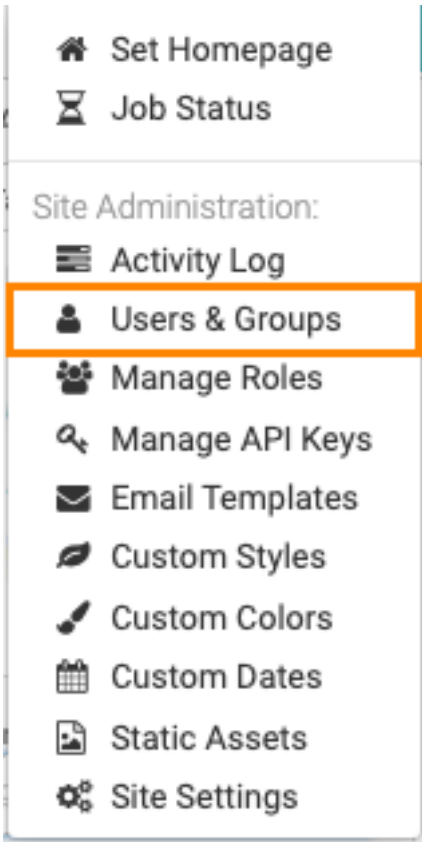

You can add security roles to a user's profile in Cloudera Data Visualization.

Before you begin

You must have administrative privileges to perform this action.

Procedure

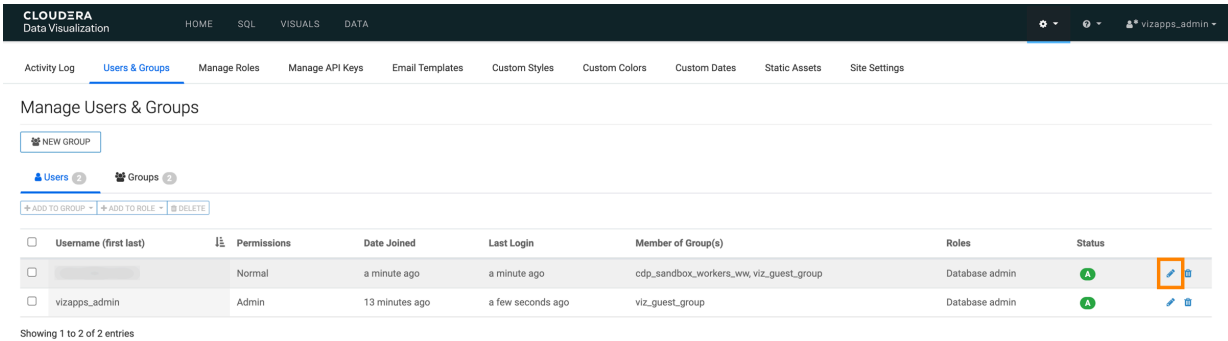

- 1. Click the Gear icon on the main navigation bar to open the Administration menu.
- 2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

- 3. In the list of registered users, select the user for which you plan to assign new roles, and click the edit (Pencil) icon that corresponds to that account.

Alternatively, you can click the Username of the account that you want to change.

The Edit User modal window appears.

- 4. Click the Roles tab.

5. Select a new role to assign to the user and click ADD.

6. After the desired role or roles appear on the right side of the interface, click SAVE.

Results

In the Users & Groups interface, the user now has the new role assignment.

Assigning roles to multiple users

You can add several users to a role at the same time in Cloudera Data Visualization.

Before you begin

You must have administrative privileges to perform this action.

About this task

To assign users to existing roles, follow these steps:

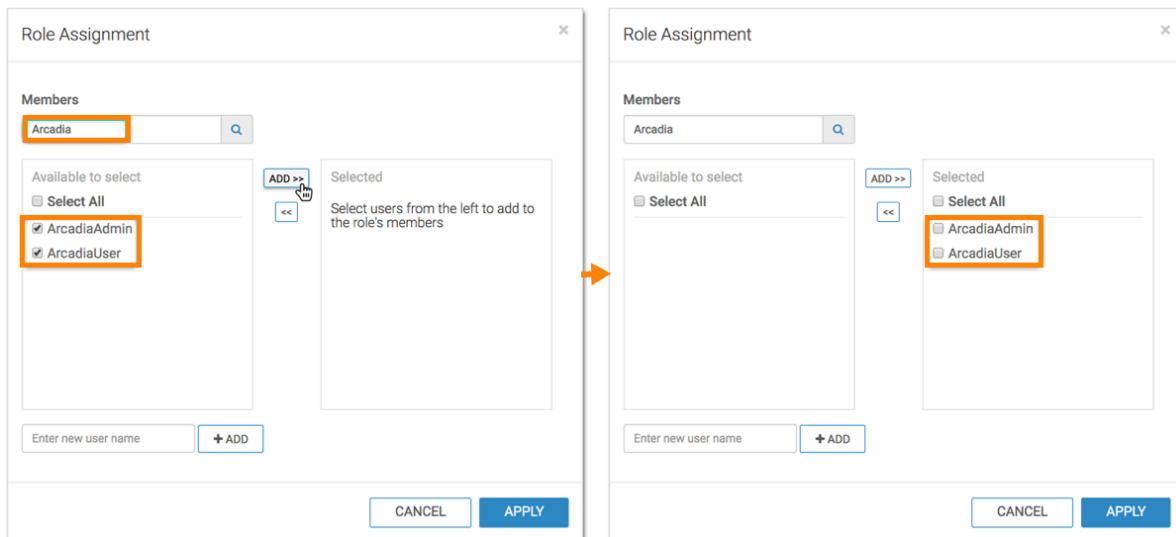

Procedure

1. Under the Members tab, in the Users list, click Edit User(s)
2. The Role Assignment modal window for users appears.

3. There are several options for adding a user to a membership:

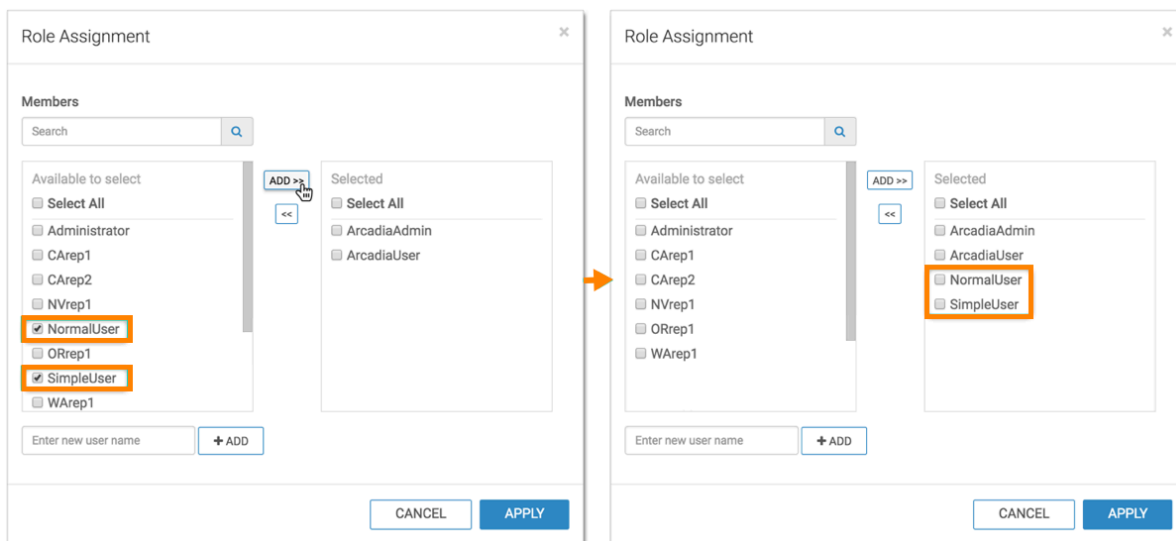

- *Search*

If you have a long list of users in the Members section, use the Search box to match user names, select them from the sub-list, then click **ADD** to move them to the right side of the modal window, and finally click **APPLY**.

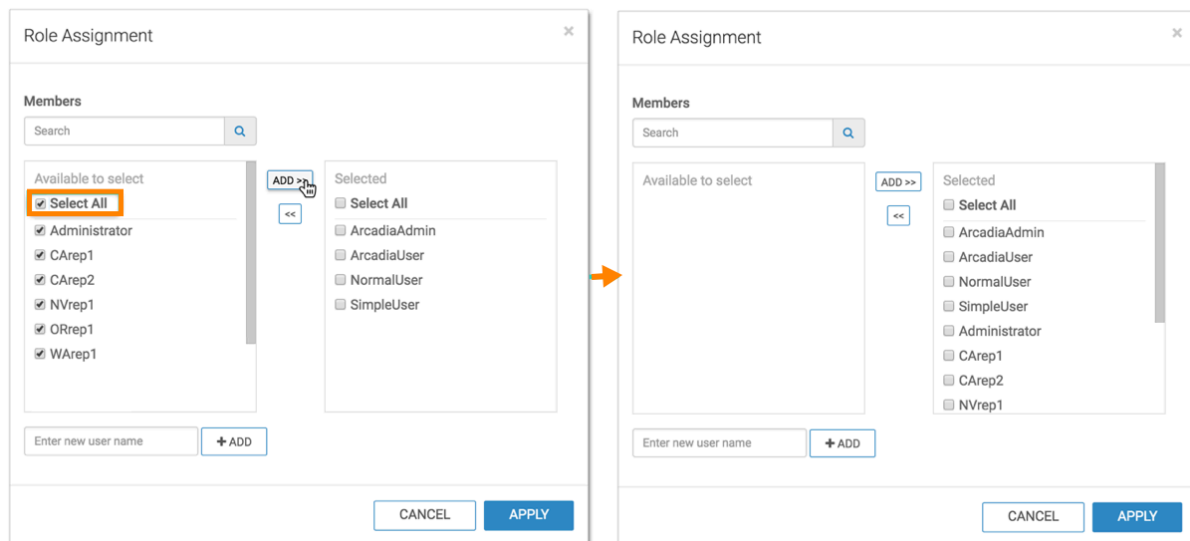

- *Select*

In the Members section, select the users to assign to the role, click **ADD** to move them to the right side of the modal window, and finally click **APPLY**.

- *Select All*

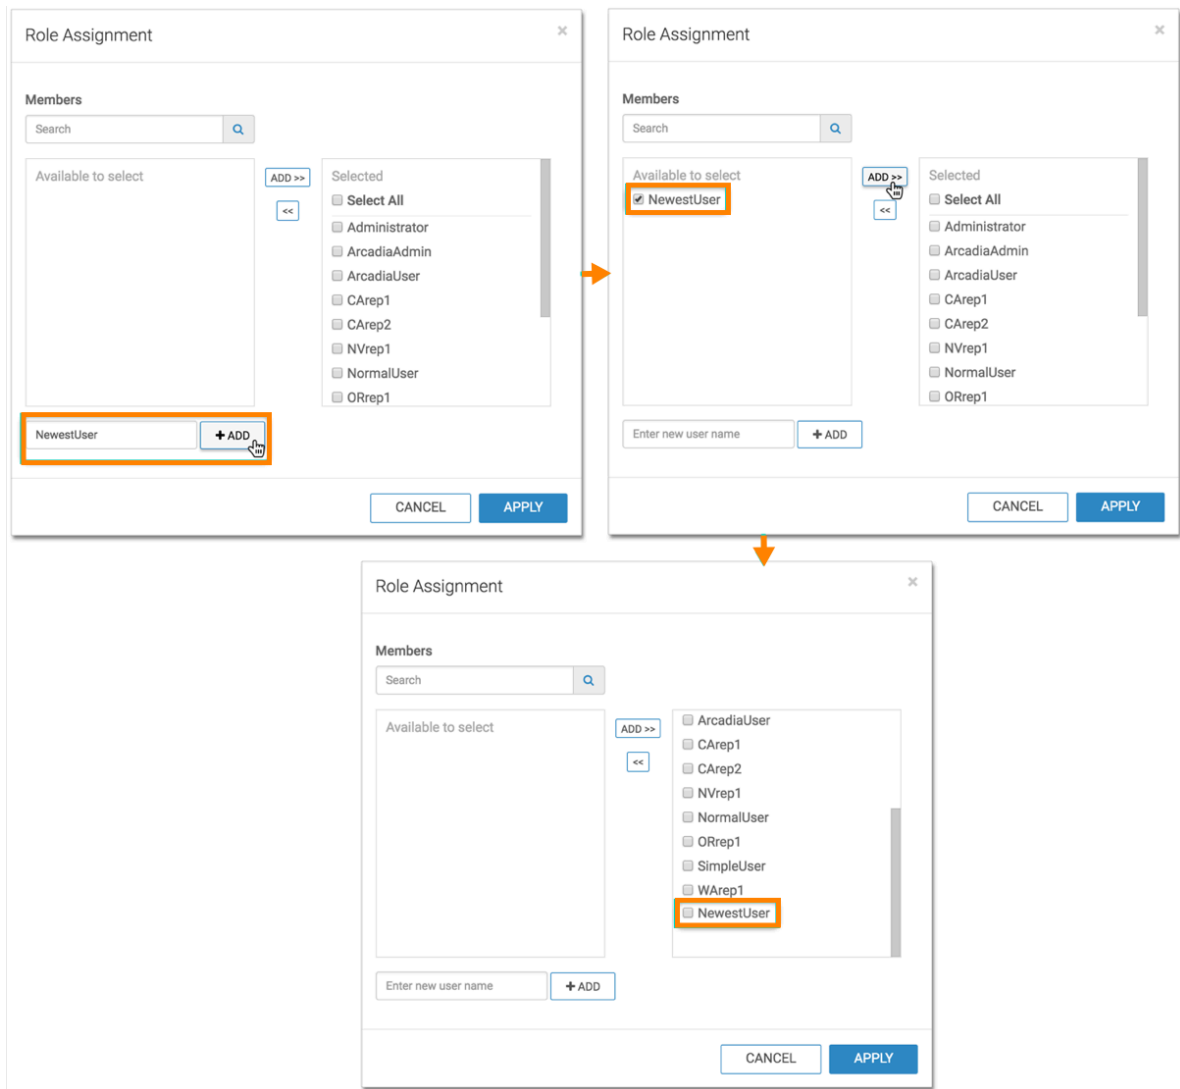

To assign all users to Members, select **All** to get all user names, then click **ADD** to move them to the right side of the modal window, and finally click **APPLY**.

- *Adding Externally Defined Users; LDAP Authentication*

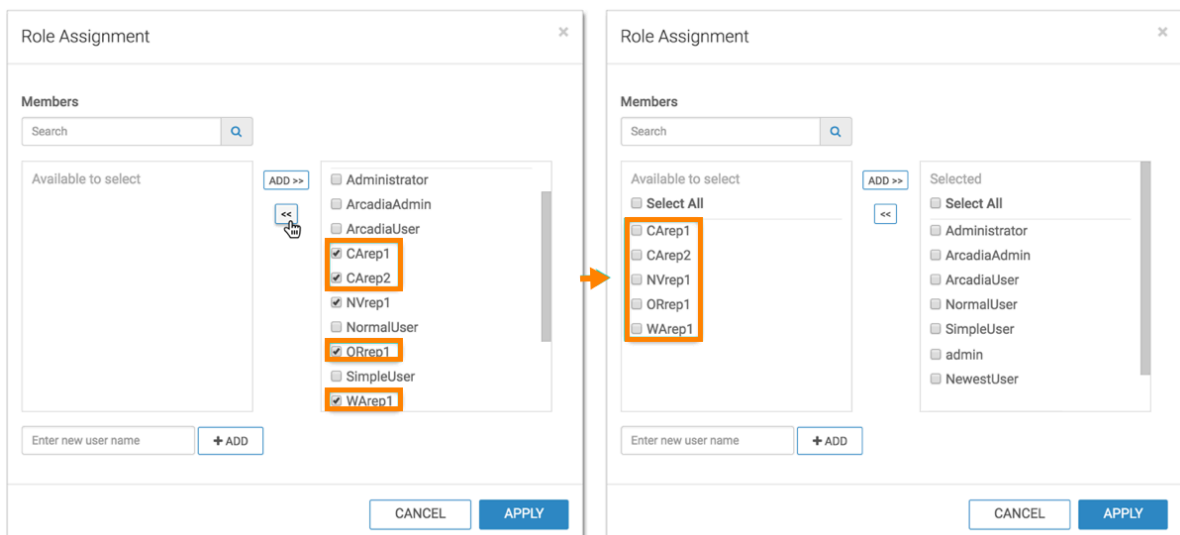

For convenience, the Role Assignment interface supports adding into the list of assignees usernames that are not stored locally. For example, known usernames available through LDAP authentication may be added in this manner.

Enter the new user name, and click ADD. After the new user name appears in the Members section, select it and click ADD to move the new user to the right side of the modal window. Click APPLY.

- *Remove*

To move users out of Members, select the user(s) on the right side panel, then click the Left Arrow, and finally click APPLY.

The list of users assigned to the role appears in the Role: Test Role 1 interface, under the Members tab.

4. Click SAVE. A confirmation of role update appears briefly on the screen.

The screenshot shows the 'Role Detail' page for 'Test Role 1' in Cloudera Data Visualization. The page has a dark header with 'CLOUDERA Data Visualization' and navigation links: HOME, SQL, VISUALS, DATA. Below the header, the breadcrumb 'Roles / Role Detail' is visible. The main title is 'Role: Test Role 1'. There are two buttons: 'SAVE' (green) and 'UNDO' (blue). Below these are input fields for 'Name' (containing 'Test Role 1') and 'Description' (containing 'Testing role creation'). At the bottom, there are two tabs: 'Privileges' (selected) and 'Members'. The 'Members' tab shows a list of users and groups. The 'Users' section has a header with 'Users 7' and an 'EDIT USER(S)' button. The table lists users with columns 'Username', 'First Name', and 'Last Name'. The 'Groups' section has a header with 'Groups 0', a 'Require all groups' checkbox, and an 'EDIT GROUP(S)' button. A note at the bottom states: '(these users were explicitly added and are not necessarily part of the added groups)'.

Assigning multiple roles to multiple users

You can add multiple users to multiple role at the same time in Cloudera Data Visualization.

Before you begin

You must have administrative privileges to perform this action.

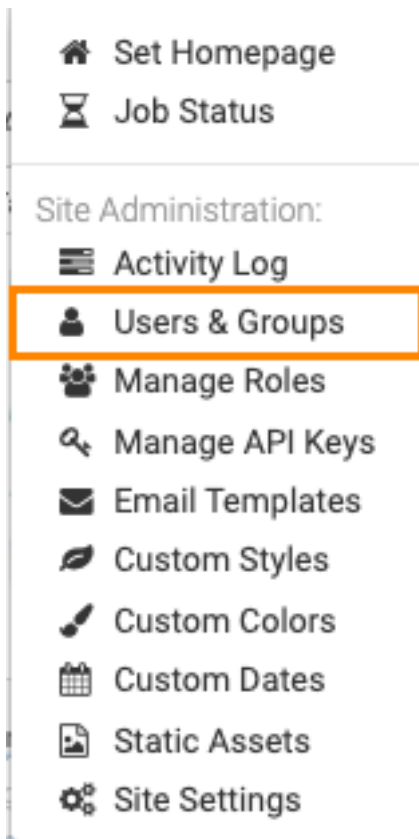

About this task

To assign multiple users to existing roles, follow these steps:

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.

- Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

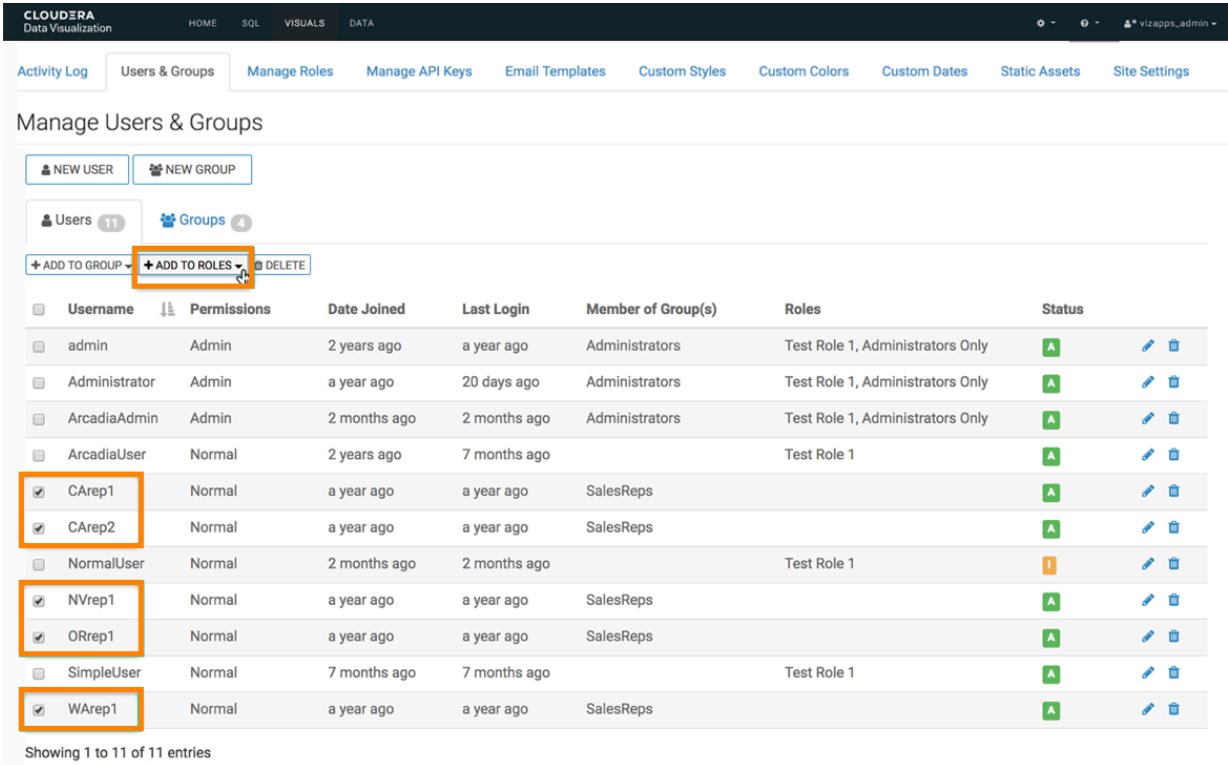

- Select the users that you want to assign to roles. In this example the following users are used: CArep1, CArep2, NVrep1, ORrep1, and WArepl.

The screenshot shows the 'Manage Users & Groups' interface. The 'Users' tab is selected, showing a list of 11 users. The following users are highlighted with orange boxes: CArep1, CArep2, NVrep1, ORrep1, and WArepl. The interface includes buttons for 'NEW USER', 'NEW GROUP', and 'ADD TO GROUP', 'ADD TO ROLES', and 'DELETE'.

<input type="checkbox"/>	Username	Permissions	Date Joined	Last Login	Member of Group(s)	Roles	Status

Deleting user accounts

You can delete both standard user accounts, and administrator accounts in Cloudera Data Visualization.

Note: This feature is only available to users with administrative privileges.

An administrator can delete user accounts in the following ways:

Deleting individual user accounts

You can delete user accounts in Cloudera Data Visualization (CDV).

Before you begin

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to delete an individual CDV user account.

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.

2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. In the list of users, do one of the following:

- Find the username of the account you want to delete, and click the Trashcan icon.

 A screenshot of the 'Manage Users & Groups' interface. The 'Users' tab is selected, showing a list of 3,630 users. The user 'abarr (Anthony Barr)' is highlighted with an orange border. The table columns are: Username (first last), Permissions, Date Joined, Last Login, Member of Group(s), Roles, and Status. The user 'abarr (Anthony Barr)' has a status of 'A' and a trashcan icon next to it.

Username (first last)	Permissions	Date Joined	Last Login	Member of Group(s)	Roles	Status
abagnall (Alex Bagnall)	Normal	a year ago	Never			A
abajwa (Ali Bajwa)	Normal	a year ago	Never			A
abaker (Adham Bani Baker)	Normal	a year ago	Never			A
abalasubramanian (Aswin Shakil Balasubramanian)	Normal	a year ago	Never			A
abanerjee (Arijit Banerjee)	Normal	a year ago	Never			A
abarr (Anthony Barr)	Normal	a year ago	Never			A
abarrette (Aaron Barrette)	Normal	a year ago	Never			A
abartfeld (Alexander Bartfeld)	Normal	a year ago	Never			A
abatham (Anurag Batham)	Normal	a year ago	Never			A
abathia (Ashish Bathia)	Normal	a year ago	Never			A

- Click the Username of the account you want to delete, or the edit (Pencil) icon.

The Edit User modal window is displayed.

4. Click DELETE USER.

5. In the confirmation modal window, click DELETE.

Results

After the operation succeeds, you will see the Users screen. The Username of the account you just deleted is no longer on the list.

Deleting several user accounts

You can delete user accounts in Cloudera Data Visualization (CDV).

Before you begin

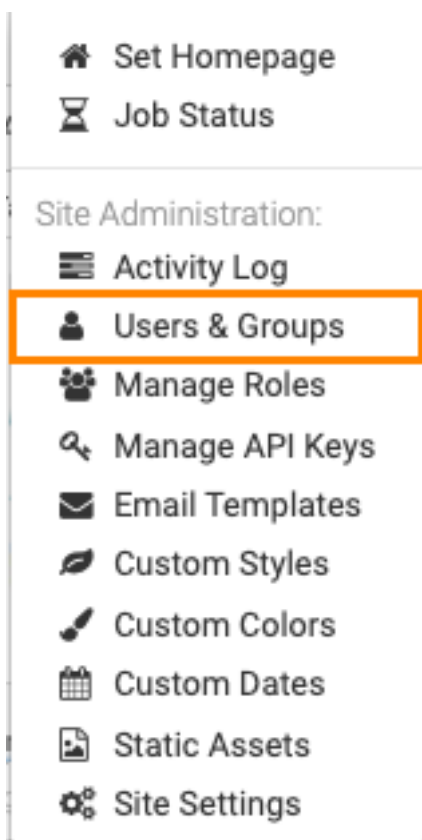

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to delete several CDV user accounts at the same time.

Procedure

1. Click the Gear icon on the main navigation bar to open the Administration menu.
2. Click Users & Groups.

The Manage Users & Groups interface appears, open on the Users tab.

3. In the list of users, click the checkmarks next to the usernames you plan to delete.

4. Click DELETE.

The screenshot shows the 'Manage Users & Groups' page in Cloudera Data Visualization. The 'Users' tab is selected, displaying a table of users. The 'DELETE' button in the top action bar is highlighted with an orange box and an arrow. The 'abartfeld' user is selected with a checkbox.

<input type="checkbox"/>	Username (first last)	Permissions	Date Joined	Last Login	Member of Group(s)	Roles	Status

38

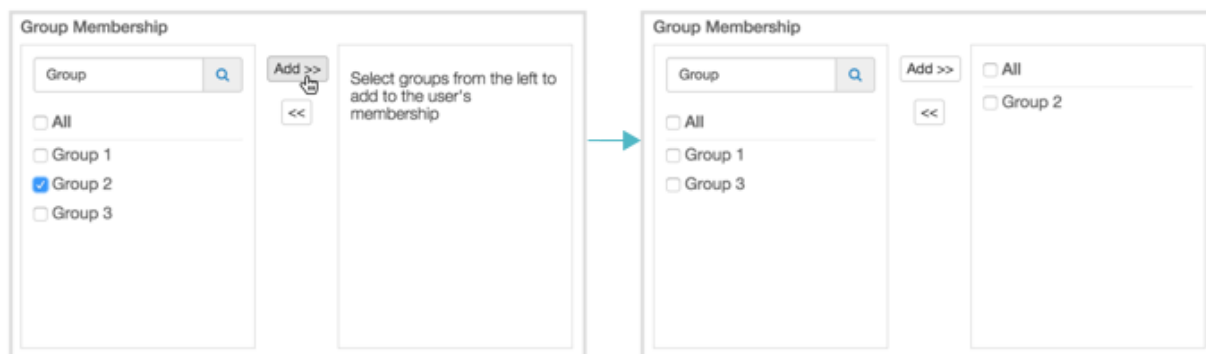

Adding a user to multiple groups; user modal

There are several options for adding a user to user groups when working in the New Group or Edit Group modal window.

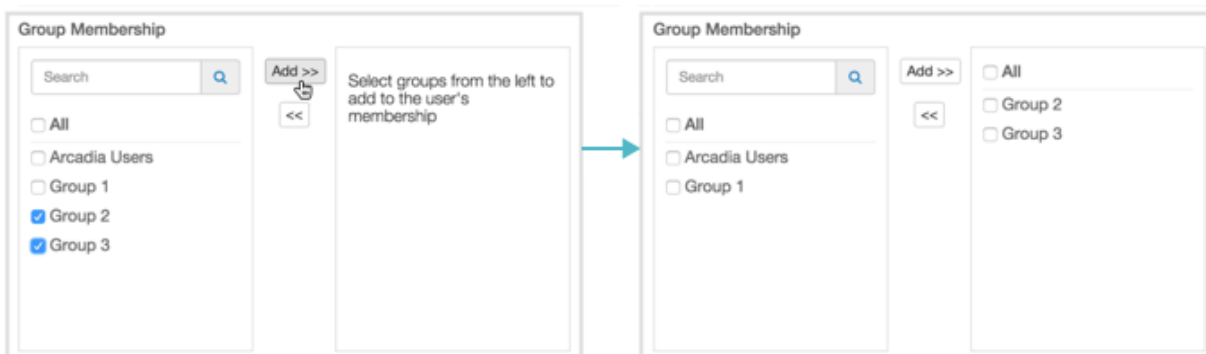

Procedure

Choose from the below options:

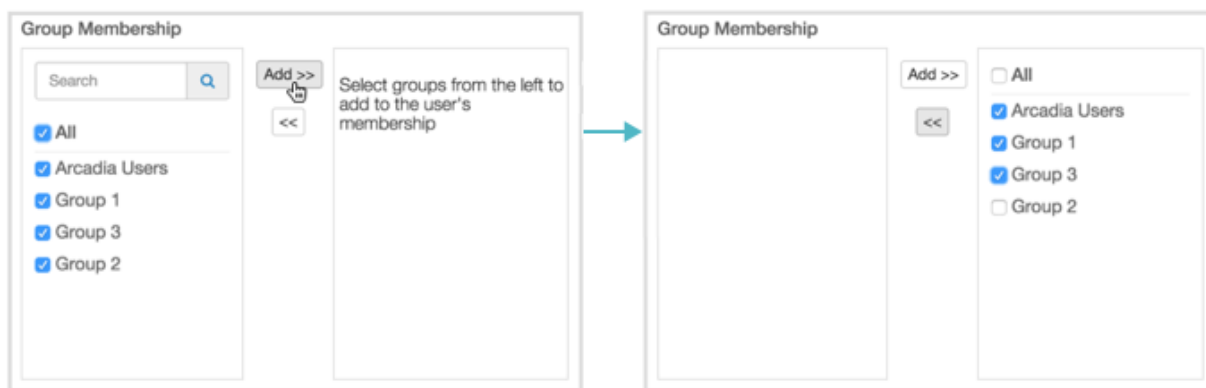

- If you have a long list of groups in the Group Membership section, use the Search box to match group names, select groups from the sub-list, and then click ADD to move them to the right side of the modal window. Click SAVE.

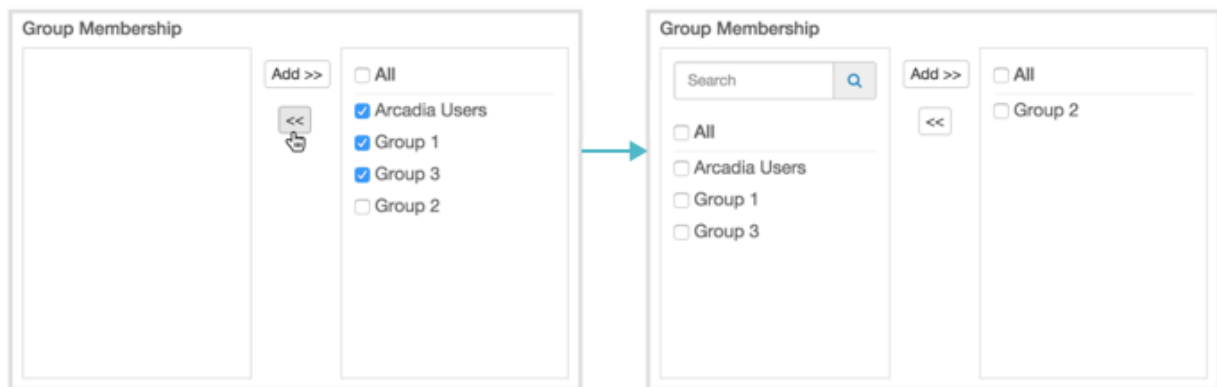

- In the Group Membership section, select the group to assign to the user and click ADD to move them to the right side of the modal window. Click SAVE.

- To assign the user to all user groups, select All to get all the groups, and then click ADD to move them to the right side of the modal window. Click SAVE.

- To move the user out of one or more groups, select the groups on the right side panel, and then click the Left Arrow. Click SAVE.

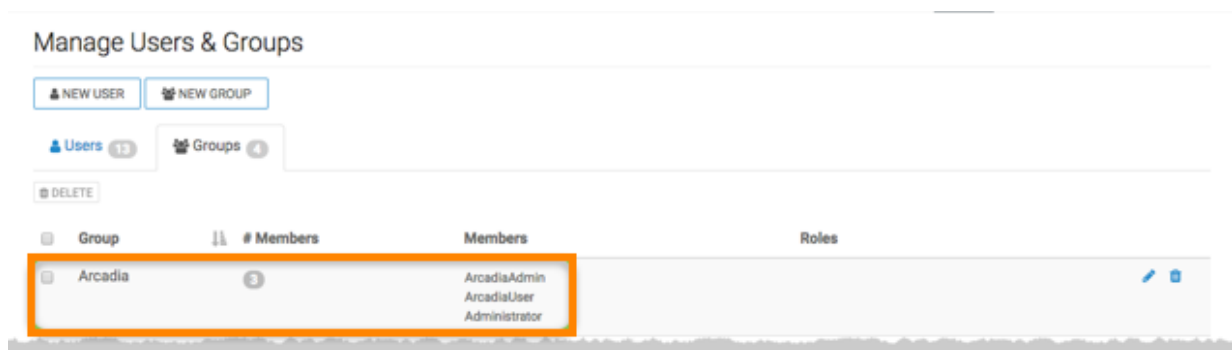

Adding multiple users to a single group; group modal

There are several options for adding users into a specific user group when working in the New Group or Edit Group modal window.

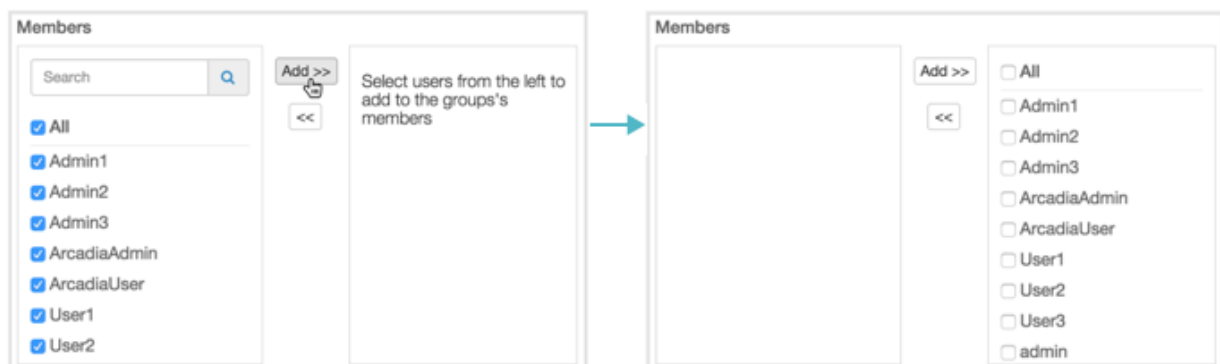

Procedure

Choose from the below options:

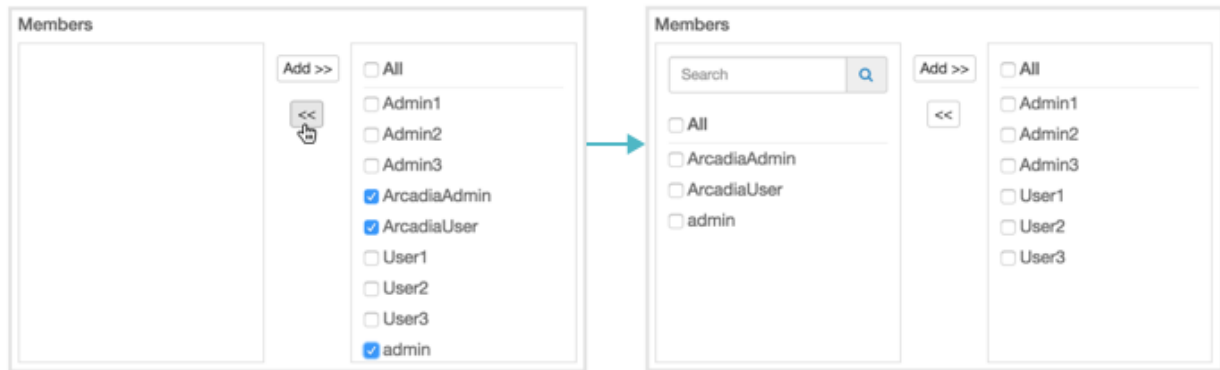

- If you have a long list of users in the Members section, use the Search box to match usernames, select users from the sub-list, and then click ADD to move them to the right side of the modal window. Click SAVE.
- In the Members section, select the users to assign to the group and click ADD to move them to the right side of the modal window. Click SAVE.

- To add all users to a particular group, select All, and then click ADD. Click SAVE.

- To move users out of the group, select the users on the right side panel, and then click the Left Arrow. Click SAVE.

Adding multiple users to multiple groups; users tab

When working in the Users tab, you can add multiple users to one or more user groups.

Procedure

1. Select the users that you want to assign to groups.
2. Click the Down Arrow on the right of Add to Group, and select the groups for the users.
3. Click SAVE.

Assigning roles to user groups

You can add user groups to a role in Cloudera Data Visualization.

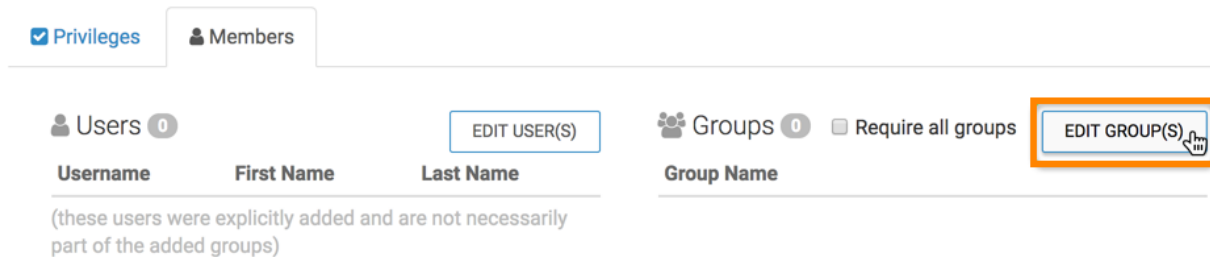

About this task

To assign user groups to existing roles, follow these steps:

Procedure

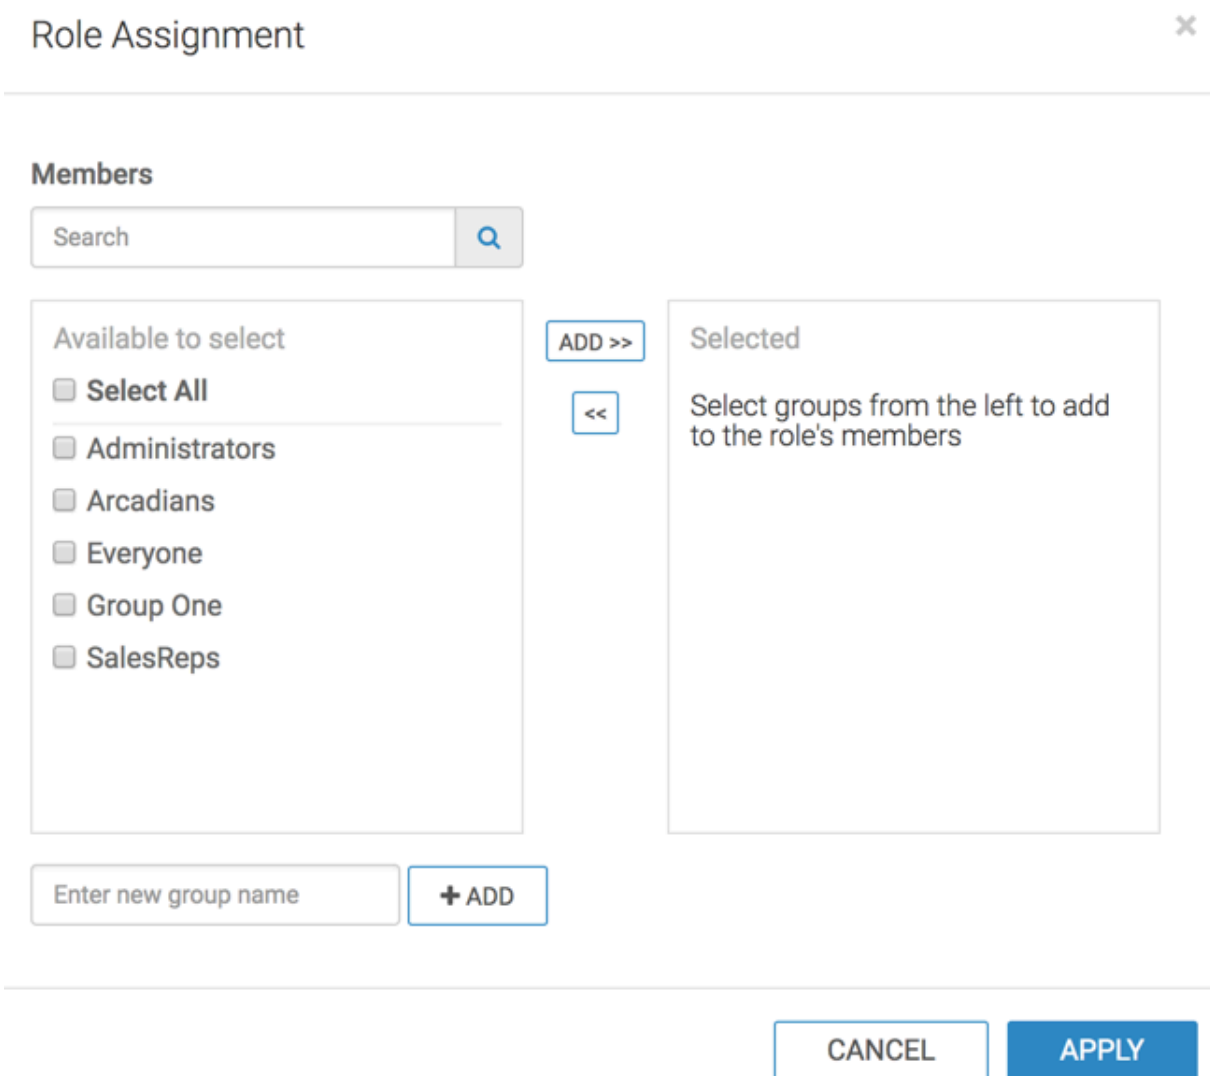

1. Under the Members tab, in the Users list, click Edit User(s).

For information about the Require all groups option, see *All Groups Requirement*.

The screenshot shows the Cloudera Data Visualization interface. At the top, there are two tabs: "Privileges" (checked) and "Members". Below the tabs, there are two sections: "Users" and "Groups". The "Users" section has a button "EDIT USER(S)" and a table with columns "Username", "First Name", and "Last Name". Below the table, it says "(these users were explicitly added and are not necessarily part of the added groups)". The "Groups" section has a button "EDIT GROUP(S)" which is highlighted with an orange box. There is also a checkbox "Require all groups" next to the "Groups" header.

The Role Assignment modal window for groups appears.

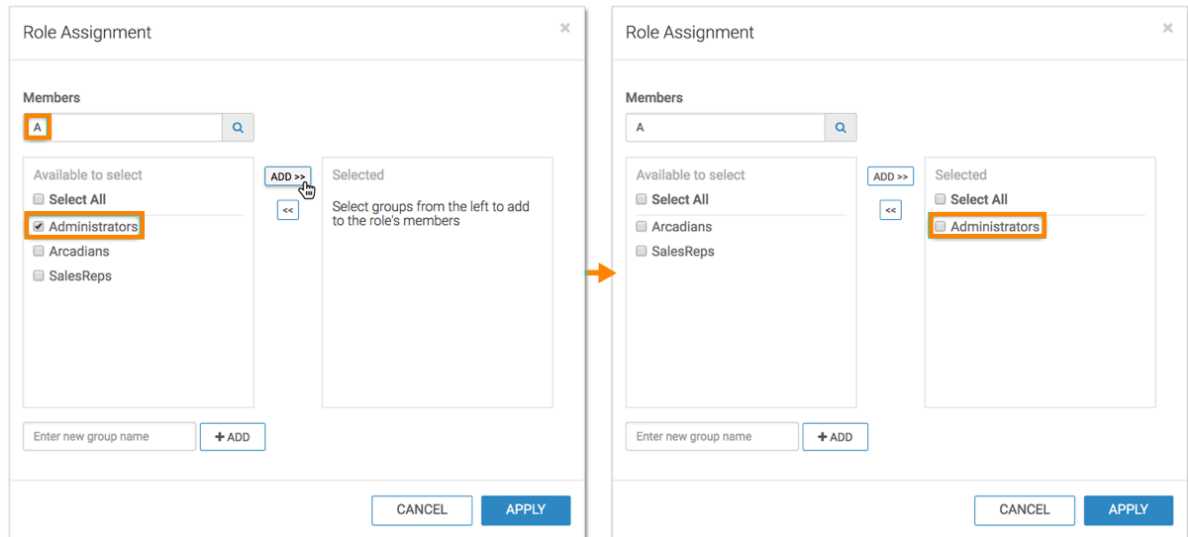

The screenshot shows the "Role Assignment" modal window. The title bar says "Role Assignment" with a close button. Below the title bar, there is a "Members" section. The "Members" section has a search bar. Below the search bar, there are two panels: "Available to select" and "Selected". The "Available to select" panel has a "Select All" checkbox and a list of groups: Administrators, Arcadians, Everyone, Group One, and SalesReps. The "Selected" panel has a message: "Select groups from the left to add to the role's members". Between the two panels are "ADD >>" and "<<" buttons. At the bottom of the "Members" section, there is a text input field "Enter new group name" and a "+ ADD" button. At the bottom right of the modal, there are "CANCEL" and "APPLY" buttons.

2. There are several options for adding groups to role membership:

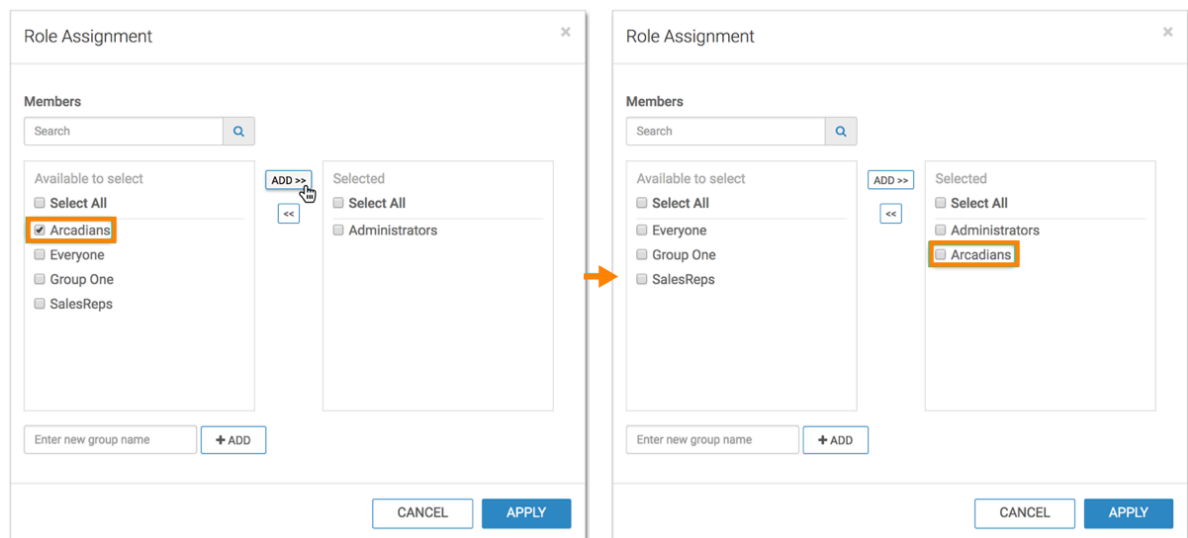

- *Search*

If you have a long list of groups in the Members section, use the Search box to match group names, select them from the sub-list, and then click ADD to move them to the right side of the modal window. Click APPLY.

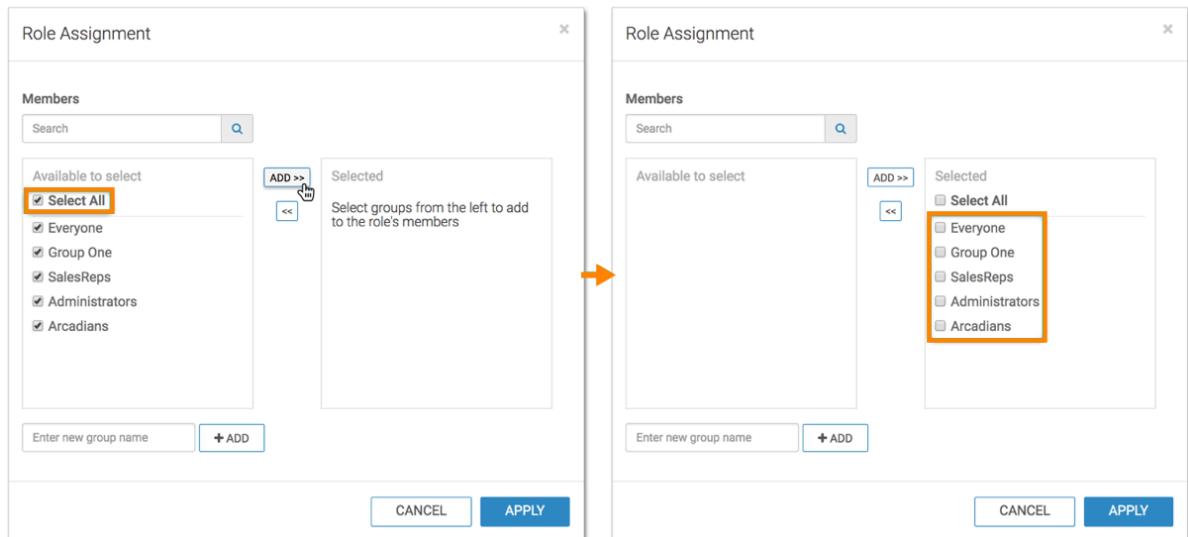

- *Select*

In the Members section, select the groups to assign to the role and click ADD to move them to the right side of the modal window. Click APPLY.

- *Select All*

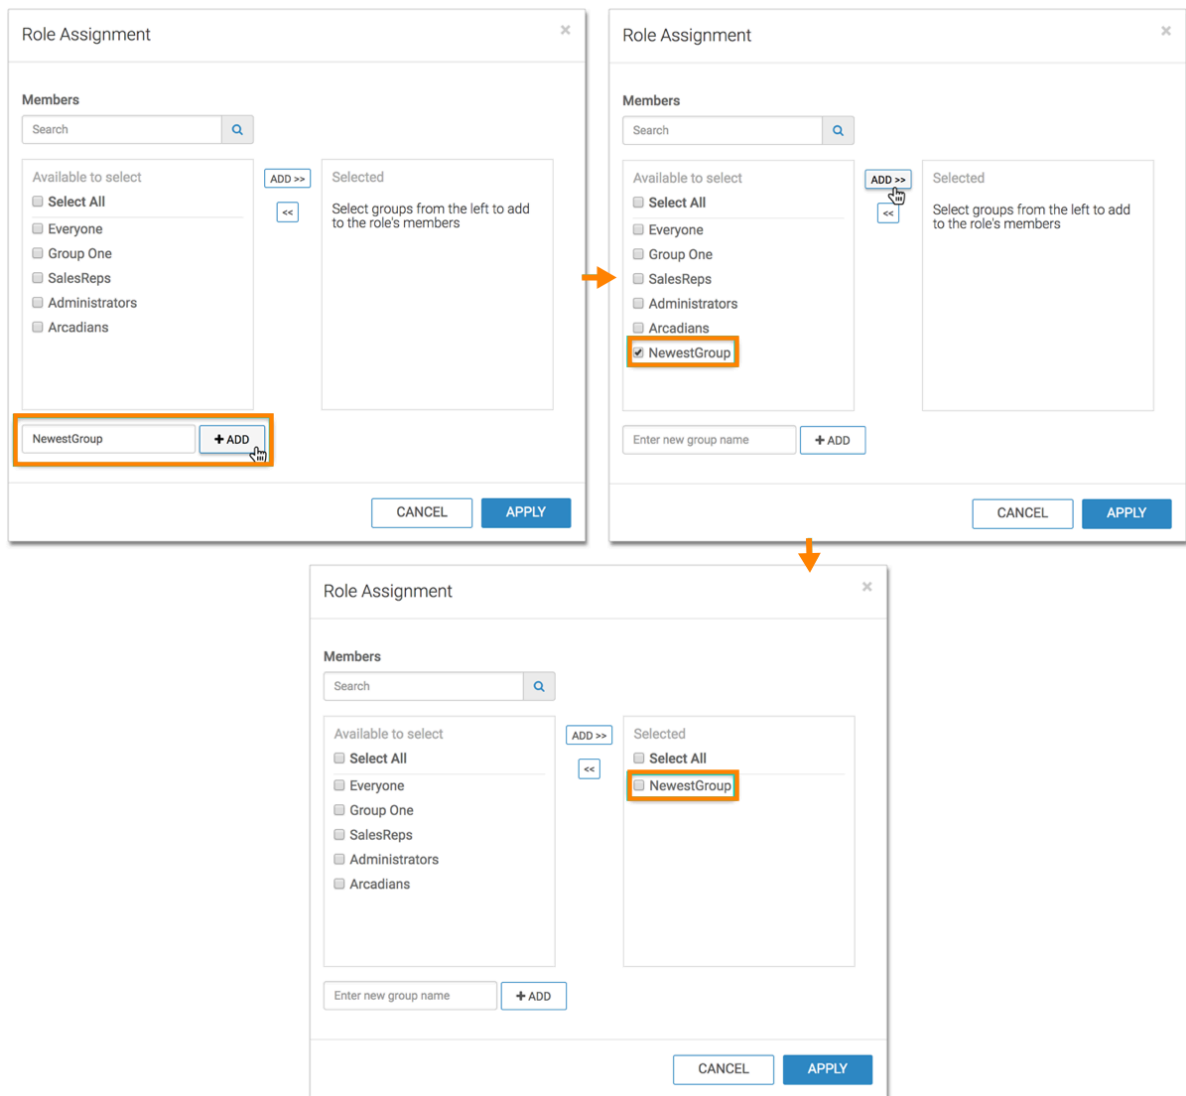

To assign all groups to Members, select All to get all group names, and then click ADD to move them to the right side of the modal window. Click APPLY.

- *Adding Externally Defined Users; LDAP Authentication*

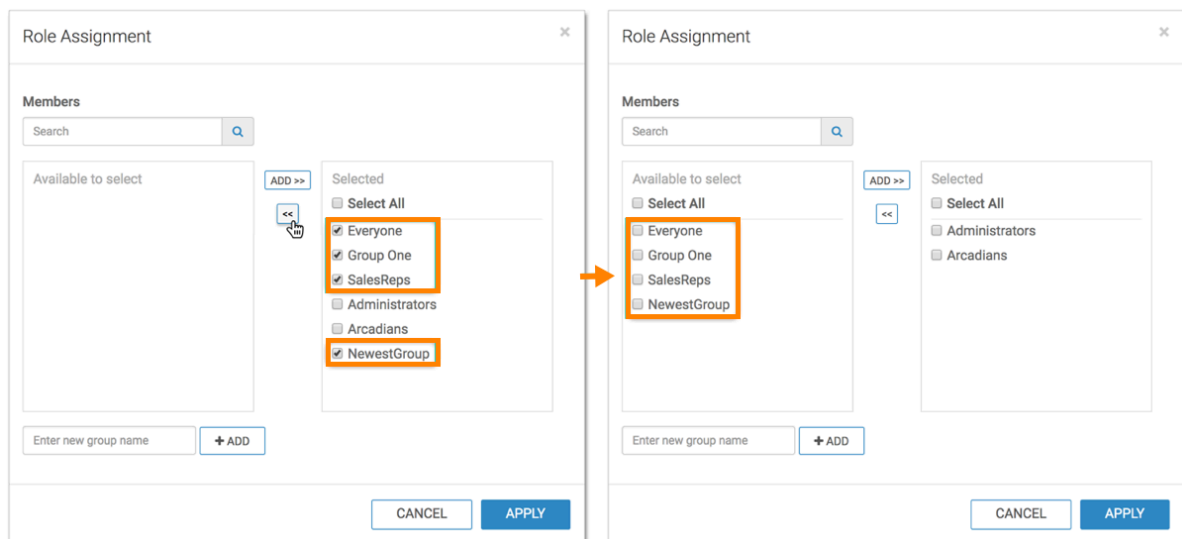

For convenience, the Role Assignment interface supports adding into the list of assignees user groups that are not stored locally. For example, known groups available through LDAP authentication may be added in this manner.

Enter the new group name and click ADD. After the new group name appears in the Members section, select it and click ADD to move the new group to the right side of the modal window. Click APPLY.

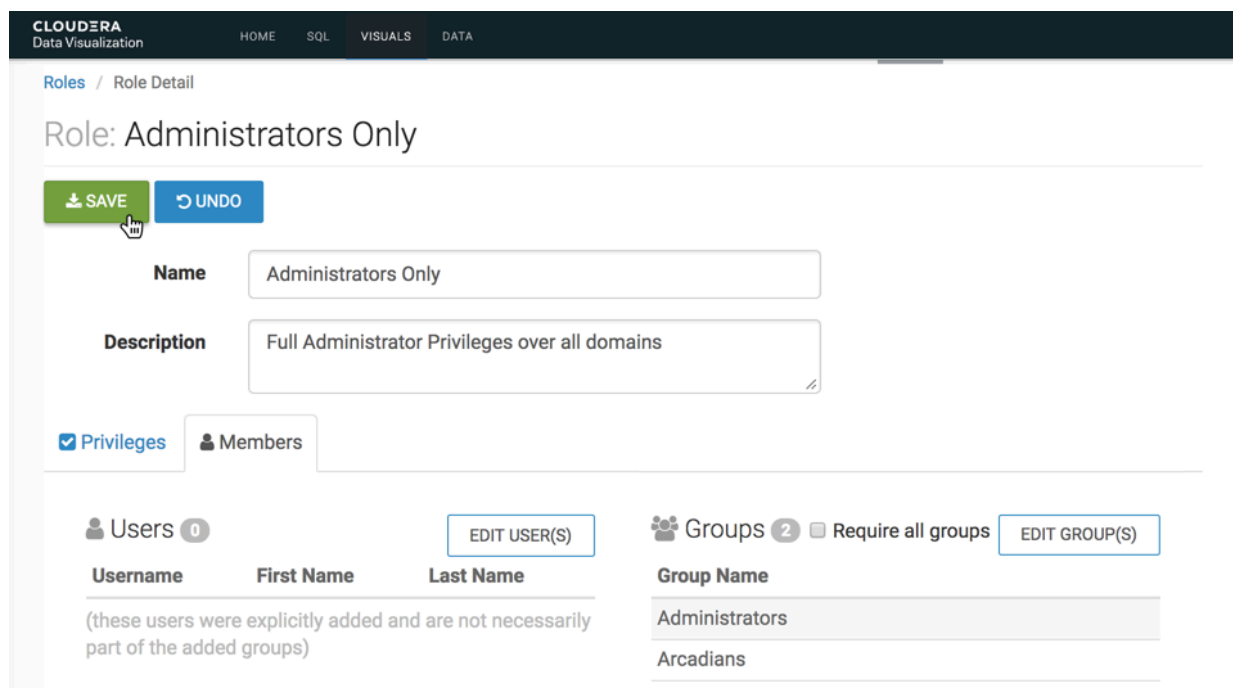

- *Remove*

To move groups out of Members, select the group(s) on the right side panel, and then click the Left Arrow. Click APPLY.

The list of groups assigned to the role appears in the Role: Administrators Only interface, under the Members tab.

3. Click SAVE. A confirmation of role update appears briefly on the screen.

Deleting user groups

You can delete user groups in Cloudera Data Visualization

Before you begin

You must have administrative privileges to perform this action.

About this task

The following steps demonstrate how to delete a previously defined user group.

Procedure

1. Click the Groups tab.

2. There are several ways for deleting user groups:

Method 1:

- a. Click the boxes next to the names of the user groups to select them.
- b. Click DELETE.
- c. In the confirmation window modal, click DELETE.
