ML Runtimes Pre-installed Packages overview

Cloudera AI ships with several base engine images that include Python kernels, and frequently used libraries.

Note: New ML Runtime releases are automatically added to the deployment, if Internet connection is available.

As the software and versions listed in *ML Runtimes Pre-installed Packages* are installed in the images, you shall not upgrade these versions as this may lead to dependency conflicts. If any related software in this list needs to be at a higher version, you must use a more recent version of the legacy engine or ML Runtime.
