Cloudera Data Lineage FAQ

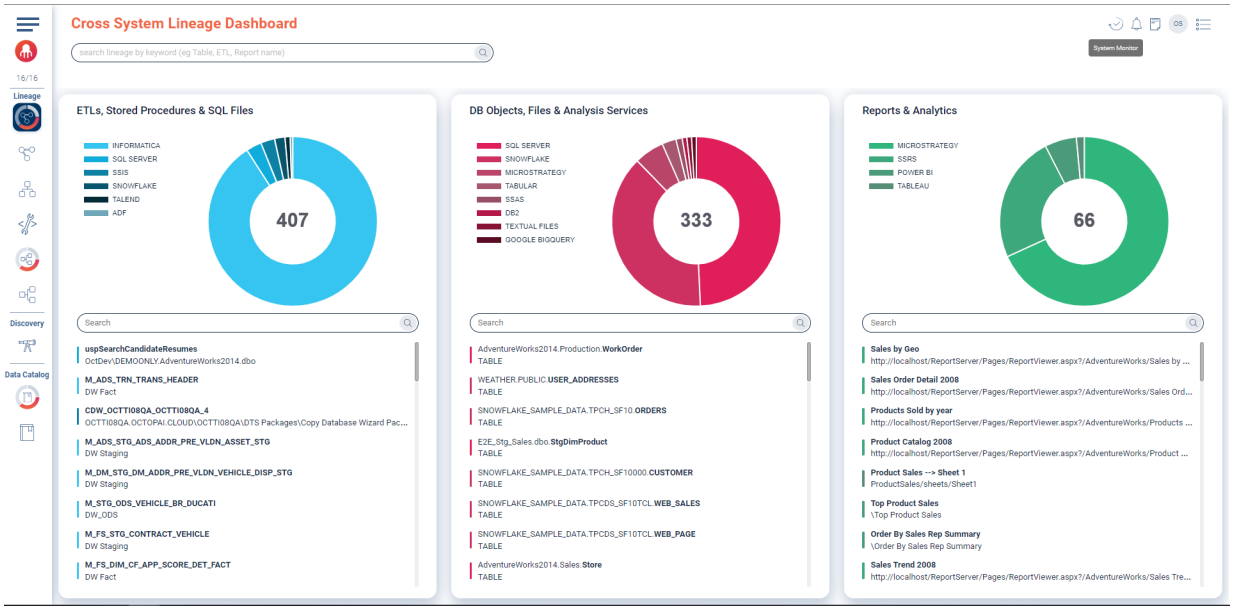

The Cloudera Data Lineage (formerly Octopai) FAQ addresses common questions and challenges, including system refreshes, password resets, and managing inferred objects. It provides clear solutions to enhance user experience and streamline troubleshooting for Cloudera Data Lineage.

How to check when the system was last refreshed

Learn about how to check when the Cloudera Data Lineage (formerly Octopai) system was last refreshed.

Procedure

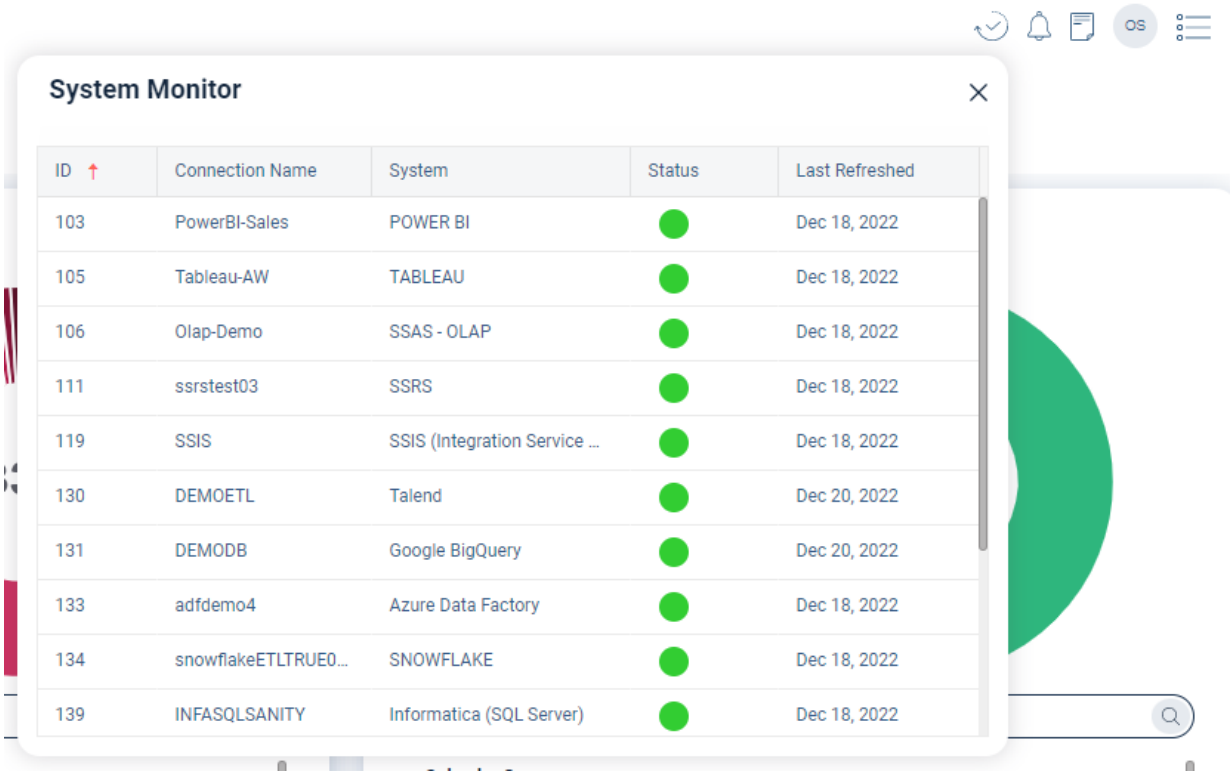

1. Go to the Cloudera Data Lineage platform.
2. Click the System Monitor icon in the upper-right corner.

The System Monitor window opens and shows the following information:

- **ID** that is the connection ID number
- **Connection Name**
- **System** that is the system name
- **Status**
- **Last Refreshed** that is the date when the analysis was published to the site

How to clear your site data (clear cache)

Learn about clearing your site cache to solve some basic issues, such as the performance of Cloudera Data Lineage (formerly Octopai) or applying a hotfix.

Procedure

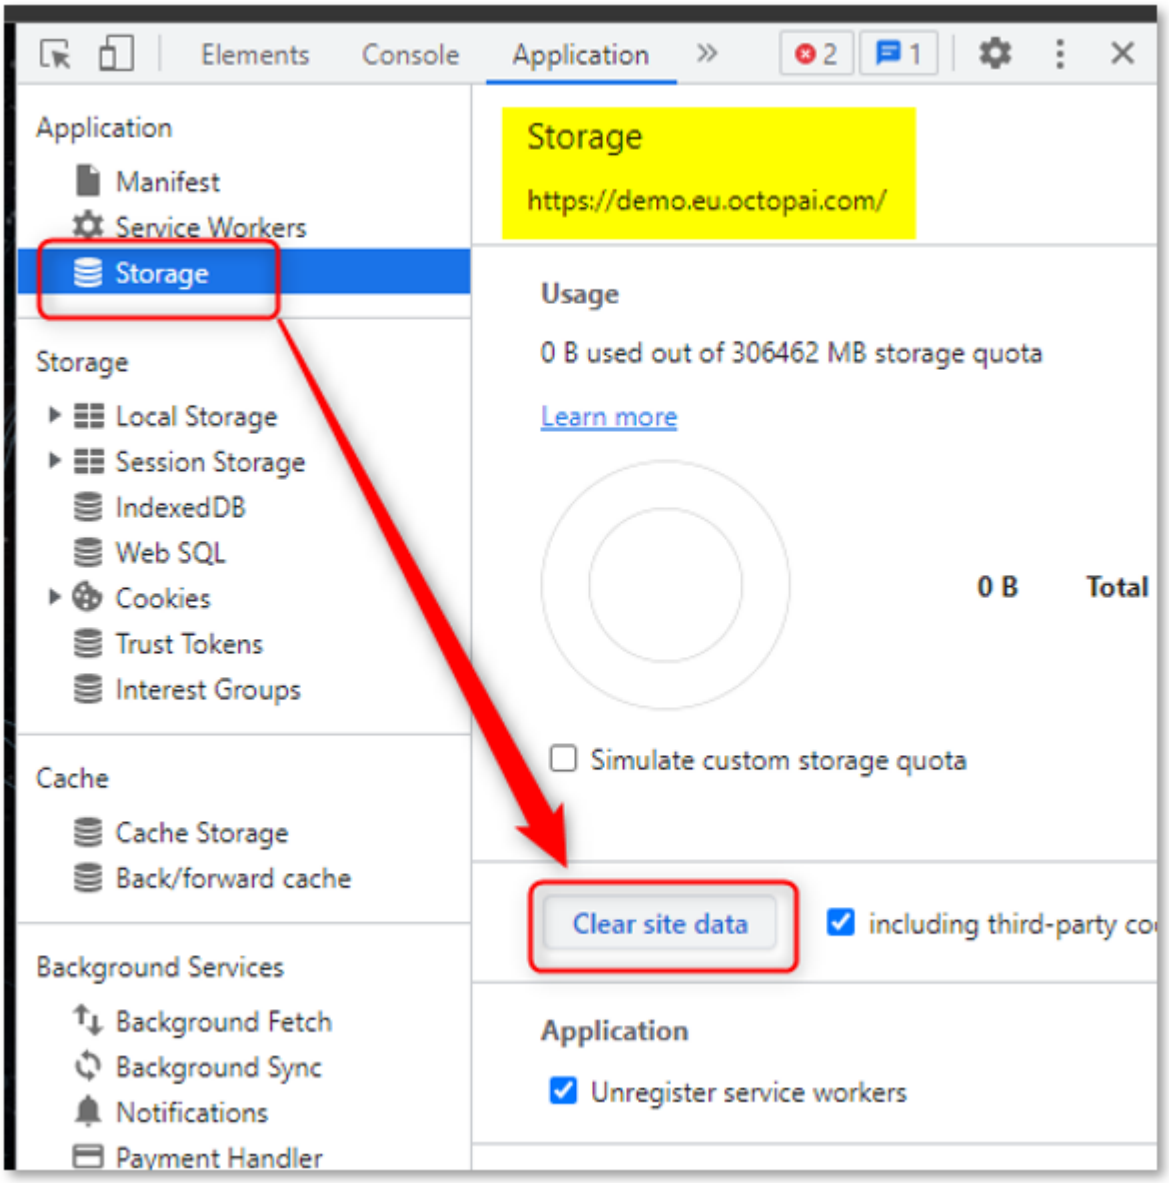

1. Press F12 on your browser.
   The Dev Tools opens.
2. Go to **Application**.

   Figure 2: Application option

3. Go to **Storage** and click Clear site data.

Figure 3: Clear cache

Results

This operation clears the stored data for your Cloudera Data Lineage Platform Site only.

Your browser data, including cookies from other sites, will not be affected.
